These passages also still glimmer with the original modal nuance of the causative-stem of *nṣl*. In each case, the emphasis lies on the action itself, which can lead to success but not necessarily. The combination of the infinitive with a finite form of the auxiliary verb *ykl* "to be able" in Dnl. 3:29 as in the older Aramaic instances (→ II) emphasizes the saving ability of God ("there is no other god who can save in this fashion"). The use of *nṣl* as a verbal complement after the Dt-stem of the auxiliary verb *šdr*[19] "to try" in Dnl. 6:15 characterizes the king's attempt yet to protect Daniel from the lions' den as a mere effort which ultimately did not lead to success, however. Dnl. 6:28 emphasizes through the resumption of the parallelism of *nṣl* and *šyzb* in 6:15 that only God himself can save from such danger, and no king, however powerful. The modal usage in Aramaic constitutes, then, no more a contrast to the factual than it does in Hebrew, for which reason *nṣl* can interchange there with resultative verbs of deliverance.[20]

In post-Achaemenid Aramaic, *nṣl* seems to disappear from usage and Qumran seems to attest it with certainty only twice. In 1QapGen 22:10,19, it occurs in an expansion of the corresponding formulation from Genesis in the meaning "to fetch back" in reference to Abraham's successful attempt to take back the stolen goods and captives from the enemies.

IV. Verb *plṭ*. Aramaic attests the root *plṭ*, in the G-stem "to escape" and in the D-stem "to deliver, set loose," both occasionally supplemented with *mn* "from," beginning at Qumran. It already appears once, however, in a Samʾalian royal inscription that says that the gods of the place "saved him [the father of the one who commissioned the inscription] from his destruction" (*plṭwh . . . mn šḥth*).[21] Thus, context suggests a D-stem. Additionally, the verb continues in usage in later Aramaic.[22]

1. G-stem "to Escape." The G-stem of *plṭ* stands in 1QapGen 19:20 with *npšy* "my life-force"[23] as the subject in the sense of "to survive" at the end of Abraham's interpretation of his dream that announces the threat of mortal danger: if Sarai will portray him as her brother, he may escape on her account. It serves similarly in 4Q204 5 2:24 (1 En. 106:18f.)[24] in the announcement that Noah will escape (the destruction of the flood), and similarly of the escape of the righteous in the judgment in 4Q204 1 5:5. In 1QapGen 22:2, it refers to Lot who escaped captivity (*mn šbyʾ*) after a raid. The text of 4Q552 4:12 is fragmentary.

2. D-stem "to Deliver." The D-stem "to deliver" also occurs in 1QapGen, specifically in 12:17 for God's deliverance from the destruction (*mn ʾbdnʾ*) of the flood, and probably also in an unclear context in 11:14. In 11Q10 4:9 and 32:2 (Job 21:10 and 39:3) it means, "to set free."

3. Nouns. The feminine *plṯh* /paleṭā/ "deliverance" is attested in 4Q530 1 1:3; for later forms, see *ATTM*, 668.

נקה *nqh* /neqǣ/; נקי *nqī*; נקה *nqh* /naqǣ/

I. Etymology and Forms. II. Occurrences and Usage. III. Verb “to Be Clean,” Adjective “Clean.”

I. Etymology and Forms. The Aramaic noun *nqh* /neqǣ/ “sheep” (at least in Syriac a feminine) may involve an Akkadian loanword from *nīqu* “sheep offering.”[1] In contrast with the traditional explanation in older Hebrew and Aramaic lexicography, this noun is distinct from the root *nqī* “to be clean,” well known from Hebrew but also native to Aramaic.[2] One cannot rule out an original shared etymology for the two lexemes, but over time, they became clearly distinct in Aramaic. Aramaic otherwise typically employs *dkī* for “to be clean.”

II. Occurrences and Usage. The meaning “sheep” for *nqh* /neqǣ/ is also indicated for older Aramaic by the word /neqiyā/ marked as a feminine in *nqyh wgzth* “a sheep and its wool” in a pre-Imperial Aramaic private letter from Hermopolis.[3] The apparently related form *nqwh* /neqwā/ occurs for a sheep offering[4] in the Imperial Aramaic Xanthos inscription[5] concerning the institution of a new cult.

In the light of these parallels, the expression *kʿmr nqʾ* in the description of the white robe[6] that the Ancient of Days wears in the vision of Dnl. 7:9 doubtlessly means “like wool.”[7]

III. Verb “to Be Clean,” Adjective “Clean.” The verb *nqī*, in the D-stem “to cleanse,” is also rare in Aramaic, but appears in an alliance treaty

from the eve of the Imperial Aramaic tradition as a legal term “to free from foreign claims.”[8] Later, the verbs *mrq* or *ṣpī* serve this function.

The adjective *nqʾ* /naqǣ/ “innocent”[9] occurs in older Aramaic only in 11Q10 22:3 (Job 33:9) where it renders the Hebrew *hapax legomenon ḥp*, probably under the influence of Hebrew *nqy*.[10]

נשׂא/נשׂי *nś̊/nśī*; נסב *nsb*; לקח *lqḥ*; טען *ṭʿn*; טעון *ṭʿwn* /ṭaʿūn/

I. Etymology, Forms, and Lexical Field. II. Old and Imperial Aramaic (Usually *nśī*). III. Biblical Aramaic (*nśī*). IV. Qumran and Later Aramaic (*nsb*). V. Verb *lqḥ* "to Take." VI. Verb *ṭʿn* "to Load" and Noun *ṭʿwn* "Load."

I. Etymology, Forms, and Lexical Field. Aramaic *nśī* "to take (away)" arose from the common Semitic verbal root **nś̊* "to take up" and is employed mostly as in Hebrew "to lift, carry" in the G-stem and transitively. After the loss of the glottal stop ending the syllable still in the Old Aramaic period, it was transferred to the class of verbs ending in vowels,[1] but the ʾ for the original glottal stop was still long retained in a historical spelling here, too.

The verb *nśī* is common in this form in Old and Imperial Aramaic for "to lift up, take away," then generally "to take" and also occurs in three Biblical Aramaic passages, both in Ezra and in Daniel, where it appears everywhere with the meaning "to take (away)." It is usually employed literally with persons as subjects and concrete material objects, but can also stand with an inanimate subject such as the wind (Dnl. 2:35) or abstract objects (e.g., words). In contrast, it occurs at Qumran only very sparsely and was replaced there as in all other post-Imperial Aramaic literary languages by *nsb* "to take."

Its etymology is unclear. It may be that an association with Arabic *našiba*, as once suggested by Nöldeke and often repeated since,[2] should be abandoned.[3] The hypothesis that *nsb* may have arisen from *nśī b-*[4] already fails, on one point alone in that *nsb* already occurs in the proverbs of Aḥiqar in exactly this spelling,[5] but is distinct from *nśī* with which it once

appears there in parallel. Since in the Aḥiqar papyrus, in accordance with Imperial Aramaic orthography, the reflections of the old */ś/ (spelled *š*) and /s/ (spelled *s*) are always maintained in distinction from one another,[6] the assumption of a scribal error becomes superfluous. Moreover, there is no evidence of a frequent use of *nśī* with *b*-, which would have facilitated such an elision.

More likely, then, one may regard *nsb*, at least in the sense of "to take," as a rare and for Aramaic typical, yet independent lexeme that, in comparison to the typical *nśī* probably had a very specific, but no longer precisely determinable nuance. This conclusion finds further support in the fact that quite frequently in parallelism, the less common or precise word appears in the second member, entirely in analogy to the juxtaposition of *nśī* and *ṭʿn* "to load" in the proverb in the preceding lines that has a parallel structure (→ VI).

Then, one would assume an original meaning "to lift" or the like for *nsb* which first expanded in post-Imperial Aramaic perhaps under the influence of the increasing spelling *s* for the historical */ś/ which later fused with /s/ at least in pronunciation.[7] Finally, in the course of such a semantic extension, *nsb* ultimately replaced the old Semitic verb *nśī* in Aramaic,[8] but since then shared its meaning with *ṭʿn*. Presumably, this development began in the spoken dialects beneath the surface of the more conservative literary language.

Synonyms of the verbs for taking are well defined in Aramaic and well represented in literary and documentary texts. With the meaning "to take away" *nśī* has points of contact with → *nṣl* (causative-stem) "to snatch away"; explicitly for "to raise up," in addition to → *nṭl*,[9] the causative-stem of → *rīm* can also be employed. Originally in reference to cargo, *ṭʿn* denotes "to load" (→ VI). In contrast, *lqḥ* serves in older Aramaic for "to take" in general and as an antonym of → *yhb*/*ntn* "to give" (→ V), but was

also later replaced with *nsb*. For “to receive,” that is, when the act of giving proceeds from someone else, older Aramaic usually utilizes the verb → *qbl* in the D-stem.

Only very rarely is *nśī* used for this in the Dt-stem when it means “to arise” (Ezr. 4:19), sometimes with the supplement *ʿl* “against.” Better attested in this function is the similarly constructed Lt-stem of *rīm*. For “to carry” → *sbl*.

II. Old and Imperial Aramaic (Usually *nśī*). The oldest Aramaic inscriptions employ *nśī* often with the nuance “to raise up,” either literally for the lifting of the hands as a prayer gesture in the reports of royal acts[10] or figuratively for the “raising” of an intention *ʿl śpt* “to the lips” in parallel with *slq ʿl lbb* “to come over the heart” in a state treaty.[11] In contrast, it appears in *KAI* 222 B 39 apparently with the meaning “to carry away” with food (*lḥm*) as the object; an additional specimen in *KAI* 224.26 is fragmentary.

The somewhat later proverbs of Aḥiqar, with their richly picturesque mode of expression, also employ the verb in the sense of “to raise up,” “to take,” and “to carry away,” each in a variety of shades: “to lift” in a comparison regarding a heavy or light burden (→ I);[12] “to take,” here of loot;[13] and then “to carry away”;[14] “to lift” of a foot;[15] “to carry” figuratively of shame and literally of a load;[16] also figuratively for something that God (in heaven) has lifted.[17]

In the Aramaic material from the Achaemenid period, *nśī* primarily has the meaning “to carry” and often appears in juridical texts and in relation to the transport of goods.[18] The same is true for ostraca with commercial documents[19] and a marriage contract from Idumea.[20] Furthermore, it refers to slaves bearing a brand at least once.[21]

With the Iranian loanword *dšnʾ* “the donation” as object, *nśī* also occurs once in the meaning “to accept.”[22] The relevant text is a letter from the chancellery of the Egyptian satrap Aršama; in idiomatic Aramaic, one would normally expect the verb *qbl* (D-stem) for “to accept.” It is unclear whether this specific formulation traces to the substrate influence of Iranian.

In post-Achaemenid Aramaic, *nśī* still appears in cuneiform incantation formula from Uruk for “to take” in a certain ritual act.[23] Linguistically, this text does not belong to the Imperial Aramaic literary tradition, however, but to the earliest witnesses to East Aramaic.[24] In later East Aramaic, as in Jewish Babylonian, Syriac, and Mandean, *nsb* replaced the verb (→ I).

III. Biblical Aramaic (*nśī*). Two of the three Biblical Aramaic instances of *nśī* are forms of the G-stem and conform closely to older Aramaic diction. In Ezr. 5:15, the imperative “take!” appears in the original command of Cyrus to take the temple vessels, set out on the path to Jerusalem,[25] and to deposit them there,[26] in order to initiate the reconstruction. On the other hand, Dnl. 2:35 employs it figuratively in the vision of the colossus on clay feet in reference to the wind that carried away remains of the once powerful statue now reduced to dust as a symbol of the four sequential empires.[27]

The Dt-stem in Ezr. 4:19, which is unusual for this verb, means “to rise up against [*ʿl*] someone” and has as its subject Jerusalem, which is supposed to have repeatedly rebelled[28] against ruling kings in the past. With a similar meaning and an identical construction, however, Dnl. 5:23 employs the Lt-stem of → *rīm* to refer to Belshazzar’s sacrilege; there are parallels for this elsewhere in Aramaic. No semantic or stylistic distinction between these two expressions can be determined.

IV. Qumran and Later Aramaic (*nsb*). The Aramaic texts from Qumran reflect the disappearance of the root *nśī* from the lexicon after the disintegration of Imperial Aramaic as the originally most widespread Aramaic literary language. Qumran attests the verb with certainty only as

ynswn “they will carry” in 11Q10 11:4 (Job 27:13), on the one hand, with the loss of the ʾ in keeping with pronunciation, but on the other, with degemination of the /n/ in contact position according to Imperial Aramaic orthography. In this text, it stands for Hebrew *lqḥ* with the nuance “to accept” and is supplemented by the preposition *mn*] *qdmhwy* “from him (i.e., God)” instead of the simple *mn* as is often the case in relation to God.[29] An additional possible specimen of the Dt stem already known from Ezr. 4:19 “to arise” (→ III) in 4Q203 7a:7[30] is fragmentary and the reading somewhat uncertain.

Otherwise, the verb *nsb* for “to take” appears at Qumran as in other Aramaic varieties from the same period and later. Narrative texts, in particular, attest it well. For “to raise” (of the countenance) in 1QapGen 5:12, it still stands quite close to older usage, but it now appears frequently for “to take,”[31] sometimes in ritual instructions,[32] and specifically for “to take someone [*l*-] as wife,”[33] as often later, as well.[34] The causative-stem, then, means, “to give in marriage.”[35] Various others of the overall numerous instances are fragmentary.

In Palmyrene and at Hatra, *nsb* is now also used in contexts in which one formerly encountered *nśī* and *lqḥ* (→ V): *PAT* 1624.7 (→ II) and 2775.10 (→ III),[36] as well as H344.7 with the nuance “to take,” H281.3,9 in the sense “to take away.”[37] “To carry” is now *ṭʿn* (→ VI).

V. Verb *lqḥ* “to Take.” Like **nśʾ* (Aramaic *nśī*), *lqḥ* “to take” is a common Semitic root. In contrast to *nśī*, *nsb,* and other verbs of carrying or removing (→ I), it does not primarily designate a physical exertion, but grasping an initiation. It is common in the G-stem in Old and Imperial Aramaic and conjugated, as in Hebrew, like a verb I-*n* with assimilation of the /l/ in contact position,[38] which is sometimes preserved in the spelling.[39]

Old Aramaic evidence already reflects a broad spectrum of possible usages: in addition to the common usage,[40] the acceptance of words[41] and sacrificial offerings,[42] the seizure of land and property,[43] the capture of cities,[44] and the imprisonment of persons.[45]

Documentary texts from the Achaemenid periods also indicate a broad distribution as a blanket term. In letters, it often denotes "to take away,"[46] in contracts "to take possession"[47] or "to take as wife."[48] It occurs figuratively in an oath formula with "life" as an affirmation,[49] and in a grave context, to take "water before Osiris."[50] It also appears in commercial texts in the literal sense. The Gt-stem "to be taken"[51] overlaps with the internal passive, which was disappearing in post-Imperial Aramaic.[52]

Biblical Aramaic does not attest *lqḥ*, but the few specimens from Qumran indicate that it was disappearing in post-Imperial Aramaic and would ultimately be replaced by *nsb* (→ IV): the passive participle of light that would be "taken away" in astronomical jargon[53] and two fragmentary passages.[54] The Nabatean confirmation of a Greek marriage contract has the causative-stem "to give as wife."[55] The few Jewish Babylonian occurrences in legal contexts trace back to Hebrew influence.[56]

VI. Verb *ṭʿn* "to Load" and Noun *ṭʿwn* "Load." Finally, the verb *ṭʿn* in the G-stem denotes "to load." It is the Aramaic counterpart of the common Semitic root *θʿn.[57] The nuance "to load up" presumably arose from "loading animals" and in relation to "to set out," for which Arabic and OSA employ the verb. It is transitive, takes a simple ("to carry something") or dual object ("to load someone/something with something), and forms a passive.

The term *ṭʿn* first appears already in the Old Aramaic sayings of Aḥiqar. In *TADAE* C1.1,159, it stands alongside *nśī* "to raise high" in reference to a heavy load,[58] which the parallel expression in the subsequent lines takes up again with *nśī* and *nsb* in reference to a light load.[59] If the two verbs were chosen consciously to clarify *nśī*, as is common in

parallelism, *ṭʿn* would have originally been associated with a major physical exertion like the English "to load up" and *nsb* with a lesser exertion such as "to raise up" (→ I). In l. 186, it appears with the noun *ṭʿwn* for loading a camel load (see below).

In Imperial Aramaic in a letter-contract with *b-* it literally denotes the loading of a boat[60] and in a contract figuratively for the imposition of an oath;[61] the corresponding passive also occurs once in the same sense.[62] The passive participle *ṭʿyn* "loaded," as in the Palmyrene tax tables,[63] is later understood in Aramaic as an active "bearing."[64]

If the meaning in Old and Imperial Aramaic was still quite specific, the verb occurs in later Aramaic languages with a broader semantic spectrum that also includes the usages "to carry, lift up" which were previously associated with *nśī*.[65] There, it is more closely associated with physical exertion than *nsb* (→ V), which has also assumed some of the meanings of *nśī*.

The masculine substantive *ṭʿwn* /ṭaʿūn/ "load" belongs to the same root. A proverb of Aḥiqar first attests it in the phrase *ṭʿwn gmlʾ* "camel load" as an internal object of the verb[66] and remains productive in Aramaic even in post-Christian times.[67]

נשם *nšm*; נשמה *nšmh* /našamā/; נשם *nšm* /našam/; נשב *nšb*; נפש *npš* /napš/

I. Etymology, Lexical Field, and Forms. II. Noun "Breath." 1. Breath of Life. 2. Breath of Air. 3. Verb "to Blow." III. "Soul." 1. In the Full Sense. 2. "Self." 3. "Tomb."

I. Etymology, Lexical Field, and Forms. Aramaic first attests a verbal root *nšm* "to breathe" with certainty in post-Christian East Aramaic,[1] but it has a cognate in the Hebrew *nšm* "to blow" (Isa. 42:14) and in the Arabic *nasama* "to blow softly," and also underlies the feminine noun /našamā/ "breath of life" already attested in Biblical Aramaic and with the masculine variant /našam/ "breath of air" at Qumran.

It presumably constitutes a by-form of the root *nšp* "to blow" also known from various Semitic languages[2] and its variant *nšb*.[3] The interchange between the voiced bilabial /b/ and its unvoiced counterpart /p/ and the bilabial nasal /m/ is easily explained phonetically and appears sporadically elsewhere in Semitic.[4]

It is less clear whether this root bears a direct etymological relationship with the also common Semitic feminine primary noun /napš/ "self," but a metathesis of *šp* to *pš* would not be problematic from a phonetic perspective and a relationship would be semantically plausible. To be sure, Biblical Aramaic does not attest this substantive, but it is quite frequent in other Aramaic languages, either in the concrete full sense "breath of life, life force" or, mostly, diminished to "self" and also used in the place of an absent reflexive pronoun; sometimes it denotes a grave symbol (or the grave itself), which represents the postmortem presence of the deceased.

Old Aramaic spelled the word *nbš* instead of the otherwise common *npš*. It continues to be disputed, however, whether this is the result of a secondary shift from /p/ to /b/ in contact with /š/, as most assume,[5] a purely orthographic peculiarity with no differentiation in the pronunciation between /pš/ and /bš/ or, the most unlikely explanation, the reflection of an old by-form.

The lexical field of *nšm* with its corresponding variants and nominal derivations also includes → *rwḥ* "wind, spirit," which is sometimes employed in the same context.

II. Noun "Breath." "Breath" was perceived as the physical expression of the force that enables people to move autonomously and be active intellectually. It correlates, thereby, to being alive, per se. Since life was considered an essential characteristic of God, God is also the one who gives life and takes it. In the invisible and intangible yet directly perceptible breath of air, the mystery of life has the corresponding natural manifestation. Consequently, one also conceives of the animating creation of humankind as an "in-breathing" (Gen 2:7). Indeed, one could distinguish the human breath of life, as designated by *nšmh* in Hebrew, at least according to an Israelite conception, from the animal because in it the divine spirit subsists (the human is, thus, an individualized *rwḥ*) and thereby first enabled the human being to think and speak.[6]

1. Breath of Life. The feminine *nšmh* /našamā/ "breath of life" occurs in Aramaic first in Dnl. 5:23 where it appears in the Tiberian vocalization as *nišmā*. Daniel declares to KingBelshazzar why God has condemned him to inevitable demise: at his feast, he desecrated the holy temple vessels from Jerusalem and paid homage to lifeless idols, but did not glorify[7] God, in whose power[8] are Belshazzar's life-breath and his fate.[9] The life-breath as a physical expression of the vital force is, thus, the gift of God, the source of all life[10] and who alone merits unlimited veneration for it. God, as the truly

living, also contrasts with the purely material, lifeless idol images. This idol polemic acquires marked features in the postexilic period.[11]

In contrast, 1QapGen 2:10 from Qumran, with the difficult expression *nšmty lgw ndnhʾ* "my breath is in its covering," apparently emphasizes the primarily physical aspect of the intense breath in the body[12] during a heated conversation[13] between Lamech and his wife Bettenosh concerning who may have sired their son Noah. The formulation may imitate Dnl. 7:15 and has no parallels otherwise, but may depend on an already old misunderstanding of the text there, which may once have read differently.[14] Admittedly, the immediate context is fragmentary and permits no conclusions concerning the significance of the obvious relationship between *nšmh* and emotions.

An additional specimen may appear in 11Q10 24:8, where *nšm*]*th* "his life-breath" can be emended with relative certainty following the Hebrew text of Job 34:14. As in Dnl. 5:23, the word here denotes the God-given life force of a human being; if God withdraws it, the inanimate body decays to dust. In the preceding part of the sentence, not preserved in Aramaic, *nšmh* parallels *rwḥ* "spirit."[15] According to this passage, too, to be alive is not merely a vegetative process, but is linked indivisibly with thought and emotion, just as the concept of "life" itself transcends the purely biological.[16]

2. Breath of Air. While the feminine *nšmh* /našamā/ serves as a collective noun for the (human) breath as such, the related masculine *nšm* /našam/[17] can designate the individual breath of air. Such an arrangement of collective nouns into a genus and an individual element is common in Semitic languages.[18]

The first instances of this also appear in the texts from Qumran, although all are fragmentary: in 4Q534 1 1:10 and 4Q541 1 2:3 the suffixed plural *nšmwhy* or *nšmyh*[*wn*] "his, their breaths," respectively; in 4Q534 1 1:10 in a construct relation with *rwḥ* "breath" in the context of the

announcement of Noah's birth, but with no further context. Also preserved only as a fragment, 4Q541 1 2:3 (Levi apocryphon) employs the word with *kwl* "all." 11Q10 10:5 (Job 26:14) has *ʿṭr* "breath" for Hebrew *šmṣ*.

3. Verb "to Blow." The verb *nšb*, which is probably related to the root *nšm* (→ I), occurs as a participle with the meaning "to blow" in reference to strong[19] winds in 1QapGen 13:16. It appears there in the context of a vision. The "four winds of heaven" are a fixed element of apocalyptic visions such as, e.g., Dnl. 7:2.[20] The imperfect appears in 11Q10 31:2 (Job 38:24), also in reference to wind.

III. "Soul." Since the ancient translations of the Bible, the feminine substantive *npš* /napš/[21] has been traditionally and over-simplistically rendered "soul" (ψυχή). In fact, however, the anthropological concept underlying Hebrew, as well as other West Semitic usage, eludes a strict division of the person (admittedly never systematically defined as such) into corporeal and immaterial components.[22] Meanwhile, → *bśr* "flesh" can also denote a living being overall, and not just in relation to its materiality, while organs like the → *lbb* "heart" are closely associated with intellectual and emotional states. In essence, then, /napš/ denotes the body given vitality by the breath of life (→ II) in its totality, and, abstracted from this notion, the "self," and from the fifth century on a tomb as its symbol.

1. In the Full Sense. Since older Aramaic literature reflects only isolated facets of the theological lexicon, the full sense of *npš*/*nbš* in particular continues to be paradigmatic, and in most cases, the word denotes the "self" (→ III.2). Line 5 of the Kuttamuwa inscription, which stands linguistically between Samʾalian and Old Aramaic, seems, however, to constitute an exception. On this monument for a high official, one finds, together with a depiction of a funeral meal, the instruction that, in dedication, a sacrifice should be offered to a series of gods and *lnbšy zy bnṣb zn* "for my *nbš* in this stele."[23] The context does not indicate whether the sacrifice was to take

place while the donor was still alive. If not, the *nbš* would have been the spirit of the deceased that remains present beyond death.

This concept has no parallels in Aramaic texts, however, and could, therefore, represent a peculiarity of the cult of the dead at Samʾal, which probably displayed Hittite features.[24] The Samʾalian inscription *KAI* 214.17f.,22 also mentions the *nbš* of the dead as a participant in a sacrificial meal.

Otherwise, the association of *npš* with the life force shines through only in isolated instances: when an inscription is dedicated to a god *lḥyy nbšh*/*npšh* "for the life of his (the donor's) *npš*,"[25] in an oath formula,[26] or when deliverance from mortal danger is described as the escape of the *npš*.[27] As in Hebrew, *kl npš* serves at Qumran for "every living being."[28] Here, it denotes all who are subject to judgment and are thus responsible, which explicitly presupposes belief in an individual afterlife.

2. "Self." In contrast, *npš* usually has the sense "self" already in Old Aramaic, explicitly so in the identification of a person with a wax figure in the rite accompanying a curse formula;[29] further, in the place of a pronoun[30] and as a collective term as in the English "souls" for "people."[31] Sometimes, the *npš* as the seat of emotion and thought comes to the foreground, either paralleling *lbb*[32] or alone.[33]

With *lqḥ*[34] and the preposition *l-*, *npš* often serves in Imperial Aramaic for "to acquire" with the connotation "to seize."[35] Legal diction also employs it as a circumlocution for "one's own,"[36] including one's own signature.[37] The formulation *ʿl npš* for "obligated to fulfill the contract" appears in private documents from the Dead Sea and Dura Europos.[38] Furthermore, in legal and commercial texts, *npš* denotes "individual."[39] The three passages in 11Q10 5:5 (Job 21:25: "mind"); 10:9 (Job 27:2: "me"); 36:6 (Job 41:13: "breath") all correspond to the Hebrew text and its

nuances. A pair of additional instances from all periods is too fragmentary to be classified as a specific usage.

Syriac, especially, employed other nouns such as /qnōmā/ along with *npš* as reflexive circumlocutions, probably because the t-stems there were largely restricted to the passive.

3. "Tomb." At the latest since the fifth century B.C.E., *npš* designated a grave in Aramaic. This usage first appears at Tēma in northern Arabia where the word refers to memorial stones with a stylized death mask (with no mouth) and stands at the beginning of the text in the construct state with the subsequent name. In the Nabatean kingdom, it referred to pyramid-shaped gravestones and later made its way from Arabia via an unknown path to Syria, where such a use of *npš* is well known from Palmyra, and then spread farther to Judea.[40]

The basis of this semantic development is no longer perceptible. As a structural term, *npš* may trace back to the spirit of the dead whose presence at the grave one assumed like a (transitory?) after-glow, in a manner similar to the way the *nbš* according to the older Kuttamuwa inscription from northern Syria was in the stele (→ III.1); or the memory of the deceased itself evokes his person just as the workplaces or the home of a person can still give an immediate impression of his presence even after his death. It is not possible, however, to draw further conclusions concerning the nature of the presence of the one represented in this way and his relationship to the grave. It would be premature, consequently, to assume "bodiless souls" everywhere here since the same terms could refer to the mutating eschatological hopes.

נֶשֶׁר *nšr* /nešr/

I. Form and Meaning. II. Occurrences.

I. Form and Meaning. The masculine substantive /našr/ is a Central Semitic primary noun of the most common noun form *qatl*.[1] In the third century B.C.E., it was revocalized in Aramaic as the *qitl*-form /nešr/.[2] The LXX (ἀετός) and the Vulgate (*aquila*), however, always translate it "eagle," but since it is bald (Mi. 1:16) and feeds on carrion (Job 39:29f.), only the vulture is suitable.

Apparently, in Palestine it involved the now almost extinct griffon vulture (*Gyps fulvus*), the largest bird with a wingspan reaching to three meters. In eastern Mesopotamian Hatra (first century B.C.E. to third century C.E.) *nšr* is clearly the eagle as a symbolic animal for the supreme god, the sun, based on figurative representations.[3] 11Q10 33:8f. (Job 39:27), in fact, distinguishes between *nšrʾ* "the vulture" and *ʿwzʾ* "the eagle." Yet, one cannot always rule out confusion of the two high-flying predatory birds.

II. Occurrences. The first instance of *nšr*, in the singular absolute, appears in the Deir ʿAllā wall inscription I.8 (Gilead ca. 800 B.C.E.)[4] mocking the swallows in the image of an overturned world in the context of a judgment prophecy.[5]

In Biblical Aramaic, the word occurs in Dnl. 7:4 in the expression "a lion with the wings of a vulture [*wgpyn dy nšr lh*]" for a chimera[6] as an image of the Babylonian Empire; as a sign of the comparatively human character of this dominion, the wings were torn off the animal, it was placed in a human stance, and it was equipped with a human heart. The figurative

comparison in Dnl. 4:30 has the plural absolute, however: Nebuchadnezzar was dehumanized during his time of contrition so that "his hair became as long as (the feathers) of eagles [*śʿrh knšryn rbh*] and his nails like a bird's talons."

Only a few instances have been preserved at Qumran: 4Q558[7] "a vulture"; Book of Giants 4Q530[8] "he flew with his hands like an eagle";[9] finally, the singular determined *nšrʾ* in 11Q10 33:8 (Job 39:27) "the vulture arose." The word occurs further in Nabatean[10] and in later East and West Aramaic.[11]

נִשְׁתְּוָן *nštwn* /neštāwan/

I. Etymology and Lexical Field. II. Imperial Aramaic Usage. III. Biblical Aramaic.

I. Etymology and Lexical Field. Borrowed from Iranian in the Achaemenid period, the masculine *nštwn* "official letter, decree" is also a specific term in Aramaic administrative diction. The pronunciation is usually reconstructed as /neštāwan/,[1] but the Tiberian pointing *ništ^{e}wān*, if it is reliable, would argue more for /neštawān/.[2]

The word apparently has a significantly more restricted spectrum of usage than the much more widespread Semitic noun → *ṭʿm* "order" and refers particularly to specific written instructions, sometimes explication as a reaction to a disturbance in the execution of an official directive (→ II). It also differs, however, from *dkrn* "record, memorandum"[3] and is used in Biblical Aramaic together with *ʾgrh* "letter" (Ezr. 4:18 par. 4:11; 5:5 par. 5:6).

II. Imperial Aramaic Usage. The few Imperial Aramaic instances of *nštwn* all stem from the context of Achaemenid provincial administration. Nonetheless, their occurrence in letters both from Egypt and from Bactria indicates the high degree of the standardization of Aramaic Imperial diction and its terminology. All known passages refer to concrete decisions in individual cases. It occurs once in a letter from officials of the satrap Aršama to their superior concerning an "allotment,"[4] together with *ktyb* "stands written," and, consequently, a document; the context, however, is fragmentary. Here *nštwn* seems to supplement the *ṭʿm* "order" mentioned in l. 2 (thus *ʾp* "also").

Two additional instances appear in somewhat later letters from the Bactrian satraps: first in the admonition of a higher official that the addressee, a subordinate provincial administrator, has acted contrary to an official directive (*mn šṭr nštwnʾ zyly*)[5] by exploiting camel keepers. Here, too,[6] the context makes it rather clear that it involves a document since *nštwnʾ zyly* "my instruction" seems to refer to an order designated in l.5 by → *ṭʿm* that had already been sent (*šlyḥ*) to the addressee demanding that he refrain from this behavior. This new decree responded to a complaint by another official.

The second instance from the Bactrian archive[7] also appears in the satrap's appeal to the same subordinate in reaction to a complaint; the addressee was not fulfilling his obligations in the organization of agricultural work and repairs of the satrap's estate and was, thus, acting *lʾ . . . lqbl nštwnʾ zyly* "not in accordance with my instruction."[8] Once again, the context suggests that an earlier order[9] had not been followed.

III. Biblical Aramaic. All three attestations of the term *ništ^{e}wān* in Ezra correspond to official Imperial Aramaic diction. It always involves an official document (→ II). Ezra 4:18 employs the word for the letter[10] that the opponents of the construction of the Jerusalem wall sent to Artaxerxes; it refers in 4:23 to the king's response that, in reaction to the complaint, had forbidden the rebuilding until further notice. It also serves as a term for a royal reaction to a missive in 5:5.[11]

From the Aramaic, Hebrew borrowed the term in the same pronunciation.[12] There are, however, no indications to be taken seriously or even approaching plausibility that Iranian loanwords came directly into Hebrew; moreover, such a thesis would contradict the known socio-linguistic evidence both with regard to the Aramaic language situation in Palestine and to the complete lack of any indication of a continued use of Persian in the western provinces. The word appears twice in the same meaning for written instruction in the Hebrew parts of Ezra (4:7 and 7:11).

נתן *ntn*; נתין *ntyn* /natīn/; מ(נ)תנ(ה) *m*(*n*)*tn*(*h*) /mattan(ā)/; נבזבה *nbzbh* /nabizbā/(?)

I. Etymology, Suppletive Relationship with *yhb*, and Lexical Field. II. Usage of the Verb. III. Noun "Temple Slave." IV. Noun "Gift."

I. Etymology, Suppletive Relationship with *yhb*, and Lexical Field. In Aramaic, the common Semitic (with the exceptions of Arabic and Ethio-Semitic) root *ntn* "to give" in the G-stem overlaps with the synonymous verb → *yhb*, which is, however, within Northwest Semitic, typically Aramaic. Otherwise, *ntn* appears in a number of variants: in addition to this form, dominant in the Judean and Transjordanian linguistic regions, it appears in Akkadian as *nadānu* and in Ugaritic and Phoenician, thus the languages distributed throughout northern Syria-Palestine, as *ytn*. Meanwhile, Aramaic *yhb* probably developed from an older **whb*, which still appears in Arabic and OSA with the meaning "to give."

The various semantic nuances of *ntn* and *yhb* for older Aramaic can no longer be determined. At the latest since the fifth century B.C.E., the two roots stand only in a suppletive relationship,[1] in which the forms that assimilate the initial /n/ are formed on the biradical basis *tn*, that is, the imperfect[2] and the infinitive. In contrast, the verb *yhb* serves for the other forms, i.e., perfect, participle, and the also biradical imperative (*hb*). The latter root, to be sure, at least occasionally forms an imperfect in Old Aramaic, although the precise distribution of forms remains unknown in consequence of the sparsity of instances.

The suppletive relationship of this pair may result from a semantic expansion of an originally very specific verb (say from “to make a gift” to “to give”) similar to that still evident for the antonymous lexical field “to take” in post–Imperial Aramaic times. There, too, the frequent common Semitic verb → *nśī*, originally, “to lift up, to take,” became marginalized and was ultimately replaced by the less common *nsb* with the likely old meaning “to lift up.” In any case the sole certain example of an imperfect of *yhb* in the oldest Aramaic inscriptions[3] already has the general meaning “to give” and refers to the contractually established delivery of foodstuff.[4] It apparently occurs here in antithetical parallelism with a partially reconstructed form *t*]*śʾ* of *nśī* “to take (away)” following a lacuna in the same line. Thus, the Aramaic evidence itself no longer permits one to deduce a possibly once more restricted older meaning of *yhb*. The instability of *ntn* as an independent paradigm could, however, involve the fact that roots with identical first and third radicals occur in Semitic only very sporadically.

In post-Christian East Aramaic the two secondary forms *ntl*[5] and *ntb*[6] appear. One may explain them as the contraction of the last radical with the prepositions *l*- “to someone” or *b*- “for,” common in relation to this verb in particular,[7] as dissimilation to a related consonant,[8] or as assimilation to the /b/ of *yhb*, potentially also as an interaction of both causes.

The passive “to be given” of the Gt-stem of *ntn* occurs only very rarely. Normally, however, the Gt-stem of *yhb* serves this function in all forms, including the imperfect,[9] for which, contrariwise, *ntn* serves in the G-stem (see above).

The nouns in the lexical field of giving already attested in older Aramaic belong to *ntn*, not to *yhb*: the substantivized masculine passive participle /natīn/ “given” for a slave given to the temple (or the court?) or

his descendants[10] and the verbal noun on the *maqtal* pattern /mattan/ with its feminine /mattanā/[11] "gift."

Additional nouns from the same lexical field include the rare Iranian loanword /dāšn/[12] and in personal names Aramaic /zabd/.[13] The substantive *nbzbh*,[14] of unknown origins, perhaps related to the likewise unclear *nbz* "receipt,"[15] parallels /mattanā/ for "gift" in the book of Daniel (→ IV).

In relation to individual forms of giving, the vocabulary becomes further refined in various terms for "sacrifice" and "to sacrifice,"[16] "donation,"[17] "tribute" and other forms of taxation,[18] and *šḥd* for "bribery."[19]

II. Usage of the Verb. The verb *ntn* appears beginning in the Old Aramaic period, both in Old Aramaic itself[20] and in Samʾalian. Only a few specimens survive from this earlier period, as a rule, in the imperfect. A few sixth century B.C.E. pre-Imperial Aramaic texts from Egypt attest a perfect, however: the private correspondence from Hermopolis[21] and a private contract dated to 515 B.C.E.[22] Both already stand under the influence of Achaemenid orthography, but, with the exception of a few morphological peculiarities, presumably belong to a form of Aramaic already widespread in Egypt in pre-Achaemenid times.[23] The Hermopolis correspondence also employs *yhb* apparently without distinction.[24] From the fifth century B.C.E., the root becomes prevalent in the whole linguistic region for the perfect (→ I),[25] so that the distribution even according to otherwise completely parallel formulations is only purely morphological, at the latest from this time forward.

Thus, *ntn* appears with the same shades of meaning and constructions as *yhb*, which are treated more extensively there: in the literal sense for concrete things or goods (including sums of money or tribute, Ezr. 4:13; 7:20), for abstractions such as time (Dnl. 2:16), but also gifts of the gods, such as a long life[26] and, especially in the book of Daniel, god-given royal

power (Dnl. 4:14,22,29).[27] Furthermore, it occurs, depending on the object, in a few idiomatic expressions.[28]

III. Noun "Temple Slave." An old cultic use of the verb *ntn* in the sense of "to consecrate, sacrifice" survives in the noun *ntyn* /natīn/ for a slave dedicated to a specific service. It has an exact counterpart in the Hebrew term *nᵉṯīnīm*, attested only in the plural.[29] The *qatīl*-form instead of the *qatūl*-form of the passive participle typical in Hebrew and its distribution in postexilic sources such as Ezra, Nehemiah, and 1 Chronicles indicates the Aramaic origin of this designation.

The sole older Aramaic instance other than personal names, Ezr. 7:24, uses it to denote King Artaxerxes's provision of temple servants come from Babylon who, together with the other temple personnel were to be exempt from taxation. They were subordinate to the Levites and could have become part of the temple personnel through debt slavery, as prisoners of war, or by birth. The word appears as part of a list before *plḥy byt ʾlhʾ dnh* "the servants of this house of God,"[30] which refers to an additional group[31] or, summarily, all those previously named.

If, indeed, the personal name Natīn, already frequent in Old Aramaic times, presupposes this specific meaning "temple servant" (and not just a general dedication of a child to a deity), the pertinent institution in the Aramaic linguistic realm may have already had substantially older roots. Since Babylon may have already become largely Aramaic-speaking in the sixth century B.C.E.,[32] the Aramaic term for this group of persons would also have been adopted.

IV. Noun "Gift." The masculine verbal noun *mtn* /mattan/ first appears in Aramaic in a list on a third century B.C.E. ostracon in the formulation *lmtnʾ* "as a gift," in each case after a personal name.[33] It may involve a list of gifts for a land purchase.[34]

Furthermore, since Biblical Aramaic, the related feminine *mtnh* or *mntnh* /mattanā/ appears. In Daniel, it occurs three times for the king's gift

as a reward for interpreting a dream (Dnl. 2:6,48) or the writing on the wall (5:17), always in the plural and spelled phonetically *mtnn*. In two of these passages, it parallels the otherwise unknown noun *n*^{e}*ḫizbā* (Dnl. 2:6 and 5:17).[35]

In addition, in context, the discussion concerns either special honors (2:6) or a very high position in state service (2:48; 5:16f.). These extraordinarily elevated distinctions correspond to the difficulty and significance of the tasks performed. Even the king's experts failed in them, but the exile Daniel knew how to solve them with bravado thanks to his gift of divine wisdom—after all, it involved the explanation of world history. Notably, he accepted only the gifts of the positively described King Nebuchadnezzar (2:48) and rejected those of the arrogant evildoer, Belshazzar, condemned by God to destruction (5:17).

In the sole instance of the word in the Aramaic texts from Qumran[36] *mntn*[*n*] also designates royal gifts, in this case of the pharaoh to Abraham who had healed the pharaoh of a God-sent illness. Here, as in Dnl. 2:48, it is linked with the verb *yhb* "to give,"[37] while *qbl* "to receive" appears in Dnl. 5:17. In Nabatean contracts from the Dead Sea, the word designates gifts in the legal sense.[38]

נתר *ntr*

I. Etymology and Lexical Field. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology and Lexical Field. Along with the typical verb for "to fall," → *npl*, Aramaic also knows the less common root *ntr*. It also has a common Semitic origin and, considering Akkadian *našāru* and Arabic *naṯara*, developed from an original **nθr*. The meaning of the G-stem ("to fall away, out of/away from)" is only discernible in older Aramaic, since the verb appears there only in the C-stem "to set free, to liberate," but it can be identified very well later.[1] As "to fall out," it appears regularly there in relation to hair or leaves and is, therefore, more specific than *npl* "to fall."

Normally, scholars assume some relationship to *ntr* "to jump" as in the Hebrew G- and D-stems. In reference to a lamb jumping off in 4Q206 4 2:20 (1 En. 89:16), it may, however, if the reading and emendation *nt*[*r* based on the Ethiopian parallel version is correct, be borrowed from the Hebrew.[2] Ugaritic *ntr* with the same meaning[3] and perhaps Arabic *natala* in the specific sense of "to jump forth" argue instead for a homonymous root.[4] It is unclear whether there is an etymological relationship to /netr/ "natron."[5]

II. Imperial Aramaic. In Imperial Aramaic, *ntr* in the C-stem serves in legal texts to mean "to take away again"[6] or "to set free."[7] For the former, however, one more frequently finds → *nṣl* "to snatch away, to reclaim," for

the second → *šbq*. The reading and interpretation of *ntyrh*[8] are uncertain; R. Degen[9] reads the imperative *ktyrh* "wait on it!"

III. Biblical Aramaic. The sole Biblical Aramaic instance of *ntr* is the C-stem in Dnl. 4:11, where it denotes the shedding of the leaves of a tree and parallels → *bdr*, in the D-stem "to scatter." In a dream vision, the tree symbolizes King Nebuchadnezzar; the denuding and felling on an angel's comment represents the penance of exile.

IV. Qumran. In the same sense as in Dnl. 4:11, the verb also appears in 1QapGen 13:17 from Qumran (→ III), also together with *bdr*. Here, the subject is a wind that denudes a tree in a vision.

סבל *sbl*; סבול *sbwl* /sabūl/; סמך *smk*

I. Etymology, Lexical Field, and Meaning. II. G-stem "to Carry." III. D-stem "to Support." 1. Old and Imperial Aramaic. 2. Ezra 6:3. IV. Noun "Support."

I. Etymology, Lexical Field, and Meaning. Aramaic *sbl*, in the transitive G-stem "to carry," has a homonymous Hebrew cognate; Arabic *zabala* and Akkadian *zabālu* with an identical meaning may involve a possible secondary by-form.[1] The root has been attested since the pre-Imperial Aramaic proverbs of Aḥiqar. More often, especially in Imperial Aramaic, the D-stem "to support" appears, usually as a return service and, in legal texts, also in the sense of "to provide support, to care for"; in Biblical Aramaic, in contrast, it denotes literally "to support" in reference to a foundation (Ezr. 6:3).[2] The related t-stem denotes the corresponding passive and occurs once in Imperial Aramaic. In view of the generally good Imperial Aramaic evidence concerning the D-stem of *sbl*, the older hypothesis of a causative stem involving an /s/-prefix of *wabālu* borrowed from the Assyrian[3] has fallen into disfavor.

For the meaning "to carry," the G-stem of → *nśī* is otherwise employed more often elsewhere.[4] The G-stem of *smk* sometimes serves for "to support" and also as a construction term in *TADAE* B3.10:14, and later in 1QapGen 20:22,29 for the laying-on-hands as part of a healing.[5]

The infrequent masculine noun /sabūl/ "support" occurs in the sense of "support" and sometimes in accord with the meaning of the D-stem.

II. G-stem "to Carry." The G-stem of *sbl* "to carry" is rare in comparison to → *nśī*, but probably occurs in a fragmentary animal fable in the proverbs of Aḥiqar.[6] The context and the parallel with the subsequent *nśī* indicate the G-stem; the D-stem "to support" occurs in l. 203 of the same text (→ III). Thereafter, the G-stem of *sbl* may also occur in two partially destroyed fragments from Qumran.[7] In addition, Beyer[8] reads the imperative *sb*]*wl* "take!" in 4Q197 5:6 (Tob. 8:21), although only the *l* can be read with any certainty; in contrast, the reconstruction *ʾwb*]*yl*[9] does not conform well with otherwise known older Aramaic diction where *ybl* in the C-stem means "to bring"[10] and not "to take," as would be expected given the context and the other versions; consequently, Beyer may have drawn the correct conclusion. A Nabatean private document from the Dead Sea also has *sbl* once,[11] although its immediate context is fragmentary.

Some attribute the t-stem form *ystblwn* in the Imperial Aramaic Aḥiqar narrative framework[12] to the G-stem and understand it as "to be carried,"[13] but, given the clear D-stem in the preceding lines in the same context, the form more likely belongs to it and means "to be supported" (→ III).

III. D-stem "to Support."

1. Old and Imperial Aramaic. The pre-Achaemenid period already attests *sbl* in the D-stem "to support." It probably first appears in a fragmentary animal fable of Aḥiqar[14] and later certainly in a private letter from Hermopolis.[15] The first form is morphologically ambiguous, but the preserved context is usually understood such that only the meaning "to provide" suits it, because it seems to mean a return service: the untameable wild ass[16] refuses to allow someone to ride it[17] in return for feed (→ IV).[18]

Imperial Aramaic also manifests the verb *sbl* regularly with persons as objects for a provision of support. In the court context of the Aḥiqar narrative framework, it refers to the provision that the high official Aḥiqar,

fallen into disgrace, receives from his deliverer.[19] In contrast, it appears in a more general usage in the Aramaic Behistun inscription in reference to the support that Darius received from other princes.[20] In a private document from Elephantine, it denotes the provision and care that a slave and her daughter guarantee their owner and after his death his son in exchange for freedom on the passing of their owner.[21] The phrase "as a son or a daughter supports his or her own father" (*zy ysbl br wbrh lʾbwhy* in l. 11, abbreviated somewhat in l. 12f.) qualifies the provision more precisely. Similarly, a testament employs it of a house that the testator, who needs care, leaves to his daughter in exchange for her caregiving.[22] An additional specimen on an ostracon from Elephantine is quite fragmentary.[23]

2. Ezra 6:3. The participle *mswblyn* as a construction term "to stabilize" in reference to a foundation[24] in the instructions concerning the construction of the temple in Ezr. 6:3 differs from this otherwise well-attested Imperial Aramaic figurative usage, "to support." The difficult form has given rise to a variety of explanations, but, in light of the other Imperial Aramaic usages, one should likely assume, in contrast to the pointing *mᵉsōḇᵉlīn*,[25] a passive participle of the D-stem /masobbalīn/ "stabilized."[26] Thus, the word serves most likely to characterize the foundation.[27] The expression probably means, then: "be built . . . and its foundation stabilized."

IV. Noun "Support." The noun *sbwl* /sabūl/ "support" first occurs in an animal fable in Aḥiqar in context with the D-stem of the verb and with the nuance "support" as a return service (→ III.1).[28] This shading results, however, from the possibly conjectural interpretation of the fragmentary passage. An Imperial Aramaic private document also employs the same word for support involving a monetary loan, which the context does not describe further, however.[29]

26. Cf. *ATTM*, 643 and H. Gzella, *Tempus, Aspekt und Modalität im Reichsaramäischen*. *VOK* 48 (2004), 178f.; it would then, admittedly, involve an unusual *plene* spelling of the short /o/.

27. And probably not as a predicative "is bearing/should be retained" as the Vulgate with *ut ponant*, *LexLingAram* 117 with *conserventur*, and H. G. M. Williamson, *Ezra, Nehemiah*. *WBC* (1985), 68,71 suppose, because a modal ptcp. would be unusual in Imperial Aramaic, Gzella, 178 n. 189.

28. *TADAE* C1.1,204.

29. *TADAE* B5.5,4.

סגד *sgd*; סגיד *sgyd* /saggīd/; סגדה *sgdh* /segdā/; סגדו *sgdw* /segdū/; מסגד *msgd* /masgad/

I. Verb. II. Derived Nouns. 1. For Worship of a God. 2. As a Priestly Title. 3. For a Place of Worship.

I. Verb. The juxtaposition of the verbs *npl wsgd* in Dnl. 2:46; 3:5,6,7,10,11,15 and *plḥ wsgd* in Dnl. 3:12,14,18,28 permits one to determine definitively the meaning of *sgd*. On the one hand, it is more than "to bow, fall down," which is expressed with → *npl*, and, on the other, more than "to serve," which is the basic meaning of → *plḥ*. Because of the gradation in the use of these verbs, *sgd* must represent "to demonstrate honor, to pay homage, to worship, to give divine honor." Humans can receive such a form of honor.

According to 4Q538 1-2:3f., Joseph's brothers in Egypt "bowed before Joseph and showed him honor," *wqdm ywsp* [*nplw wlh*] *sgdw* (cf. Gen. 43:28). The narrative framework of Aḥiqar has instead of *npl* the verb *ghn*: *ghnt wsgdt lm ʾḥyqr qdm ʾsrḥ*[*ʾd*]*n* [*mlk*] *ʾtwr*, "I fell down and showed true honor, I Aḥiqar, to Asarhaddon, the King of Assyria."[1] Contrarily, the use of *sgd* in Dnl. 3 implies the veneration due the golden statue of a pagan deity. In Dnl. 2:46, *npl wsgd* refers to Daniel, to whom Nebuchadnezzar paid homage. The text's reference to the *minḥā* offered to Daniel[2] suggests the enduring cultic significance of the act so described. Aquila and Symmachus surmised this correctly and accordingly replaced *minḥā* with δῶρα "gifts" in their translations because the customary translation of the

word with θυσία "sacrifice" would have implied that Daniel had been venerated as a god. Nevertheless, Daniel appears in Dnl. 2:47 indeed as the representative of his God. Precisely this must also be the case in 4Q246 1 2:7, which says in reference to the eschatological king: *wkl mdynt*ʾ *lh ysgdwn* "and all provinces will show him honor."[3] It states the reason immediatlely: *ʾl rb*ʾ *b*ʾ*ylh hw*ʾ "the great God stands with him," which recalls the "great God" of Dnl. 2:45 (cf. Ezr. 5:8).

II. Derived Nouns.

1. For Worship of a God. Frahang XIX.13 and the Pahlavi inscriptions utilize the heterogram SGDH in the religious sense "to worship" and in the profane sense "to honor." The word *sgdh* "(idol) veneration" occurs in Targum Neofiti 1 of Gen. 11:4,[4] while the Fragmentary Targum has *byt sgdw*.[5] Targum Onqelos of Num. 31:10 mentions a *bēt siḡdaṯᵉhōn*, but translates *ʾæḇœn siḡdā* "the stone of worship" at Lev. 26:1,[6] thus, apparently a cult monolith. Apparently, there were two nouns with the nuance "(idol) worship," i.e., *siḡdā* and *siḡdū*.

2. As a Priestly Title. A Neo-Babylonian legal document dated to 558 B.C.E.[7] deals with a special case of a pledge for a loan: an oblate (*širku*) gave his son for ten years, practically in a kind of slavery, to a *sa-gi-it-tum* or *sa-git-tú*, a female cult employee, whose precise function has not yet been defined. After four years, the original creditor died and another assumed her official position and her rights. Her title, admittedly Aramaic,[8] must be analyzed as *saggīd* + *tu,* as the masculine form of the same noun, attested much later in the name of an angel *sgydʾl* "worshiper of God," indicates. It appears in the inscription on a magic bowl found on the island of Biḡān[9] and was pronounced /saggīdu/, as the dissimilation in another specimen, *sngy*(*d*)*ʾl*, indicates.[10] The feminine counterpart must, therefore, have been

saggīd-tu > *saggittu*. So far, there are no other indications concerning the cultic function it denotes.

3. For a Place of Worship. "The place of worship" is called /masgadā/. The oldest instance of this word occurs in a Jewish oath formula from Elephantine: *bḥ*[*yy mlk*]ʾ *bmsgdʾ wbʿnt yhw*,[11] "by the li[fe of the king], by the place of worship, and by the service of Yaho!" This text is easily reconstructed with the help of the oath formula of the Aramaic clay tablet AO 25.341, l. 12f., *ḥyy mlkʾ*,[12] while Palmyrene,[13] *wnt dy bl* "the service of Bēl,"[14] and Jewish Palestinian, *ʿntʾ dṣlwtʾ* "fixed prayer time"[15] attest the meaning of *ʿnt*, "prayer time, service." Admittedly, the oath formula employs the noun *msgdʾ* instead of *mqdšʾ*,[16] perhaps because the Yaho temple in Elephantine was already destroyed at this time. In any case, *msgdʾ* here is not a divine name, contrary to Milik's understanding. This last development is first attested in Roman times, namely by the theonym Ṭūr-Masgadā, "Mount of the Worship Place," found at Caesarea Palestinae.[17] The plural *msgdyʾ* appears on an ostracon from Maqqeda in Idumea, dated to the fourth century B.C.E. It introduces the quantity of seed for the sowing of various fields, one apparently called "the terrace field of the worship place," *rpyd msgdyʾ s 16*.[18] The noun *rpyd* derives from the Semitic root *rpd* and compares to the Sabean *rfd* "retaining wall, support," thence the translation "terrace field."[19] Another ostracon from the same region mentions local sanctuaries,[20] one of them "the house of Yaho" (*byt yhw*). Arabic adopts *masǧid* "mosque" from Aramaic, but apparently through the mediation of South Arabian *ms1gd-n*, with s_1 instead of the older s_3, which points to the coincidence of these two phenomena.[21]

סגן *sgn* /sagan/

I. Etymology and Meaning. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology and Meaning. Aramaic borrowed the official title *sgn* /sagan/ from Akkadian in Neo-Assyrian times. In Akkadian, the word, originally pronounced *šaknu*,[1] initially denoted a governor or prefect, in general. It migrated from Aramaic further into Hebrew[2] and probably referred to various administrative offices. In the course of time, it could also simply refer to a "leader." For the root → *škn*.

II. Imperial Aramaic. The precise function of a *sgn* in Achaemenid times is disputed and is variously identified with that of a *frataraka*[3] "under-satrap (of a certain district)" or of a *rb ḥylʾ* "commandant."[4] The variety is because this title appears in different contexts and, apparently, in no fixed sequence with various other designations.[5] As a legal authority to whom one could register a complaint,[6] the *sgn* appears with the honorific → *mrʾ* II.3 "lord" or the professional designation *dyn* "judge"[7] in a formulaic expression in the various private documents from Elephantine,[8] and further as a title in contracts from Samaria[9] and in a severely corrupt context in Saqqara.[10] The relationship does not permit one to conclude, however, whether it involves a specific office or the meaning was already so diluted that *sgn* could refer to quite different offices.[11] In addition to legal documents from provincial administration, more than 160 brief inscriptions on stone objects such as mortars and pestles from the royal treasury in Persepolis regularly attest the term, in any case.[12] It occurs there in the

stereotypical opening *lyd*, possibly "at the disposal of,"[13] together with the personal name and *sgn* as title. Here, it seems to involve a low-ranking administrative official. Finally, *sgn* can also simply designate the leader of a hierarchically organized group in a broader sense, such as the *sgn ngryʾ* "leader of the carpenters" in a letter from Elephantine.[14]

III. Biblical Aramaic. While *sgn* refers to officials in the Achaemenid provincial administration in Nehemiah and the Hebrew portions of Ezra, the word appears in Biblical Aramaic only in the court narratives of Daniel. There, it occurs mostly in a very generic sense in a list of various official titles describing the entire upper leadership of the empire and its provinces (Dnl. 3:2,3,27; 6:8), once also for Daniel's function as the leader of Babylon's sages (Dnl. 2:48). Both the official and the general usage bear the marks of Imperial Aramaic diction (→ II).

IV. Qumran. At Qumran, the word occurs only once in 11Q10 14:4 (Job 29:10) for the Hebrew *ngydym*, "princes, leaders," also a title with a very broad spectrum of use.[15]

סוף *sūp*; סוף *swp* /sawp/; סיפין *sypyn* /sayāpīn/; בטל *bṭl*

I. Etymology and Lexical Field. II. G-stem “to Stop.” III. C-stem “to End, Destroy.” IV. Noun “End” (Usually Temporal). V. Noun “Ending” (Spatial).

I. Etymology and Lexical Field. A verbal root *sūp* in the G-stem “to cease, disappear” occurs in Aramaic and quite infrequently in Hebrew—mostly prophetic—texts; Arabic employs it in stem IV for “to collapse, lose.”[1] It probably has a by-form in *spī* with the ambitransitive G-stem “to carry off (transitive), to perish (intransitive)” in Hebrew[2] and in later Aramaic languages. The precise nuance of *sūp* depends on the character of the subject; it generally means that something passes and ceases to exist, similar to → *ʾbd* and Hebrew *klī*.[3] As might be expected, the C-stem means “to end, destroy.”

In contrast, the verb *bṭl*, in the G-stem “to stop,” in the D-stem “to shut down,” refers to the end of an activity; Ezra employs it often in relation to the work on the reconstruction of the temple,[4] according to *ATTM*, 2, 93 also in 1QapGen 10:1 for the end of the flood, although, because of unclear, fragmentary letters, the reading is disputed.[5] It occurs in most branches of the Semitic languages, although with different meanings, and migrated into Hebrew.[6]

In addition, the root *sūp* includes the common Aramaic masculine *qatl* noun with the ground form /sawp/, later /sōp/, “end,” and the rare plural *qatāl* form /sayāpīn/ for “ending” in a spatial sense. Meanwhile, the noun /sōp/ appears only rarely in Hebrew and first in late texts such as Eccl.

3:11; 7:2; 12:13 or 2 Ch. 20:16, so that it is usually regarded an Aramaic loanword.[7]

II. G-stem "to Stop." The first clear instances of the verb *sūp* appear in Biblical Aramaic.[8] Daniel 4:30 attests the G-stem with the otherwise very rare nuance "to be fulfilled, to fulfill" in reference to a word[9] together with the supplement *ʿl* "to someone."

The typical meaning "to cease, disappear" first occurs at Qumran, most often in context with the evil[10] that ends with the dawn of the kingdom of God.[11] In such passages at Qumran, *ʾbd* appears otherwise. The verb also refers to plans that come to naught,[12] and to water after the flood.[13] In 11Q10 20:2 (Job 31:40), it translates the Hebrew *tmm* for the end of a speech. A few additional instances in fragmentary passages[14] cannot be determined more precisely because of the lack of context.

III. C-stem "to End, Destroy." The causative, transitive meaning "to end, destroy" can be explained naturally in relation to the G-stem. Its spectrum of usage is, therefore, similar. Daniel 2:44, the earliest instance, employs the verb in the interpretation of Nebuchadezzar's dream of the colossus with clay feet with the kingdom of God that crushes[15] and destroys all earthly kingdoms as the subject.[16] It appears in the same sense in the "son of God" text from Qumran for the eradication of violence[17] from (*mn*) the earth in the end time.[18] The immediate context of 1QapGen 13:11 is unclear; it appears directly in context with the G-stem as the result: "destroyed . . . died away" (→ II). In 11Q10 18:9 (Job 31:16), the verb represents the Hebrew *klī* in the D-stem "to cause to swelter," in 21:2, the conclusion of a speech (Job 32:11).[19]

IV. Noun "End" (Usually Temporal). Like the verb, the masculine noun *swp* /sawp/ > /sōp/ "end" first appears in Biblical Aramaic. With the otherwise rare spatial meaning, it refers in Dnl. 4:8,19 to the "end of all the earth" (*lswp kl ʾrʿ*), up to which the mighty world tree in Nebuchadnezzar's

second dream could be seen; otherwise, the plural /sayāpīn/ known from Qumran functions in this sense (→ V). The word can also denote the end of an account (Dnl. 7:28),[20] at Qumran, furthermore, the end of a dream[21] or of honor.[22]

More often, the word has a temporal meaning. In the phrase *ʿd swpʾ* "forever," it also refers to the eternal dominion of God already in Daniel (6:27) and the enduring destruction of worldly power (7:26).[23]

The texts from Qumran employ it as *lswp* "at the end of" = "after" in the construct state with a subsequent temporal expression for the terminus of a specific time span.[24] Absolutely for "at the end" = "finally," one finds *ʿm swp*[25] or *bswp*.[26] Additionally, *swp* can also represent "death, destruction" in apocalyptic contexts.[27] A similar combination of *swp* and *ʾbdn* appears in 4Q580 1 1:12. In 11Q10, *lʾ swp* "without end" translates the Hebrew *lʾ ḥqr* "unfathomable";[28] probably under the influence of this passage, *swp* was added in 21:2 (Job 32:11) to the verb *ḥqr* "to fathom" also employed in the Hebrew text. In 1:5 (Job 18:2), it represents the unclear Hebrew *qnṣ*,[29] which the translator apparently understood as a variant of *qṣ* "end" with a degeminated spelling[30] so that the Aramaic rendition reads "to make an end of words."

V. Noun "Ending" (Spatial). In a few texts from Qumran, in reference specifically to the "ends of the earth," one encounters the plural *sypyn* /sayāpīn/, mostly in the construct state with *ʾrʿʾ* [31] and sometimes *syʾpy* with *ʾ* written as a vowel letter for /ā/.[32] In addition to 4Q558 34:1 and 4Q568:1, the word can presumably be reconstructed in 11Q10 10:1 (Job 26:10) where it would represent the Hebrew *tklyt* as the boundary between light and darkness, i.e., the point to which light can advance. In contrast, the reconstruction in 4Q204 1 13:25, where only the first letter can be read, seems much less certain.

H.-D. Neef, "*swp*," *ThWQ*, II, 1084-86 (Heb.); M. Sæbø, "סוֹף *sôp*," *TDOT*, X, 188-90; M. Wagner, *Die lexikalischen und grammatikalischen Aramaismen im alttestamentlichen Hebräisch*. *BZAW* 96 (1966); idem, "קֵץ *qēṣ* end," *TLOT*, 1153-56.

1. See T. Nöldeke, review of E. Kautzsch, *Die Aramaismen im Alten Testament*, *ZDMG* 57 (1903) 419.

2. Also in the medio-passive N-stem and in the C-stem; cf. H. Ringgren, "סָפָה *sāpâ*," *TDOT*, X, 303-5.

3. Aramaic employs this term only very sporadically for "to cease": C. Stadel, *Hebraismen in den aramäischen Texten vom Toten Meer* (Heidelberg, 2008), 87f.

4. The G-stem twice in 4:24, the D-stem in 4:21,23; 5:4; 6:8.

5. Cf. D. A. Machiela, *The Dead Sea Genesis Apocryphon*. *STDJ* 79 (2009), 53.

6. Wagner, 34.

7. Ibid., 87.

8. The reconstruction of the supposed imperative *s*]*p* in the proverb of Aḥiqar *TADAE* C1.1,88 following I. Kottsieper, *Die Sprache der Ahiqarsprüche*. *BZAW* 194 (1990), 20 is entirely uncertain and, with the conjectural meaning "to stop"—here in reference to the word of a king—does not conform to the usage of the verb known otherwise; it may be that one should read *ʾ*]*p* "also" with *TADAE* and consider supplying a finite verb.

9. *mlh*.

10. *rš*ᶜ.

11. 4Q204 5 2:28 (1 En. 107:1), in parallel with *klī*; 4Q245 2:2 and perhaps 4Q532 2:8, although neither has context.

12. 4Q534 1 1:9.

13. 4Q206 4 2:3 (1 En. 89:8), after *nḥt* "to sink."

14. Including Noah's dream in 1QapGen 13:12.

15. → *dqq*.

16. The Tiberian pointing with a lengthened penultima is not Aram., cf. *BLA*, §148c.

17. → *ḥrb*.

18. 4Q246 1 2:6; probably a C-stem in agreement with *ATTM*, 2, 446; contra *ATTM*, 645, however.

19. Although with no direct counterpart in MT and perhaps inspired by 20:2 (Job 31:40).

20. According to *BLA*, §353f. and *LexLingAram*, 118 as an antonym of → *rʾš* in 7:1, but this interpretation as a double gloss is not compelling.

21. 4Q530 2 2+ 6-12:12,20.

22. 4Q213 1-2 2:17.

23. Here almost with the nuance “completely.”

24. 1QapGen 19:23; 20:18; yet undetermined in 4Q212 1 4:26 (1 En. 91:17).

25. 4Q212 1 4:17 (1 En. 91:13).

26. 4Q554 3 3:16.

27. 4Q212 1 2:21 (1 En. 91:19), after the verb *ʾbd* “to expire” as an adverbial modifier *lswp* “to a pernicious end” with a subsequent *ʾbdn*, the form of which, however, is not entirely clear because of the paleographically difficult final letter before the lacuna. *DSSStE*, 442f., reads *lswp ʾbdnʾ* “utter destruction.”

28. 11Q10 25:1 and 28:4 (Job 34:24 and 36:26).

29. Cf. *GesB*[18], 1177.

30. *ATTM*, 89-95.

31. → IV for *swp* in the same sense in Daniel.

32. Other examples in *ATTM*, 2, 315f.

סלק *slq*

I. Verbal Root and Etymology. 1. Common Semitic. 2. Common Aramaic. II. Biblical Aramaic Usage. III. Qumran. 1. G-stem. 2. Causative-stem "to Sacrifice."

I. Verbal Root and Etymology.

1. Common Semitic. Among the Semitic languages, Aramaic almost exclusively attests the verbal root *slq* (with Semitic *s_3), which denotes upward motion in its most general sense and thus has the basic meanings "to climb up, to go up." While Neo-Babylonian *salāqu*/*selēqu*[1] and Hebrew *ʾæssaq* (Ps. 139:8)[2] indubitably involve borrowings from Aramaic, Arabic *tasallaqa* "to climb up, to scale a wall," should it be genuinely Arabic,[3] demonstrates the root as at least common Central Semitic. The basic meanings of the Arabic root *slq* in the I. stem, however, are "to throw down, bribe, to remove, to cook,"[4] which suggest a borrowing from the V. verbal stem from Aramaic.[5] The ithpaal that corresponds to the Arabic V. stem also occurs in Aramaic.[6] Consequently, it is entirely conceivable that the root *slq* in the meaning "to climb up" originally characterized Aramaic alone.

2. Common Aramaic. Since the earliest specimens, the contact position has exhibited mostly a progressive assimilation in the sequence */sl/ > /ss/, e.g., in the imperfect peal, Old Aramaic *ysq,*[7] and Syr. *nessaq*.[8] Exceptions may occur in Imperial Aramaic *mslq*[9] or in Jewish Babylonian *myslq*.[10] The assimilation resists explanation according to the laws of phonetics;[11] it may rather be an analogous formation after the antonym → *nḥt* "to climb

down,”[12] whose first radical /n/ is subject to assimilation according to the laws of phonetics.[13] The haphel and the related t-stem also exhibit the same assimilation.[14] Instead of lengthened consonants, one also finds forms with geminate dissimilation /ss/ > /ns/,[15] e.g., haphel participle Qumran-Aramaic *mhnsq*[16] and Biblical Aramaic infinitive *l*^{e}*hansāqā* (Dnl. 6:24). Despite these and assimilated forms, the assumption of a root **nsq* is unjustified.[17]

The base vowel in the perfect peal, when transmitted or orthographically recognizable, is /i∼e/,[18] in the imperfect /a/[19] or /u∼o/,[20] perhaps even /i∼e/ judging from the Jewish Babylonian secondary imperative *slyq*.[21] In the perfect, forms with a prosthetic *aleph* can also occur, such as Jewish Palestinian *ʾyslyq*.[22]

In addition to the peal and the less frequent pael or ithpaal, the root appears chiefly in the causative haphel and its passive-reflexive counterparts.[23]

The root *slq* appears in its original form in all the older varieties of Aramaic and in modern dialects such as Neo-West-Aramaic and Ṭuroyo. In both the older and the modern varieties, variants of the root developed on the basis of the irregular forms. These variants include the perfect forms of the Samaritan *sq* formed on the analogy of II-*ū* or II=III[24] and Mandaic *saq*.[25] Most modern varieties construct I-*y*[26] or I-ʾ forms.[27] Occasionally, various roots coexist.

A series of nouns derive from the root *slq*, including Syriac *massaqṯā*[28] and Mandaic *masiqta*,[29] both “ascent,” or Syriac *sullāqā*[30] with the same meaning.

II. Biblical Aramaic Usage. The verb is very rare in Old and Imperial Aramaic (→ I.2). In the Biblical Aramaic text, *slq* occurs eight times in seven verses, five times peal (four pfs., one ptcp.), twice in the haphel (pf., inf.), and one in the hophal (pf.). Only one of the passages appears in Ezra

(4:12). Daniel 7:8 attests the peal perfect *silqaṯ*,[31] as does Dnl. 7:20; Ezr. 4:12 and Dnl. 2:29 attest *s^{e}liqū*; and Dnl. 7:3 attests the participle *sāl^{e}qān*. The haphel perfect *hassiqū* occurs in Dnl. 3:22, and the infinitive *l^{e}hansāqā* in Dnl. 6:24.[32] This verse also has the sole instance of the hophal perfect *hussaq*.

The Biblical Aramaic text manifests the basic meaning of *slq* in various ways. Ezra 4:12 designates the ascent to Palestine from the plain of Babylonia with *slq*: [. . .] *dī y^{e}hūḏāyē dī s^{e}liqū min l^{e}wāṯāḵ ʿ^{a}lænā ʾ^{a}ṯō līrūšlæm* "that the Jews, who have come to us from near you, have arrived in Jerusalem."[33] In addition, Dnl. 7:3 employs the verb for ascent from the water, *w^{eə}arbaʿ ḥēwān raḇr^{e}ḇān sāl^{e}qān min yammā* "then four large animals arose from the sea."[34] Similarly, *slq* refers to the growth of horns from a head, Dnl. 7:8 *w^{aə}alū qæræn ʾoḥ^{o}rī z^{eʿ}ērā silqaṯ*[35] *bēnēhēn*[36] "and, look, another small horn grew up between them," and Dnl. 7:20 *w^{eʿ}al qarnayyā ʿ^{a}śar dī ḇ^{e}rēšah w^{eə}oḥ^{o}rī dī silqaṯ* "and (I wanted to learn) about the ten horns on his head and the other (horn) that had grown up." In a figurative meaning, *slq* serves in Dnl. 2:29 to describe the occurrence of thoughts, *ʾant malkā raʿyōnayiḵ*[37] *ʿal mišk^{e}ḇāḵ s^{e}liqū mā dī læh^{e}wē ʾaḥ^{a}rē ḏ^{e}nā* "to you, O King, thoughts came on your bed concerning what will one day be."

The haphel indicates the cause of the upward motion, twice as an active, once in reference to prisoners in Dnl. 3:22, *guḇrayyā ʾilleḵ dī hassiqū l^{e}šaḏraḵ mēšaḵ waʿ^{a}ḇeḏ negō qaṭṭil himmōn š^{e}ḇīḇā dī nūrā* "those men who brought up Shadrach, Meshach, and Abednego, the flames of the fire killed," and once with the command to Daniel to come out of the den in Dnl. 6:24, *ūl^{e}ḏāniyyel ʾ^{a}mar l^{e}hansāqā min gubbā* "and he commanded that Daniel be brought from the den." The latter passage appends a

description of the execution of the instruction passively in the hophal, *w^e^hussaq dāniyyel min gubbā* “and Daniel was brought from the den.”

Apart from the unformulated passage Dnl. 3:22, the LXX typically renders *slq* peal with ἀναβαίνω, the causative haphel in contrast with ἀναφέρω. The Peshitta employs the corresponding Syriac forms of *slq*, only Dnl. 3:22 exhibits, again, a sharply altered form. The Vulgate offers the verbs *ascendo* and *orior* for the peal, and, in contrast, *educo* for the haphel. Once again, Dnl. 3:22 diverges.

III. Qumran.

1. G-stem. The diction at Qumran essentially coincides with that of Ezra and Daniel. Here, too, *slq* functions primarily as a verb of upward motion, either geographically to climb up from a lower-lying region, e.g., from Egypt to Palestine, *wslqt mn m*[*ṣ*]*r*[*y*]*n* “and I arose from Egypt” (1QapGen 20:33), or from Sodom to Jerusalem, *wšmʿ mlk swdm dy ʾtyb ʾbrm kwl šbytʾ wkwl bztʾ wslq lʿwrʿh wʾth lšlm hyʾ yrwšlm* “(when) the king of Sodom heard that Abram had brought back all the captives and all the plunder, he went to him and came to Šalem—that is Jerusalem” (1QapGen 22:13).[38] The ascent of a cliff or a height is attested often, e.g., *wslq lrʾš kpʾ dn* “and (the lamb) climbed to the point of this rock” (4Q204 4:3 [1 En. 89:32]) or *wʾmr ly slq lk lrmt ḥṣwr* “and (God) said to me: Climb to the height of Ḥaṣor” (1QapGen 21:8).[39] Ascent to an upper story appears in 4Q196 6:2 (Tob. 3:10), the rise of a spiral stairway on a column in the heavenly Jerusalem (5Q15 1 2:4f.). The ascent of noise or orders can also be described with *slq*, e.g., *wq*[*lh*] *slq q*[*dm šmyh* “and [the] out[cry] went rig[ht up to the heaven” (4Q201 1 4:6 [1 En. 8:4])[40] or *wrḥ mqṭwrty l*[*š*]*myʾ slq* “and the odor of my burnt offering rose up to [h]eaven” (1QapGen 10:17).[41] In a figurative sense, *slq* denotes the rise of mysteries,

lqdmyn [. . . *s*]*lq rzʾ* "first [. . .] the mystery [ar]ose" (4Q536 2 1+3:12, Noah's birth).

2. Causative-stem "to Sacrifice." The most important aspect not represented in Ezra and Daniel, but frequent at Qumran in numerous instances, is the use of *slq* chiefly as a C-stem in relation to the offering of a sacrifice.[42] Here, *slq* designates the ascent of the altar as, e.g., in [. . .] *lhqrbh lkl dy slyq lmdb*[*ḥʾ*] "the woo[d] that is fitting to offer for all that goes up to [the] altar"[43] or *wʾsqh lmdbḥʾ kwlh* "and he brought (the bull) whole on the altar" (11Q18 13:4, heavenly Jerusalem).[44] On the other hand, it means "to sacrifice" directly, namely in the sense that something for the offering of a sacrifice[45] is brought onto the altar,[46] cf., e.g., *wbnyt tmn mdbḥ wʾsqt ʿlwhy ʿlʾ wmnḥʾ lʾl ʿlywn* "and I built God an altar there and sacrificed to God Most High a burnt and a grain offering" (1QapGen 21:20) or *wbʾdyn hsq ʾynwn* "and then offer (the wood)."[47]

סעד *sʿd*; סעד *sʿd* /saʿd/; עדר *ʿdr*

I. Etymology and Lexical Field. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran (Including the Noun “Help”).

I. Etymology and Lexical Field. The G-stem of the West Semitic verbal root *sʿd* may have originally meant “to support, undergird” in the sense of “to steady,” as Hebrew still sporadically attests (Isa. 9:6; Ps. 18:36; Prov. 20:28), while it appears in Aramaic in the G- (as in Ezr. 5:2) and D-stems for “to help” with a direct object. No clear semantic difference between the two stems emerges from the limited distribution of instances. Yet, the verb probably appears in the Behistun inscription in the G-stem, always for divine assistance (→ II),[1] while the unmistakable D-stem in Ezr. 5:2 (→ III) has more the nuance of moral support. The first meaning also underlies the rare usage of the verb in West Semitic personal names.[2] The root appears further in the masculine noun /saʿd/ “help” (→ IV).

Otherwise, for “to help,” Aramaic also employed the Semitic verbal root *ʿδr,[3] spelled *ʿdr* in post-Old Aramaic, and the related noun /ʿeδr/ (> /ʿedr/ > /ʿedar/). The pre-Imperial Aramaic proverbs of Aḥiqar already attest the root and relate it to divine assistance.[4] The noun also appears in names.[5] In *KAI* 233.13, *ʿzrk* “your assistance” could represent a participle of the verb or the noun. Concerning the few possible, although disputed, Imperial Aramaic instances, see *DNSI*, 830; Qumran manifests only two passages from 11Q10 (9:10 and 14:7 [Job 26:2 and 29:12]), both for the Hebrew cognate *ʿzr*. In addition, *sīʿ* appears later.[6] Meanwhile, *smk* appears in the literal sense “to support, to prop up.”[7]

II. Imperial Aramaic. Aramaic evidences the verb *sʿd* since the Achaemenid period, although Samʾalian already manifests it.[8] All the Imperial Aramaic instances come from the Behistun inscription as a component in the formulaic phrase *ʾhwrmzd sʿdny* "Ahuramazda helped me" in King Darius's reports concerning successful military campaigns.[9] There, the clause following this expression is always "through the protection [*bṭlh*] of Ahuramazda"[10] with reference to the destroyed enemy.[11] Since it involves perfects, the consonantal spelling permits no distinction between the G- and the D-stems, but in light of later usage, the G-stem seems plausible.

III. Biblical Aramaic. This root appears in Biblical Aramaic only as a D-stem participle in Ezr. 5:2 where it refers to the prophets Haggai and Zechariah who supported Zerubbabel and Joshua in the construction of the temple. The preposition *ʿm* "with" suggests the subordinate role of the first two and 6:14 emphasizes prophetic activity so that one must speak here of "moral, rather than manual, support."[12] It remains unclear, however, whether this distinction rests on the choice of the D-stem rather than the more common G-stem.

IV. Qumran (Including the Noun "Help"). Forms of the root *sʿd* are also very rare at Qumran. *ATTM*, 2, 93 reads the D-stem infinitive *lsʿdwtny* "in order to help me" in 1QapGen 7:19.[13] In any case, the context is almost entirely destroyed.

The related noun *sʿd* "help" appears in 1QapGen 22:31 in a divine promise to Abraham alongside *tqp* "strength." Later Aramaic also attests both the noun and the verb,[14] but it could also assume the meaning "to eat, to nourish," which gives rise to *sʿwdtʾ* "meal."

Gzella

G. Warmuth, "סָעַד *sāʿaḏ*," *TDOT*, X, 287-91.

1. Similarly in Hebrew prayer diction: Pss. 20:3; 41:4; 94:18; 119:117.

13. Accepted by D. A. Machiela, *The Dead Sea Genesis Apocryphon*. *STDJ* 79 (2009), 48, who, however, incorrectly fails to recognize a *n* before the *y* and, therefore, assumes a possessive rather than an objective suffix; judging from the photograph, the reading with *s* is better in any case than *lhʿdwtny* "to remove me" following J. A. Fitzmyer, *The Genesis Apocryphon of Qumran Cave 1 (1Q20)*. *BietOr* 18/B (^{2}2004), 78, and others.
14. *DJPA*, 384f.; *DJBA*, 823.

ספר *spr* /sepr/; ספר *spr* /sāper/; אגרה *ʾgrh* /ʾeggarā/

I. Etymology and Lexical Field. II. Writing. 1. “Document.” 2. “Book.” 3. “Literacy.” III. Professional Designation “Scribe, Secretary.” IV. “Letter.”

I. Etymology and Lexical Field. In Aramaic, the common Semitic verbal root *spr*, employed otherwise with various nuances in individual languages for different particular intellectual activities,[1] is only productive in nominal forms. Instead, a series of other lexemes produced the differentiation in the lexical field of the verb in Aramaic. Thus, the West Semitic root → *ktb* serves for “to write,” → *mnī* for “to count,” usually → *ḥšb* for “to reckon,” and *šʿī* and sometimes *tnī* (properly, “to repeat”) for “to recount.”

The masculine /sepr/[2] “manuscript” may be a primary noun[3] and refers to a variety of documents independent of their material forms. It usually represents documents, but also inscriptions and letters, then also books. In such usages, it overlaps with more specific terms such as → *nṣb* “stele,” *ʾgrh* or *ʾgrt* “letter” (→ IV), and *mglh* “scroll.”[4] It can sporadically denote literacy, itself, however, similar to Latin *litterae*.

In contrast, the professional designation /sāper/[5] “scribe,” by form a G-stem active participle, in distinction from /sepr/ “document,” is probably secondary.[6] Depending on the area of responsibililty, it denotes officials of various ranks, from a secretary to a high official of state. In the diglot administrations of the Neo-Assyrian and Neo-Babylonian empires, *sēpiru*[7] distinguishes a scribe of texts in alphabetic script and probably also in the Aramaic language from a cuneiform scribe (*ṭupšarru*).[8] Later, it also meant “scholar.”

II. Writing. Aramaic documents from Syria-Palestine originated from the, at least incipient, structures of state and the associated administrations after circa 1000 B.C.E. The increasing use of the alphabetic script in the public realm for representation and bookkeeping required professionally trained chancellery officials and established forms for reports of royal activity and state treaties, as preserved in the oldest inscriptions, as well as for letters, memoranda, receipts, lists, and documents in private law.[9] Admittedly, this second group clearly appears only beginning with the Neo-Assyrian period with its extensive bilingual administrative apparatus, but may have had precursors already in the chancelleries of the independent Aramaic city-states; oral traditions and sayings were also written down for nondocumentary purposes (for training?).[10] Thus, *spr* /sepr/ refers both to (mostly) official and to literary texts, and overlaps with /kitāb/ "something written."[11]

1. "Document." Depending on the nature of the preserved literature, the majority of the Old and Imperial Aramaic instances of /sepr/ refer to state or private legal documents. In the Sefire steles, the word regularly denotes the vassal treaties recorded in the inscriptions there, either as a locative with *b-* "in" or in conjunction with *mly* in the construct state,[12] denoting both the wording,[13] and, in the plural (for the steles as wholes?), their physical form.[14]

In the Achaemenid period, the center of gravity of the textual corpus shifted to private contracts and letters. By far the majority of the instances of *spr* in this period stem from the various legal documents from Elephantine. It denotes a contract and, in the construct state with an additional term, can more precisely define the nature of a document in relation to the legal affair at its base, in the colophon the respective document itself: *spr ḥwb* "record of debt,"[15] *spr ʾgrʾ* "document concerning a wall,"[16] *spr by* "document concerning a house,"[17] *spr ksp* "document concerning money,"[18] *spr ʿbwr* "document concerning grain,"[19] *spr plgn* "partnership agreement,"[20] *spr mrḥq* "waiver declaration,"[21] and *spr ʾntw*

"marriage contract."[22] As the direct object of transitive verbs, it also denotes various stages in a juridical process: → with *ktb* the drafting of a document,[23] with → *yhb* the delivery,[24] with the C-stem of → *npq* the production,[25] with *lqḥ*[26] the acceptance,[27] and finally with → *ʿbd dyn spr* the execution of a contractually established legal claim.[28]

In letters, contrariwise, *spr* also refers to the pertinent document and often serves as the object of the verb → *šlḥ* "to send,"[29] less often of the synonymous C-stem of **wšr*[30] or of the verb *ktb*.[31] Thus, it occurs mostly in private letters, while the more formal register of official correspondence, at least since the Achaemenid period, prefers *ʾgrh*/*ʾgrt* (→ IV).[32]

2. "Book." As a designation for a book, *spr* first becomes common with the development of local Aramaic literary traditions around the middle of the first millennium B.C.E., although the form of the Deir ʿAllā inscription as recorded on a scroll (ca. 800 B.C.E.)[33] already prefigures this usage. The three Biblical Aramaic occurrences refer to three different books: *spr dkrnyʾ* in Ezr. 4:15 to the Persian court chronicles or collected edicts,[34] *spr mšh* in 6:18 to the Mosaic law,[35] and the plural absolute *spryn* in the apocalyptic court scene of Dnl. 7:10 to books, not further defined, opened in the proceedings against the monsters, symbols of the secular empires.[36] At Qumran, as with the often synonymously employed → *ktb* IV, references to revelations[37] and the wisdom of the patriarchs[38] dominate. The documentary meaning, however, also appears occasionally.[39]

3. "Literacy." As in Hebrew, /sepr/ can additionally signify "literature" (cf. Dnl. 1:4) and "writing" (Isa. 29:12), e.g., as the subject of learning in 4Q213 1 1:9 and 1-2 2:8.[40] In conjunction with the verb → *ydʿ*, meanwhile, it means "to be able to read and write." Negated in post-Achaemenid legal texts, this expression denotes "to be illiterate."[41]

III. Professional Designation "Scribe, Secretary." The professional designation /sāper/ "scribe" first occurs as an addition to personal names in Neo-Assyrian administrative texts.[42] While it probably involves lower ranking administrative officials here, "scribe" is also a fixed title of the legendary, high-ranking counselor, Aḥiqar, who embodies the ideal of the clever and upright servant of state.[43] The Achaemenid provincial chancelleries of Egypt and Bactria also refer to scribes.[44] In the first case, official letters distinguish the scribe from another official, who *ydʿ ṭʿmʾ znh* "knows this commandment," in the second, the same person seems to have performed both functions.[45] Scribes were responsible not just for drafting letters and documents, however, but could also hear complaints concerning unpaid wages[46] and receive grain deliveries for the royal storehouse.[47] The records yield only sporadic insights into the highly specialized spectrum of duties of this very heterogenous profession, however. Common to the scribes of various ranks is an education meant to lead, in addition to literacy itself, to mastery of the current document forms and Aramaic literary diction, which was extremely standardized beginning in the Achaemenid period,[48] with its rhetorical possibilities. Higher officials, in particular, may also have enjoyed additional academic education since they created the literary works.[49]

In the book of Ezra, "scribes" in the sense of higher servants of state also include the opponents of the construction of the Jerusalem temple (Ezr. 4:8f.,17,23) as well as its protagonist, Ezra. He was simultaneously "priest"[50] and "expert" in the divine law (7:12,21),[51] expanding the function of the well-educated official to the religious realm—perhaps in the sense of the recording of cultic regulations.[52]

At Qumran, too, the title implies theological knowledge and serves as an attribute of Enoch who received insights into the secrets of the world and history in visions recorded in writing.[53] With the canonization of binding religious texts, which require interpretation and are inexhaustible, the "scribes" became the NT scholars (γραμματεύς).

IV. "Letter." The feminine *ʾgrh* /ʾeggarā/ and, without distinction until the Achaemenid period *ʾgrt* /ʾeggert/,[54] refers mostly to "letter" in official diction.[55] Nonetheless, in addenda to some Neo-Assyrian cuneiform texts it refers to "document,"[56] since the administrative terminology was not yet standardized.

Imperial Aramaic knows a variety of specific lexemes for a written edict from a high office: *dkrn*,[57] → *ṭʿm*, → *nštwn* and → *ptgm*.

Gzella

סרוּשי *srwšy* /srōšī/

I. Etymology and Form. II. Usage.

I. Etymology and Form. The feminine noun *srwšy* /srōšī/ "corporal punishment" derives from the Old Persian **sraušyatā*[1] and appears in Aramaic beginning with the Achaemenid period. The word was integrated into the noun system as an abstract form with /-īt/.[2] Since the etymology was not transparent, the initial /s/ could be incorrectly understood as an old */ś/ (already pronounced like /s/),[3] so that the word appears in Biblical Aramaic as *šᵉrōšī* (Ezr. 7:26).[4] Only the pointing differentiated graphically between *š* and *ś* and spelled, perhaps through assimilation, *š*.

II. Usage. In Imperial Aramaic, official documents from the provincial administration of Egypt[5] and Bactria[6] attest *srwšy* "punishment." In *TADAE* A6.3:6f., it accompanies the verb → *ʿbd* "to do, perform" and designates a punishment of slaves prescribed by edict.[7] In contrast, the Bactrian text is a list for the distribution of food (flour, wine, and oil) to administration workers. Here, as an *abstractum pro concreto*, the word evidently refers to the officials responsible for administering floggings.

Ezra 7:26 mentions punishment in a series of penalties for violations of the divine and the royal law in second place after execution, but before monetary fines and imprisonment. LXX understood the word correctly throughout and translated it with παιδεία, which also serves normally as the rendering of forms of the Hebrew root *ysr*.[8] Because of the misspelling *šršw*, the later history of interpretation sees here a form of *šrš* "to uproot"

and understands the word as “rejection (from the community).”[9] In Aramaic, however, “to uproot” is only → *ʿqr*. Consequently, this can hardly have been the original meaning.

סרך *srk* /sārak/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Generally, scholars trace the masculine *srk* /sārak/ to an Iranian origin.[1] In Aramaic, it first served as the title of a high official and later—if, in fact, the same lexeme—also as a designation of an established and juridically valid order.

II. Usage. First attested in Imperial Aramaic administrative texts from Persepolis, *srk* has the meaning "administrator, treasurer."[2] Unclear so far is its relation to *srkr* "leader, overseer"[3] in a Bactrian list of food to be distributed.[4] In the episode of Daniel in the lions' den, *srkyn* are very high officials to whom even the satraps (provincial governors), with whom they are regularly mentioned, must render account; thanks to the favor of King Darius, Daniel also numbers among them (Dnl. 6:3,4,5,7,8). No historical foundation for this hierarchy is perceptible.

In Aramaic texts from Qumran, in contrast, *srk* represents "order." With some certainty, one may emend *bs*[*rk* "accordingly" for the prescribed sacrificial practice.[5] The creation-theological interpretation of the courses of the stars[6] may constitute an additional instance, but the reading is dubious.[7] One encounters *srk* very often denoting "order, rule" in a few Hebrew documents, especially the Community Rule and the War Scroll.[8] In any case, it is uncertain whether exactly the same Imperial Aramaic official title or another form serves at Qumran for the abstract concept "order," especially since the word occurs in Jewish Babylonian as a *qitl*-noun /sirk/.[9]

סתר *str*; סתר *str* /setr/; מסתר *mstr* /mastar/; טמר *ṭmr*; צפן *ṣpn*

I. Etymology and Lexical Field. II. Use of the Verb "to Conceal." III. Use of the Noun "Hiding Place."

I. Etymology and Lexical Field. In Aramaic, the West Semitic verbal root *str* "to conceal" is less productive than in Hebrew. It appears in the factitive D-stem "to conceal something" and in the related t-passive "to be concealed"; later, the C-stem and the Gt-stem "to seclude oneself," synonymous with the D-stem, appear.[1] There is no etymological relation to the synchronous, homonymous root *str*,[2] in the G-stem "to destroy."[3] The masculines /setr/[4] and /mastar/, both meaning "hiding place," derive from *str* "to conceal."

The semantic nuance of this verb makes it difficult to distinguish it from its synonyms: on one hand *ṭmr* in the G- and C-stems;[5] on the other *ṣpn* in the G-stem "to be hidden"[6] and in the C-stem "to conceal."[7] Furthermore, it overlaps with *ksī*, in the G-stem "to conceal oneself" and in the D-stem "to cover."[8]

II. Use of the Verb "to Conceal." As a verb, *str* first appears in Biblical Aramaic as a substantival feminine passive participle *mstrtʾ* "the hidden" (Dnl. 2:22). It parallels *ʿmyqtʾ* "the profound, unfathomable" in a wisdom praise of God who reveals the hidden.[9] The three certain instances from Qumran are translations: 4Q583 1:2[10] corresponds with *ḥsī* "to conceal oneself" from Isa. 14:32; 11Q10 13:2 and 25:5 (Job 28:21; 34:29) render the Hebrew cognate.[11] In contrast, 4Q531 11:1 and 4Q541 24 2:3 are so corrupt that the reading and context remain unclear.

III. Use of the Noun "Hiding Place." The noun *str* /setr/ appears in the proverbs of Aḥiqar,[12] *mstr* /mastar/ in 4Q201 1 2:7 (1 En. 4:1), both denoting "protection, cover."

עבד ʿbd; עבד ʿbd /ʿabd/; עבידה ʿbydh /ʿabīdā/; עבד ʿbd / ʿobād/; מעבד mʿbd /maʿbād/; אמה ʾmh /ʾamā/

I. Lexical Field and Grammatical Constructions. II. Usage of the Verb. 1. “To Make.” 2. “To Act, to Do.” 3. Passive. III. Noun “Servant.” IV. Noun “Work, Service.” V. Noun “Act, Action.” VI. Verbal Noun “Deed.”

I. Lexical Field and Grammatical Constructions. Forms of the common West Semitic root *ʿbd* and its numerous nominal derivatives are very productive in Aramaic. In contrast to Hebrew, Ugaritic, and Arabic, here the verb does not mean “to serve,” but either “to make” in the sense of “to produce” in terms of a concrete result or “to do, to demonstrate” with a view to the action itself. For this meaning, Hebrew usually employs the verb *ʿśī* and Phoenician and Arabic *pʿl* (rare in Hebrew), while Aramaic employs → *plḥ* and, at first only sporadically, *šmš* for “to serve.”

ʿbd occurs in the G-stem with the related t-stem and in pre-Christian Aramaic with the internal passive for the nonactive diathesis “to be made” or “to be bestowed” (→ II.3). The exact nuance depends on the nature of the concrete or abstract object. Furthermore, various prepositional supplements appear with particular regularity for “to do,” *l*- for the indirect object “to someone,”[1] *ʿl* “against, to the disadvantage of,”[2] *b*- “with/to someone,”[3] and *ʿm* also “to”[4] or “with,”[5] and *qdm* “to”;[6] in the t-passive “to be bestowed” also *mn* “to someone”[7] or, rarely, of the agent.[8]

The related nouns represent the entire semantic spectrum of the root. The meaning of the verb “to serve,” no longer productive in Aramaic, survives in /ʿabd/ (> /ʿabəd/) “servant”;[9] either the substantival feminine passive participle /ʿabīdā/ “work, service,” usually employed specifically,

or the general masculine verbal noun /ʿobād/ “act, action” refers to the act; finally, the rare, also masculine verbal noun /maʿbād/ “deed” denotes the result of the action.

II. Usage of the Verb. The verb *ʿbd* belongs among the most frequent Aramaic roots, is already ubiquitous in older material, and occurs in very many general or register-specific shadings.[10] Nevertheless, a fundamental difference may be identified between usages that refer to a specific result (“to make, produce), and those in which the action stands in the foreground (“to do”) and that must be translated with a variety of main verbs depending on the nature of the object. The use of “to do” as an auxiliary verb, as, e.g., in Modern Persian or Turkish, seems marked, especially beginning with Imperial Aramaic; its frequency even in comparison to other Semitic languages stands out. It remains unclear, however, whether it involves an independent Aramaic development, with at least an element of Iranian influence, or primarily a reduction of lexical complexity in the course of the far-reaching use of Aramaic as a contact language.

The participle serves as a *nomens agens* “creator” or “doer.” Because of its dual nature, it also appears in a nominal usage in the construct state when it can be defined by a genitive relationship with the subsequent word. The diction in this regard remains constant over the centuries.

1. “To Make.” The earliest Aramaic sources already attest *ʿbd* with a specific material object to denote a creative activity that leads to a tangible result. Already in the Tell Fekheriye inscription (ca. 850 B.C.E.), the verb denotes the production of a statue by its commissioner.[11]

In the Achaemenid period and later, the number of occurrences increases sharply. Here, alongside “to (have) produce(d),”[12] specialized usages also appear. In reference to divine subjects, the verb denotes “to create,”[13] in reference to wine “to produce.”[14] With a dual direct object, the verb can denote “to turn something into something”[15] and, therefore, overlaps with the D-stem of → *šwī* and the G-stem of → *śīm*. The participle can also be employed substantivally for “producer of.”[16]

2. "To Act, to Do." Further, the nuance *ʿbd* "to do, to effectuate" with an abstract object appears regularly since Old Aramaic: thus already often in the Sefire treaties of state "to act thusly [*kn*],"[17] "to do whatever is good,"[18] and "to commit a treaty infraction [*mrmh*]."[19]

From the fifth century B.C.E., everyday speech and then literary texts also attest the verb well so that the diction in the sources develops further. It occurs in the quite general sense "to do, act, proceed,"[20] "to do something for someone, to do something to someone,"[21] in official regulations for "to behave (thusly/in accordance with the agreement)."[22] Furthermore, numerous idiomatic expressions occur, as in administrative diction "to convey,"[23] "to adopt something (of goods) as one's own [*lnpšh*],"[24] "to perform" (e.g., of repairs or other tasks),"[25] "to issue (an instruction)"[26] or "to make an oath."[27] Similarly, in reference to events as object such as a sacrifice,[28] a rebellion (Ezr. 4:15), a temple dedication (Ezr. 6:16), a banquet (Dnl. 5:1),[29] or a battle[30] it can denote "to organize." Further, it means "to commit a crime" (Dnl. 6:23) and "to work a miracle" (Dnl. 3:32; 6:28). In the terminology of documents, *ʿbd dyn* "to hold a proceeding,"[31] with → *dt* also "to follow a law" (Ezr. 7:26), and officially with *zmnʾ* "to establish the time."[32] The numerous, although mostly fragmentary instances in Imperial Aramaic private correspondence on ostraca suggest that the verb was also widespread in colloquial speech.

Specific expressions with other abstract objects first appear at Qumran, but connect as a whole with the Imperial Aramaic evidence: "to make something sound,"[33] "to produce joy,"[34] "to show honor,"[35] "to exercise dominion,"[36] and "to pass time."[37] Otherwise, along with other terms for criminal behavior such as *ḥms* "wrong," one can also "do" a lie;[38] cf. "to do the truth" in Jn. 3:21 and 1 Jn. 1:6.[39]

3. Passive. Imperial Aramaic formed the actual passive of *ʿbd* internally through an ablaut.[40] Except for the participle, this internal passive disappears at the end of the first millennium B.C.E., first in the imperfect. Because of this development, the sometimes middle, sometimes reflexive

Gt-stem was expanded with the passive diathesis.[41] To date, Old Aramaic has yielded no pertinent instances of *ʿbd*, but Imperial Aramaic and later attest the passive categories for a variety of the usages also attested in the active, mostly in the Gt-stem: "to be made into something" in Dnl. 2:5; 3:29 and Ezr. 6:11;[42] "to be performed" in Ezr. 5:8;[43] 6:12 or 7:21,23;[44] "to be instigated" in Ezr. 4:19 (rebellion, active in 4:15); "a proceeding will be held" in Ezr. 7:26;[45] sporadically even others, such as *TADAE* A6.8:4; 6.10:9; D1.32:15 with *ptgm* "word" for "to be admonished." Most of the Imperial Aramaic instances of the t-stem come from official letters, where passive expressions apparently already belong to the bureaucratic writing style of the period.

The passive participle points to the result "made, done,"[46] even in specialized usages,[47] and is often indistinguishable from the passive perfect third-person masculine singular; the t-stem participle emphasizes an action underway "being made, done."[48]

Idiomatically, the passive participle *ʿbyd* "made" in *ʾyk ʿbyd* can represent "how it is going, what is happening"[49] and together with *ʾtr* "place," "resident."[50]

III. Noun "Servant." In the noun *ʿbd* /ʿabd/ "servant," Aramaic preserves the meaning of the root "to serve" that disappears for the verb after the Old Aramaic period. As a term for legal or social status, *ʿbd* can mean "slave,"[51] with *ʾmh* /ʾamā/ "maid" as a feminine counterpart,[52] and then is often mentioned together with the owner.[53] Consequences of bondage include beating and sale, as proverbs[54] and legal texts[55] demonstrate. As a designation for subordination, in contrast, *ʿbd* means "servant."[56] In this sense, which is sometimes indistinguishable from simple servants,[57] *ʿbd* can even refer to high-ranking persons[58] and, in reference to a vassal relationship, it functions as a counterpart for → *mrʾ* "lord" even in royal self-designations.[59] Formal style, such as in letters or at court, also knows it as a self-designation when relating to a person

deserving respect.[60] As a parallel, religious speech employs the word for "servant of God."[61] Consequently, together with a theophoric element, it constitutes a frequent component of masculine names.[62] In 11Q10 2:5; 18:6; 35:7 (Job 19:16; 31:13; 40:28) it represents the homonymous Hebrew counterpart. The term → *ʿlym* can also act as a synonym.[63]

The verb *šʿbd* "to enslave," first attested with certainty later in East Aramaic, derives from the noun with an analogous expansion of the *š*-causative borrowed from the Akkadian on a West Semitic root.[64] The suggestion by E. M. Cook[65] to reconstruct a corresponding form in 4Q246 1 I 8 *yšt*]*ʿbdwn* "they shall be subject to him" is highly questionable. Indeed, É. Puech's interpretation[66] as "to serve" must be incorrect since Aramaic never employs *ʿbd* in this manner. Instead, as long as only East Aramaic attests *šʿbd*, one of the other possible emendations in the preceding lacunae is preferable, e.g., *y*]*ʿbdwn* "they [will d]o."[67]

IV. Noun "Work, Service." The verbal noun *ʿbydh* /ʿabīdā/ "work, service" is originally a feminine passive participle, but was probably no longer perceived as such, especially since it parallels the semantic spectrum of the noun /ʿabd/. It already appears beginning with the late Old Aramaic proverbs of Aḥiqar in the later widely employed usage as the object of the verb *ʿbd* "to perform a task,"[68] likewise l. 21, *TADAE* B2.4:10 and A6.7:9, presumably also in A4.1:5 (in reference to the prohibition against working on the festival; partially destroyed). With the marker of existence, *ʾyty ʿbydh l-* means "to have something to create."[69] In the construct state, it refers to "work on": Ezr. 4:24; 5:8 (with *ʿbd*); 6:7 "construction on"; Ezr. 6:18 "worship"; Dnl. 2:49; 3:12 to service in the royal administration, as in the court novella 4Q550 1:3; 2:7; 4:2. The supposed meaning "worker" is uncertain.[70]

V. Noun "Act, Action." Only post-Achaemenid Aramaic attests *ʿbd* /ʿobād/ "action," especially in the plene spelling *ʿwbd* at Qumran, where the word occurs regularly. There it mostly denotes, not an accomplishment, like *ʿbydh*, but, similar to → *ʾrḥ* II.2 the manner of action or the behavior.[71] It sometimes occurs together with a negative term such as *šqr* "lie,"[72] *ḥšyk* "dark,"[73] or *qšh* "gruesome"[74] for the misdeeds that reveal the corrupt character of a being, but also positively for action rooted in holiness and truth.[75] In addition, it can refer to the regular behavior of nature[76] and to the established sacrificial procedures.[77] In 11Q10, it once represents *mʿbd*, which was probably borrowed from Aramaic (25:2 [Job 34:25], → VI), otherwise the authentically Hebrew *pʿl*.[78] Finally, in building inscriptions, it denotes "construction."[79]

VI. Verbal Noun "Deed." Less common in older Aramaic is the verbal noun *mʿbd* /maʿbād/ "deed," which can be distinguished by context from the infinitive of the verb *mʿbd* /maʿbad/, which is identical in a consonantal spelling. It has no specific nuance: in Dnl. 4:34 the plural denotes God's majestic demonstrations of power; in 4Q201 1 4:5 (1 En. 8:3), the misdeeds that humans learned, to their undoing, from the fallen angels; and in 4Q542 1 1:2, God's creation in a genitive construction with → *mrʾ*.[80] Jason's epitaph,[81] if this interpretation is correct, seems to employ it for "construction," supporting the interpretation above of 4Q542 1 I 2 as "manufactured." The word then appears in East Aramaic with the very specific connotation "magical deed."[82]

23. *TADAE* A6.10:3,7; 6.15:7.
24. *TADAE* A4.7:13; 6.15:6; B7.2:6, following *lqḥ*.
25. *TADAE* A6.2:22, etc.; 6.7:9.
26. *TADAE* A6.3:8; 6.13:3f.; 6.14:3; Naveh and Shaked, A6,6,9.
27. *TADAE* B2.8:6.
28. *TADAE* A4.7:22.
29. Cf. 4Q545 1a 1:6.
30. *TADAE* C2.1:12,15,22,32, etc.; Dnl. 7:21; 1QapGen 21:24; 4Q246 1 2:8; 4Q531 22:4.
31. *TADAE* B2.6:31; 3.8:32,38; 6.4:6; 1QapGen 20:13; → *dīn* II.1.

32. As in the correspondence of Bactrian satraps: A4,2 in Naveh and Shaked, probably also to be reconstructed in A2,4.

33. 4Q246 1 2:6.

34. 4Q542 1 1:3.

35. 4Q242 1-3:5.

36. 4Q550 1:6f.

37. 1QapGen 22:28; cf. J. A. Fitzmyer, *The Genesis Apocryphon of Qumran Cave 1 (1Q20)*. *BietOr* 18/B (^{3}2004), 254, with NT parallels.

38. *šqr*; 1QapGen 11:14; 11Q10 24:2 (Job 34:8); here, as in similar passages, a const. ptcp.; consequently, *ATTM*, 650 and 2, 449 interpret it substantively as "doer of" and, together with comparable cases, list it as a separate lexeme.

39. According to *ATTM*, 2, 184 also 4Q196 17 2:4f. (Tob. 13:8); but the reading is controversial, contra J. A. Fitzmyer, *Tobit*. *CEJL* (2003), 310 (Tob 13:6).

40. See e.g., *ʿbyd* "it was done" in *TADAE* A4.7:15, probably a passive perfect.

41. Thus, e.g., *ytʿbd* "it will be done," *TADAE* A4.5:9; 4Q198 1:5 (Tob. 14:4); 4Q529 1:10.

42. Active in *TADAE* B3.9:6f.,9.

43. Work, active, e.g., in *TADAE* A6.2:22.

44. Commands, active, e.g., in *TADAE* A6.3:8.

45. Active, e.g., in *TADAE* B2.6:31.

46. E.g., *TADAE* A3.3:9 or A4.7:20; in a periphrastic phrase "to be built" in Naveh and Shaked, A5,2.

47. Thus, very often "is conveyed" in reference to taxes in the import and export list *TADAE* C3.7.

48. Cf. *TADAE* A4.9:11 *lqbl zy lqdmyn hwh mtʿbd* "to care to be done exactly as before" Naveh and Shaked, A5,1 "being built," the result appears then in l. 2 with the pass. ptcp., see above.

49. *TADAE* A3.3:6; 4Q552 1:9; cf. H. Gzella, *Tempus, Aspekt und Modalität im Reichsaramäischen*. *VOK* 48 (2004), 180,186; see also the discussion there of the difficult expression in C2.1:66.

50. *TADAE* B2.2:3; D2.12:3.

51. *KAI* 233.13, the king gave these persons [l. 7]; *TADAE* B2.11:4,5,17; 3.9:5,7,9.

52. *TADAE* B3.1:10; 3.13:11; in property lists.

53. Cf. *TADAE* A6. 3:7; B8.7:5.

54. *TADAE* C1.1:178f.

55. Sales contracts from Samaria.

56. Often as a title in seal and other inscriptions on objects, see Schwiderski, 624.

57. Perhaps 1QapGen 22:6.

58. *KAI* 224.13.

59. *KAI* 216.3; 217.4; 266.1,6,8; → *mlk*.

60. Father: *TADAE* A2.1:13; 2.4:1; superior: A4.7:1,4,22; king: Dnl. 2:4,7; Ezr. 4:11.

61. Dnl. 3:26,28; 6:21; Ezr. 5:11; 4Q213a 2:8,10.

62. E.g., *ʿbd ngw* for an original *ʿbdnbw* “servant of Nabu” in Dnl. 2:49; 3:30; cf. *ATTM*, 650 and 2, 449.

63. Literally “boy.”

עבר *ʿbr*; עבר *ʿbr* /ʿebr/; מעבר *mʿbr* /maʿbar/; עבור *ʿbwr* / ʿebbūr/

I. Etymology and Lexical Field. II. Verb. 1. G-stem “to Cross.” 2. Causative-stem “to Convey.” III. Noun “Something Beyond.” IV. Rare Noun Forms.

I. Etymology and Lexical Field. All branches of the Semitic languages know forms of the verbal root *ʿbr* “to pass through, over,” including Aramaic and the other languages of Syria-Palestine. Beginning at Qumran, the verb is well attested, appears mostly in the transitive or intransitive G-stem, and with a living subject literally denotes the movement of “going through, passing over, passing by,” and is, therefore, more specific than → *hlk*/*hūk* and *ʾzl* “to go.” Less often, it appears figuratively for the transgression of commandments or for “to disappear.”[1] In descriptions of places, it occurs with geographical terms for “to extend.” Depending on the nuance, prepositional supplements may accompany it, such as *b*- “to pass by” or *l*- “to extend toward.” Less common is the transitive C-stem “to bring over.” Jewish Palestinian and Jewish Babylonian, however, attest the D-stem in this and a few other nuances,[2] while Syriac and others retain the C-stem.[3] All stems form a t-passive.

The most common nominal form of this root is the masculine /ʿebr/[4] “opposite side (i.e., of a river, etc.).” Since the Achaemenid period, it functioned generally as part of the place name *ʿbr nhrʾ* “beyond the river” for Syria-Palestine (→ III). Other, although substantially more rare, derivatives include the likewise masculine nouns /maʿbar/ “ford” and /ʿebbūr/ “intercalation” (with calendrical expressions), attested only later.

So far, no relationship has been established between the verbal root *ʿbr* and the masculine /ʿabūr/ "grain," well-attested beginning with Imperial Aramaic in legal and commercial texts.[5] It probably involves a word with a still unclear etymology and the original meaning "harvest."[6] Aramaic does not attest the homonymous Hebrew root *ʿbr* II "to be angry, to grumble"[7] with certainty (→ II.2).

II. Verb. As a verb, *ʿbr* in the G-stem "to cross over" may already appear in Imperial or even later Old Aramaic, but the similarity between *r* and *d* does not permit a confident distinction from *ʿbd* "to make, to do,"[8] especially not in the fragmentary context of the oldest possible instances.[9] The same is true for the difficult expression at the beginning of the unidiomatic Aśoka inscription *KAI* 279.1.[10] The verb first definitely appears in Aramaic texts from Qumran. The oldest absolutely certain instance of the C-stem "to bring over" also appears, after one disputed Old Aramaic instance, at Qumran.

1. G-stem "to Cross." Because of the broad spectrum of usage, the precise nuance of *ʿbr* essentially depends on the context, but it always denotes a movement in a specific direction. For the terminative "to arrive, to reach," in contrast, Aramaic employs → *mṭī*, 1QapGen notably → *dbq*. In 4Q243 12:3, with persons as the subject, it refers to the crossing of the Jordan River, which follows the suffixed infinitive *mʿbrhwn* "its crossing" here as a direct object. Metaphorically, it serves in religio-ethical speech for the transgression of divine laws.[11] An additional form of *ʿbr* may appear in 4Q201 1 2:1 (1 En. 2:1) in reference to the stars, which do not leave their fixed courses.[12]

The apocalyptic terminology of the book of Enoch employs the verb with heaven as a subject to mean "to disappear"[13] in an expansion of the literal meaning "to pass over," as it appears in 4Q213 1-2 2:18 negated in reference to an eternal kingdom or priesthood (the subject is lost in the lacuna in the preceding text) with *mn* "from." According to *ATTM*, 2, 97, it

also occurs with a similar nuance at the end of 1QapGen 13:16 in reference to a wind.[14]

Contrariwise, with a geographical term like a boundary (*tḥwm*), *ʿbr* denotes "to pass through"[15] or with a section of land (*ḥwlq*) "to extend toward (*l*-)."[16]

Other idiomatic usages, such as *ʿbr ʿl* "to come over someone" in 4Q545 1a 1:4, are uncertain.[17] Similarly, Beyer reads a Gt-stem *ytʿbr* "it will run out" in 4Q198 1:5 (Tob. 14:4), while others prefer *ytʿbd* "will happen."[18] Regarding 4Q343, → II.2.

2. Causative-stem "to Convey." Outside Aramaic proper, the C-stem of *ʿbr* "to convey" already appears in Samʾalian in the eighth century B.C.E. where both the morphology and the context confirm it.[19] The earliest possible Old Aramaic specimen is *KAI* 224.17 from Sefire. In the context, *yʿbrnh* may very plausibly mean "and he removed him" (i.e., the successor to the throne from his position) and is grammatically possible as an early phonetic spelling without /-h-/.[20] To be sure, a form of *ʿbr* II "to be angry" merits consideration,[21] but this root is unusual later in Aramaic.

Furthermore, the form *yʿbr* with the added phrase *lydyk* in a letter in Nabatean script circa the birth of Christ[22] may be added and translated "and he will be transferred into your hands."[23] Contrarily, *ATTM*, 2, 450[24] assumes a G-stem with the meaning "to pass over (into someone's hands)" when, however, one would expect, in light of other Aramaic texts, *npl* with the nuance "to fall to."[25] Since almost nothing of the broader context survives and cannot be reconstructed from parallels, no decision can be made.

Meanwhile, only the internal passive of the C-stem in 4Q206 1 26:20 (1 En. 32:3) "to be brought over" can be considered assured for older Aramaic. It appears in the report of Enoch's heavenly journey.

III. Noun "Something Beyond." In Biblical Aramaic, the root occurs only in the form of the noun /ʿebr/ (> /ʿebar/) in the toponym *ʿbr nhrʾ* "Beyond the River" (Ezr. 4:10f.,16f.,20; 5:3,6; 6:6,8,13; 7:21,25). Since Achaemenid times, it was the official name of Syria-Palestine,[26] which the official style of the book of Ezra also employs. Furthermore, it appears on coins from Cilicia.[27] Later, the word appears in compound prepositions meaning "beyond."[28]

IV. Rare Noun Forms. Of the other nouns, *mʿbr* /maʿbar/ "ford"[29] may already occur in 1QapGen 11:9 according to *ATTM*, 2, 94, but the reading is disputed.[30] Gravestones from Zoar[31] contain additional instances of *ʿbwr* / ʿebbūr/ "leap year"[32] and Jewish Palestinian and Jewish Babylonian have the D-stem of the verb.[33] Later, West and East Aramaic literary diction attests further noun forms from the lexical field of crossing.[34]

עדי ʿdī; עדי ʿdy /ʿady/(?); עדינה ʿdynh /ʿedyānā/

I. Etymology and Lexical Field. II. G-stem “to Go Away.” 1. Old and Imperial Aramaic. 2. Biblical Aramaic. 3. Qumran. III. Causative-stem “to Take Away.” IV. Noun “Payout.” V. Possible Noun “Pregnancy.”

I. Etymology and Lexical Field. Aramaic *ʿdī*, in the G-stem “to go away,” developed from an older, common West Semitic root **ʿdū* with cognates in Ugaritic, Arabic, Old South Arabian, and a few Ethiopian Semitic languages.[1] In contrast, the two Hebrew instances[2] are probably borrowed from Aramaic, but that cannot be demonstrated with certainty. Although plausible, there is no etymological relation to the homonymous root *ʿdī* II “to adorn (oneself),” well-known in Hebrew,[3] which is apparently not native to Aramaic.

Old Aramaic already attests the root *ʿdī* “to go away,” which remains productive throughout older Aramaic. Its distribution in royal representation texts, official correspondence, private documents, and religious literature, indicates that it belongs to the register of literary language; at the same time, it has points of contact with the semantic spectrum of various colloquial verbs. The G-stem usually functions as a transitive for “to go away,” negated, often to designate imperishability, and, with an abstract subject, to mean “to cease.” Consequently, it overlaps with the use of *ʿbr* “to pass over” in the same sense,[4] with the frequent verb → *sūp*, and with *bṭl*. As a verb of motion, *ʿdī* takes the supplement *mn* “from” and expresses the additional nuance “to come, to arrive at (*b*-)” (→ II), which → *mṭī* usually expresses.[5] In a few Old and Imperial Aramaic instances, however, the verb seems to serve intransitively for “to pass over” and, thus, to correspond exactly to *ʿbr*.

Contrariwise, the transitive C-stem has the meaning "to take away, remove" and occurs with concrete or abstract objects. It seems more often to have specifically juridical or constitutional legal connotations. The preposition *mn* "from" may accompany it. With this nuance, the root denotes a verbal act of high transitivity and, thus, forms a t-passive of the C-stem "to be removed," as one might expect. Mostly, however, the very general verb *lqḥ* "to take,"[6] and less often, → *nṣl* "to snatch away" or, in older phases of the language → *nśī* "to lift up, to take away" fulfilled this function. The very general verb usually denotes "to take away" in the everyday sense, however. Jewish Babylonian preserves the C-stem of *ʿdī* only as an archaism, however, and has otherwise given way to the D-stem "to remove," "to cast."[7]

The related masculine noun *ʿdy* "payout" also belongs to technical legal diction and occurs in some Nabatean private documents.[8] Because of the final /-w/, which preserves the original third radical of the root, on the other hand, the noun *ʿdw* /ʿadw/ "garnishment" in another Nabatean contract[9] cannot be originally Aramaic, but stems from the Arabic. It would then belong to a native Nabatean legal tradition.

Finally, the feminine *ʿdynh* /ʿedyānā/ "pregnancy" occurs very rarely—if at all. It seems to be interchangeable with its synonym *hrywn* /heryōn/[10] and belongs to the nuance "to be pregnant" of the D-stem of *ʿdī* in later Jewish Palestinian.[11] The two possible instances in older Aramaic are disputed, however (→ V).

Syriac knows numerous additional noun forms, most of which have the common nuance "strange, strangeness."[12]

II. G-stem "to Go Away."

1. Old and Imperial Aramaic. The meaning of the verb *ʿdī* "to go away" seems to be less specific so that it occurs with widely varied nuances. In the earliest instance, the text of an Old Aramaic dedication gift on a horse bridle, it refers transitively to "crossing over" with a river as direct object[13]

and, therefore, quite in analogy with *ʿbr*. Something similar pertains to an Imperial Aramaic grave inscription from Dascyleion,[14] which addresses passers-by on the street.[15] Three additional instances from the Imperial Aramaic documents of the Bactrian archive have instead the typical meaning "to go away from [*mn*]."[16]

2. Biblical Aramaic. The post-Imperial Aramaic material attests an even broader usage. In Dnl. 3:27, *ʿdī* referring to the smell of smoke denotes "to reach," the preposition *b-* presumably designates the goal "to,"[17] thus, "to adhere to," for which, based on typical Aramaic diction, one would expect *mṭī* or *dbq*.[18] Otherwise in the book of Daniel, *ʿdī* has the nuance "to decay" and refers to the dominion that earthly kings can lose,[19] but the people of God cannot (7:14). This usage relates to the corresponding use of the C-stem in statements concerning God's power to install and depose kings at will (→ III). The negated verb also appears in Dnl. 6:9,13 in a formulaic expression for an inalterable law.[20]

3. Qumran. At Qumran, alongside the literal meaning "to go away,"[21] the figurative meaning "to pass away, disappear" predominates, as in 4Q536 2 2:13,[22] 4Q542 1 2:8,[23] and 4Q541 9 1:4.[24] The form *ʿdˀ*, which *ATTM*, 2, 97 reads as the penultimate word in 1QapGen 13:12 paralleling *sp*[25] "he decayed and perished," has the same meaning. The fragments of the letters are unclear, however, and other editors have instead translated "the water" as the subject of the verb *sp*.[26] In 11Q10 3:7 (Job 20:5) *lʿbʿ tʿdˀ* "it perishes soon" rather freely translates the Hebrew expression *ʿdy rgʿ* "only a moment," singular in this specific combination, presumably primarily because of the graphic similarity of the verb.

The legal diction of the Nabatean contracts from the Dead Sea knows the verb with the nuance "to become invalid," as in Dnl. 6:9,13 (→ II.2), either in the formulaic expression at the conclusion of a document, *yʿdˀ dyn lˀ brš̌ˀ* "a decision will be invalid without a creditor"[27] or in other formulations.[28]

Finally, *ʿdī mn* appears in the *Megillat Taʿanit* in the sense "to depart from" in reference to a religious law.[29]

III. Causative-stem "to Take Away." In comparison to the G-stem, the C-stem "to take away, remove" has a more closely defined meaning. The oldest instance from the proverbs of Aḥiqar employs the verb with an abstract object in the admonition not to remove wisdom;[30] the narrative framework employs it similarly in reference to the "removal" of sin (l. 50). In the official petition from the Elephantine community to the Persian government, it denotes the destruction of the temple;[31] in legal diction, the theft of property;[32] and in the Memphis harbor registry, the removal of a boat.[33]

The book of Daniel applies this official diction to the terminology of political theology; here the verb refers to the retraction of secular sovereignty (Dnl. 5:20, with *mn* "from"; 7:12,26) by God who has authority over the kings (2:21).[34] It serves for God's eradication of evildoers in 1QapGen 11:13,[35] in 19:21 for "to take away."[36] 11Q10 34:4,6f. (Job 40:8,10f.) employs it freely for *prr*, *ʿdī*, and *pūṣ*.

The t-passive occurs in *TADAE* A6.6:3, but without sufficient context. Meanwhile, some assume a possible t-stem of the G- or C-stem for the reading *ytʿdwn* in 4Q548 1 2-2:11.[37] The probable meaning "they (the sons of darkness) will be removed" argues for a t-causative stem. Yet, the two interior letters of the word are unclear and there is no immediate context that could supply clues as to the intent; Beyer[38] suggests *ytqrwn* "they will be called." No conclusion is possible.

IV. Noun "Payout." *ʿdy* "payout" occurs in a few Nabatean contracts from the Dead Sea,[39] mostly along with the Arabic loanword *ḥlṣ* "payment."[40]

V. Possible Noun "Pregnancy." Beyer[41] interprets the paleographically indisputable word *ʿdynh* in the episode of Lamech and Bettenosh[42] as a

feminine noun /ʿedyānā/ "pregnancy," for which, however, the same passage has *hrywn*;[43] it has a parallel in later Palestinian Targums.[44] Otherwise, however, it is associated with the noun *ʿdn* "arrogance,"[45] which is otherwise unattested in this form, and translated "joy, delight" like the Hebrew *ʿdnh*.[46] This second option better suits the context, but postulates an otherwise unknown word, while the first conforms to the Palestinian-Aramaic usage of *ʿdī* but does not explain the alternation between *ʿdynh* and *hrywn* for "pregnancy." Thus, the arguments are uncertain.

44. *ATTM*, 2, 451.

45. 1QapGen 11:12, also “Eden” in Heb.

46. Fitzmyer, 130; Machiela, 35f., in contrast, fluctuates and has “desire” in l. 9 and “pregnancy” in l. 14.

עדן ʿdn /ʿeddān/

I. Root and Lexical Field. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Root and Lexical Field. Research manifests an increasing consensus linking the masculine substantive /ʿeddān/ "fixed time" with the common Semitic root **wʿd* "to determine."[1] Nouns related to this root designate a specific and limited time span. Nonetheless, /ʿeddān/ need not refer to the exact moment of a specific event. In Akkadian, *adānu* (*adannu*) denotes a limitation of time or a fixed date, just like Aramaic /ʿeddān/. In Ugaritic, *ʿdt* and *mʿd* refer to an assembly of deities that occurs on special occasions such as Kirta's celebration of his wife in the presence of the gods in *KTU* 1.15 II 7.11. The Hebrew *mōʿēḏ* also generally means "fixed time" in reference to a ritual or a procedure; the word *ʿēḏā* denotes the religious community itself. Here, the concept of "time" has close ties with "holy time," i.e., the experience of the holy in the course of time through religious festivals and the seasons of the year. It differs from the spatial dimension as it appears in temples, sanctuaries, and sites of prayer.

Such a semantic development, however, cannot be demonstrated for the Aramaic /ʿeddān/; this word consistently has a purely chronological meaning. Its synonym → *zmn* expresses the chronological nuance even more clearly. The two occur together in Dnl. 2:21 and 7:12 (→ III). The temporal adverb *kʿt* "now" in a Sefire stele[2] represents an additional temporal term.[3] The form *kʿn* occurs in Imperial Aramaic also in *TADAE* A4.7:3; the parallel version in 4.8:3 has *kʿt*. Both introduce a new topic.

II. Imperial Aramaic. Old Aramaic does not attest /ʿeddān/. Imperial Aramaic employs the word in various prepositional expressions with adverbial functions,[4] the most frequent of them with more than twenty certain examples in *bkl ʿdn* "at any time," i.e., "ever," further in *bʿdn zy* "at the time when, immediately" and *mn ʿdnʾ* "since that time." Other examples are *bzk ʿdnʾ* "at that time";[5] *lʿdn ʾḥrwn* "at a later time" (l. 49); *kzy ʿdn* "as soon as it passes."[6]

III. Biblical Aramaic. All thirteen specimens of the word in Biblical Aramaic, vocalized *ʿiddān*, occur in Daniel. Two of them appear in the adverbial expression *b^{e}ʿiddānā dī* "immediately" (3:5,15). In two others, it stands as a noun in the true sense, as in 2:8 where it designates the time that the dream interpreters want to gain,[7] and in 2:9 with "as soon as the time changes" in reference to a situation in which there is no need to hurry. Seven passages employ the noun in the sense of "year," that is for a full cycle of months. Thus, the expression *šiḇʿā ʿiddānīn* in Dnl. 4:13,20,22,29 (LXX 4:16,23,25,32) denotes the seven years of Nebuchadnezzar's insanity. The same usage appears three times in the indication of the period in 7:25 *ʿaḏ ʿiddān w^{e}ʿiddānīn ūp̄^{e}laḡ ʿiddān* "for one year and two years and a half year." Furthermore, the word appears twice together with *z^{e}mān* for time in its natural course, thus for the seasons of the year: 2:21 *ʿiddānayyā w^{e}zimnayyā* "times and periods";[8] 7:12 *z^{e}man w^{e}ʿiddān* "for a period and a time," i.e., a limited span of time. The underlying concept of time is inseparable from the belief that God establishes the time of a specific event. Thus, *ʿiddān* and *z^{e}mān* express this idea. Ecclesiastes 3:1 employs the two Hebrew terms *ʿēṯ* and *z^{e}mān* for this same idea.

In the Greek translations of the book of Daniel, καιρός consistently represents *ʿiddān* with the nuance "fixed moment." If the noun refers to the year, after all, the original Greek version (Old Greek, OG) of 4:16 (4:13 MT; OG does not have it in 4:20,22,29) renders it passably with ἔτος "year,"

while Theodotion (Th) has καιρός. In 7:25, however, both OG and Th translate καιρός. The adverbial expressions, in turn, have various counterparts: *b^{e}ᶜiddānā dī* in 3:5 appears as ᾗ ἂν ὥρᾳ "at whatever time" Th, but as ὅταν "when" in OG. In 3:15 Th writes ὡς ἂν "if, when," OG employs ἅμα "immediately."

IV. Qumran. At Qumran, the word appears nineteen times, frequently in the adverbial expression *ᶜd ᶜdn dy* "until the moment in which; until," e.g., in 2Q24 4:19; 4Q534 1 1:4; 4Q546 9:5; 4Q554 3 3:20. Qumran also attests its use as a noun in the sense of "fixed time," however: *ᶜdn ršyᶜyn* "the time of the evildoers" (4Q536 2 2:13), *bᶜdn qṣ* "the time of the end" (4Q558 28:1), *dynyn bᶜdnyhn* "judgments at their times" (4Q568 1:1), *ᶜdn* ᶜ[*qt*]ᵓ "the fixed time of oppression" (11Q10 31:1 [Job 38: 23]), and *ᶜdn mwldhyn* "the time of their (i.e., the mountain goats and hinds) bearing" (11Q10 32:2 [Job 39:2]). The other instances resist precise definition because of their poorly preserved contexts.

עוּר ʿ*wr* /ʿūr/; אדר ʾ*dr* /ʾedder/

I. Etymology and Lexical Field. II. Noun “Chaff.” III. Noun “Threshing Floor.”

I. Etymology and Lexical Field. The substantive ʿ*wr* /ʿūr/ “chaff” may involve an Aramaic primary noun;[1] Hebrew employs the word *mōṣ*.[2] It occurs in older Aramaic only in the vision of the colossus with clay feet in Dnl. 2:35, but Syriac also attests it thereafter[3] as a feminine that may be related to the Arabic ʿ*uwwār* “dust.”[4] The masculine noun ʾ*dr* /ʾedder/ “threshing floor” belongs to the same semantic field,[5] originally a *qittil*-form subsequently revocalized as /ʾeddar/.[6] In Dnl. 2:35 it appears with /ʿūr/, but also appears elsewhere in isolation. In any case, the exact paradigm in the Tiberian vocalization of the plural cannot be deduced from the construct state (ʾ*idd*^{e}*rē*) attested only here.

II. Noun “Chaff.” The context of the sole instance of ʿ*wr* in older Aramaic is the comparison in a dream vision of the statue pulverized[7] with a stone to chaff on a threshing floor in the summer (*whww kʿwr mn ʾdry qyṭ*). The statue of various metals, but with feet of mixed iron and clay, symbolizes four empires with diminishing worth, the latter weak because of a lack of internal unity, and the stone the kingdom of God that constitutes the conclusion of history. This vision pictures the reversal of circumstances: a single stone[8] smatters the colossus and itself grows into a mountain that fills the earth,[9] while the gigantic statue collapses into dust. The wind, however, carries the dust away,[10] so that it cannot be found anywhere. Thereby, all memory of the central concerns of the earthly kings who

glorify their deeds in inscriptions also vanishes.[11] The formulation of the comparison alludes to the summer as the time of harvest and judgment.[12] Consequently, secular and divine power prove to be incommensurable.

III. Noun "Threshing Floor." Besides Dnl. 2:35 (→ II), *ʾdr* "threshing floor" also appears in debt instruments of the Neo-Assyrian period in the translation of the Akkadian expression *ina adri* "on (a) threshing floor," which establishes where the lent grain should be returned.[13] The word occurs further in an early Achaemenid lease agreement (515 B.C.E.)[14] in relation to the transportation of grain by ass. It continues in dispute, however, whether the Babylonian name of the twelfth month, /ʾadar/ (Feburary/March), is etymologically related as the "month of threshing."[15]

עֵז ʿz /ʿezz/; צפיר ṣpyr /ṣapīr/

I. Etymology, Overview. 1. Goat. 2. Male Goat. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology, Overview.

1. Goat. The initial form of the Semitic designation for goat in general and the female goat in particular was apparently */ʿanz/. The form */ʿinz/[1] also comes into question, although not only *ʿanz* in Arabic, which retains an accented *-i-* after ʿ at least in nominal forms, but also Akkadian *enzu*, *ezzu*[2] with regular *e-* < *ʿ*a-*,[3] and the early Canaanite instances of *ḫazzum* and *ḫazzatum*[4]—*ḫ* is the cuneiform spelling of ʿ—speak more for an old *a*.

The word may have originally been a collective, as suggested by the Old Canaanite *nomen unitatis ḫazzatum* (see above) and the Old South Arabian *ʿnz* "goats."[5] Even Old Arabic, where *ʿanz* denotes the female goat, preserves remnants of the *nomina unitatis* in a figurative use.[6] Akkadian forms the plural mostly as a feminine, Ugaritic,[7] like Hebrew and Aramaic, as a masculine.

In Aramaic neither the reference to the gender of the designated animal—although most instances refer to female animals—nor (as in Hebrew) the grammatical gender is fixed. The construction as a feminine occurs twice in the Aramaic of the Aḥiqar text (fifth century B.C.E.) and once as a masculine on a third-century ostracon from Egypt.[8] Even the genitive phrase *ṣ*^e^*pīrē ʿizzīm* "male goats" (Ezr. 6:17) employs *ʿēz* generically.

The later Aramaic forms[9] of the pointed texts[10] consistently have *ʿizz* as the ground form, with an assimilated *n* and *i* before an accented ending,

whether under the influence of the sibilant,[11] or because the singular absolute was formed anew from the other forms with an accented ending by omitting the ending. The Syriac construct *ʿnez* still exhibits the *n* radical.[12]

2. Male Goat. The Aramaic word for male goat, first attested in the OT and at Qumran, may have been pronounced /ṣapīr/ before the loss of the short vowel.[13] With the sole exception of Hebrew, where it has the same pronunciation, there are no assured counterparts in other Semitic languages. Consequently, and in view of the passages in which it occurs (Dnl. 8:5,8,21; Ezr. 8:35; 2 Ch. 29:21), it seems likely that Hebrew borrowed the word from Aramaic.[14] Later dialects[15] also have a feminine *ṣpyrh*[16] or *ṣpyrtʾ* for the female animal in addition to *ṣpyr* "ram." Syriac has in *ṣepārāyā*[17] another form of the same root with an ending formally equivalent to the nisba, as often happens with animal designations;[18] a counterpart to *ṣprytʾ* appears in an eleventh century Babylonian text;[19] Mandean lacks the word entirely.

The equally late[20] attested *tayš* "male goat"[21] is not clearly distinct semantically; *gadœ̄* < **gady* denotes only the young male animal.

II. Imperial Aramaic. Older Aramaic does not attest /ṣapīr/. Of the eight assured (with an additional four reconstructions) Imperial Aramaic instances of */ʿanz, ʿinz/ "goat," all still spelled with the nonassimilated *n*, only the most recent instance, a fourth century B.C.E. ostracon from Tell ʿIra in Israel,[22] may exhibit forms both with and without assimilation, although one is reconstructed and the other uncertain in reading and interpretation.

The assured specimens are singular forms, four times the absolute *ʿnz* and four times the determined *ʿnzʾ*.[23]

Absolute: *TADAE* A4.10,10: "and sheep, cattle, and goat will not be offered (literally, "made") as a whole-offering (*mqlw*), but incense and . . . -offering"; *TADAE* D7.1:10, a letter: "In the morning, I will go home, and they will give you a goat before I come to you"; ostracon *TADAE* D7.57:5,

a letter (third century B.C.E., Egypt): "And now, I send you via the brother of *TM* (a name), the wife of *Mlkyh br ʿzgd* a goat [*ʿnz ḥd*]"; Idumea ostracon Ephʿal and Naveh 72f. (fourth century B.C.E., Palestine):[24] "the skin of a goat."

Determined: *TADAE* C1.1:166f. (proverbs of Aḥiqar) three times:[25] "the leopard met/touched the goat and she [*hy*] was freezing/naked [*ʿryh*], the leopard raised up and said to the goat, 'Come [*ʾty*]! . . .' The goat raised up and said to the leopard"; l. 209, a partially damaged context, but again feminine: "and the goat[s] raised up (*ʿnt*). . . ."[26]

III. Biblical Aramaic. There is only one (common) occurrence of both words, goat and male goat, in a sort of dually expressed plural[27] *ṣᵉpīrē ʿizzīm* "billy goats" in a sacrifice list (Ezr. 6:17): "And, to dedicate this house of God, they brought one hundred steers, two hundred rams, four hundred lambs, and, as a sin offering for all Israel, twelve male goats according to the number of the tribes of Israel."

IV. Qumran. Qumran offers no instance of *ʿz* "goat." There are two instances of *ṣpyr* "male goat" in 4Q156 2:5 and 2:6; the fragment translates Lev. 16:20f. and belongs to the oldest preserved Targum (ca. 150 B.C.E.). Twice, partially emended or difficult to read—both in a destroyed context—one finds *ṣpyrʾ ḥyʾ* "living male goat" for the Hebrew *ʾæṯ-haśśāʿīr hæḥāy*, "the living male goat" or *ʿal rōš haśśāʿīr haḥay* "(will place both of his hands) on the head of the living male goat."

עזקה ʿzqh /ʿezqā/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. There is no agreement concerning the etymology of the feminine noun *ʿzqh* /ʿezqā/ "signet ring." It is not possible to establish that it was borrowed from Akkadian,[1] but a relationship with the Semitic root **ʿzq* "to break open, to dig" (perhaps via "to push in"?) may be possible, nonetheless.[2] The lexical field includes → *ḥtm* "to seal."

II. Usage. The signet ring is the paradigmatic mark of official authority. The milieu of the royal court also constitutes the origin of the themes of the oldest Aramaic literature.[3] The diction of Achaemenid administration was simultaneously the foundation of narrative prose that defined the form and motifs of novelistic stories that mirrored the tension in early diaspora Judaism between integration into world politics and its own cultural traditions.[4] Thus, the royal signet ring traces as a fixed element from the early narrative framework of Aḥiqar via the court narratives of Daniel to the diaspora novellas from Qumran.

The Achaemenid period first attests *ʿzqh*. Among the Imperial Aramaic documentary texts, it occurs twice in letters from Egypt, once in a fragmentarily preserved official writing of unknown contents[5] in the expression *bʿzqt* in the construct state with a subsequent personal name "with the signet (ring) of PN," and again as a plural *bʿzktyh* (scribal error) in a later ostracon with the shipping note for a sealed jug.[6]

The other specimens come from literature. In the account of the fate of the high Assyrian official Aḥiqar, *ṣbyt ʿzqth* "keeper of his (i.e., the king's) signets"[7] belongs among the main character's titles (ll. 3,60) and those of

his designated successor (l. 19). The title denotes the high position in the imperial administration and the confidence that a royal signet-bearer enjoyed.

Daniel 6:18, then, deals with the function of the signet ring: the king seals with (*b*-) his own ring and that of his nobles the stone at the opening of the lions' den; the verb is → *ḥtm*. The intention is to rule out the possibility for Daniel to receive external aid,[8] which proves that his survival through the assistance of an angel was a miracle.

The tradition of the court novella continues in texts from Qumran. 4Q196 2:7 (Tob. 1:22) explicitly establishes Tobit's relationship with Aḥiqar, whose title here is *rb ʿzqn* "signet master," and situates the material via this reminiscence into the broader corpus of Aramaic literature. Another story that plays out among the Persian kings employs *ʿzqh*, again with the preposition *b*- modifying the verb *ḥtm*, to denote a scroll sealed sevenfold by Darius.[9]

A magical text from late antiquity employs *bʿzqth dšlmh* "by the signet ring of Solomon"[10] in an apotropaic formula. The noun continues in use in later Aramaic literary languages.[11] The verb *ʿzq* "to seal"[12] instead of the old *ḥtm* presumably derives from the noun.

עין ʿyn /ʿayn/; נבע nbʿ; עור ʿūr; שכן škn /šekn/; בבה bbh /bābā/

I. Forms and Lexical Field. II. As a Body Part of Human Beings. III. In Prepositional Phrases with *b*-, *k*-, *l*-.

I. Forms and Lexical Field. As the designation for a body part present in pairs, the common Semitic noun *ʿyn* /ʿayn/ "eye" is feminine in gender. In Aramaic, where at the latest circa 200-150 B.C.E. it was consistently revocalized /ʿēn/ with the monophthong,[1] it appears predominantly in the construct state or with suffixes. On into post-Christian times, the dual[2] with the meaning "eye" generally represented the plural but was mostly unrecognizable as such since, in the construct and thus also before suffixes, the dual and plural are identical in form. Consequently, the consonantal text of Dnl. 7:8,20 *ʿynyn* still reflects the original dual /ʿaynayn/, but was vocalized in the pointing, which no longer recognized this old form, as a plural *ʿaynīn*.[3]

In contrast, the word when used for "spring" takes the feminine plural.[4] This second meaning is rare in Aramaic and occurs before Palmyrene[5] and the literary languages of late antiquity[6] only as part of sparsely transmitted place names such as En-Dina "Spring of Justice,"[7] there in the singular, however.[8] Instead of it, the texts from the Dead Sea attest two forms of the root *nbʿ* "to bubble" for "spring" following /maʿyān/,[9] /nebaʿ/,[10] and /mabbūʿ/,[11] which continue to occur later.[12]

In the typical sense of "eye," *ʿyn* regularly appears in set phrases. Besides the usage with certain verbs such as → *nṭl* "to lift" or → *pṭḥ*[13] "to open," it appears with particular frequency in prepositional expressions with *b*- "in the judgment of" or *l*- "before the eyes of" (→ III).

The broader lexical field includes the verb → *ḥzī* “to see” and the noun /ʿawār/ “blindness”[14] with the corresponding adjective /ʿawīr/ “blind”[15] and with the verb *ʿūr* “to blind.”[16] The eye has a /šekn/ “lid” and a /bābā/ “pupil” (→ II).

II. As a Body Part of Human Beings. Expressly for the body part—of humans and of gods—*ʿyn* “eye” appears in older Aramaic only in nondocumentary texts. The oldest instance occurs in a state treaty from Sefire in an appeal to the gods as watchful guarantors of the agreement established in the text: *pqḥ ʿynykm lḥzyh ʿdy* “open your eyes in order to regard the treaty of. . . .”[17] Thereafter, the pre-Achaemenid proverbs of Aḥiqar employ the term frequently in statements concerning behavior between people and its foundation in religious ethics. The admonition to discretion, since “their” (with no antecedent) eyes and ears are ubiquitous (*kzy bkl ʾtr ʿ*[*yny*]*hm w ʾdnyhm*),[18] suits—as the figure Daniel must also often experience—the life of the court official in which these sayings presumably have roots.[19] Eyes and ears[20] also appear in l. 157 in the very common parallelism,[21] but with no clear context. Raising the eyes[22] together with giving the heart[23] seems to denote the demonstration of benevolence and trust (l. 105) apparently also central in the same milieu.

Aḥiqar also states that *ʿyny ʾlhn ʿl ʾn*[*š*] “the eyes of the gods [rest] on human bings” (l. 172). Biblical diction also employs this formulation frequently,[24] although its precise significance in these passages remains unclear because, first, the end of the clause has been lost and, second, the relation to the context has not been explained: if one relates the statement as the conclusion of a chiastic contrast with the preceding text,[25] the gods’ glance signifies good for human beings; if, contrariwise, one links it to the subsequent saying,[26] it could emphasize that no sin goes unnoticed. Two additional instances[27] do not preserve sufficient context.

Biblical Aramaic takes up such usages in older epigraphical material. The motif of the “eye of God”[28] appears in Ezr. 5:5 as an expression of the divine protection over[29] the elders of the Jews so that the construction of

the temple could proceed undisturbed. In Dnl. 4:31, the raising of the eyes serves to express devotion to God.[30] With apocalyptic imagery, however, new usages also appear: in the vision of the animals as an image for the four empires, the "eyes like human eyes" of the "little horn" of the last being (Dnl. 7:8,20)[31] accentuate its particularly eerie nature with no counterpart whatsoever in the range of human experience.[32]

With the texts from Qumran, the known spectrum of usage expands yet again. Raising the eyes serves once here, as in Dnl 4:31, as a prayer gesture,[33] in another instance, ingressively for gazing.[34] Furthermore, eyes serve as a characteristic of the beauty of extraordinary people.[35] Similarly, they are considered the seat of sleep.[36] A priestly prophecy mentions a "pupil [*bbh*] of his eye,"[37] but without context. In Enoch's animal allegory, the opening (*pṯḥ*) of the eyes[38] represents divine revelation. Finally, 11Q10 renders the Hebrew word in its varied usages, sometimes also attested in originally Aramaic texts: 5:1 (Job 21:20; seeing with one's own eyes); 14:5 (Job 29:11; parallelism of eye and ear); 35:3 (Job 40:24; hooks in the eyes in an adynaton); 36:4 (Job 41:10; the shining eyes of Leviathan); 37:7 (Job 42:5; the vision of God). A pair of additional instances are too fragmentary to permit the determination of the content.

Finally, magical texts from late antiquity employ *ʿyn byšh* or just *yn* for the "(evil) look,"[39] that unleashes its own demonic effect, but is rooted in the eye.

III. In Prepositional Phrases with *b-*, *k-*, *l-*. In conjunction with the three proclitic prepositions *b-*, *l-*, and *k-*, the full sense of *ʿyn* "eye" weakens into a designation for modal or local relationships. Old Aramaic already attests *bʿyny* "in the judgment of,"[40] then also at Qumran.[41] Imperial Aramaic also manifests *lʿyny* "in the presence of,"[42] as does 11Q10 4:7 (Job 21:8, literally as in the Heb. text). Finally, in 1QapGen 16:17 *kʿyn* certainly means "accordingly,"[43] just as is also true later.[44]

43. As first recognized by *ATTM*, 2, 452, contrary to earlier editor's interpretation "spring," which is nonsensical in the context; cf. the extensive justification in H. Gzella, review of D. A. Machiela, *The Dead Sea Genesis Apocryphon*, *BiOr* 68 (2011) 378f.

44. See *DJBA*, 857.

עיר ʿyr /ʿīr/

I. Etymology. II. Meaning. III. Biblical Aramaic. IV. Qumran.

I. Etymology. The root that underlies the noun *ʿyr* /ʿīr/ is the subject of broad discussion. Most[1] derive it from the common Semitic verbal root *ʿīr* "to be awake," which, for example, 1QapGen 19:17; 4Q213b 2; 4Q547 9:8 attest as a t-stem "to awaken." Alternative suggestions[2] assume, among others, a relationship with the Proto-Semitic **ṣīr*[3] or a purely inferred Aramaic and Hebrew root **ġīr*.[4]

II. Meaning. Because of the derivation from the root *ʿīr* (→ I), translators have long often rendered the noun /ʿīr/ "watcher" (i.e., someone who holds watch). Already, the Greek and Old Ethiopic versions of the book of Enoch render it mostly with "awake."[5] The same Greek word also appears in the translations of the book of Daniel by Aquila and Symmachus.[6] The noun appears in relation to the heavenly world and denotes an angelic being who serves as a messenger.[7] Aramaic first attests it beginning with the book of Daniel, but it also appears in the Hebrew apocryphal literature from Qumran: *nplw*] *ʿyry h*[*šmym* "the watchers of the [heavens fell],"[8] cf. *nplw ʿydy* (= *ʿyry*) *hšmym*[9] and *wgm ʿl hʿyrym* "and also against the watchers."[10]

III. Biblical Aramaic. In Biblical Aramaic, the noun *ʿīr* occurs three times, always together with the adjective *qaddīš* "holy":[11] *waʾᵃlū ʿīr wᵉqaddīš min šᵉmayyā nāḥiṯ* "and see, a holy watcher descended from heaven (Dnl. 4:10); *ʿīr wᵉqaddīš nāḥiṯ min šemayyā* (Dnl. 4:20); *biḡzēraṯ*

ʿīrīn piṯgāmā umēmar qaddīšīn šᵉʾelṯā “this decision was announced by the watchers; this statement was demanded by the holy ones” (Dnl. 4:14).[12]

IV. Qumran. The Aramaic texts from the Dead Sea attest the noun well. In addition to the occurrences of *ʿyryn* in *bgzrt*] *ʿyryn ptgmʾ wmʾmr qdyšyn šʾl*[*tʾ* in 4Q115 (= Dnl. 4:14; 4QDan[d]), it appears another sixteen times in nonbiblical manuscripts: 1QapGen (2:1,16; 6:13; 7:2), 4Q202 (1 4:6 [1 En. 10:9]), 4Q203 (7a:7; 7b 1:4; Book of Giants), 4Q204 (1 5:19 [1 En. 12:3]; 1 6:8 [13:10]), 4Q206 (1 22:5 [1 En. 22:6]), 4Q212 (1 3:21 [1 En. 93:2]), 4Q531 (partially emended in 1:1 and 36:1; Book of Giants), 4Q532 (2:7; Book of Giants), 4Q534 (1 2+2:15; Noah’s birth), 4Q546 (22:1; Testament of Amram). The biblical dual expression *ʿīr wᵉqaddīš* occurs twice: *lʿyrʾ wqdyšʾ* in 4Q206 1 22:5 (1 En. 22:5) and *ʿyryn wqdšyn* in 4Q212 1 3:21 (1 En. 93:2). Particularly noteworthy is the formulation *mn ʿyryn hryʾtʾ wmn qdšyn zrʿ* “the conception was from the Watchers and the seed from the Holy Ones” (1QapGen 2:1, in reference to Noah).[13]

12. → *ptgm*.

13. → *qdš*.

עלה ʿlh /ʿellā/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. The feminine noun *ʿlh* /ʿellā/ "grounds for an accusation" apparently belongs to a root **ʿll* "to act" also known from Hebrew[1] and Arabic and is therefore related neither to the Aramaic verb → *ʿll* "to enter" nor to the common Semitic root *ʿlī* "to go up."[2] The distribution of occurrences indicates that the word is a term in court proceedings and legal diction related semantically to *qbylh* /qabīlā/ "accusation."[3]

II. Usage. Aramaic first attests *ʿlh* in Dnl. 6:5f.: other court officials envied Daniel his outstanding success, but could find no grounds in his blameless execution of office to accuse him before the king and, therefore, charged him (successfully) because of his religious practice. The noun appears here with the verbs → *bʿī* "to seek" and → *škḥ* "to find," in 6:5 along with *šḥyth* "evil."

Further, formulaic expressions in a few private documents from the Dead Sea also exhibit the term.[4] Comparable is the use of αἰτία in Greek legal diction, as also reflected in Mt. 27:37 par. Mk. 15:26, Jn. 18:38 and 19:4:6, or Acts 23:28. Later, *ʿlh* appears explicitly in the sense of "pretense."[5] The same nuance underlies the translations of Dnl. 6:5f. in Pseudo-Theodotion[6] and the Vulgate.[7]

Gzella

1. Heb., “to do something to someone,” see W. Roth and H.-J. Fabry, “עלל *ʿll*,” *TDOT*, XI 139-47.

2. → *ʿly*.

3. → *qbl*.

4. M 27:3 in *ATTM*, 314f.; nV 7:27 in *ATTM*, 2, 217-23 in the construct *kl ʿlt mndʿm* “grounds for whatever accusation”; perhaps also in nV 3:43 in *ATTM*, 2, 211-15, but reading and interpretation are not clear.

5. *DJPA*, 404a; *LexSyr*, 524.

6. πρόφασις “pretense.”

7. *occasio* “opportunity.”

עלי ʿly /ʿellāy/; עליון ʿlywn /ʿelyōn/; עלי ʿly /ʿalī/; עליה ʿlyh / ʿelliyā/

I. Etymology. II. Designation for a Deity. 1. Biblical Aramaic. 2. Qumran. III. Profane Use. 1. Old and Imperial Aramaic. 2. Biblical Aramaic and Qumran.

I. Etymology. Akkadian, Canaanite, Arabic, and Old South Arabian also attest the root *ʿlī/ū* "to go up, to be above." Among Aramaic verb forms, the synonymous root → *slq* also finds usage. Hebrew, Ugaritic, Akkadian, Arabic, and Old South Arabian Sabean manifest a divine designation or predicate from the root *ʿlī*.

II. Designation for a Deity.

1. Biblical Aramaic. Besides "in the presence of El and ʿElyān" (*qdm ʾl wʿlyn*) concluding an Old Aramaic Sefire treaty[1] as Canaanite treaty gods, the root first appears in Biblical Aramaic as a divine designation in the form of the masculine singular adjective in the determined state *ʿillāʾā*[2] "the Most High," either alone (Dnl. 4:14 [4Q115 3-7:15],21, 22,29,31; 7:25) or in the phrase *ʾœlāhā ʿillāʾā* "the Most High God" (Dnl. 3:26,32; 5:18 [4Q112 12:4],21 [4Q113 6:1]), although always uniformly within a literary unit. Nebuchadnezzar shifts to the designation *ʾœlāhā ʿillāʾā* in Dnl. 3:26,32 after the pericope has otherwise employed only *ʾœlāhā* "God," as soon as the miracle in the fiery furnace demonstrated to him the God's character (vv. 15,29). Standing alone, *ʿillāʾā* returns at a prominent place in Nebuchadnezzar's dream vision, and in its depiction, interpretation, and fulfillment (Dnl. 4:14,22,29), again in the phrase "(to know) that the Most

High has power over the kingdom of human beings” (*dī šallīṭ ʿillāʾā bᵉ-malḵūṯ ʾᵃnāšā*).[3] Meanwhile, Daniel’s reference to these events in this interpretation of the flaming writing in Dnl. 5:18,21[4] employs *ʾᵉlāhā ʿillāʾā*.

In the expression *qaddīšē ʿælyōnīn* “Holy Ones of the Most High”[5] that recurs in the interpretation of Daniel’s animal vision, the masculine plural noun in the absolute state, borrowed from the Hebrew, functions as a divine designation in the plural of majesty. In v. 25, the expression parallels *ʿillāʾā* “the Most High.”

2. Qumran. At Qumran, three forms appear as divine designations: *ʿlyʾ* “the Most High” (m.sg. det., 1QapGen 6:9, 4Q550 7a:1, 4Q568 1:1; in 1QapGen 6:24; 10:18 without context), *ʿlywn* “Most High” (with certainty only in 4Q246 2:1; in 4Q543 22:2 without context; in 4Q536 3:8 a pl. abs.), and the borrowed Hebrew phrase *ʾl ʿlywn* “Highest God” (1QapGen 12:17; 20:12,16; 21:2,20; 22:15,16,21; 4Q552 6:10; and perhaps 4Q558 88:1). In the fragmentary narrative from the Persian court 4Q550 7a:1, *ʿlyʾ* appears in the expression *ʿlyʾ dy ʾntwn dḥlyn w*[*p*]*lḥyn hw šlyṭ b*[*kwl ʾr*]ʿʾ “the Most High whom you fear and worship rules over the [whole ear]th,” which echoes the phraseology of Dnl. 4:14, etc. (→ II.1). In 1QapGen 6:9, the noun lends validity to the existing, but disputed in the intertestamental period, marriage regulations by designating them as “eternal law [that] the Most High [gave] human beings” ([*dy yhb*]*h ʿlyʾ lbny ʾnšʾ*).

Only the apocalypse 4Q246 1 2:1 has *ʿlywn* “Most High” standing alone in the meaning “God”; the parallelism “he will be named son of God and people will call him son of the Most High” (*brh dy ʾl ytʾmr wbr ʿlywn yqrwnh*) depends, however, on the phrase *ʾl ʿlywn*.[6] In contrast, one should probably translate the masculine plural absolute form *ʿlywnyn* in the fragmentary 4Q536 3:8 “angel” following Biblical Aramaic terminology.

The Hebrew divine designation *ʾl ʿlywn* “Highest God” from the Melchizedek pericope (Gen. 14), beloved in the Hellenistic period, typifies

the Abraham cycle in 1QapGen. The instances in col. 22 appear in the treatment of the biblical passage and have influenced the other usages. In addition to other divine designation, the phrase also appears once in the mouth of Noah, 1QapGen 12:17: “I blessed the Lord of Heaven, the Highest God, the great Holy One, who saved us from annihilation.”

III. Profane Use.

1. Old and Imperial Aramaic. In the Old Aramaic Sefire inscription, the feminine noun *ʿly* “upper story, rooftop” occurs in the curse on the treaty breaker, of whose house the gods will “make its basement into its [r]ooftop”;[7] on the other hand, the adj. *ʿly* defines the toponym “upper Aram,”[8] whose location is disputed. In the Imperial Aramaic Aršama correspondence,[9] the pair of feminine singular determined adjectives *ʿlytʾ wtḥtytʾ* elliptically designate “Upper and Lower (Egypt).” The same pair of adjectives[10] serves in contract texts from Elephantine[11] to indicate the north-south dimensions of property. Contrary to the use of *ʿlytʾ* as “Upper Egypt,” the archaeological evidence suggests the meaning “northern” for *ʿly* here.[12]

2. Biblical Aramaic and Qumran. In Dnl. 6:11, the noun form *ʿillīṯeh*[13] “his rooftop”[14] denotes the room in which Daniel, despite the prohibitions of the Persian King Darius, prays toward Jerusalem three times daily. Sara, the daughter of Raguel, also withdrew in 4Q196 6:2 (Tob. 3:10) “to the rooftop of the house [of her father” (*lʿlyt byt* [*ʾbwh*)[15] to pray. In the poetic passage 1QapGen 20:7, in contrast, the courtiers praise Sarah’s beauty to pharaoh with the words “she is the highest in her beauty, higher than them all” (*ʿlyʾ šprhʾ lʿlʾ mn kwlhn*).[16] Additional instances of the feminine noun *ʿly*[17] and of the adjective,[18] without context, appear in descriptions of the architecture of the new Jerusalem.

עלים *ʿlym* /ʿolaym/

I. Etymology. II. Old Aramaic Inscriptions. III. Imperial Aramaic Documents. IV. Aramaic Texts from the Dead Sea.

I. Etymology. The Aramaic substantive *ʿlym* /ʿolaym/[1] "boy, youth" corresponds to the **qutayl* paradigm and belongs to the root *ʿlm*. The **qutayl* noun paradigm in Semitic languages typically signifies diminutives.[2] The root *ʿlm* traces to the Proto-Semitic **ġlm* and has cognates in Ugaritic, Arabic, Canaanite (both Hebrew and Phoenicio-Punic), Eblaite, and perhaps in Akkadian. Its basic meaning seems to be connected to the state of sexual maturity and the emotions that arise from it; the noun *ʿlym* refers mostly to a young (and especially in the case of its feminine counterpart *ʿlymh*, marriageable) human being in puberty.

II. Old Aramaic Inscriptions. Already the oldest Aramaic textual witnesses exhibit instances of the substantive *ʿlym*. It occurs once in the bilingual Tell Fekheriye inscription (*wmʾh nšwn lhynqn ʿlym wʾl yrwy* "and may one hundred women suckle a child and it still not have enough!")[3] and one at Sefire (*wšbʿ* [*mhy*]*nqn ymšḥ*[*n šdyhn w*]*yhynqn ʿlym wʾl yśbʿ* "and may seven [nur]ses salve [their breasts and] feed a child and may it still not be satisfied"),[4] both as part of curse formulas. In these passages, *ʿlym* refers to a not yet weaned infant, which suggests that Old Aramaic already employed it for (sometimes very) young people in general and, consequently, with no explicit relation to puberty.

Finally, a feminine form *ʿlymh* may appear in the Deir ʿAllā Inscription (II.4), perhaps in the meaning "virgin, marriageable maiden, young

woman," but the context permits no certain conclusions.[5]

III. Imperial Aramaic Documents. From the Achaemenid period, four instances of the substantive *ʿlym* appear in the Imperial Aramaic texts from Egypt. There, in a majority of cases, it refers to a youth that belongs to a certain person or household, e.g., *TADAE* A4.3:8 *ḥwr ʿlym ḥnnyh* "Ḥor is the lad of Ḥananya"; C3.27:30 *ʿlymy bytʾ* "lads of the house(hold)"; A3.5:6 *ḥzy ʿl ʿlymyʾ wbyty* "concern yourself with the lads and my house(hold)." In a similar sense, a few documents from this period attest the feminine counterpart *ʿlymh* "maiden, maid," as in an ostracon from Idumea:[6] *hbw lh ḥdh mn ʿlymtʾ* "give him one of the maids"; the context makes it clear that the pertinent maid was subordinate to another person so that she could not act autonomously. Notably in this context, a possessive suffix can denote "my lad,"[7] but the letters of Aršama often employ the independent pronoun *zyl-*.[8] This indicates a possessive relationship between a person in authority and a subordinate in his service.[9] For the same reason, translators often render the substantives *ʿlym* and *ʿlymh* as "servant" or "slave." Nonetheless, it should be emphasized that the meaning "servant, slave" does not seem to belong to the semantics of the terms *ʿlym* and *ʿlymh* themselves,[10] but that only the context in which they appear establish this nuance. Thus, in B2.11:12f., *ʾyty tbʾ šmh ʾmhm zy ʿlymyʾ ʾlh* "there is a certain Taba, the mother of these lads" and in D7.9:6-8 *lʾ yškḥn ʿlymth mktbh ʿl šmh* "they do not want to find his maid marked with his name,"[11] the substantives *ʿlymyʾ* "the lads" and "*ʿlymth* "his maid" apparently refer to slaves. Yet, in B3.9:3 *ʿlym*[*ʾ zyl*]*k* "[you]r la[d]" appears in a document that expressly prohibits the pertinent person from ever falling into slavery,[12] which includes marking with a brand, but, instead, he should be treated like a son. In D23.1.2:13 *wʿlymʾ ʾzl ʿl ʿsrs*["and the lad went to ʿOsirs," too, although the context is fragmentary, includes no indication that the youth

involved belonged to anyone as property. In two lists from Bactria with the distribution of rations, *ʿlymn* appears with other servants.[13]

IV. Aramaic Texts from the Dead Sea. Biblical Aramaic does not attest the substantives *ʿlym* and *ʿlymh*, but the Aramaic texts from the Dead Sea do so well with the meanings known from the older material. Thus, *ʿlym* refers to a newborn (1QapGen 2:2: *wlby ʿly mštny ʿl ʿwlymʾ dnʾ* "and my mind changed in me because of this child," a reference to the child Noah, the son of the speaker Lamech; likewise 5:2,13 and 4Q204 5 2:23,30 [1 En. 106:18; 107:2]). Further, the masculine refers to a young man (e.g., 4Q196 13:2 [Tob. 6:7]: [*wbʾdyn š*]*ʾl ʿwlymʾ lml*[*ʾkʾ*] "[then] the young man asked [the an]gel";[14] elsewhere in Tobit, this is the fixed expression for the central character: 4Q197 4 1:6f.,16 [Tob. 6:3,11]; 4Q197 4 3:5 [7:2]; cf. further 11Q10 14:2; 23:3 [Job 29:8; 33:25]). Meanwhile, the feminine *ʿlymh* denotes a young, marriageable woman (4Q197 4 2:3 [Tob. 6:13]: *wtmll bʿl*[*m*]*tʾ dʾ blylyʾ dn* "tonight you will talk about this [youn]g maiden").[15] With the same nuance, a feminine abstract noun *ʿlymw* "youth" also derives from *ʿlym* (4Q534 1 1:3f.: *bʿlymwth lhwh klṭyš* "in his youth, he will be like a sharp-witted person";[16] cf. 11Q10 23:3; 36:8 [Job 33:25; 41:14]). Finally, in the case of 1QapGen 22:23, *brʾ mn dy ʾklw kbr ʿwlymy dy ʿmy* "besides what my young men, who are with me, have already consumed," the broader context (i.e., the use of *ʿbd* in 22:6) indicates a reference to Abraham's slaves (→ III).[17]

עלל *ʿll*; עלל *ʿll* /ʿalāl/; עללה *ʿllh* /ʿalalā/; מעל *mʿl* /maʿal/; מעלין *mʿlyn* /maʿʿālīn/

I. Etymology, Forms, Lexical Field, and Grammatical Constructions. II. Verb in the G-stem "to Enter." 1. Old and Imperial Aramaic. 2. Biblical Aramaic. 3. Qumran. III. Verb in the C-stem "to Lead In." 1. Imperial Aramaic. 2. Biblical Aramaic. 3. Qumran. IV. Nouns.

I. Etymology, Forms, Lexical Field, and Grammatical Constructions. In contrast to the other Northwest Semitic languages, Aramaic employs the verbal root *ʿll* for "to go into, to enter."[1] In turn, it corresponds etymologically to the old **ġll*.[2] With the antonym → *npq* "to go out," as with → *nḥt* "to descend" and → *slq* "to ascend," Aramaic crystallized a unique pair of very productive verbs of direction. Here, *ʿll* appears in the widespread G-stem "to enter"[3] and in the more specialized C-stem.

The fact that a few historical spellings survived for a long time in the post-Achaemenid literary tradition probably has to do with the extensive use of this verb. The graphically degeminizing spelling of the long /ʿʿ/ in forms with preformatives or prefixes according to an Achaemenid convention[4] as *-nʿ-*[5] and, beginning with Biblical Aramaic, the spelling of the plural participle with a doubled *l*,[6] that sometimes extended to the perfect of the third-person feminine singular, presumably by analogy,[7] are relatively frequent. These orthographic characteristics indicate that the Aramaic texts from the Bible and Qumran have deep roots in the Imperial Aramaic literary tradition.[8]

In the G-stem, prepositional expressions regularly indicate the direction of movement: *b-* "in"[9] or *l-*;[10] later also *bgw*[11] and *lgw*[12] "among";[13] *ʿl*

“near” with persons;[14] in court style for persons sometimes *qdm* (Dnl. 4:5). Yet, as with other verbs of coming and going, the objective can also follow directly.[15] Furthemore, in a greeting formula, *bšlm* “safely” appears as an adverb of manner.[16]

The transitive C-stem is constructed similarly: *l-* “in”[17] or *lgw*,[18] of persons in court style *qdm* “before” (Dnl. 2:25; 4:3,5; 6:19; in each case of the king). In pre-Christian times, it also formed an internal passive “to be brought,”[19] which the t-stem later replaced (→ III).

Of verbal nouns, besides the substantival G-stem infinitive /maʿʿal/ “access,” older Aramaic attests the masculine /ʿalāl/ “entrance,” the feminine /ʿalalā/ “income,” and the presumably masculine plural /maʿʿālīn/ “sinking” (of the sun).

II. Verb in the G-stem “to Enter.” In the G-stem, *ʿll* “to enter” is a generic verb that appears in widely varied categories of texts and linguistic registers beginning with Old Aramaic. Consequently, primarily the context more precisely defines its nuance—also including quite specific shades such as “to invade,” “to break in,” “to go in,” and still more.

1. Old and Imperial Aramaic. Old Aramaic state and royal inscriptions employ the verb, on the one hand, for “to enter a house,” either in reference to a private dwelling where someone finds lodging,[20] or with reference to the palace as *kl ʿll byt mlk* perhaps to designate the entire palace complex[21] to which the validity of the state treaties from Sefire refer.[22] On the other hand, *ʿll* with an enemy king as subject can denote “to invade” in the context of military conquests.[23]

(The meaning of *ynʿl* in *TADAE* C1.1,205, which probably belongs to another root, is open to speculation; in any case, cf. *DNSI*, 737, s.v. *nʿl*.)

In Imperial Aramaic documents from Elephantine, *ʿll* with *b-* often serves for “to break in”[24] and in contracts for “to enter” of wares or

money,[25] but it also regularly appears in the general sense.[26] Especially in the colloquial speech of the ostraca correspondence, it seems to have faded also to "to go, to come."[27] It appears once already in Old Aramaic for "to invade."[28]

The post-Achaemenid tradition of Imperial Aramaic knows additional contexts of usage: in a marriage contract on an ostracon from Idumea the man's entry into the house in relation to the marriage ceremony;[29] in Palmyrene grave inscriptions in the descriptions of direction "if you enter";[30] in Hatra to emphasize the validity of a law even for "day guests";[31] and perhaps in H29.5f. in the prohibition against entering a sacred site wearing shoes (cf. Ex. 3:5).[32]

2. Biblical Aramaic. All instances of the verb in Biblical Aramaic come from the book of Daniel. There, *ʿll* refers mostly to the appearance of members of the court staff before superiors, either with a request or in response to a summons.[33] Such a nuance has no direct parallel in the older material. Meanwhile, if the queen appears before the court (5:10),[34] it may also mean simply "to enter (into a room)" as the preposition *l-* suggests. This is surely the case for Daniel's arrival in his own house (6:11, again with *l-*).

3. Qumran. At Qumran, one can easily observe the breadth of the use of *ʿll* in the narrative texts 1QapGen, Tobit, and the Persian court tale. Here, the verb appears mostly with an animate subject and *l-* for entrance into a building such as the royal palace (4Q550 6+6a-c:6f.), a private home (4Q197 4 3:4 par. 4Q196 14 2:7 [Tob. 7:1], a greeting formula; 1QapGen 20:6 of the bridal chorus), or the temple (2Q24 4:3; similarly probably also 11Q18 15:3,6; 16 2+17 1:4), and for entry into a country (1QapGen 19:13f.; 4Q197 4 1:15 [Tob. 6:10]; 4Q570 2:4) or a city (4Q197 4 3:1 [Tob. 7:1]). Together with *ʿl*, it denotes coming to a person (1QapGen 2:3; 4Q197 4 2:8 [Tob. 6:14]). In connection with *b-*, it appears with an inanimate subject to denote "to encroach on."[35] The wider context of the comparably frequent occurrences in the Book of Giants is unclear (4Q530 1 1:8 and perhaps 2

2+6-12:1; 4Q531 46:2; 4Q532 2:7). In 11Q10 6:3 and 36:2 (Job 22:4 and 42:8) it renders *bō*ʾ.

A peculiarity of the astronomical book of Enoch is the formulaic use of *ʿll* for "to set" in reference to a heavenly body, mostly for the course of the moon (e.g., 4Q209 7 2:5 bis 7 3:6), sporadically for the sun (so surely in 4Q209 35:1), since, according to the underlying concept, when setting, heavenly bodies entered into (*l*-) a gate[36] on the western horizon (4Q209 3:7; 7 2:8; 7 3:6).[37] A few additional specimens have been transmitted without context or are in dispute paleographically.[38]

III. Verb in the C-stem "to Lead In." The meaning of the C-stem "to lead in" (of persons) or "to bring in" (of goods) is more specific than the G-stem and common beginning with Imperial Aramaic documental texts. The D-stem with a similar spectrum of usage also appears later.[39]

1. Imperial Aramaic. Marriage contracts employ *ʿll* of the dowry that the wife brings to the husband (*l*-) "in her hand" (*bydh*)[40] and takes with her in the event of divorce.[41] It denotes "to deliver" in reference to bondservants[42] and goods,[43] "to bring in" in Idumean commercial ostraca,[44] "to deliver" (wine) in the Parthian Nisa Ostraca,[45] and "to import" in the Palmyrene tax tables.[46]

2. Biblical Aramaic. Biblical Aramaic employs the verb entirely in accord with the G-stem (→ II.2) for "to lead in" in the context of an audience with the king (with *qdm*: Dnl. 2:24f.; 4:3; 6:19; absolutely: 5:7) and in analogy with the internal passive (with *qdm*: 5:13; absolutely: 5,15).

3. Qumran. The texts from Qumran attest an additional use: "to make enter" (4Q197 4 3:4 [Tob. 7:1]),[47] also in reference to visionary journeys (4Q554 1 2:11; 1 3:15 par. 5Q15 1 1:18; 5Q15 1 2:6; 4Q204 1 6:21), and "to bring in" (4Q213 1 1:8, cf. Sir. 6:19f.); passive in 4Q538 1-2:2.

IV. Nouns. The related nouns appear significantly less often than the verb. In the vision of the heavenly Jerusalem from Qumran, the infinitive of the G-stem *mʿl* /maʿʿal/ functions as the noun "entrance" for the verbal action.[48] This usage is distinct from *ʿll* /ʿalāl/ "entrance" in 4Q554 1 3:19 par. 5Q15 1 2:2[49] and in 4Q554 1 3:17 in the expression *ʾsp ʿll* "entry foyer"[50] and the juridical "access" in contracts from the Dead Sea.[51]

The plural *mʿlyn* /maʿʿālīn/ in *mʿly šmšʾ* "sunset" (Dnl. 6:15)[52] is also subsumed under another paradigm because of the /ā/.[53] Otherwise, older Aramaic has *mʿrb* for "west, sunset."[54]

In addition, at least a few Nabatean contracts from the Dead Sea firmly attest the feminine *ʿllh* /ʿalalā/ "income."[55] Some assume the same meaning for *ʿll* in an Imperial Aramaic papyrus from Saqqara,[56] but it is uncertain because of its insufficient context.[57] For other nouns attested in Syriac, see *LexSyr*, 524f.

Gzella

H. Drawnel, *The Aramaic Astronomical Book (4Q208-4Q211) from Qumran* (Oxford, 2011); I. Ephʿal and J. Naveh, *Aramaic Ostraca of the Fourth Century BC from Idumaea* (Jerusalem, 1996); H. עלם ʿlm /ʿālam/

I. Etymology. II. Usage. 1. Samʾalian. 2. Old Aramaic and Deir ʿAllā. 3. Imperial Aramaic. 4. Biblical Aramaic. 5. Aramaic Texts from the Dead Sea.

I. Etymology. For Northwest Semitic *ʿlm* /ʿālam/, *DNSI*[1] offers a bandwidth from *ʿlm*$_1$ to *ʿlm*$_6$, of which, however, only *ʿlm*$_4$ is pertinent to Aramaic, although *ʿlm*$_6$ will also be treated here (→ II.1). The etymology of *ʿlm*, which continues as a subject of debate,[2] suggests that one begin only very generally with a concept of extremes that signifies distant times, either past or future, or both.[3] On this basis, one can assume a transposition of the concept of a temporal extreme to a local realm so that the extreme signified with *ʿlm* can also be the outer realm of the inhabited world, i.e., the underworld. Restricted to the resting place of the dead, *ʿlm* can also denote the grave.[4] Since *ʿlm* unites temporal and local extremes, it can also assume the meaning "world" at Palmyra and "epoch" in apocalyptic texts.

II. Usage. The oldest instances of *ʿlm* in the Northwest Semitic languages, especially in Ugaritic, exhibit a semantic distinction between *ʿlm* as "underworld"[5] and *ʿlm* as "long time." The latter occurs primarily in legal documents as a terminus *ʿd ʿlm*. This semantic distinction between *ʿlm* as "underworld" and "long time" survives into the first millennium in Phoenician, Hebrew, and Aramaic.[6]

1. Samʾalian. The inscription of King Panamuwa I, attributable to the eighth century B.C.E. and affixed to the statue of the god Hadad erected at the site of the king's future cult of the dead, reports: *ʾnk pnmw br qrl mlk yʾdy zy hqymt nṣb zn lhdd bʿlmy* "I am Panamuwa, son of QRL, King of Yādiya, who has erected this statue for Hadad *bʿlmy*."[7] Scholars have suggested that *bʿlmy* be understood as "for my eternity"[8] or as "in my youth."[9] Yet, justified reservations against both translations arise[10] suggesting that *ʿlm* be understood as "grave."[11] Such an understanding also suits well the royal cult of the dead at Samʾal discussed in *KAI* 214.[12] Thus, the meaning for *ʿlm* "underworld" known from Ugaritic is restricted and concretized. The same situation also manifests itself in the Phoenician inscription on the Aḥirom sarcophagus.[13] In contrast, *ʿlmt* "youth" in a Cilician grave inscription[14] involves the later clearly attested abstract formation of → *ʿlym* "lad."[15] Regarding the relationship of Samʾalian to Old Aramaic, see P. M. Noorlander, "Samʾalian in Its Northwest Semitic Setting: A Historical-Comparative Approach," *Or* 81 (2012) 202-38.

2. Old Aramaic and Deir ʿAllā. Old Aramaic attests the temporal term *ʿd ʿlm* "forever" with certainty in *KAI* 224.25; cf. perhaps [*mn*] *ʿlm* "since the beginning" in l. 24;[16] the reading in *KAI* 222 B 7 could be [*lʿl*]*mn* "forever."[17] Because of its fragmentary context, the reference to *bt ʿlmn* in the inscription from Tell Deir ʿAllā remains unclear;[18] it may refer to the grave.[19]

3. Imperial Aramaic. The legal texts from Elephantine employ the formulation *mn ywmʾ znh wʿd ʿlm* (variants: *mn ywmʾ znh ʿd ʿlm*/*ʿd ʿlmn*) "from this day and forever more" to establish the beginning of the marriage in the marriage formula[20] and in other legal texts that relate to real estate,

mobile property, and slaves.[21] Regarding the Ugaritic counterpart *ʿd ʿlm*, cf. *DUL*[3], 155.

So far, the sole Nabatean instance of *b(y)t ʿlmʾ* appears on an inscription from the Negev.[22] In addition, legal texts have the time designation *lʿlm*,[23] which also appears in the grave inscriptions to emphasize the inviolability of the grave, the inalterability of ownership, or the eternal duration of the curse on the grave robbers.[24]

The Palmyrene inscriptions often manifest *b(y)t ʿlmʾ* as an umbrella term for "grave site." In this respect, it can refer, like *mʿrtʾ*, to a hypogeum and, like *qbrʾ*, to a grave tower.[25] In the Greco-Palmyrene diglots, (μνημεῖον) αἰώνιον or αἰώνιος τειμή represents *b(y)t ʿlmʾ* which introduces the aspect of eternity. For the Greco-Palmyrene diglots, it is necessary to consider that some of them may have been translated from Greek into Palmyrene and, consequently, in certain cases, a strong Greek influence may underlie the Palmyrene.[26]

Furthermore, *ʿlm* as "world" appears in the divine title "lord of the world." Thus, at Palmyra, one designated Baʿalšamin as *mrʾ ʿlmʾ* "lord of the world."[27] Additional instances of this title appear in an Arabic inscription from Madaʾin Salih.[28]

The Hatrian inscriptions know only the time reference *lʿlm*/*ʿl ʿlm* "forever."[29]

4. Biblical Aramaic. Biblical Aramaic attests *ʿālam* with eighteen occurences in the Aramaic book of Daniel. Semantically, the term does not always denote "eternity," but, with a view to the older ten-week apocalypse (1 En. 93:1-10; 91:11-17), "epoch."[30] This is likely in the praise of God's name *min ʿālᵉmā wᵉʿaḏ ʿālᵉmā* "from epoch to epoch" (Dnl. 2:20). The characterization of the dominion of the son of man as *šolṭān ʿālam*, which can be understood as "dominion for an epoch" (Dnl. 7:14; cf. 4:31),[31] also

merits mention. The saints of the Most High receive and take possession of a kingdom *ʿaḏ ʿālᵉmā wᵉʿaḏ ʿālam ʿālᵉmayyā* "until the epoch and until the epoch of epochs" (Dnl. 7:18). The designation of the duration of the last kingdom as *lᵉʿālᵉmayyā* (Dnl. 2:44) stands in contrast. The discussion of a *malkūṯ ʿālam* "eternal kingdom" (Dnl. 3:33; 7:27)[32] corresponds to this usage. The aspect of eternity occurs in the wish addressed to the king *malkā lᵉʿālᵉmīn ḥᵃyī* "O King, live for eternity" (Dnl. 2:4; 3:9; 5:10; 6:7,22)[33] and in the characterization of God as *qayyām lᵉʿālᵉmīn* "enduring for eternity" (Dnl. 6:27). Likewise, the last kingdom will not be destroyed *lᵉʿālᵉmīn* (Dnl. 2:44).[34] The LXX renders *ʿālam* with αἰών.

With reference to the distant past, Ezr. 4:15,19 has *min yōmāṯ ʿālᵉmā* "since ever and always."[35]

5. Aramaic Texts from the Dead Sea. Of the Aramaic texts from the Dead Sea, the astronomical book of Enoch (1 En. 72-82) and the ten-week apocalypse (1 En. 93:1-10; 91:11-17) are primarily relevant for this use of *ʿlm*. In them, *ʿlm* is the "epoch" that contains spatial and temporal structures, i.e., "the unity of space and time that arose from the will of the Creator . . . in which human life plays out"[36] or put otherwise, "the space-time of the creation, structured by the courses of the stars."[37] Chronologically, the *ʿlm* divides into ten epochs of 490 years each.

Otherwise, Qumran regularly also exhibits the typical temporal concept *l*(*kwl*) *ʿlmyn* or *ʿd* (*kwl*) *ʿlmyn* "forever" (e.g., *l-* 1QapGen 20:12f.; 21:10,12; *ʿd* 21:14; in 1QapGen with the Hebraizing ending *-m*, however) or *ʿlm*(*ʾ*) following a substantive in the construct state "eternal" (e.g., 1QapGen 6:2,8; 4Q246 1 2:5.9, like Dnl. 7:14,27, → II.4). Furthermore, the meanings "grave" and "world" occur in the Palestinian inscriptions.[38]

עלע ʿlʿ /ʿelaʿ/

I. Etymology, Form, and Lexical Field. II. Usage.

I. Etymology, Form, and Lexical Field. Aramaic *ʿlʿ* /ʿelaʿ/ "rib" apparently developed from an older Semitic */śilaʿ/.[1] Despite the masculine plural ending, in agreement it behaves like a feminine.[2] At the same time, the spelling with ʿ already in the oldest preserved specimen,[3] a saying of Aḥiqar transmitted on a papyrus from Elephantine in Imperial Aramaic orthography, reflects the secondary consonantal shift from the original Aramaic reflex of */ś/, represented in Old Aramaic with the letter *q* and probably pronounced like a voiced, fricative /q/,[4] to /ʿ/.[5] As with */ʿiś/ "wood,"[6] the first /ʿ/ in this unstable transitional form dissimilates to /ʾ/ in post-Christian Aramaic languages.[7] They also have *dpn* /dapn/ for "side, ribs (collectively)."[8]

II. Usage. On the whole, the word is very rare in older Aramaic. A proverb of Aḥiqar uses it for something particularly hard in a paradoxical metaphor of "soft speech,"[9] perhaps a royal command,[10] which, however, is simultaneously so strong that it "can break the ribs of a dragon like death" (*wʿlʿy tnyn ytbr kmwtʾ*).[11]

The association of *ʿlʿ* with a monster of superhuman strength also shines through in Dnl. 7:5. There, the second of the four apocalyptic beasts, which can only be roughly compared to real animals[12] and symbolizes the ravaging power of secular empires, appears with "three ribs in its mouth" (*tlt ʿlʿyn bpmh*).[13] The reference is not necessarily anatomical, rather more

likely a sign of incessant voracity (cf. Am. 3:12), especially since it still boldly consumes “much flesh.”

Later, the noun also appears as *ʾlʿ* [14] in the geometrical or architectural sense of “side, flank.”[15]

עם ʿm /ʿamm/; אמה ʾmh /ʾommā/; ארם ʾrm /ʾaram/

I. Etymology, Forms, and Lexical Field. II. Ethnic Term. III. Religious Use. IV. “Tribe.” V. “Aram.”

I. Etymology, Forms, and Lexical Field. Aramaic *ʿm* /ʿamm/ “people”[1] preserves a common West Semitic primary noun and is, as in the other languages, masculine in gender. It may be identical with the word otherwise employed for “paternal uncle; tribesfellow,” which Aramaic attests, however, only as an element of old personal names.[2]

The oldest Aramaic spelled the plural with a simple *m* as in the determined state *ʿmyʾ* “the nations,”[3] later with a doubled consonant as in *ʿmmyʾ* for the bisyllabic basis /ʿamam-/ (only historically in Dnl. 3:4, etc.). There is controversy concerning whether *ʿmmʾ* in two sayings of Aḥiqar[4] represents the same word or belongs to another lexeme of the *qatal* paradigm, “totality,” otherwise not evident in Aramaic.[5]

In the course of its usage in biblical and postbiblical Jewish literature, the meaning of /ʿamm/ as an older designation for a population that falls under a specific territorial government acquires a primarily religious connotation in the sense of “people of God.” In accordance with Biblical Hebrew’s use, it also appears in later Jewish texts for “pagans” or “common folk” (*plebs*). The Old Aramaic instances reflect the first meaning; Imperial Aramaic does not attest the word.

In Aramaic, the feminine *ʾmh* /ʾommā/ “tribe” serves as a broader ethnic term. In the older phases of the language, only Ezra and Daniel attest it, but with Ugaritic /ʾummatu/,[6] Arabic *ʾumma*, Hebrew *ʾummā* (Gen.

25:16; Num. 25:15; Ps. 117:1) and perhaps Akkadian *ummānu* and *ummatu*,[7] it has a clear Semitic etymology, although a relation to */ʾimm-/ "mother" is only speculation.[8] The context of its usage in Ugaritic and Hebrew (in Num. 25:15 glossed with *bēṯ-ʾāḇ*) suggests that, at least in Northwest Semitic, the genealogical nuance "clan, extended family" stands in the foreground. Yet, this word already serves in Biblical Aramaic quite generally for "nation."

Further, the book of Daniel also employs alongside /ʿamm/ and /ʾommā/ in the same formulaic expression the language (/leššān/, "tongue) to denote a nation.[9] This is unparalleled, however, in the older Aramaic sources.

Even the place name *ʾrm* "Aram" with the related adjective *ʾrmy* /ʾaramāy/ "Aramaic, Aramean" is not fixed on an ethnic meaning.

II. Ethnic Term. Although *ʿm* /ʿamm/ originally meant a people in reference to relataionship traced genealogically to a mythical clan-founder, this specific nuance "clan" is already no longer perceptible in the oldest preserved Aramaic sources. At the latest, after the economic, political, and demographic revolutions in Syria-Palestine between the Late Bronze and the Early Iron Ages, "ethnicity" could not be limited to an agnatic community. Instead, after the demise of city lifestyles—and in the case of the Arameans of Syria perhaps also the demise of the Hittite Empire—population groups reconstituted. With the rise of state structures after 1000 B.C.E., clan-associations still in existence with traditional family structures probably interacted further with charismatically and dynastically legitimized, territorially defined, and religio-culturally undergirded forms of monarchy, served by palace and temple as their political, economic, and cultural centers.[10] Thus, one cannot reconstruct a common Aramaic "people" with clearly identifiable material culture, customs, national tradition, and unified language, but only individual local phenomena. Already the earliest Aramaic written witnesses attest a multiplicity of dialects,[11] and the sources of the period employ the name "Aram" only geographically (→ V).

Therefore, *ʿm* appears in the Old Aramaic Sefire state treaties, which contain all the oldest instances, for "nation" as the population of a region subject to a political prince, who will share the penalty of his treaty violation.[12] The supplement *zy bydy* "that is my power"[13] makes explicit the definition in the sense of a common state authority.[14] One text[15] associates *ʿm* with a local sanctuary and, thus, emphasizes, along with the juridical and social aspects, the religio-cultic aspect of the organization of the inhabitants of a specific region, but the key word (*ʾšrthm*) is unclear. "People of my nation" *bny ʿmy* denotes membership in such an internally structured and externally delimited group,[16] cf. *ʿmh* "his nation" at Deir ʿAllā.[17]

With the incorporation of the once independent Aramaic principalities into the Neo-Assyrian Empire around the middle of the eighth century B.C.E., the term *ʿm* disappears from the documentary material and, on into Roman times, appears only in literary texts. The Aramaic-speaking inhabitants of Syria were now part of the multiethnic state and remained so under Babylonian, Achaemenid, Greek, and Roman rule. Indubitable specimens of the word first reappear in Biblical Aramaic. It is unclear whether *ʿmmʾ* in *TADAE* C1.1:89,189 involves the plural "nations" or another word "totality" (→ I);[18] in l. 98 this contrasts this lexeme with the individual; the context of l. 189 is unclear. The *ʿm* in l. 109 could be the preposition "with."[19]

In the court tales of Daniel, almost all instances appear in the formula *ʿam^{e}mayyā ʾumayyā w^{e}lišššānayyā* "nations, tribes, or languages" (Dnl. 3:4,7,31; 5:19; 6:26), in Dnl. 3:29 instead the synonymous singular *ʿam ʾummā w^{e}lišššān*. This formula emphasizes the universal validity of royal edicts and announcements in the empire, but with reference to the pagan state religion and, after the king's conversion, to the worship of the true God. The administrative recognition of several official languages in the Achaemenid Empire may have influenced the division into language

groups.[20] One cannot say with certainty, however, whether *ʿam* differed, e.g., as an ethnic category from *ʾummā* as a social category, especially since the latter, like *ʿam*, denotes entire national groups in Ezr. 4:10 (→ IV). Ezra 6:12 simply employs the word *ʿam* for the same, all-encompassing target group of a royal mandate—here the protection of the Jerusalem temple from destruction.

Then, Dnl. 7:14 transfers the same expression from the political to the religious realm in the vision of the investiture of the "son of man" by promising the people of God (→ III) eternal dominion after their oppression by the sequence of secular powers.

Finally, among the Nabateans, the old meaning returns in the royal epithet *rḥm ʿmh* "who loves his people"[21] and *dy ʾḥyy wšyzb ʿmh* "who kept his people alive and delivered them" in the dating formula of Nabatean treaties from the Dead Sea.[22]

III. Religious Use. In Israel, the veneration of an official god of the kingdom and the dynasty, as other Syro-Palestinian minor states also knew, developed into an all-encompassing relationship far beyond political relations and the well-being of the ruling house. Thus, the social organization understood as a relationship was expanded into the "people of God," who have entered into a covenant with the divine ruler of all who transcend any historical or national limitation, who experience unity from this bond, grounded ethically through exclusive worship and solidarity among human beings, and who expect eschatological restoration after the experience of exile and foreign domination. Scholars often associate the beginning of this process with the fall of the Northern Kingdom to the Assyrians in 722 B.C.E.[23] Thus, Israel's Aramaic literature from the postexilic period also reproduces the nuance of *ʿm* as "people of God." It is tied to God over generations so that the exile can be perceived as a penalty for the sins of the fathers (Ezr. 5:12), it stands in a close relationship with its priests regardless of the dwelling place of individuals (Ezr. 7:13,16),[24] and the divine law guides it (Ezr. 7:25).[25] In the apocalyptic expectation, the people of God, whatever its precise definition may be, will triumph at the

end of times as the "people of the saints of the Most High"[26] over all powers (Dnl. 7:27; 2:44).

This understanding also determines the use of *ʿm* at Qumran, where it appears mostly in apocalyptic passages. The opposition of the people of God and the nations in 4Q246 1 2:3f.,8 closely resembles Daniel; cf. 4Q243 16:3; 24:3f., and the passages concerning the eschatological battle with the "nations," the representatives of the evil, clearly exaggerated historical enemies of Israel.[27] The "people" will be purified[28] and is simultaneously the medium of enlightenment,[29] but its wisdom will also be shared with the other nations.[30] In contrast, 4Q213a 3-4:6 is proverbial: individual purity ennobles the entire nation. 11Q10 employs *ʿm* for *gwy*[31] and *ʾdm*.[32] Additional instances are very fragmentary.[33] In Jewish Palestinian, it represents uneducated people in contrast to the literate[34] or the pagans;[35] more in *DJPA*, 410.[36]

IV. "Tribe." Biblical Aramaic first attests the rare synonym /ʾommā/ "tribe" as *ʾummā*. Outside Ezr. 4:10, where it uniquely represents "nations," it occurs only in Daniel, consistently in an expression of totality to denote the royal authority valid equally for all (→ III). The singular appears only in Dnl. 3:29; the plural in Dnl. 3:4 and Ezr. 4:10 is vocalized in accordance with the etymology with *ʾmm* /ʾummayyā/, otherwise, probably secondarily *ʾumayyā*. *ATTM*, 2, 150 reads the same word in 4Q550 2:4,[37] for other suggestions → *npl* III.2.

V. "Aram." The Old Aramaic texts consistently employ the name *ʾrm* "Aram" as a territorial designation for Syria (thus, roughly, the Syrian wilderness as far as the Euphrates) or parts of it, although the broader distinction between *kl ʾrm* "all of Aram" and *kl ʿly ʾrm wtḥth* "all of upper and lower Aram" in the description of the region in which the state treaties of Sefire are valid[38] remains unclear. Thus, it could refer to various Aramaic states[39] and serves in biblical texts to designate the kingdom of Aram-Damascus.[40] The genealogical association of the name with Arama,

Shem's son, in 1QapGen 12:11; 17:9 depends on the tradition of the division of the land after the flood. The definition of the name "Syria" in Greco-Roman sources varies similarly.[41]

Imperial Aramaic private documents from Elephantine first attest the adjective *ʾrmy* /ʾaramāy/ "Aramaic, Aramean." An "Aramaic people" as an ethnic entity cannot be identified, however (→ II), although this concept is widespread as a retrojection in the identity formation of modern Aramaic-speaking minorities. The term interchanges with *yhwdy* "Judean,"[42] even in reference to the same person, at Elephantine, too.[43] Meanwhile, the genealogical relationships of the partriarchs with the Arameans (Gen. 25:20; 28:5; 31:24; Dt. 26:5) have no known historical foundation, but probably serve to underscore the understanding of their own foreignness in Canaan according to the national theological historiography.[44] In later Jewish Palestinian and Jewish Babylonian *ʾrmy* means "non-Jew, Gentile,"[45] as also in Syriac translations of the Bible.[46]

The adverb *ʾrmyt* /ʾaramāyt/ "in the Aramaic language" derives from the adjective.[47] It appears in Biblical Aramaic in Dnl 2:4a introducing the Aramaic portion, rendered in Greek as Συριστί (see above), but also denotes Aramaic as the administrative language (2 K. 18:26; Ezr. 4:7).

In fact, based on certain phonetic, morphological, and sometimes also lexical characteristics, Aramaic can be plausibly differentiated from the other Semitic languages, specifically those of Syria-Palestine.[48] In the course of its long history, however, various population groups in the Near East employed it as a colloquial, administrative, or literary language.[49] Consequently, there was no uniform ancient designation of the language and inhabitants of Syria.[50] In the modern Semitistic sense, "Syriac" means the Aramaic language of Edessa that became the theological and liturgical lingua franca of a great portion of the Christian orient with the expansion of Christianity.[51] Thus, Syriac is Aramaic, but Aramaic is more than Syriac.

עמק ʿmq; עמק ʿmq /ʿomq/; עמיק ʿmyq /ʿammīq/

I. Etymology and Lexical Field. II. Verb “to Be Deep,” “to Deepen” (C-stem). III. Noun “Depth.” IV. Adjective “Deep.”

I. Etymology and Lexical Field. In Aramaic, the root *ʿmq* “to be deep” functions as it does in Hebrew and other Northwest Semitic languages. The stative G-stem (Hebrew only in Ps. 92:6, figuratively) is still rare in the better-attested later literary languages;[1] older Aramaic has only one instance of the C-stem “to deepen,” for which Jewish Palestinian and Jewish Babylonian have the D-stem.[2] The nominal forms have a literal or figurative meaning: the masculine *ʿmq* /ʿomq/[3] “depth” also designates the “valley,” and the adjective *ʿmyq* /ʿammīq/ “deep,” formed in Aramaic on the *qattīl* pattern, denotes “profound, concealed.”

II. Verb “to Be Deep,” “to Deepen” (C-stem). The verb first appears as a C-stem “to dig deeply” in a construction report in the Old Aramaic royal inscription of Zakkur[4] with a grave (*ḥrṣ*) as object. In contracts from the Dead Sea, it also occurs as a construction term along with *ḥpr* “to dig.”[5]

III. Noun “Depth.” The first instances of the noun *ʿmq* /ʿomq/ appear at Qumran. In 1QapGen 21:25,32 and 22:13f., it represents *ēmœq* in Gen. 14:3,17, both of a certain valley with this name, likewise in 4Q537 24:2. The contract V 47:4[6] has it in a property description in contrast to *rwm* “height.”

IV. Adjective “Deep.” The adjective *ʿmyq* /ʿammīq/ “deep” as a substantival plural in Dnl. 2:22 denotes “secrets” (fem.), similarly in 4Q541

3:3 with *bīn*[7] *b-* “to pay attention to,” thus clearly as a wisdom term.

7. T-long stem.

עני I *ʿnī*

I. Etymology, Lexical Field, and Grammatical Constructions. II. Generally "to Commence, to Answer." III. Religiously "to Answer Prayers."

I. Etymology, Lexical Field, and Grammatical Constructions. Forms of the Semitic verb **ʿnī* I "to answer" can be quite clearly distinguished semantically from the homonymous root **ʿnī* II "to be humble, poor."[1] At least the second, based on Moabite,[2] Arabic, and Old South Arabian, may trace to an original **ʿnū*.[3] Aramaic also attests both, but so far they cannot be subsumed plausibly under a common root. If, as is customary in Hebrew lexicography, one assigns the particle *lmʿn* "thereby"[4] and the masculine noun /ʿenyān/ "matter"[5] to a further homonymous verb **ʿnī* III "to make an effort, to be busy,"[6] one can also assume the same for Aramaic.

Aramaic usually employs *ʿnī* I together with a subsequent *ʾmr* "to say"[7] which either represents a reaction to something previously said in the sense of "to answer" or, if it does not introduce a response, serves to express an ingressive action, "to begin, to chime in." Naturally, it occurs in this usage normally only in narrative texts and is attested in this function since the late Old Aramaic sayings of Aḥiqar. Employed absolutely with a divine subject, *ʿnī* can also function in religious language with the nuance "to answer prayer." It is less common, but early Old Aramaic already attests it.

In addition, the C-stem of → *tūb* can signify "to answer" and, in official diction, the noun → *ptgm*[8] denotes "answer." Meanwhile, → *šmʿ* "to hear" mostly indicates "to answer prayer" and the C-stem of *ṣūt* absolutely or in a construction with a direct object occasionally does so.[9]

Older Aramaic employs “to answer” intransitively, sometimes supplemented with an indirect object following *l-* “someone” or, in court style, the person following *qdm* “before.” Later, it also appears as a double transitive “someone something.”[10]

The form with *ʿnī* in relation to *ʾmr* in introductions to speech merits particular attention. Old and Imperial Aramaic employ both verbs in the perfect, as the morphologically unequivocal forms of the third-person plural *ʿnw wʾmrw* in the still Old Aramaic sayings of Aḥiqar[11] and of the first-person singular in the Imperial Aramaic framework narrative *ʿnyt wʾmrt* (l. 45) indicate. In contrast, the third-person masculine singular in Daniel in the same combination is vocalized as a participle (Dnl. 2:15,26; 3:24; 5:13; 6:21),[12] as is *ʾmr* alone in the meaning “to say” (Dnl. 4:4; 6:7,13,16; Ezr. 5:3).[13] Verbs introducing direct speech often appear in present forms and, thus, anticipate the temporal reference of the speech itself.[14] With regard to *ʿnī . . . ʾmr*, however, the form of *ʾmr* may have initially been reduced to the participle as the result of a “reduction of markedness,”[15] as the spelling *ʿnw wʾmryn* in the consonantal text with the third-person plural perfect of *ʿnī* and the participle of *ʾmr* indicates (Dnl. 2:7,10; 3:9, etc.).[16]

II. Generally “to Lift, to Answer.” In combination with *ʾmr* in narrative texts, *ʿnī* serves to introduce speech “he began and said,” in relation to a preceding speech also “he answered and said.” It appears first in the fables of Aḥiqar used of talking animals[17] or plants,[18] likewise in the framework narrative[19] and in the Bar-Puneš story.[20] It structures the course of the text, while in documentary genres such as contracts, a simple *ʾmr* introduces quotations.[21]

Daniel follows the same usage, employing third-person singular verbs as participles for the historical present in the transition to direct speech (2:15,26; 3:24; 5:13; 6:21), but preserving the old construction with the feminine singular (5:10) and the transitional form masculine plural perfect

as a participle (2:7,10; 3:9, etc.; → I). In a pair of passages from Qumran, which preserve sufficient contexts, two or three parallels appear with the third-person masculine singular that could be either the perfect or the participle,[22] and further a few examples from 11Q10 as literal renderings of the same construction in Hebrew.[23] Only fragments without context preserve perfects of *ʿnī* in other persons.[24] Introducing speech, *ʾmr* transmitted alone apparently stands in the perfect.[25]

III. Religiously "to Answer Prayers." The use of *ʿnī* in religious diction for "to answer prayer" as in Hebrew (cf., e.g., 1 S. 7:9; Isa. 30:19) is uncommon. A comparison, in the broadest sense, occurs in the Old Aramaic inscription of Zakkur,[26] where *wyʿnny* "and he [i.e., the dynastic god Baʿalšamin] answered me" denotes a reaction to the raising of the hands in prayer.[27] Meanwhile, the use of the imperfect as a past, otherwise atypical in Old Aramaic, suggests that here, too, *ʿnī* was primarily understood as a verb of speech "to answer," i.e., like the participle in Daniel (→ I), it denotes the historical present.[28]

Otherwise, *ʿnī* first denotes "to answer (a prayer)" again in the prayer language of Palmyrene dedicatory inscriptions.[29] In a dialogue with God consisting of speech and response, such as 11Q10 34:2 (Job 40:6), meanwhile, it also means "to answer" with a divine subject (→ II).

26. *KAI* 202 A 11.

27. → *yd* II.1.

28. And, therefore, is morphologically a long imperfect; see the discussion in H. Gzella, *A Cultural History of Aramaic*. *HO* 111 (2015), 84f.; the interpretation sometimes represented earlier as a narrative short imperfect is unsubstantiated.

29. *PAT* 0393.4; 0413.3; 1911.8; fragmentarily 0065.4; etc., cf. *PAT*, 398, s.v.

עני II ʿnī; ענה ʿnh /ʿanǣ/; ענוה ʿnwh /ʿanwā/; עתר ʿtr /ʿotr/

I. Etymology and Lexical Field. II. Usage of the Adjective "Poor, Poor (Person)." III. Antonym "Wealth."

I. Etymology and Lexical Field. Unlike Hebrew, Aramaic rarely attests the root *ʿ*nī* II "to be humble, poor"[1] and, when it does, it is primarily as the adjective ʿ*nh* /ʿanǣ/ "humble, poor." Probably under the influence of Hebrew, the D-stem "to humble," however, appears in Jewish Palestinian[2] and in Jewish Babylonian.[3] Presumably, the Dt-stem in Syriac has the same basis because the examples in *LexSyr*[4] all originate from the respective biblical passages translated from the Hebrew.

A proverb of Aḥiqar attests the feminine ʿ*nwh* /ʿanwā/ "poverty"[5] and describes it as the most bitter of all; the abstract /ʿanw/utānū/ and related forms for the virtue of humility appear in later literary languages.[6]

Semantically, it is difficult to differentiate ʿ*nī* II from forms of the root → *špl* "to be humble," which is more productive in Aramaic. Later, the root *dwī* denotes "to be woeful"[7] and *mskn*, borrowed from the Akkadian and reanalyzed as a quadriradical, denotes "poor."[8] The noun ʿ*tr* /ʿotr/ > /ʿotar/ "wealth"[9] serves as an antonym. The verb **ġθr* > ʿ*tr* "to be/become rich" with additional derivatives is attested later.[10]

II. Usage of the Adjective "Poor, Poor (Person)." The first instance of ʿ*nh* /ʿanǣ/ occurs at the beginning of the self-presentation ʾ*š* ʿ*nh* ʾ*nh* in the Old Aramaic royal inscription of Zakkur.[11] Since the formulation "a humble man am I" poorly suits the self-conscious tone of texts in this genre, the meaning of the word is debatable.[12] It most likely indicates Zakkur's

nonroyal parentage as a *homo novus* or his pious relationship with the dynastic god Baʿalšamin and, in either case, would be self-praise.

Daniel 4:24 employs the plural *ʿnyn* substantivally for "poor, woeful" by which Nebuchadnezzar seeks pity after Daniel's warning in order to avoid the penalty for his sinful arrogance. Relatedly, care for the poor belongs to the royal ideal.[13] The word also appears as a substantive at Qumran, in three of four instances in passages translated from the Hebrew and rendering the Hebrew cognate: 4Q583 1:2 (Isa. 14:32), 11Q10 14:6; 25:4 (Job 29:12; 34:28). Finally, 4Q569 1-2:8 "remember the poor"[14] lacks context.

III. Antonym "Wealth." The noun /ʿotr/ appears immediately at the beginning of the Aramaic textual tradition in the Tell Fekheriye inscription designating the abundance that the weather god Hadad brings to the earth.[15] In accord with the orthographic tradition of Gosan, it is spelled *ʿsr* there.[16] In a proverb of Aḥiqar, it appears along with the substantival adjective *ʿtyr* /ʿattīr/ "rich," which occurs only here in Old Aramaic; the rich should not become haughty and say: *bʿtry hdyr ʾnh* "in my wealth I am glorious."[17] In 1QapGen 22:22,31f. *ʿtr* refers to Abraham's God-given possessions.[18]

ענן *ʿnn* /ʿanān/; ערפל *ʿrpl* /ʿarapel/; מטר *mṭr* /maṭar/; תלג *tlg* /talg/

I. Etymology and Lexical Field. II. Noun “Cloud.” III. Noun “Rain.” IV. Noun “Snow.”

I. Etymology and Lexical Field. Aramaic, like Hebrew and Arabic, designates the “cloud” generally with the masculine *ʿnn* /ʿanān/. Yet, Aramaic seems not to use the noun collectively so that the word appears mostly in the plural.

Along with the feminine *ʿrpl* /ʿarapel/ “dark cloud,” the same lexical field also encompasses the masculine terms → *ṭl* /ṭall/ “dew,” *mṭr* /maṭar/ “rain,” and *tlg* /talg/[1] “snow.” In addition, they all belong to the common Semitic lexicon; Hebrew also has a more fully developed set of synonyms for “cloud,” “mist,” etc.[2] The older Aramaic written sources preserve meteorological vocabulary primarily in the depictions of nature and passages dealing with the theology of creation in 11Q10.

II. Noun “Cloud.” The first occurrence of *ʿnn* is in the vision of the investiture of the “son of man.”[3] After the collapse of all secular kingdoms, he appears *ʿm ʿnny šmyʾ* “with the clouds of heaven” before the throne of the Ancient of Days and receives from him eternal power (Dnl. 7:13). In contrast to the monsters, which symbolize the empires in the preceding course of the vision and arise from the depths of the sea (7:2f.), long an image of chaos,[4] the “son of man” comes from the bright heights, which the reference to heaven in the formulation[5] specifically emphasizes. The LXX accentuates the convenient relationship with the old Canaanite myth of Baal as the rider of the clouds,[6] as in the Ugaritic epic, more through the

translation ἐπί “on” instead of “with.” It continues as a matter of debate, however, whether this rendering presupposes an original text with, e.g., the preposition *ʿl*.[7] Familiarity with this myth, at any rate, cannot be excluded.

At Qumran, the word appears quite frequently because of the numerous instances in 11Q10 rendering both the Hebrew cognate *ʿnn* and related terms such as *ʿb* “rain cloud,” *nṭp* or *ʾgl* “drops,” *ḥzyz* “thundercloud,” and *sʿrh* “storm wind.”[8] Thus, the range of Hebrew synonyms was reduced, indeed in conformity with the translation style of 11Q10.

Elsewhere, *ʿnn* occurs only sporadically at Qumran, but always in the context of creation theology: in 1QapGen 12:1 of the rainbow in the clouds as a sign of God’s postflood covenant (following Gen. 9:13), as the donor of the winter rain in Enoch’s speech concerning the constancy of nature,[9] in the translation of the sacrifice regulation from Lev. 16:13 in 4Q156 1:4 of the incense cloud, and, in an unclear context, in a demon incantation.[10] In 4Q157 1 1:2 (Job 3:5) *ʿnnʾ* would normally be considered a spelling of the determined state;[11] in a nonstandard orthography, however, it could also denote the feminine *nomen unitatis ʿnnh* “(individual) cloud” borrowed from Hebrew and otherwise foreign to Aramaic, especially since the (poetic) original has an indetermined form “a cloud.”

The more specific synonym *ʿrpl* /ʿarapel/ “rain cloud, dark cloud” appears in 11Q10 29:8 and 30:7 (Job 37:18; 38:9) for its Hebrew cognate, but may not be a loanword based on the broader Semitic etymology. In 4Q541 9 1:5, an apocalyptic passage, alongside *ḥšwk* “darkness,”[12] it appears in the determined state figuratively denoting the metaphysical darkness of the sin and uncertainty that the “eternal sun of God” will illuminate in the eschaton.

III. Noun “Rain.” The noun *mṭr* /maṭar/ “rain” appears in Aramaic beginning with the texts from Qumran. In 11Q10, it occurs in the same contexts as *ʿnn* “cloud”: 28:5 (Job 36: 27); 31:3,5 (38:25,28; → II). In 31:3 (Job 38:25), it represents the Hebrew *šṭp*, elsewhere the cognate *mṭr*. The

synonyms in the lexical field "rain" are also less developed than in Hebrew.[13] Furthermore, 4Q204 1 13:26 (1 En. 36:1) employs it along with → *ṭl* "dew"; as does 4Q211 1 1:2 (1 En. 82:22), indeed with "clouds" as the subject[14] and the C-stem of *nḥt* "to bring down" as the verb,[15] cf. 1Q24 5:4 and 4Q201 1 2:4. It is also part of the angel name Matarel "rain of God" in 4Q201 1 3:9 par. 4Q204 1 2:27 (1 En. 6:7). *ATTM*, 2, 93 emends following Gen. 8:2 at the end of 1QapGen 10:1 *m*[*ṭrʾ* "the rain."

IV. Noun "Snow." "Snow," *tlg*, appears in comparison to the white clothing of the Ancient of Days in Dnl. 7:9[16] along with → *nqh* "wool," in Enoch's dream of the punishment of the angels in reference to a house with a foundation of snow, contrary to human experience, hot and cold simultaneously,[17] and for snow-covered mountains in reference to the cardinal directions.[18] Outside the mountains, snow was very rare[19] and represents purity or threat (cf. Prov. 31:21).

עצב ʿṣb; עציב ʿṣyb /ʿaṣīb/; אבל ʾbl; בכי bkī; כרי krī

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. The verbal root *ʿṣb* "to be sorrowful" appears only very rarely in Aramaic, but it has a West Semitic etymology and appears in the Gt-stem indicating the medium in reference to psychic circumstances. The adjective *ʿṣyb* /ʿaṣīb/ "sorrowful" derives from it. The nuance of *ʿṣb* hardly differs from that of *krī* (also in the Gt-stem). The parallelism of *krī* with → *bhl* in the sole older Aramaic instance (Dnl. 7:15), however, suggests a state of terror (after a disturbing vision), while *ʿṣb* and *ʿṣyb* find usage in the context of care and sorrow. Thus, they approach the semantic spectrum of the root *ʾbl* "to mourn." For the verb, see 4Q531 17:3[1] and 4Q541 24 2:2,[2] for the noun /ʾebl/ > /ʾebəl/ "grief" 6Q14 2:3,[3] and perhaps, 1QapGen 6:11 according to *ATTM*, 2, 92.[4] The verb *bkī* in the G-stem denotes crying/wailing as a physical symptom of mourning,[5] optionally supplemented with *ʿl* "over,"[6] later in the D-stem "to beweep someone."[7] "To worry" can also be indicated by *yṣp*.[8]

II. Usage. The verb *ʿṣb* appears in older Aramaic only in 1QapGen 20:12. It serves as an infinitive *bʾtʿṣbʾ* to modify the verb *ʾmr* "to say" in Abraham's petition abounding in concern for Sarah. The adjective *ʿṣyb* occurs with a very similar nuance in Dnl. 6:21 as an attribute of → *ql* in *bql ʿṣyb* "with an anxious/sorrowful voice." Thus, after a sleepless night, King Darius inquires after the well-being of Daniel, who, through a court intrigue

involving his envious opponents, had been thrown into the lions' den because of his piety, but survived with God's help.

8. *ATTM*, 2, 411.

עקר ʿ*qr*; עקר ʿ*qr* /ʿeqqār/

I. Etymology and Lexical Field. II. Usage of the Verb "to Eradicate." III. Noun "Root Stock."

I. Etymology and Lexical Field. Aramaic ʿ*qr* "to eradicate" in the G-stem and the related t-passive has a Hebrew cognate; Akkadian *uqquru* "disabled"[1] and Arabic ʿ*aqara* "to wound" (if not borrowed) may argue for a common Semitic etymology. The same root underlies the masculine ʿ*qr* / ʿeqqār/ "rootstock, stem," but the question of priority is like that of the hen and the egg. The root[2] emanates from the stem.[3] The two terms often appear in the same context. In Nabatean private documents from the Dead Sea, one also finds ʿ*qrn* (/ʿeqqārān/?) "groundstock, base amount" as a commercial term.[4]

II. Usage of the Verb "to Eradicate." As a verb, ʿ*qr* first appears[5] in Dnl. 7:8 in the vision of the horns of the fourth animal to depict how three of them were ripped out before (*mn qdm*) the fourth, worst horn. Interpreters usually relate it to Antiochus Epiphanes, three of whose dynastic predecessors were eradicated.[6] In Abraham's dream of the cedar and the palm, it also expresses enduring destruction,[7] and similarly in 4Q212 1 4:14 (1 En. 91:11) the end of evildoers. No context has been preserved for 11Q10 12:6 (Job 28:9). In nV 43:10[8] it means "to clear."

III. Noun "Root Stock." Old Aramaic already attests ʿ*qr* "rootstock." Use as a botanical metaphor for "descendants" seems obvious, but its very frequent occurrence in the Sefire treaties of state[9] is a typical characteristic of the style of these texts.

Nebuchadnezzar's dream vision of the world tree employs it in a different sense: on divine command, the tree should be cut down to the rootstock (root and branch) and the trunk remaining in the grass[10] placed in fetters (Dnl. 4:12,20). According to Daniel's interpretation, this announces the proud king's penance in exile, but Nebuchadnezzar will not be ultimately destroyed so that the way back to dominion remains open via the acknowledgement of the superior power of the true God (4:23). Meanwhile, even in banishment, basic provisions, symbolized by dew[11] and herbs[12] as nourishment, keep him alive. The sole instance from Qumran, 4Q530 2 2+6-12:8 (Book of Giants), also stems from a dream vision of an orchard, just as trees, in general, dominate the imagery of the visions. It deals with roots that sprout their stem.

עָרַד ʿrd /ʿarād/

I. Form and Denotation. II. Individual and Allegorical Meanings.

I. Form and Denotation. *ʿrd*, cuneiform *ḫarādu*,[1] in Aramaic originally /ʿarād/, pointed *ʿᵃrāḏ*, is the exclusively Aramaic designation for *Equus hemionus*[2] "onager" (not domesticated) in the North and *Equus africanus* "African wild donkey"[3] in Africa and Arabia, along with /ḥemār/[4] masculine, /ḥemārā/ and /ʾatān/ feminine; the sayings of Aḥiqar from the seventh century B.C.E. first attest the word in Aramaic. As *ḥᵃmōr* masculine and *ʾāṯōn* feminine, it also constitutes the normal Hebrew expressions. The temperament, speed, frugality, and endurance of the animal, which symbolized the unfettered and wild in the Near East, fascinated the poets and sages. Today, it is extinct in the Semitic-speaking Near East.

II. Individual and Allegorical Meanings. The word *ʿrd* denotes the genus or the stallion and is masculine in gender: 11Q10 32:4 (Job 39:5).[5] In 1 Ch. 8:15 and perhaps[6] in *TADAE* B8.4:15 (431 B.C.E.), it is a masculine name. Hebraized as *ʿrwd*, it already appears in Job 39:5,[7] always in rabbinic Hebrew, thence also occasionally in Babylonian Targumic and in Galilean Targumic under the influence of the Babylonian, in Babylonian Talmudic,[8] in the graffito *TADAE* D22.29:3 (493 B.C.E.), and also as a name in rabbinic Hebrew.

The earliest instances describe the onager as untamable,[9] an inhabitant of the hostile wilderness, in which the king who has become like an animal abides.[10] In the animal vision from Enoch 85-90 4Q201-212,[11] an allegory of world history, Ishmael appears (following Gen. 16:12) as the father of

many onagers, the Arabs (following Gen. 37:25-28) that overtake the lamb, Joseph.[12] As the designation for the mare, *ʿr(w)d* receives the feminine ending.[13]

ערר ʿrr; ער ʿr /ʿarr/; ערר ʿrr /ʿarār/

I. Etymology and Lexical Field. II. Verb “to Object.” III. Noun “Opponent.” IV. Noun “Objection.”

I. Etymology and Lexical Field. Forms of the root *ʿrr* “to feud with,” arisen from an older common Semitic **ṣ́rr*,[1] occur in Aramaic mostly in legal diction. The verb is unusual; Biblical Aramaic attests the masculine *ʿr* /ʿarr/ (ca. 200-150 B.C.E.)[2] “opponent” and, at the latest in private documents from the Dead Sea, the likewise masculine *ʿrr* /ʿarār/ “objection.” Unrelated is *ʿrr* “to strip.”[3]

II. Verb “to Object.” Jewish Palestinian first attests the verb with certainty. It serves as a legal term “to object.”[4] The supposed instance for “to incite” with *dyn* as object in *TADAE* B2.3:27[5] should probably be read with *TADAE ʿbdy* “sue.”[6]

III. Noun “Opponent.” The noun *ʿr* /ʿarr/ “opponent” occurs in older Aramaic only in Dnl. 4:16 where it is suffixed as *ʿryk* along with *śnʾyk* “your enemies”[7] in the disturbed Daniel’s unfulfilled wish, probably spoken out of loyalty,[8] that Nebuchadnezzar’s disastrous dream about his banishment and the related interpretation would befall the king’s enemies.

IV. Noun “Objection.” A possible early instance of *ʿrr* “objection” in a saying of Aḥiqar is uncertain.[9] It occurs for certain, however, in Aramaic contracts from the Dead Sea in waiver declarations.[10]

E. Jenni, "צרר *ṣrr* to show hostility toward," *TLOT*, 1098f.; H. Ringgren, "צַר *ṣar*," *TDOT*, XII, 464-68; F. Zanella, "*ṣrr* II," *ThWQ*, III, 444–46.

1. Hence Heb. *ṣrr*.

2. Abbreviated to /ʿar/, *ATTM*, 120-22.

3. *KAI* 222 A 41, pass.; see J. A. Fitzmyer, *The Aramaic Inscriptions of Sefire*. *BietOr* 19/A (^{2}1995), 97f.

4. *DJPA*, 421a.

5. *ATTM*, 665 and *DNSI*, 889f.

6. Fem. sg. impv. *ʿbd* for "to sue someone," → *ʿbd* II.2 and *dīn* II.1; and consequently deleted in *ATTM*, 2, 460.

7. → *śnī*.

8. Cf. K. Koch, *Daniel 1-4*. *BK* XXII/1 (2005), 423f.

9. *TADAE* C1.1:103, where one can also read *ʿdr* "help."

10. V 48:9 and 81:7; in a slight variation in V 2:6 and 3:29; Heb., but under the heavy influence of Aram. legal terminology, hV 39:27; 40:10; all in *ATTM* 2.

עֵשֶׂב ʿśb /ʿeśb/; דתא dtʾ /datǣ/

I. Etymology, Lexical Field, and Forms. II. Usage of the Noun "Herb, Herbage." III. Noun "Grass."

I. Etymology, Lexical Field, and Forms. The Aramaic masculine collective substantive *ʿśb* /ʿeśb/[1] "herb, herbage" corresponds to a, probably common Semitic, primary noun. It denotes the greens that God's creation gave humanity as nourishment. The same lexical field includes *ʿśb* and the likewise masculine noun *dtʾ* /datǣ/ "(fresh) grass," which arose, after the lost of the glottal stop in the final syllable[2] and the fusion of the interdentals and the dentals[3] around the ninth century B.C.E., from an old */daθʾ/, with a retained /ʾ/ in a historical spelling. The Akkadian *dašʾu* and Syriac *taḏā* (with metathesis) indicate a *qatl*-form, but the word appears in Biblical Aramaic pointing, in Hebrew, and sometimes in Syriac as a *qitl*-noun.[4] The two terms often appear together, and *ʿśb* also with *yrq* (/yarūq/?) "greenery."

II. Usage of the Noun "Herb, Herbage." Daniel 4 first attests *ʿśb*[5] in an angel's repeated formulaic command to expel Nebuchadnezzar from human society as a punishment for his arrogance so that he is wet with the dew of heaven[6] and shares herbs as nourishment with the animals; first in the dream of the world tree (4:12), then in Daniel's interpretation (4:22), and finally as a genuine, immediately executed command (4:29f.; taken up again in 5:21), as the object of the verbs → *ṭʿm* III. and *ʾkl*.[7] It refers to the fact that the king will be stripped of his majesty, but will nevertheless be kept alive through basic provisions. Analogously, Qumran employs *ʿśb* for

the nourishing abundance of creation in the postdiluvian world.[8] Furthermore, it appears in the Palmyrene tax tables.[9]

III. Noun "Grass." In older Aramaic, *dtʾ* "grass" occurs three times in the same context as *ʿśb*: in Dnl. 4:12,20[10] for the grass of the field where the rootstock of the felled royal tree should be left, in 1QapGen 11:12 in the description of the nourishing earth, and similarly in 11Q10 31:5 (Job 38:27).

10. Det. *diṯʾā*.

עשת ʿšt

I. Lexical Field and Grammatical Constructions. II. G-Stem "to Plan." III. Middle-Passive "to Be Understood."

I. Lexical Field and Grammatical Constructions. The verb *ʿšt* "to plan, think," which occurs in the G-stem in reference to a specific intention and in the related t-stem with a middle nuance for a favorable attitude, appears to involve a peculiarity of the Aramaic lexicon. The sole Hebrew instance Jon. 1:6 "to think of someone" may have been borrowed from the Aramaic, likewise the derived nouns *ʿštw* "idea" (Job 12:5) and *ʿštnt* "thought, plan" (Ps. 146:4).[1] It also appears in Old Aramaic, but otherwise has no known semantic cognates and seems, as evidenced by its distribution in literary or official texts, to be associated with the register of standard speech. For "to remember" in general, Aramaic has → *dkr*, and for "to consider, acknowledge, calculate" → *ḥšb*.

Besides the indirect object following *l-*, *ʿl* for "against" or "about," *b-* "with", or adverbial expressions can supplement the verb.

II. G-Stem "to Plan." The first instance of *ʿšt* in the G-stem consists of the provision in a Sefire treaty of state against attacking a loyal treaty partner.[2] The "thinking in the heart" (*ʿšt blbb*)[3] along with *ʾmr bnbš* refers to unexpressed contemplations. In the framework narrative of Aḥiqar, *ʿšt* refers once to the harm that Aḥiqar's nephew has in mind against (*ʿl*) him,[4] and again to a plan (*ʿbd lqbl zy ʾnt ʿšt* "do what you have in mind," l. 68). Imperial Aramaic will employ *ʿšt l-. . . bḥyy* in the sense "to think of [the envisaged heir] in life."[5] Corresponding precisely to this usage, *ʿšyt* in Dnl.

6:4 denotes the king's intention to (*l*-) promote Daniel because of his accomplishments. Interpreters usually take the form to be a passive participle "to be intent on,"[6] which now finds support from *hww ʿšytyn l-* "they planned to" in 4Q532 2:6 (although with no further context). It consistently refers to specific, executable intentions.

III. Middle-Passive "to Be Understood." The Gt-stem expresses more of a generally favorable attitude toward (*l*-) someone and functions as a wish for well-being in formal letters to authorities.[7] The occurrence in 4Q206 3 1:5 has no context.

עתיק ʿ*tyq* /ʿattīq/

I. Etymology and Lexical Field. II. General Use. III. The Ancient of Days in Dnl. 7.

I. Etymology and Lexical Field. The Aramaic adjective ʿ*tyq* /ʿattīq/ "old" belongs to the common Semitic root ʿ*tq* "to depart, to advance," which first occurs as a verb "to age" in Aramaic in post-Christian literary languages.[1] In the Imperial Aramaic written tradition, the word consistently refers to objects from earlier times that do not age as people do. Thus, the "Ancient of Days" on his divine throne in Dnl.7 denotes an age beyond the typical human lifespan. Instead of this term, the noun → *śb* /śāb/ or the adjective → *rb* /rabb/ serves as "old person," *qšyš* /qaššīš/ also serves as the honorific "senior, elder."[2] The specific age of a person finds expression through /bar šanīn/ with a number ". . . years old."[3]

II. General Use. Imperial Aramaic usages of the adjective ʿ*tyq*[4] generally describe things of undetermined age. In the formulaic certification of validity in legal texts such as endowments, which specifically establish their validity for all coming generations, the word means an "old one," that is an earlier document that can no more invalidate the present document than a new one (*ḥdt*) can.[5] A satrap's letter from Bactria employs it of old houses,[6] the harbor register from Elephantine[7] employs it often in the unexplained expression *lq* ʿ*tyq*,[8] and a letter ostracon for *qmrʾ* ʿ*ty*[*q*ʾ "the old wool."[9] In a Palmyrene honorary inscription it depicts old wine[10] and in another[11] "old" (παλαιά) gold denari, probably according to an old weight.

III. The Ancient of Days in Dnl. 7. Thus, *ʿattīq yōmīn* "an Ancient of Days" (Dnl. 7:9; 7:13,22 in the determined state *ʿattīq yōmayyā*) in reference to the divine figure before whose throne the "son of man"[12] receives eternal dominion at the end of time does not mean an old person, but a transcendent figure lost in reverie that has existed since primeval times.[13]

פחה *pḥh* /pāḥā/

I. Etymology, Forms, and Lexical Field. II. Old and Imperial Aramaic. III. Biblical Aramaic.

I. Etymology, Forms, and Lexical Field. Aramaic *pḥh* /pāḥā/ "governor" is borrowed from Assyrian *pāḫatu*[1] and as *pœḥā*, as it also is in Biblical Aramaic pointing, made its way further into Hebrew. It behaves as a masculine, but in form has assimilated to the feminine of the *qālāt* type and therefore forms the plural with the extension /-awā-/[2] as in the determined state /pāḥawātā/. It was employed in the Achaemenid period as a naturalized official title, although not always for the same rank.[3]

II. Old and Imperial Aramaic. The letter of the Canaanite prince Adon to the pharaoh from the end of the seventh century B.C.E.[4] first attests *pḥh* "governor," but the context remains unclear. In the Achaemenid period, it denotes a provincial governor, subordinate to the satrap, who, for his part, functions as the chair of the district administration for which, in turn, the term *pqyd*[5] serves. The salutation of the petition from the Elephantine community concerning the construction of the temple addresses Bagohi as "governor of Yehud"[6] and calls Sanballat "governor of Samaria" (l. 29). The governor of Bactria appears in the Behistun inscription;[7] a letter from its chancellery attests a *pḥh* of Bactria subordinate to the satrap in late Achaemenid times.[8] The reference to the governor of Samaria in private documents[9] may mean that they required authorization from the provincial prefecture.

Meanwhile, *pḥwʾ*, as in *TADAE* A3.3,4[10] and, if the reading is correct, a few stamp seals, probably refers to a low-ranking official and is, then, probably not identical with *pḥh* "governor."[11]

III. Biblical Aramaic. The usage in Biblical Aramaic is imprecise and refers sometimes to the satraps of Syria-Palestine, itself (Ezr. 5:3,6; 6:6f.,13), to the governor of Yehud (5:14), and in the court tales of Daniel generally to high officials along with other titles with no precise differentiation (Dnl. 3:2f.,27; 6:8).

פלג *plg*; פלג *plg* /palg/; פלגן *plgn* /palogān/; פלגן *plgn* /polgān/

I. Etymology, Lexical Field, and Grammatical Constructions. II. Verb "to Divide." III. Noun "Half." IV. Noun "Departments." V. Noun "Apportionment."

I. Etymology, Lexical Field, and Grammatical Constructions. The verbal root *plg*, which is at least West Semitic and possibly even older, occurs in individual languages with various nuances, of which Aramaic "to share, divide" becomes distinct from Arabic "to split." The Achaemenid period first attests it as a verb normally construed as a transitive with that which is to be divided as a direct object. Yet, because of the lack in the consonantal texts of unequivocal forms such as the participle, it cannot be determined whether the later differentiation between the G-stem "to share" and the D-stem "to divide"[1] was already common in pre-Christian times.

Additional supplements can be indicated individually by prepositional expressions following *l*- for the indirect object and *ʿl* "under," later also *byn*, or *ʿm* "with." In pre-Christian times the internal passive denoted the result "to be shared/apportioned,"[2] the passive Gt-stem, the action "to be divided."[3] In post-Christian times, this usage displaced the internal passive in Aramaic.

Among the nominal forms, the masculine *qatl*-form /palg/ "half"[4] is the most common and clearly differs in Hebrew from the corresponding *qatl*-noun *pælæḡ* "ditch, water course."[5] On occasion, the plural of the *qutal*-form /palogān/ "departments" appears;[6] in the Aramaic contracts from the Dead Sea (legal diction?), the feminine abstract /palgū/ serves for "half,"

and later for "conflict."[7] The masculine /polgān/ "apportionment" known in contracts from the Achaemenid period denotes the verbal action.

The verb *plg* usually denotes dividing as such while → *ḥlq* serves for allocation by a responsible authority. In certain contexts, however, *plg* also appears interchangeably with *yhb*.[8]

II. Verb "to Divide." The attestation of the verb *plg* begins with an Aramaic treaty from the year 515 B.C.E. There, it occurs in relation to a common land lease to denote the sharing of the seeds with (*ʿm*) the contract partner in the eighth year of the lease[9] and the mutual (*kḥdh*) sharing of "good and bad," that is, of success and failure (l. 6). It functions similarly in a document more than a hundred years later concerning the allocation of slaves from common property (*kḥdh*) among (*ʿl*) the pertinent parties.[10] These contracts were called *plgn* (→ V).

In Biblical Aramaic, the verb occurs as a passive participle (→ I) in the interpretation of the vision of the colossus as a symbol of the empires,[11] its clay feet symbolizing the last "divided, split" kingdom.[12]

At Qumran, *plg* occurs in the context of the postdiluvian land apportionment,[13] for the lot (*ʿdb*) assigned to Enoch with the angels,[14] and in relation to the division of the bread in the offering.[15] In 11Q10, *plg* translates the Hebrew *ḥlq*[16] and *ḥṣī*.[17] For a discussion of passages lacking context and in dispute, see Gzella.

III. Noun "Half." The noun *plg* "half," as a number also "one-half," appears very often in the indications of quantity in Imperial Aramaic legal and commercial texts.[18] It appears as a temporal term *pᵉlaḡ ʿiddān* "half a year" in Dnl. 7:25.[19] Almost all the instances from Qumran appear in the phrase *šbyʿ plg* "a fourteenth" in a formulaic expression for the calculation of the course of the moon in 4Q208-209 (1 En. 73), similarly *bplg šbyʿyn*

"in fourteenths" in 4Q210 1 3:6 (1 En. 78:7). Others appear in measurements in the precise description of the new Jerusalem.[20] No difference from *plgw* (→ I) is perceptible and the relationship to *plg* at Persepolis[21] is unclear.

IV. Noun "Departments." In Ezra, the root *plg* appears as a plural of the noun /palogān/ "priestly department" (Ezr. 6:18) paralleling the plural of /maḥloqā/ in reference to the Levites[22] in the arrangement of temple service. In the sacrificial ritual of the new Jerusalem from Qumran, the word returns as a construct *plwgt ptry* "table groups."[23]

V. Noun "Apportionment." The noun *plgn* /polgān/ occurs in Achaemenid era legal texts in the meaning "apportionment" as a contractual matter,[24] thus in the same text as the verb in reference to the action (→ II).

פלח *plḥ*; פלחן *plḥn* /polḥān/

I. Etymology and Lexical Field. II. General Use “to Serve.” III. Religious Use. IV. Noun “Service.”

I. Etymology and Lexical Field. Of the various nuances of the root *plḥ* attested in several Semitic languages, Aramaic settled on “to work, to serve” in the G-stem in contrast to the related meanings “to plow” and “to divide” for the G- (Ps. 141:7, the text is uncertain) and D-stems (2 K. 4:39; Job 16:13; 39:3; Prov. 7:23) in Hebrew. Via “to handle” one can establish a relationship to “to work” and further to “to serve,” “to revere.” Meanwhile, many consider Arabic *falaḥa* “to plow, to farm” an Aramaic loanword.[25]

Imperial Aramaic first attests *plḥ* as a verb, although initially only rarely. It can take a direct object with the person as a pronominal suffix or following the object marker[26] or an adverbial expression with *b*- “in, at.” Already in the Achaemenid period, it appears both in the profane sense “to serve (a superior),” for either noble or humble work, and also in the religious sense “to revere (God).” The second nuance always appears in Biblical Aramaic and often at Qumran. Older Aramaic attests it in the meaning “to work, to handle” only once (→ II),[27] but later more frequently.[28]

The masculine noun *plḥn* /polḥān/ “service” already occurs once in Ezr. 7:19 for “worship,” in Jewish Palestinan as a *qitlān*-form.[29]

In the usage for “to serve,” *plḥ* overlaps with → *šmš*; the nuance “to revere” finds expression in → *sgd* or → *dḥl* meaning “to fear (God).” As a noun for “work, worship,” Aramaic knows the feminine /ʿabīdā/;[30] “servant” is normally /ʿabd/[31] or infrequently /ʿolaym/.[32] The meaning “to

toil" belongs to the root *ʿml* in the G-stem with the related masculine noun /ʿamal/ "toil," sometimes also "work."[33]

II. General Use "to Serve." In general usage, *plḥ* first represents "to serve" regardless of the nature of the service itself. It can refer equally to the service of a very high official *bbb hykl*ʾ "in the palace gate," that is, at court[34] and to the work of a slave and her daughter who are contractually bound to serve their owner and his son until his death and who will be rewarded with freedom at his death in the disposition of his will.[35] The service itself can be more precisely defined with the verb → *sbl* "to support" (*zy ysbl br wbrh lʾbwhy* "as a son or daughter supports his/her own father"), but even here includes the meaning "to attend to, to look after, to take care of." The few nonreligious examples of *plḥ* from Qumran have the connotation "to work": once in the phrase *plḥ bʾrʿ* "to work the earth (literally: to work in the earth)" of Noah's agricultural activity,[36] and otherwise in the translation of the rhetorical adynaton in Job 39:9 "Will the wild ox want to be your servant [*ʿbdk*]?" in 11Q10 32:8, which, as the following lines make clear, also refers to work with the plow.

Furthermore, in a memorial inscription from Hatra,[37] the probably substantival participle of *plḥ* can represent "servant" or[38] "soldier." In any case, the supplementary *dmlkʾ* "of the king" indicates a nonreligious usage. In fact, the meaning "soldier" explicitly arises from the analogous usage in reference to a legionnaire (*dblgywnʾ*) in a Palmyrene honorary inscription.[39]

III. Religious Use. Since Aramaic also designates God as "lord"[40] beginning in the earliest sources, a religious use of the verb *plḥ* to mean "to serve God" is obvious. This service finds expression primarily in cultic worship and personal piety, while *plḥ* has the nuance here of "to revere, to worship." Thus, it occurs in Imperial Aramiac in a grave inscription from Egypt in the wish that the deceased may serve Osiris in the afterlife: *hwy*

plḥh, thus an imperative with a verbal participle "be serving" or, more likely, with a substantival participle "be a servant/worshiper."[41] In any case, the participle functions substantivally in the construct. In the phrase *plḥ ʾlhʾ* "worshiper of the gods" it occurs in memorial inscriptions from Hatra.[42]

Biblical Aramaic employs *plḥ* exclusively with a religious connotation: in Dnl. 3:12,14,18,28 for idol worship that Daniel and his companions avoid, in 6:17,21[43] for the worship of the true God, and, finally, in 7:14,27 for the defining relationship of the whole world—all nations and especially all powers[44]—with God at the dawn of his eschatological kingdom. Ezra 7:24 employs the participle *plḥy byt ʾlhʾ* in a more restricted, probably summary, sense for the other cultic personnel in addition to various functions previously mentioned explicitly.[45]

The few pertinent instances from Qumran reflect the same semantic spectrum: in 4Q550 7+7a:1, *plḥ* denotes the worship among the Jews; in a vision of Noah in 1QapGen 15:18, in contrast, perhaps pagan idol worship (although in a very fragmentary context). The two small fragments 4Q570 16:4 (C-stem?) and 17:2 are preserved with insufficient contexts.

IV. Noun "Service." In keeping with the use of the verb in Ezra, the noun *plḥn* /polḥān/ there also denotes "worship" (7:19) with explicit reference to the temple liturgy in Jerusalem and the sacral vessels.[46] Likewise, the feminine abstract /pālḥū/ in a memorial inscription from Hatra apparently designates temple worship.[47] Additionally, the G-stem participle is a *nomen agentis* "servant/worker" and "worshiper" (→ II and III).[48] Syriac also knows the *nomen professionis* /pallāḥ/ "farmer," just as in Arabic.

פם *pm* /pomm/

I. Etymology and Lexical Field. II. As a Body Part. 1. Human. 2. Animal. III. Figurative Usage. IV. In Prepositional Expressions with *k*-, *l*-, and *ʿl*.

I. Etymology and Lexical Field. In Aramaic, /pomm/ "mouth" appears initially as a /qull/ form, as the spelling *pu-um-mi-e* in the cuneiform Uruk text and the pointing in Biblical Aramaic indicate, in West Aramaic secondarily as a /qill/ form.[1] Around 200 B.C.E. or shortly thereafter, the final long /-mm/ was shortened to /-m/.[2] In contrast to the paired body parts like /śapā/ "lip" and the similar /šenn/ > /šen/ "tooth" (Dnl. 7:5,7,19),[3] but very much like /leššān/ "tongue,"[4] it is a masculine. Aramaic shares the ending /-m(m)/ with Arabic. The latter, however, has the vowel ending /-ū,-ī,-ā/, depending on the case, in the construct state and especially with suffixes, like Ugaritic and, finally, also Hebrew *pœ̄*, which probably arose from the accented final /-ī/ of the genitive.[5] The historical relationship between the two old forms remains a matter of dispute.[6] The oldest Aramaic written sources attest the noun. In addition to the literal use for the body part, the "mouth" of humans and the "mouth" of animals (e.g., Dnl. 6:23; 7:5) are not differentiated, but have different connotations; /pomm/ can also stand figuratively for "opening" (Dnl. 6:18) reflecting its form or for "speech" reflecting the prominent function as an organ of speech even in the literal use as a body part. This second usage underlies the usage, attested frequently especially in Imperial Aramaic documentary texts, in various,

somewhat interchangeable prepositional phrases[7] and in the less frequent adverbial combination (*k*)*pm ḥd* "in agreement with."[8]

II. As a Body Part.

1. Human. All the earliest Aramaic instances attest the use of *pm* /pomm/ "mouth" as a human body part directly related to speech through which the inner attitude becomes perceptible. The Tell Fekheriye inscription already employs the word twice as part of the expressions *ʾmrt pmh* "the word of his mouth"[9] in the wish that Hadad accept the word of the donor[10] and that his speech please both gods and human beings (l. 14).

In contrast, the self-testimony of the deceased priest in a somewhat younger grave inscription from Nērab employs the formulation *bywm mtt pmy lʾtʾḥz mn mln* "on the day of my death, my mouth was not closed to words"[11] as confirmation that the one who commissioned the inscription was clear-minded to his last breath, for the intellectual powers of a person are evidenced in one's capacity to speak.

In Aḥiqar's admonitions, *pm* in conjunction with *šmr* "to guard" and *nṭr* "to watch over" serves to recommend discrete treatment of words and thus to depict the ideal of the circumspect and reliable court official: the eyes and ears of other people lurk everywhere, so one should guard one's mouth,[12] for the word[13] is like a bird.[14] It should only be free advisedly, but is then a powerful stratagem (*ʿzyz ʾrb*, l. 83). Thus, it is true of behavior generally that the gods will punish (ll. 171-72) people whose mouths issue evil (*lḥyh tnpq m*[*n*]*pmhm*).[15] The interpretation of l. 162 is controversial because of paleographical difficulties,[16] but here it may involve the consequences of (boastful?) speech for one's own fate, similar to the deed-consequences relationship in l. 156: May El contort (*ʾpk*) the mouth of the one who contorts words. Two further instances appear in a fragmentary context in ll. 114,155.

Against this background, the usage of *pm* in the book of Daniel, which contains the only Biblical Aramaic occurrences of the word, attains clearer contours: Nebuchadnezzar still had his boast, under the influence of the mighty Babylon, his city, in his mouth (*bpm*), when, with this folly committed despite a divine warning, he spoke about his majesty and was sent into banishment as a penance on a command from heaven (Dnl. 4:28). Likewise, the "mouth" of the small horn in Dnl. 7:8,20, which represents the peak of power at enmity with God, is not simply an anthropomorphic element that emphasizes the interpretation in relation to Antiochus Epiphanes, but an expression of folly and arrogance. Thus, both passages expressly state *pm mmll rbrbn* "a mouth that boastfully." In both cases, naïve or arrogant speech has roots in a moral breach that the practical ethics of the sayings of Aḥiqar illuminates in various facets. The same applies to Enoch's address to the evildoers from whose mouth comes *rbrbn wqšyn* "grand and hard things."[17]

2. Animal. In reference to animals, in contrast, *pm* regularly occurs pejoratively for destructive voracity. According to a curse formula in the Old Aramaic treaties of state from Sefire, the gods are to send *mn kl mh ʾkl* "everything that consumes" into the land of the prince who violates the treaty[18] so that it suffers[19] from the mouth (*pm*) of serpent (*ḥwh*), scorpion (*ʿqrb*), bear (*dbhh*),[20] and leopardess (*nmrh*).[21] In an apparently similar, although very fragmentary, context, another passage mentions the devastating impact of the mouth of the lion[22] and again of the leopard.[23]

These connotations already established in older Aramaic literature left a deposit in Biblical Aramaic: first, after his escape from the lions' den, Daniel says that an angel closed (*sgr*) the lion's mouth and thereby saved him from its voracity; then, in Dnl. 7:5, in the description of the second apocalyptic animal, traditionally regarded as bear-like, which has *tlt ʿlʿyn bpmh* "three ribs in its mouth," and thus, presumably, consumes incessantly.[24] The fire-spewing "mouth"—here probably better "throat"—in

the description of Leviathan according to 11Q10 36:4,7 (Job 41:11,13, for *pāʾ*) also belongs to the topos of the destructive monster.

III. Figurative Usage. Older Aramaic only manifests isolated cases of figurative usages of *pm*. Aside from the obvious use for "opening" in the lions' den in Dnl. 6:18,[25] as a dual *pm*[*yn*], it may describe the "blades" of a knife (*skyn*) in a saying of Aḥiqar (→ II.1).[26] Also likely, although not entirely without doubt, is the meaning "edge, seam" in the description of a dress as *pšk 1 lpm 1* "one handwidth per side" and *ṣbʿn 2 lpm 1* "two fingerwidths per side" in the dowry lists in marriage contracts from Elephantine.[27]

The metaphorical use of the word also continues to be rare at Qumran. In the address to a fool,[28] *pm* "mouth" serves metonymically for "speech"[29] in *sklʾ dy pmk yrmnkh* "you, fool, whose mouth will throw you." Similarly, *bkl pmkwn* "with your whole mouth" appears in the summons to praise in 4Q196 17 2:2 (Tob 13:7) for the feeling expressed with the voice;[30] cf. the modifier *bp*]*m* "(I was) in the mouth (of a widow in prayer)" in 11Q10 14:8 (Job 29:13).

IV. In Prepositional Expressions with *k*-, *l*-, and *ʿl*. Contrariwise, the construct state of *pm* in combination with the prepositions *k*- or *ʿl* "on the instruction of" and *l*- "accordingly,"[31] is very frequent in Imperial Aramaic legal diction. Numerous examples of *kpm* and *ʿl pm* appear at the end of private documents in the specification of the scribe and his employer,[32] sporadically, however, also for a hearing in a court record.[33]

The same formulation found in Elephantine, with *ʿl*, appears in the Nabatean summary of a Greek sales contract from the Dead Sea.[34] Another Nabatean contract employs *kpm rʾš* to express a numerical proportion.[35]

Finally, *kpm ḥd*[36] or adverbial *pm ḥd*[37] denotes "(as though) from one mouth," i.e., "in agreement."

פרק *prq*

I. Etymology and Lexical Field. II. Old Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology and Lexical Field. Of the various nuances of the common Semitic verbal root *prq* in individual languages in the semantic field "to separate,"[1] Aramaic stabilized with the connotation "to release, liberate" in the G-stem, while the verb in Hebrew generally refers to "to tear off, tear loose, tear up" in the G- and D-stems and in the passive Dt-stem.[2] It can hardly be determined beyond doubt whether the rare, poetic use in Hebrew for "to liberate" (Ps. 7:3; 136:24; Lam. 5:8) reflects Aramaic influence.[3]

The few instances in older Aramaic occur in religious literature or private documents, and, therefore, have an ethical or legal connotation. Later, the verb in the G-, causative-, and D-stem with the related t-passives, and the nominal derivative /porqān/ "liberation, deliverance"[4] are very frequent.

Otherwise, Aramaic also employs the G-stem of *pṣī* for "to liberate."[5] The C-stem of → *nṣl* or → *šyzb* denotes "to snatch away, deliver"; rarely *plṭ* in the D-stem serves for "to set free."[6]

II. Old Aramaic. In the first possible instance of *prq*, a provision in an Old Aramaic treaty of state from Sefire, the meaning is not yet identical with the one known later. Here, the verb seems to stand in a formulation, preserved fragmentarily, that apparently prohibits those who live near a well from "severing" it,[7] but with no object, or from laying a hand on the water supply (*wlmšlḥ yd bmy by*[*rʾ*]).[8] This would nonetheless suit the older

Semitic meaning “to separate” (i.e., to interrupt the flow of water?) or perhaps “to break up” (in the sense of “to destroy”?),[9] that could then have still survived in this eighth century B.C.E. passage.[10] Since this is the sole occurrence of the verb in all of Aramaic before Daniel, one can only posit very vague suppositions concerning a possible shift in meaning.

III. Biblical Aramaic. The next instance, Dnl. 4:24, is a few centuries later and may already reflect the typical usage, “to release”:[11] Daniel warns King Nebuchadnezzar in the interpretation of his dream “to redeem” his own sins,[12] namely his arrogance, through good works (*bṣdqh*),[13] that is “to make amends,” in order to avoid his fall as a threatened penalty.

The usage of *pqr* “to liberate” well known from later Aramaic languages with the one to be liberated as object in no way speaks against this interpretation. Rather, the verb in Dnl. 4:24 has a precise parallel in its juridical usage for the “redemption” of one’s distraint document (*šṭr*) from (*mn*) the creditor by paying the debt, as a Nabatean private contract from the Dead Sea offers.[14] Since the usage of *prq* for “to tear” in Aramaic is not sufficiently demonstrated because of the controversial interpretation of *KAI* 222 B 34 (→ II) and would, in any case, lead to the difficult image of “tearing sins,” and, on the other hand, a comparable formulation exists in legal diction, which is also related in substance, one can best attribute Dnl. 4:24 to the verb’s typical spectrum of usage in Aramaic. LXX, Theodotion,[15] and the Vulgate[16] have also understood the passage in this way, although all place the accent in their respective formulations of divine grace, not on works.[17]

IV. Qumran. Most of the very few possible cases in which *prq* occurs at Qumran are for the most part emended or paleographically disputable. The passive participle]*pryqn* in 4Q541 24 2:3 could mean “amendable” in the sense of Dnl. 4:24 (→ III),[18] but the context permits no firm conclusions. The later typical meaning “to deliver” appears in 11Q10 27:9 (Job 36:15) for the Hebrew *ḥlṣ* I in the D-stem “to save” and, if the

prevalent emendation is correct, in 23:6 (Job 33:28) for *pdī* "to redeem." A private document from the Dead Sea also employs it thusly in reference to the wife in the event of her imprisonment.[19]

The emendation *mp*]*rq*[*n* "from deliverance" in 4Q157 1 2:9 (Job 5:4) offered by *ATTM*, 284 transmits the first instance of the masculine noun *prqn* /porqān/, but is quite uncertain. Thus, the oldest assured occurrence may be a passage in the *Megillat Taʿanit* (67-70 B.C.E.).[20]

פרשׁ *prš*; פרשׁ *prš* /parāš/

I. Etymology and Lexical Field. II. Verb in the G-stem “to Separate, to Differ, to Interpret.” III. Verb in the D-stem “to Separate, to Divide.” IV. Noun “Interpretation.”

I. Etymology and Lexical Field. Outside Aramaic, Hebrew still sporadically attests the verb *prš* “to separate (oneself), to differ” in this form. Some, however, also assume a relationship to the root *prs* “to cut, cut off, decide,”[1] more widespread in Semitic languages, whose counterpart in Aramaic (Dnl. 5:28, although in paronomasia)[2] and Hebrew[3] must also be *prs* according to the laws of phonetics. Late Old Aramaic attests *prš* beginning with the sayings of Aḥiqar. Mostly, it occurs transitively in the G-stem for “to separate,” sometimes intransitively for “to separate oneself.” In both cases, it can take a supplementary prepositional expression following *mn* “from.” In addition, the nuance “to explain, explicate” easily arises from “to separate,” optionally expanded by an indirect object with *l*-. The substantival passive participle with the Aramaic form /parīs/[4] “separated” underlies the name Φαρισαῖοι “Pharisees” (literally: “those set apart”) first attested in the New Testament. In the intransitive usage, the G-stem overlaps its t-passive meaning “to separate oneself.”

In the two older instances, the D-stem seems to have a more specific, but debated, meaning; they employ it as a technical term of Achaemenid administrative diction, usually understood in the sense of “word for word.”[5] Post-Christian Aramaic attests it as “to separate” generally, even the C-stem and the corresponding t-passive.[6] In consonantal spelling, the D-stem and the G-stem are often indistinguishable, however.

This root also includes, furthermore, the masculine noun *prš* /parāš/ “interpretation,” attested beginning with the texts from Qumran. Contrariwise, no plausible relationship exists with the homonymous primary noun /paraš/ “horse,” whose derivative /parrāš/ “cavalry soldier” already occurs in Old Aramaic.[7]

II. Verb in the G-stem “to Separate, to Differ, to Interpret.” The body of occurrences of *prš* in older Aramaic reflects the beginning of evidence for the broad semantic spectrum of the verb. The passive participle *pryš* occurs in the sense of “separate, different from one another” in a saying of Aḥiqar referring to the different lifestyles[8] of the Arabs and the Phoenician Sidonians.[9] It seems, alternatively, to represent “separated” in reference to persons in the Imperial Aramaic letter *TADAE* A4.5:10, but the subsequent context is missing, as it is in D5.58:2. An additional letter ostracon from Elephantine employs the verb instead for “to explain” with *mlh* “word, matter”[10] as the direct and *ly* “to me” as the indirect object.[11]

Qumran continues the same diction. There, *prš* appears in the meaning “to part from (*mn lwʾt*)” in the sense of “to go away”[12] and thus similar to → *npq*, as well as in reference to a plant that has separated from its implantation (*mnṣbhwn*);[13] the passive participle in architectural descriptions probably means “detached,” but with insufficient context,[14] apparently similar to *bpryš*[15] in 4Q552 1 1+2:10, although it, too, is fragmentary and in a difficult context. It serves as an astronomical term for the separation of days in 4Q209 28:4 (1 En. 82:11). Against the background of these usages, and, especially of the G-stem passive participle, one definitely may also analyze the nuance “to separate, to differ” in 11Q10 26:6 (Job 35:11)[16] as the G-stem,[17] although, given later evidence, a D-stem cannot be excluded either.[18] The t-passive of the G- or D-stem for “to separate oneself” in 11Q10 36:3 (Job 41:9)[19] appears in an intransitive construction like the G-stem.

III. Verb in the D-stem "to Separate, to Divide." Clear instances of the D-stem are rare in older material, restricted to the Imperial Aramaic bureaucratic register, and seem to have the optional nuance "to set apart." The probable passive participle *mprš* occurs in *TADAE* A6.1:3 in relation to the list of a "share"[20] for administration, followed by the two distributive expressions *zn zn* [*y*]*rḥ kyrḥ* "(listed individually) by kind, month by month."[21]

Beginning here, one can comprehend more clearly the much-discussed expression concerning the reading[22] of a letter[23] before the king *mprš* in Ezr. 4:18 (similarly, probably also in Neh 8:8). The customary interpretation as "clearly, distinctly" makes little sense in context, since one must presume it, and H. H. Schaeder's suggestion, "in translation,"[24] is purely hypothetical, lacking linguistic foundation. The semantics of *prš* overall and *mprš* in *TADAE* A6.1:3 argue for the interpretation "piece by piece," thus "literally" and unabridged.[25]

IV. Noun "Interpretation." Related to the meaning of the verb "to explain," as *TADAE* D7.24:15 attests in Imperial Aramaic (→ II), is the noun *prš* /parāš/ "interpretation." In 4Q209 23:2 (1 En. 76:14) it refers to Enoch's explanation of the twelve wind gates; in the Book of Giants, it is part of Enoch's epithet *spr prš*ʾ "the scribe"[26] of interpretation,"[27] i.e., probably "who can interpret."[28]

Gzella

M. Becker, "*prš*," *ThWQ*, III, 345–49.

1. So *GesB*[18], 1084.

2. Cf. *ATTM*, 2, 464 on *prns*.

28. So *ATTM*, 648; the translation "the distinguished scribe," e.g., in *DSSStE*, 411, does not coincide with the use of the noun otherwise and is also less convincing syntactically; better would be "the scribe of distinction" (ibid., 1063); → *pšr* IV.

פרשגן *pršgn* /parešagn/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Aramaic *pršgn* /parešagn/ "copy" is borrowed from the Old Persian **patičagniš*,[1] whose original /t/ survives in the Hebrew *paṯšœgœn* (Est. 3:14; 4:8; 8:13).[2] Even this may have been transmitted through Aramaic,[3] but since, to date, there are no examples from Achaemenid Imperial Aramaic, one cannot verify whether the two forms already appeared alongside one another there. As *pršgn* it also occurs in the Peshitta of the Old Testament, but, in comparison to *peḥmā*, it is otherwise very rare in Syriac.[4]

II. Usage. The word first appears in Biblical Aramaic pointed *paršœgœn* (Ezr. 4:11,23; 5:6).[5] It always refers to the copy of an official letter (*ʾgrh*:[6] 4:11 and 5:6; → *nštwn*: 4:23 and 7:11) to the king concerning the construction of the temple. The archival storage of letters from the correspondence of Aršama and now of the Bactrian satraps is well known. At Qumran, it twice represents the copy of a document: once a tablet (*lwḥ*)[7] and again in the superscription of a book (*ktb*).[8]

פשר *pšr*

I. Etymology, Occurrences, External Influences, and Ancient Translations. II. Aramaic Texts from Egypt and Murabbaʿat. III. Daniel. IV. Book of Giants.

I. Etymology, Occurrences, External Influences, and Ancient Translations. Aramaic texts from Egypt[1] and Murabbaʿat, the book of Daniel, the Book of Giants, and many later forms of Aramaic attest the Aramaic root *pšr*. Its etymology and meaning are linked to the Akkadian verb *pašāru*,[2] Biblical Hebrew *pāṯar* and *pittārōn* (Gen. 40-41), postexilic *pāšar*,[3] and *pēšœr*.[4] The widespread assumption[5] of an original Semitic root **pθr* "to resolve" is difficult, however: forms of *ptr* in Gen. 40–41, which do not conform to the laws of phonetics, must trace back to Aramaic influence and, conversely, the Aramaic *pšr* in Daniel and the Book of Giants to a late Babylonian or Hebrew borrowing. Instances of the root *pšr* in Imperial Aramaic texts from Egypt (→ II) with meanings that one could associate with *pašāru* point to an original Semitic root **pšr* preserved in Akkadian, Aramaic, and Hebrew. Meanwhile, Arabic may have borrowed *fassara* "to explain" and the related verbal noun (*masdar*) *tafsīr* from Syriac or another Aramaic language.[6]

In Gen. 40–41, *ptr* may involve an originally Egyptian loanword,[7] although semantically it overlaps for the most part with the technical meaning of *pšr* in reference to dreams.[8] Regardless of the two different roots, they merit treatment as synonyms based on their meaning. Thus, for

example Targum Onqelos (but not Neofiti) and the Peshitta translate the Hebrew *ptr* with *pšr*.

The basic meaning of **pšr* "to solve," "to set free" can be derived from the Akkadian, but was also apparently known to the LXX translator of Eccl. 8:1, who rendered *pēšœr dāḇār* with λύσιν ῥήματος. Akkadian also attests many derived meanings, e.g., "to release someone from an obligation" or "to pay." Postexilic Hebrew and Aramaic utilize the root mostly in reference to the interpretation of dreams (in Aramaic texts) and prophecies (in the texts from Qumran). Daniel LXX generally translates the noun *pēšœr* with κρίσις or σύγκρισις and thereby employs Greek terms for the explanation of dreams.

The precise semantic and historical relationship between the technical use of these terms in Akkadian, Aramaic, and Hebrew is unclear and in dispute, however. While the use of *pēšœr*[9] in Daniel points to familiarity with the Akkadian noun *pišru*, it remains uncertain whether Aramaic mediated the specific usage in Hebrew texts from Qumran or whether some may trace directly to Babylonian. In any case, one cannot simply proceed from the presupposition of a shared cultural background for the two terms. In particular, one cannot say with certainty whether the meaning of the verb *pšr* in Daniel and the texts from Qumran relates to a nuance of the Akkadian verb *pašāru*, or, as seems more plausible, derives from the noun *pišru*.

II. Aramaic Texts from Egypt and Murabbaʿat. In a few Aramaic ostraca from Egypt, instructions to come or to send something precede the concluding expression *wlʾ pšrn*, translated in *TADAE* as "without fail."[10] This formulation may emphasize that the commission must be executed as stated ("without error") or with attention to the time ("without tarrying"). It could also, however, have a juridical connotation and indicate that the addressee cannot evade an obligation placed on him.

The verb *pšr* could have the same meaning and the same tone as the noun. Two lines after *wlʾ pšrn TADAE* D7.20:4 repeats: *ʾl tpšr lmʾth mḥr* "do not delay coming in the morning": in D7.27:14 (last ll.) may read: *ʾp ʾl tpšr* "tarry no longer"; in Lozachmeur, 146cc4 one may presumably better read *wlʾ*]*tpšry lm*["do not delay to" as]*twšry lm*[(the same text ends with *wlʾ pšrn*). Furthermore, *TADAE* deciphers the verb in the literary text D23.1.5a:12 as *whn ltpšr* "and if you will not tarry." In *TADAE* C3.13:50 (earlier *AP* 63:14), the haphel form *hpšr*[11] may mean "to pay," as in later Aramaic.[12] The *aleph* in the reading *wʾpšr* in the certificate of debt Mur 18:6[13] is difficult to read, but a form of *pšr* is likely nonetheless, which would then refer to a repayment. Only this latter text has a religious meaning at the same time: the signatory obligates himself to repay his debts completely, even in a year of remission (cf. l. 7).

III. Daniel. Scholarship compares the meaning and usage of the verb *pšr* and of the noun *pēšœr* in the book of Daniel with those of Akkadian *pašāru* and *pišru*. The verb occurs only in Dnl. 5:12, which, in the Masoretic pointing, describes Daniel as *mᵉpāššar ḥelmīn* (usually translated "interpreter of dreams"), and in Dnl. 5:16, which states that he is in the situation *pišrīn lᵉmiṗšar* ("to give interpretations"). The syntax suggests, however, that the two pael participles *mᵉpāššar ḥelmīn* and *mᵉšārē qiṭrīn* ("untier of knots")[14] in 5:12 should be read as the peal infinitives *miṗšar* and *mišrē*. The two expressions in 5:12 and 5:16, *miṗšar ḥelmīn* and *miṗšar pišrīn*, could refer to the same activity, but specify two different aspects of it: Daniel is capable of solving dream puzzles by giving their interpretations.[15] The variation may have a literary function, for Daniel is known for interpreting dreams, but now he is required to explicate the meaning of the writing on the wall.

Because of the Babylonian context of this story, some have suggested that the rare Akkadian combination of *pašāru*/*puššuru* with *šuttu* ("dream") in the sense of "to recount dreams" or "to interpret"[16] may be relevant for understanding it.[17] In any case, the predominant meaning of this expression in Akkadian is "to resolve" or "to dispose" of a dream, i.e., to get rid of its unpleasant consequences by magical or ritual procedures, and not to give a report or interpretation.[18] The first meaning may still stand in the background of Dnl. 5, because the king indeed summons Daniel in order to alleviate his horror and the "untying of knots" may allude to the breaking of incantations. In the context of the narrative itself, however, and with a view to the parallel expression in 5:12 *ʾaḥ^a^wāyaṯ ʾ^a^ḥīḏān* ("to explain a riddle")[19] a verbal interpretation is more likely involved here.

The connection between *pēšœr* in the book of Daniel (thirty times in the singular) and Akkadian *pišru* is closer. Here *pēšœr* refers directly to dreams,[20] (written) words, or matters (*k^e^ṯāḇā ḏ^e^nā upīšrēh*, → *ktb*; *p^e^šar mill^e^ṯā*; *p^e^šar millayyā*, → *mll*) to be expounded, published, or recounted. In doing so, *pēšœr* functions mostly as the object of the verbs → *ḥwī*,[21] → *ydʿ*[22] or *ʾmr*.[23] Twice the expressions *d^e^nā pīšrā* (4:21) and *d^e^nā p^e^šar mill^e^ṯā* (5:26) explicitly introduce the verbal explication of the *pēšœr*.

Meanwhile, Akkadian does not employ *pišru* in reference to dreams, but chiefly in the letters of Neo-Assyrian scholars to the king concerning astronomical observations and their significance. The typical scheme consists of the description of an astronomical observation, followed by *piširšu* ("its interpretation") or *anniu piširšu* ("this is its interpretation"), and finally a citation from the omen literature that deciphers the significance of the respective phenomenon for future events. Meanwhile, the citation itself is cryptic and requires further clarification, which is also called *pišru*. In form, the description of a dream or a document with *d^e^nā pīšrā* or *d^e^nā p^e^šar mill^e^ṯā* (see above) followed by the decoding of the inherent meaning—instead of applied interpretation—with a view to the

future suits the milieu of Babylonian scholarship in which Daniel's court tales play out. These agreements suggest that, in Daniel too, *pēšœr* denotes more the "sense" inherent in the dream itself than the verbal act of interpretation that then deciphers this sense.

Dnl. 2 describes "dream" and "meaning" together as *rāz* ("secret")[24] that God reveals. Since the "meaning" comes from God, it is *mᵉhēman* ("reliable," 2:45)[25] and *gᵉzēraṯ ʿillāyā* ("a decision of the Most High," 4:21).[26] A comparison with Babylonian texts also unearths the distinctions that give information concerning Daniel's theological position. The usage of *pēšœr* in reference to dreams, visions, and descriptions, but not to astronomical phenomena, corresponds to a belief that God reveals the future through dreams and writings (Dnl. 2:28f.). The fact that the "meaning" itself is also the subject of revelation and is not accessible through technical literature challenges the utility of mantic scholarship.

IV. Book of Giants. The Aramaic fragments of the Book of Giants from Qumran describe two dreams of the giants Hahya and Uhya with apocalyptic content. Hahya is summoned to recount his dream to Enoch, the "scribe with the power of judgment" (*spr prš*ʾ),[27] *wypšr lnʾ ḥlmʾ* ("so that he can give us the interpretation of the dream").[28] Mahawai is sent to Enoch so that Enoch can report to him *p*[*š*]*r ḥlmyjʾ* ("the interpretation of the dreams").[29] Mahawai tells Enoch that they want to learn *pšrhwn* ("their meaning").[30] Although the figure of Enoch bears elements of Mesopotamian kings (Enmeduranki, Ziusudra) and sages who are associated with the mantic arts, they have no direct relation to the dream interpretation. There may be a relationship between Enoch's status as scribe of *prš*ʾ and his capacity to exposit the meaning of dreams. The juxtaposition of the two expressions in 4Q530 2 2:14 may reflect such a general connection between dream interpretation and the scribal arts. Nonetheless, it is doubtful whether the epithet *spr prš*ʾ itself also includes semantically the gift of dream interpretation. Like the Greek κρίνω, the verb → *prš* "to separate, to differentiate" has a broad spectrum of meaning indeed that also

extends to a good faculty of judgment and the capacity to explain some things. It remains unclear, however, whether *prš*, as is the case for κρίνω, finds express usage for dream interpretation. In 4Q203 8:13, the reading *wpšr ṣbwt*[ʾ *dʾ* ("and the interpretation of this matter")[31] could be understood as a variant of *pᵉšar millᵉṯā* (→ III) and thus allude to the preceding description of a destruction. Otherwise, with a view to the reference to "loosening bonds" in the subsequent lines, *wpšr* may be a verb or noun with the basic meaning "to loosen."[32]

פתגם *ptgm* /pategām/

I. Etymology and Lexical Field. II. General Usage "Report, Answer." 1. Imperial Aramaic. 2. Biblical Aramaic. 3. Qumran. III. Theologically for "Divine Judgment."

I. Etymology and Lexical Field. The Aramaic masculine noun *ptgm* /pategām/ "communication, decree," which spread from Aramaic into Hebrew and is vocalized in the Tiberian system in both cases as *piṯ̱ḡām*, traces to Old Persian **pati-gāma*.[1] Thus, Imperial Aramaic texts first attest it, although, as evidenced by its use in private letters on ostraca, it soon became part of the broader lexicon of the written language. As the object of → *šlḥ* and the C-stem of → *tūb*, it denotes "to answer"[2] or "to report." Religious diction applies the old meaning "royal edict" to a divine judgment. For "edict" in the stricter sense, → *ṭʿm* and → *nštwn* are available.

II. General Usage "Report, Answer."

1. Imperial Aramaic. Among the Imperial Aramaic instances of *ptgm* one first finds those in official documents. In two letters from the provincial chancellery, the expression *gst ptgm* represents "punishment" threatened against a low-ranking official for defective execution of a command.[3] In Naveh and Shaked, A1,4 from Bactria, however, it functions for "decision."[4] A court record utilizes it in the diminished sense of "word."[5] Thus, in private letters it can also serve with *šlḥ* for "report, answer."[6]

2. Biblical Aramaic. In Biblical Aramaic, too, *šlḥ ptgm*(ʾ) denotes reports and written responses to (*ʿl*) the king and high officials (Ezr. 4:17; 5:7),[7] once, additionally, an edict (Ezr. 6:11, with → *šnī* "to transgress"). The usage for an oral answer (Dnl. 3:16) is even more anemic and general.

3. Qumran. The expression *tūb* (in the haphel) *ptgm* for "to answer," already idiomatic in Biblical Aramaic, also occurs three times in 11Q10 from Qumran (9:2; 30:1; 34:3 [Job 24:25; 38:3; 40:7]; without object 37:5,7 [Job 40:5; 42:4]). This formulation frequently represents a diluted translation of the Hebrew *hwdyʿny* "teach me!" (30:1; 34:3; 37:7) in God's speech, in 37:5 *ʿnī*. In contrast, the nuance "matter," in the plural "events,"[8] stands under the influence of Hebrew *dbr*,[9] as may also *ptgm ṭb* "a good word" for "a good matter" in 11Q10 29:4 (Job 37:13), but the relation to the Hebrew text *lḥsd* "for a blessing" is indirect.[10] A few additional passages are fragmentary (4Q546 13:4; 4Q533 3:3; 4Q556a 5 i 7).

III. Theologically for "Divine Judgment." Probably beginning from the use of *ptgm* for a royal edict as in Ezr. 6:11, religious diction applied the word to a divine pronouncement of judgment.[11] The first attestation of this usage refers to the expulsion of Nebuchadnezzar decreed by a heavenly council (Dnl. 4:14).[12] The juridical connotations of this usage become particularly clear in conjunction with *biḡzēraṯ* "by decision."[13] A parallel use appears in the development of the same theme in the "Prayer of Nabonidus" 4Q242 1-3:2, where *bptgm ʾlhʾ* "according to God's edict" also refers to the dehumanization of the king as a penalty.

12. → *ʿyr*; *qdš*.

13. → *gzr* VI.

פתח *pṭḥ*

I. Etymology and Lexical Field. II. Usage of the Verb. 1. Generally. 2. Figuratively. III. Passive Participle "Open."

I. Etymology and Lexical Field. All of the chief Semitic languages know forms of the root *pṭḥ*, the basic meaning of which "to open" also gave rise to secondary uses such as "to conquer, to judge" in Arabic[1] and Old South Arabian,[2] and "to release, to judge" in classical Ethiopic.[3] The verb occurs in Aramaic initially only mostly in the transitive G-stem with an internal passive (Dnl. 7:10); in post-Christian times, the Gt-stem overtook these functions.[4]

In addition to concrete objects such as a door, a chamber, a grave, etc., *pṭḥ* also takes abstract objects and appears with various figurative nuances. Intransitively, furthermore, in the participle as a construction term "opening," it can denote a door. The Dt-stem finds sporadic usage as "to become seeing," which results from the usage for "to open the eyes."[5] Old Aramaic times already attest figurative usages.

In addition, the passive participle of the G-stem *ptyḥ* /patīḥ/ "opened" functions as an adjective "open" (→ III); furthermore, two home sale contracts from the Dead Sea also contain two old specimens of the masculine noun *mpṭḥ* /mapteḥ/ (> /maptaḥ/) "key" in relation to the transfer.[6] In isolated instances, /pomm/ "mouth"[7] denotes "opening"; either *sgr* or *skr* serves as an antonym "to close,"[8] in reference to a door, also *ʾḥd* (→ II.1).

II. Usage of the Verb.

1. Generally. An Imperial Aramaic private document from Egypt first attests the general usage of *ptḥ* “to open” with material objects. This building permit grants one party to the contract the right to open a gate or a gateway (*ʾnt šlyṭ lmptḥ trʿ*).[9] The participle *ptḥ* /pāteḥ/ “opening” in reference to a door (*dš*) appears in a description as the antonym of *ʾḥd* /ʾāḥed/, literally “stopping,” here probably in the sense “closing.”[10] The precise meaning is unclear. The usage in a commercial text[11] is also unclear.

Biblical Aramaic has only one instance of the fientic usage “to open” in the court scene of Dnl. 7:10, which depicts how the heavenly judgment on the secular powers took place and *spryn ptyḥw* “books were opened.”[12] The text does not characterize their contents, but in context, one can best think of heavenly books of revelation or of the “book of life”[13] that lists the course of the world or the deeds of every individual, respectively.

Paralleling the internal passive of the perfect in Dnl. 7:10, which first disappears from Aramaic in the imperfect and around the time of Christ’s birth also in the perfect,[14] the Levi apocryphon in an apocalyptic scene employs the imperfect of the Gt-stem for the opening of the *spry ḥkm*[*tʾ* “books of wisdom.”[15] The opening of books in the agentless passive, which echoes official style, also occurs elsewhere at Qumran in the story at the Achaemenid court in reference to a scroll[16] and in the Book of Giants, as in Dnl. 7:10 for books in a court scene,[17] both in the internal passive of the perfect.

A few other texts from Qumran contain additional uses of the verb in the concrete sense: the active in 1QapGen 12:15 for a vessel (*kmr*) and the internal passive of the perfect in 4Q206 4 1:17 (1 En. 89:3) for the subterranean reservoir of water in the flood in Enoch’s animal allegory (*ḥdr* “chamber”).[18] Otherwise, only a couple of debated and emended instances in fragmentary contexts remain.[19]

Furthermore, grave inscriptions also employ *ptḥ* regularly in the prohibition against opening the pertinent grave, e.g., in addition to Jewish ossuaries,[20] in Nabatean[21] and in Palmyrene.[22] Such formulas follow an old

West Semitic tradition[23] and intend to hinder the grave, as the last connection to the living, from being taken from the deceased.

2. Figuratively. Isolated uses of *ptḥ* with nonmaterial objects already in Old Aramaic point to a broader, sometimes figurative usage. In a treaty of state from Sefire, it occurs as an intransitive with → *ʾrḥ* "way" as subject in the agreement to give a messenger[24] of the treaty partner free passage.[25] One can explain the feminine participle *ptḥh* "is opened" most naturally as a passive (→ III);[26] in this case, it would appear in a deontic-modal nominal clause,[27] for which one would otherwise expect the short imperfect of *hwī*.[28]

Thereafter, later Old Aramaic attests the verb frequently in the sayings of Aḥiqar. Two instances appear in the context of the admonition to cautious handling of speech with → *pm* "mouth" as the object,[29] and a possible additional instance with the heart (l. 98), but the reading of a form of *ptḥ* there is not entirely assured.

Jewish, and later especially Christian, Aramaic literature employs *ptḥ* with the eyes[30] and ears, too. In Enoch's allegorical vision of the history of the world in the form of animals, it denotes the reception of the divine revelation at Sinai,[31] here in the t-passive "their eyes were opened." Further, Mk. 7:34 transmits a reflexive or middle form of the Gt-stem in Jesus's saying "Ephphatha" as a pronouncement of healing for a deaf and dumb person: based on the pronunciation, εφφαθα is an imperative */ʾetpataḥ/[32] "open" transcribed as *ʾeppaṯaḥ* and glossed in the Greek as διανοίχθητι. These usages and the abbreviation of "to open the mouth" meaning "to begin to speak"[33] are also common later,[34] in Jewish Babylonian more often for "to begin."[35] Beyer[36] already finds an example of the last nuance in *ptḥw qrbʾ* "they opened = began the battle."[37]

III. Passive Participle "Open." The passive participle *ptyḥ* "opened = open" can function adjectivally. In Imperial Aramaic, it refers only to

windows (*kwh*) and doors (→ II.1) in an architectural sense "opened in the direction of."[38] It occurs with this nuance in descriptions of real estate in private documents[39] and analogously in Dnl. 6:11[40] LXX (6:10), although translated differently in Theodotion and the Vulgate "he opened the window," which makes objective sense (since windows can be closed with wooden shutters), but is linguistically difficult. It appears in the same meaning in the descriptions of a gate "opened into (the court)" in the vision of the heavenly Jerusalem[41] and in sales contracts for homes from the Dead Sea ("has an entrance").[42] Meanwhile, it seems to mean "open gates" in 4Q204 1 13:23 (1 En. 35:1).

צבי *ṣbī*; צבו *ṣbw* /ṣabū/; צבין *ṣbyn* /ṣebyān/

I. Etymology, Overview. II. Imperial Aramaic. 1. Verb. 2. Noun. III. Biblical Aramaic. IV. Qumran.

I. Etymology, Overview. *Ṣbī* "to want, to seek" is a verb with a III-*ī* root from an original III-*ū* (Arabic), attested only in the G-stem with an *i*-perfect (*ṣabī*),[1] and with a verbal abstract *ṣbyn* /ṣebyān/ "pleasing" based on the *qutlān* pattern[2] first attested at Qumran, and which appears later in West Aramaic as *ṣbywn* /ṣiḇyōn/. Otherwise, a noun in the *qalūt* pattern[3] meaning "concern, matter" appears in the earliest specimens from the fifth century B.C.E., but in later times can also mean "will,"[4] for which, however, the peal infinitive is still available (Dnl. 4:32). Regarding the development of meaning from "will, desire" to "concern, matter," compare Hebrew *ḥēpœṣ* "pleasure, interest, intention, concern"[5] and Arab. *šayʾ* "matter" from *šāʾa* "to will/want."

Ugaritic and Phoenician do not attest the root; Hebrew does not have it as a verb, but the noun *ṣᵉḇī* "ornament, finery" probably belongs here. Akkadian has the cognates *ṣabū i/i*[6] "to wish" and *ṣibūtu* "wish, intention, want,"[7] and Arabic has *ṣabā yaṣbū* "to seek, to strive."[8] Old South Arabian and Ethiopic lack the root. The post-Imperial Aramaic literary languages, Nabatean and Palmyrene,[9] and the later dialects[10] well attest the forms mentioned for the most part. Old Aramaic, Imperial Aramaic, Biblical Aramaic, and Qumran attest *ṣbī* "to want"; Imperial Aramaic and Biblical Aramaic (once) attest *ṣbw* "matter, concern"; Qumran first has *ṣbyn* "pleasure" (only once).

II. Imperial Aramaic.

1. Verb. In six of the rather old graffiti from Ḥamā (ninth through eighth centuries),[11] the very brief texts consist of the form *ṣbh* which follow a (not always legible) personal name; the interpretation is very uncertain.[12] Apart from these, there are ninteen instances from Egypt, mostly from the fifth century, and one from Bactria; fifteen times it appears in the perfect, twice in the imperfect, three times as a participle in various constructions, employed absolutely, with an asyndetic imperfect, with an accusative, or with *zy* "that." In the latest instance (from the third or second century)[13] the participles appear with *l-* and an infinitive.

a) With no object or dependent verb, in a relative clause (or with a relative pronoun as object): *TADAE* B2.6:25,28f. (contract) perfect third-person feminine singular *ṣbyt* /ṣabíyat/, twice in the same formulation: "and she goes (wherever) she wants to."[14] *TADAE* B2.7:16 second-person feminine singular imperfect *tṣbyn* /tiṣbā̄n/: "it is yours forever, and to whomever you want (to give it), give it!" With an object, it also appears in the conditional clause with a vetitive in the apodosis *TADAE* D7.17:8 (ostracon fifth century Egypt) second-person feminine singular perfect *ṣbty* /ṣabītī/: "if you want, do not sell it!"

b) With an asyndetic imperfect: TADAE A3.10:3 (Papyrus, fifth or fourth century) perfect /ṣabī/ (or, depending upon the separation and interpretation of the *zy*, with accusative): *wzy ṣby yʿbd lh* "(sees. . .) what he would like to do in respect to that" (or, less likely, "what he would like may he do"). *TADAE* B3.7:15 (contract) with subject/verb disagreement[15] *npšy ṣbyt ʾhnṣl mnky* "I myself [*npšy*] will take her away from you again." *TADAE* translates as two clauses: "I want her; I will take her away from you," one should probably understand it as does *TADAE* B3.8:41f. and B6.4:7 with *ṣbyt* first-person singular perfect /kaʿan ṣabīt ʾaṣṣel hu-mū/: "I gave these goods to PN. Now, I will take them back."[16] The much attested formulation "you are justified in giving" lacks the complement for /

ṣabī/:[17] *TADAE* B2.11:7,12 (contract), twice the second-person masculine singular perfect /ṣabītā/: *ʾnt . . . šlyṭ . . . lmn zy ṣby tntn* "you, PN (masc.), are justified . . . (regarding this slave) . . . (to give him) to whom(ever) you want to give (him)." *TADAE* B3.4:12,14,15,16, four times like the above, but with an infinitive: *ʾnt . . . šlyṭ . . . lmn zy/dy ṣbyt lmntn* "you, PN (masc.), are justified, . . . (regarding this house) . . . to whom(ever) you want (to give it)."

c) With a direct object: *TADAE* A2.4:7 (Hermopolis, sixth through fifth centuries) second-person masculine singular imperfect *zy* (object) with *tṣbh* "And now: everything that you want (to send), send me!" Similarly, perhaps Naveh and Shaked, B3,4 (letter from Bactria) participle *ṣbh*: *hn lk ṣbh* "if he longs for you,"[18] yet there is no context.[19]

d) With *zy* "that" (uncertain): *TADAE* C1.1:149 (a saying of Aḥiqar) participle *ṣbh* /ṣābæ/ (the reading of *h* is uncertain): "if you wish, my son, that you are . . ." (the remaining broken off).

e) With *l*- and infinitive: *TADAE* D7.56:7 (third or sceond century) participle plural absolute *ṣbyn* /ṣābēn/ with *l*- and infinitive: "if they do not want to come, they should send a letter."

f) Without context: *TADAE* D1.20:9 (letter) *ṣbyt* first- or second-person masculine singular (lacking the beginning and end of the line) ". . .] what I/you want therein [. . . ." Similarly, perhaps also Lozachmeur, no. 251cc1 and cv2,[20] but the pertinent words here also stand between lacunae and are difficult to read.

2. Noun. Of the seven instances of the noun *ṣbw* in Imperial Aramaic texts,[21] only four offer sufficient context to permit one to say something about the meaning: In *TADAE* A4.3:6 the absolute *ṣbw* stands apparently as a strengthening parallel to *mlh* "word, matter":[22] *ḥzw ʿlyhm ṣbw wmlh* "see to it, what(ever) the concern and matter is (that [PN] wants from you)"; but the meaning "wish" may come into question here, as presumably in Naveh

and Shaked, B1,5: *bṣbwtʾ zy*[23] *npšy* “on my own wish.” *TADAE* A6.8:2 has the construct *ṣbwt* twice in the same line in the general meaning: “. . . do not obey me in the matter of my lord [*bṣbwt mrʾy*] that I share with you” and “With regard to the concern of my house [*ṣbwt bytʾ zyly*], that (PN) will tell you, . . . obey him and do (it).”

In *TADAE* B8.11:3 (court record) the determined *ṣbwtʾ* stands without context, apparently at the end of the clause; in *TADAE* A5.1:3 (letter from Saqqara), one cannot be sure of the reading *bṣbw zy*: “with the matter that you ha[ve]”; and in *TADAE* D7.19:8 the suffixed form *ṣbwty* with a somewhat uncertain final letter stands between lacunae.

Furthermore, in two Imperial Aramaic ostraca from Egypt in the Clermont-Ganneau collection, it is difficult to distinguish paleographically between the noun and the verb, if, indeed, a form of *ṣbī* is present at all.[24]

III. Biblical Aramaic. Biblical Aramaic attests the verb ten times in seven passages: Dnl. 4:14,22,29,32; 5:19,21; 7:19. The forms include one perfect, four imperfects, one suffixed infinitive, and four active participles. Dnl. 7:19 has the first-person singular perfect with *l-* and an infinitive: *ʾœḏayin ṣᵉḇīṯ lᵉyaṣṣāḇā ʿal ḥēwṯā rᵉḇīʿāyᵉṯā* “Then I desired assurance concerning the fourth animal”;[25] 4:14,22,29 have the third-person masculine singular imperfect in relative clauses, three times in the same expression: *ulᵉman-dī yiṣbē yittᵉninnah* “and gives it (the kingdom), to whomever he wants”; similarly 5:21: *ulᵉman-dī yiṣbē yᵉhāqēm ʿᵃlaya*[26] “and installs thereupon whomever he wants”; in 4:32 peal infinitive with a third-person masculine singular possessive suffix: *ūḵᵉmiṣbᵉyeh ʿāḇēḏ bᵉḥēl šᵉmayyā* “and, in accordance with his will, he proceeded with the host of heaven. . .”; in 5:19: four times following *hᵃwā* in the active participle after *dī* “whom(ever)” as the object clause of a main verb in the participle also following *hᵃwā*: *dī-hᵃwā ṣāḇē hᵃwā qāṭēl* . . . “He killed whom he wanted

to [he let live whom he wished, he elevated whom he wished, and he humbled whom he wished].”[27]

The noun *ṣᵉḇū* occurs only once in Biblical Aramaic in the expression *lᵓ . . . ṣbw* “nothing” in Dnl. 6:18: *dī lā-ṯišnē ṣᵉḇū bᵉḏānīᵓēl* “(the king sealed it. . .,) so that nothing would change with Daniel.”[28]

IV. Qumran. The few instances of the verb[29] stand in poorly preserved surroundings; the construction without object in a relative clause and the construction with *l-* and the infinitive reappear: 4Q204 4:6 (first century B.C.E., Book of Enoch) participle plural absolute with *l-* and infinitive in a damaged context: *l*[ᵓ *hww*] *ṣbyn lm*[*t*]*b* “did not want to return”; 4Q213 1 1:17 (second century B.C.E.; T. Levi 44:11),[30] with the supplied *l-* and infinitive based on the parallel text from the Cairo Geniza:[31] *bdy klᵓ ṣbyn* [*lmᵓlp* “for all desire [. . . to learn . . .]”; 4Q550 5+5a:6 (document of Darius, first century B.C.E.),[32] participle singular masculine absolute with the relative *zy* and an imperative in the apodosis: *mh dy ᵓnth ṣ*[*b*]ᵓ *pqdny* “However, what you wish command it of me!”; 4Q550 7+7a:1[33] imperfect: *kwl dy yṣbᵓ qryb* “All that he wants is near.” The imperfects *tṣbᵓ* in 4Q203 10:3 and *yṣbh* in 4Q346a 2 stand without context.

There are three instances of *ṣbw* “matter, concern”: 4Q203 9:4 (Book of Giants, first century B.C.E.)[34] *lᵓ* with *ṣbw* “nothing” as in Dnl. 6:18 (→ III), surrounded by lacunae: *wkwl ṣbw lᵓ tqptkh* “nothing has conquered you”; 11Q10 5:2 (Job 21:21): [*h*]*ṣbw lᵓlhᵓ bbyth* [. . .] “[Is/lies] there something for God for his house [after his death . . .]?” In 4Q203 8:13 *ṣbw* appears before a lacuna after a hardly legible word.[35]

Qumran attests the noun *ṣbyn* /ṣebyān/ “pleasure” only once, 11Q10 15:6 (Job 30:2; first century B.C.E.): *lᵓ hwᵓ ly ṣbyn* “[In . . .], I had no pleasure.”

The same construction is also attested elsewhere, cf. Syriac *LexSyr*, 619 *ṣeḇyānā* “1. gratia, 2. voluntas, 3. voluptas” and with *hwā l-* “placuit.” *ATTM*, 2, 467 (s.v. “Wille”) lists later West Aramaic instances of the word.

צדק *ṣdq*; צדק *ṣdq* /ṣedq/; צדקה *ṣdqh* /ṣadaqā/; צדיק *ṣdyq* / ṣaddīq/

I. Etymology, Forms, and Lexical Field. II. Verb “to Be in the Right.” III. Noun “Righteousness.” IV. Adjective “Righteous.”

I. Etymology, Forms, and Lexical Field. Forms of the root *ṣdq* “to be righteous” are common to the West Semitic languages and occur in Aramaic as a verb and in nominal forms. Besides the verb in the intransitive G-stem “to be in the right” and in the D-stem “to declare righteous,” the masculine substantive /ṣedq/[1] and the feminine /ṣadaqā/ “righteous conduct, action” are productive, in addition to the adjective /ṣaddīq/ “righteous,” often employed substantivally for “righteous person.” East Aramaic dissimilates the first vowel of the root, so that the form there is *zdq*.[2]

In accordance with the character of the transmitted sources, the older Old Aramaic instances of the word-group *ṣdq* relate to the realm of royal ideology, the later Old Aramaic of the proverbial wisdom of Aḥiqar to that of practical ethics, and that of the Jewish Aramaic literature of the book of Daniel and the texts from Qumran to religiously based intrahuman solidarity. This distribution of usages depends first on the state of the evidence; because of the very heterogenous material and the relatively restricted attestation in pre-Christian times, no semantic development can be identified. The various nuances have in common a direct relation to a fixed order which enables the conduct of the business of state, the law, necessary for stable communal life, and defines behavior in daily interaction. This order requires renewed internal consent and external actualization. Hebrew scripture develops it theologically.

Consequently, near synonyms first arise, after rudiments in the sayings of Aḥiqar, in the religious literature of Qumran.[3] Instead of the juridical and ethical term *ṣdq*, Qumran prefers the wisdom terms → *qšṭ* "truth," and *bʾyš* "bad," *lḥh* "evil," *ršʿ* "crime,"[4] *ḥms* "injustice,"[5] and *šqr* "lie"[6] appear as antonyms. For "justice" in the sense of case law, like Hebrew *mišpāṭ*, Aramaic employs instead forms of the root → *dīn*. In contrast, *ṣdq* denotes the higher principle of order that also underlies case law.

II. Verb "to Be in the Right." As a verb "to be in the right," *ṣdq* finds significantly less usage in Aramaic than its nominal derivatives. The oldest known instance of the G-stem appears in a saying of Aḥiqar, apparently as an expression of misfortune as a consequence of character assassination: *ʿm mn ʾṣdq* "with whom can I be in the right?"[7] A parallel formulation in the following lines has the declarative-factitive D-stem *mn ʾpw ṣdqny* "who, then, has declared me righteous?" with a pronominal object.[8] In the first case, it appears in context with *lḥyty* "my calamity," in the second with *ḥms* "act of violence."[9] Thus, this text understands agreeing with another's righteousness as part of a good reputation.

Three Imperial Aramaic examples come from Elephantine legal texts and employ the G-stem explicitly in the technical juridical sense of "to obtain justice before a court."[10] In each case, the verb is part of a formula confirming that the possessor of the pertinent document has a valid legal claim that cannot be denied him by another party in a legal proceeding.

The meaning of the partially reconstructed verb *ṣ*[*dq*]*w* in an Imperial Aramaic stele from North Arabian Tēma[11] is controversial, however. This inscription documents the installation of the priest of a deity venerated at the site and guarantees its temple a certain quantity of date palms annually. Thus, it employs Imperial Aramaic as the language of religious law.[12] If one accepts the proposed emendation, *ṣdq* can readily be identified, from purely morphological and semantic perspectives, as a declarative-factitive D-stem

“to declare righteous” with “the gods of Tēma” as the subject.[13] The subsequent preposition *l-* with the name of the priest may then indicate the direct object (especially if animate) with a transitive verb, common in Imperial Aramaic.

Alternatively, however, *ṣdq* could also be a form of the noun *ṣdqtʾ* in the feminine determinative in l. 15 of the same text (→ III). Since the further course of the text defines it as an annual delivery of date palms and apparently means “gift,” some associate it with Arabic *ṣadaqat* and attribute this nuance to the verb, too, in the sense of “to contribute,” strange in Aramaic, but very common in Arabic;[14] in this case, *l-* following the verb indicates the indirect object. Because of the fragmentary state, a final decision would be superfluous, but an Arabic substrate influence seems entirely possible.

The only certain specimen from Qumran, 11Q10 9:7 (Job 25:4), employs *ṣdq* in the G-stem exactly like the Hebrew text for “to be righteous” in the context of a rhetorical question concerning how a person could be righteous before God. Following the Hebrew, an additional form should be supplied in 26:1 (Job 35:7),[15] but only a barely legible]*t* appears after a lacuna.

III. Noun “Righteousness.” The nouns *ṣdq* /ṣedq/ and *ṣdqh* /ṣadaqā/ find usage more often and in a broader spectrum than the verb. No semantic difference is perceptible since both denote “to act righteously,” but one can nonetheless conceive of a, at least original, relationship between general “rectitude” and the specific “(individual) righteous deed.”[16] After the Old Aramaic period, however, *ṣdqh* apparently largely displaced *ṣdq* /ṣedq/ (see below).

The Old Aramaic royal inscriptions utilize *ṣdq* in the sense of the political loyalty of a vassal king to his suzerain, as developed upon the incorporation of the minor principalities of Syria into the Neo-Assyrian Empire as a component of the politico-religious order.[17] All the preserved occurrences come from Samʾal and trace the royal dignity of the vassal

back to his own loyalty[18] and that of his father;[19] similarly in an inscription written in Samʾalian, the Aramaic of Syria soon replaced the local language.[20] The attributive form *ṣdq* “righteous, loyal”[21] may be an active G-stem participle /ṣādeq/, not[22] (as one would expect here) a defectively spelled adjective (→ IV). Names also have /ṣedq/.[23]

In a Palmyrene inscription, which reflects the old West Semitic royal typology, this usage recurs almost one thousand years later in the description of Queen Zenobia as *ẓdqtʾ*.[24] The Greek parallel version has εὐσεβής “god-fearing,” apparently, therefore, it does not represent a translation of the Greek, but recourse to substantially older native forms of expression.[25]

Otherwise in older Aramaic, the noun *ṣdq* appears with certainty only as a technical legal term “justification” in a few Nabatean private documents from the Dead Sea.[26] According to *ATTM*, 2, 94, the word may also appear in the general sense in 1QapGen 11:14 as part of the expression *ʿbd ṣdqʾ* “doer of righteousness” (of Noah). This would indeed allude to the preceding antonym *ʿbd ḥmsʾ* “doer of unrighteousness” in the same line, but would presuppose an unusual word for the Aramaic of the time. Moreover, the fragments of letters cannot be recognized clearly so that other editors prefer here *gbr*<>*ṣdyqʾ* “(the) righteous man.”[27] In any case, the adjective *ṣdyq* (→ IV) better suits the diction of the Imperial Aramaic tradition.

Similarly, *ATTM*, 674 reckons the spelling *ṣdqh* in T. Levi following the Cairo Geniza[28] to be a determinate of *ṣdq* “the righteous,” but an indetermined form of *ṣdqh* “righteousness” seems significantly more likely for this reading. *ATTM*, 2, 107 now reads the determined *ṣdqtʾ* “the righteousness” from *ṣdqh* with the much older textual witness 4Q213 1 1:7 from Qumran, which may also be correct. Consequently, one can conclude that *ṣdq* as a noun found only very limited usage as a legal term after Old

Aramaic. The Syriac occurrences[29] also have such specific juridical connotations.

The typical word beginning in the seventh century B.C.E. was *ṣdqh* /ṣadaqā/. It first occurs in late Old Aramaic in a grave inscription from Syrian Nērab[30] where it refers to the piety of the deceased priest who emphasizes that, through his righteousness (*bṣdqty*) before (*qdm*) his god, he maintained a good name and a long life. The overarching, divinely sanctioned, principle of order in which *ṣdq*(*h*) is rooted expresses itself, then, in a direct deed-consequence relationship. Already in this earliest instance, it denotes "right action" collectively and in general.

In an expansion of this usage, *ṣdqh* can denote, in individual cases—at least in the context of Israelite religion—the merit itself that someone has before (*qdm*) God through a good act. Entirely in the sense of the primacy of rectitude, the Judean priests of Elephantine in their petition concerning the reconstruction of the local temple call to the attention of the Persian administrator of Judea the fact that he would gain more merit through his agreement than through any kind of sacrifice.[31]

A very fragmentary passage from the Bar-Puneš story depicts, in colors that recall[32] the Iron Age era of classical literature, a future brutalization of morals after the demise of *ṣdqh*.[33]

(Meanwhile, the use of *ṣdqh* for "gift" in an Imperial Aramaic stele from northern Arabia,[34] is influenced by the Arabic vernacular of the region and does not represent the meaning of the Aramaic word.[35] The same apparently applies to *bṣdqt* "through the donation/bequest of" in a Nabatean inscription concerning the usage rights of a grave.[36] The Nabateans employed Arabic both as the language of daily life and religion and for administrative purposes.)[37]

The religious implications of right action known already from the few Old and Imperial Aramaic instances continue in the next occurrence chronologically, Dnl. 4:24. In his interpretation of Nebuchadnezzar's dream vision of the world tree, Daniel admonished the king "to redeem"[38] his sins

(that is, his arrogance, as 4:27f. indicates) "through right action."[39] The parallel expression in the same verse specifies this action as "having mercy on the poor."[40] At the same time, *ṣdqh* here cannot be limited to the later meaning "alms."

This meaning is first perceptible in the translation of 4Q198 1:1 (Tob. 14:2) with ἐλεημοσύνας and in post-Christian Aramaic.[41] One cannot say when this shift in meaning occurred. At Qumran, at any rate, *ṣdqh* still refers generally to "right action," also as part of the religio-cultural heritage of the fathers.[42] 11Q10 26:3 (Job 35:8) renders the Hebrew cognate "sons of right action" for the sons of light. 4Q548 1 2-2:7 is largely reconstructed. Regarding 4Q213 1 1:7, see above.

IV. Adjective "Righteous." The adjective *ṣdyq* /ṣaddīq/ "righteous" first occurs in the sayings of Aḥiqar. It is employed mostly as a substantive "righteous one" and denotes an ethical quality that binds humans with gods[43] and places them under the protection of the gods,[44] but also secures the assistance of other humans.[45]

With a legal meaning "justified to own," it describes a person in two Imperial Aramaic documents from Elephantine.[46] Otherwise, the apparently general term *šlyṭ* "entitled to dispose of"[47] serves this function.

Only a few instances appear at Qumran, too. Besides the predication of Noah following Gen. 6:9[48] and presumably of Abraham in a prediluvian conversation between two angels,[49] it occurs in apocalyptic contexts denoting the righteous in the eschaton,[50] and can otherwise only be reconstructed in fragmentary contexts.[51]

With the juridical connotation "just heir," *ṣdyq* occurs in a Nabatean contract from the Dead Sea.[52] Otherwise, under Arabic influence, *ʾṣdq* /ʾaṣdaq/, demonstrably Arabic by form, fulfils this function,[53] similarly in Nabatean grave entitlement inscriptions.[54]

Rare forms, spelled defectively as *ṣdq*, in attributive usages such as the Old Aramaic in *KAI* 217.5 and the Palmyrene in *PAT* 0293.1[55] are more

likely G-stem participles (→ III). In any case, Syriac *zāḏeq*[56] supports this interpretation.

Later Aramaic languages attest additional nominal forms.[57]

צלח *ṣlḥ*

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Aramaic *ṣlḥ*, in the C-stem either a transitive "to advance, make successful" or an intransitive "to have success," can be traced to a common Central Semitic, and perhaps even to a common West Semitic, root.[1]

Traditionally, *ṣlḥ* "to divide" in the D-stem[2] is differentiated as a homonymous root,[3] but the hypothesis of a common etymology from "to intrude" via "to permeate" to "to succeed" also has adherents.[4]

II. Usage. The first appearance of *ṣlḥ* "to be/make successful" is in Biblical Aramaic. Dnl. 3:30 utilizes it for the king's advancement of Daniel and his friends after God had saved them from the fiery furnace;[5] Dnl. 6:29 employs it intransitively for Daniel's uninterrupted success under Darius and Cyrus. Both passages emphasize how the worship of God in a foreign land links with a successful life in the service of the empire. In Ezr. 5:8 and 6:14, it represents the good progress in the construction of the temple, according to 6:14 thanks to the assistance of the prophets.[6] The meaning, "to thrive" or "to divide," in 1QapGen 6:17, in a fragmentary context, is unclear.

5. With *l-* as an object marker, as is also typical in Imperial Aramaic.

6. → *nbyʾ*.

צלי *ṣlī*; צלו *ṣlw* /ṣalō/; תצלו *tṣlw* /taṣlū/

I. Etymology, Lexical Field, and Grammatical Constructions. II. Verb "to Pray." III. Noun "Prayer."

I. Etymology, Lexical Field, and Grammatical Constructions. Among the various branches of Semitic languages, the most likely direct relation to the Aramaic verb *ṣlī* "to pray" is with the Akkadian root *ṣullû* "to appeal to, to plead."[1] It arose from an old **ṣlū*, as the nominal form /taṣlū/ indicates (see below). The broader body of evidence could support the hypothesis of an Akkadian loanword.[2] On the one hand, Ugaritic *ṣlī* "to appeal to, to adjure"[3] may have been taken independently from Akkadian, especially since it occurs in the context of a magical adjuration of the clouds[4] and Akkadian was widespread as the language of ritual. On the other hand, the verb is sometimes considered an Aramaic loanword in Arabic,[5] whence it could have migrated further into Ethiopic. None of this is certain, however. Hebrew employs *pll*.

In older Aramaic, *ṣlī* appears in the D-stem, predominantly as an intransitive, but it can also take a root-related noun as internal object (→ III). Prepositional modifiers expressing various adverbial relationships are introduced by *l*- "to" (in Ezr. 6:10 "for" instead) or in formal language in the Imperial Aramaic tradition by *qdm* "before," in addition to *ʿl* "for." As a designation for mostly private, but also public prayers, it remained common in both Jewish Palestinian[6] and Jewish Babylonian,[7] as well as in Syriac[8] and other Aramaic languages on into the modern era.

In East Aramaic, the meaning "to bow, to turn" is also productive.[9] It is either associated with the same root[10] or, less likely in view of the body of

evidence, considered a homonymous verb.[11] Older evidence does not manifest it.

Furthermore, the root *ṣlī* also includes the feminine abstract noun *ṣlw* /ṣalō/ "prayer," a *qalāt* form;[12] the Tell Fekheriye inscription has instead the *taqlūt*-noun *tṣlw* /taṣlū/, later no longer still in use, apparently with the same meaning (→ III).

The verb *ṣlī* designates prayer as an expressly personal devotion to a deity in conversation quite generally; various verbs with more concrete meanings and their nominal derivatives specify the nature of the prayer itself: → *bʿī* "to request" or → *ḥnn* "to plead for mercy" (sometimes in parallelism) for the petition, → *brk* and → *ydī* "to thank, praise," as well as → *šbḥ* "to sing praise" for praise. Actions accompanying prayer include kneeling (Dnl. 6:11),[13] raising the hands[14] and the eyes,[15] in certain situations also crying.[16] The communicative act of prayer is distinguished terminologically from cultic veneration and obeisance,[17] which arise from the acknowledgment of divine power and find visible expression in the gesture of prostration,[18] and from the offering of sacrifices.[19]

II. Verb "to Pray." While the contexts of the veneration of Mesopotamian and Egyptian gods also attest the roots → *sgd* "to do obeisance" and → *plḥ* "to serve, to venerate" and the noun *tṣlw* occurs in reference to a prayer addressed to the Syrian god Hadad, all the older instances of the verb *ṣlī* including the earliest Imperial Aramaic appear in the environment of Israelite-Judean religion.[20] In the preserved material, the petition of the Judean community at Elephantine concerning the reconstruction of the temple of Yaho, destroyed at the instigation of Egyptian priests, constitutes the first attestation. The authors emphasize to the Persian governor of Judea that, since the plundering and destruction of the cultic center, the community, including women and children, have worn mourning clothes (*śqqn lbšn hwyn*), fasted (*ṣymyn*),[21] and prayed to Yaho, the Lord of heaven (*mṣlyn lyhw mrʾ šmyʾ*).[22] The subsequent lines describe

more precisely the content and objective of the prayer: Yaho should let them "look down on"[23] the evildoers. In return, they assure the governor, in gratitude for the permission to rebuild, that they will offer sacrifices (l. 25) on the altar of Yaho in his name (*bšmk*, l. 26) and will all pray for him (*ʿlyk*, l. 26).[24]

Conversely, according to Ezr. 6, the royal memorandum that authorizes the reconstruction of the Jerusalem temple takes up precisely this reciprocal relationship between the privilege of religious practice, on the one hand, and, on the other, vicarious sacrifice[25] and prayer for (*l*-) the well-being[26] of the ruler and his sons by the community favored in this manner (Ezr. 6:10).

By mentioning sacrifice first and prayer second in the same context of a communal cultic act here, as in the letter from Elephantine, the personal relationship with God and individual prayer, revitalized with the loss of the Jerusalem temple and the exile, receive a clear up-valuation. For life in the diaspora, such as the court tales in Daniel also depict literarily,[27] unconditional loyality to the true God and intimate conversation with him are the load-bearing columns of ever-endangered religio-cultural identity.

They also serve as such in the prayer scene in Dnl. 6 in the context of the story of the lions' den. The envy of Daniel, extremely successful in the imperial administration, incites an intrigue against him, which cannot find any objection[28] with his faultless execution of office, however, and brings the king, otherwise well-disposed toward him, unwittingly to place Jewish worship under the death penalty; in the context of the story, Daniel's religion was known, then, and not a private matter. Daniel's enemies packaged the actual objective as an apparently objective prohibition against addressing a petition to any god or human being other than the king (Dnl. 6:4). The account then describes how Daniel, after learning of the king signing the prohibition, withdrew to the upper story (*ʿlyh*) of his house, that is, the most intimate place available to him, but with the windows open in the direction of the old, now spiritual, cultic center Jerusalem[29] and thus linked with the overarching context of his religion. Thus, he prayed, imbedded in the framework of form and tradition, three times a day according to this custom (6:11). Here, the text links the act of praying, denoted by the participle *mṣlʾ*, with the gesture of kneeling,[30] and first

specifies it with the parallel form *mwdʾ* [31] as "praise," and in the subsequent verse, through the parallelism of → *bʿī* and → *ḥnn*, as a petition (6:12). Even if conceptual boundaries in juxtapotion can blur and nothing is known of the context in the history of liturgy, it is nonetheless likely that one should see in *mwdʾ* an introductory thanksgiving for God's already demonstrated beneficences and in *bʿʾ* as well as *mtḥnn* then the request before God (*qdm*), motivated by help in the past, for deliverance now.[32]

At Qumran, half of the instances of *ṣlī* appear in the story of Abraham at Pharaoh's court in 1QapGen. Here, as in Biblical Aramaic, prayers take place both in private and in public contexts. Abraham's petition to God that Pharaoh not assault his stolen wife Sarah,[33] shares with Dnl. 6:11f. the intimate framework (here at night), personal distress as the occasion, and the combination of *bʿī* and *ḥnn*. Likewise, it begins with praise of God.[34] In contrast, Abraham's petitionary prayer to God at the wish of Pharaoh, in his presence and for (*ʿl*) him and his house,[35] that the god-sent demon that had plagued him for years since Abraham's earlier petition disappear,[36] has models by form and content in Ezr. 6:10 and in *TADAE* A4.7:26 (see above). The laying on of hands to heal is new.[37]

The healing of a foreign ruler by a Jew is also the theme of the Prayer of Nabonidus, which deals with the topic of the expulsion and restitution of Nabonidus[38] as evidence of the superiority of the true God. Here, *ṣlī* occurs once in the superscription with *ṣlw* (→ III) as the direct object "the prayer that . . . prayed,"[39] then in the king's confession itself in reference to his futile prayer to idols (l. 7). The other instances are fragmentary.[40]

III. Noun "Prayer." Of the two related old nominal forms for "prayer," *tṣlw* /taṣlū/ is known so far only from the Tell Fekheriye inscription. There, it occurs once in the introductory hymnic description in a relative clause modifying Hadad, the merciful[41] god, "whose" prayer[42] is "good" (*ṭb*),[43] that is, effective.[44] In the subsequent dedication report, "the granting of his

(i.e., the donor's) prayer [*lmšmʿ tṣlwth*] parallels "accepting the words of his mouth" (*lmlqḥ ʾmrt pmh*)[45] as the purpose of the dedication of the pertinent statue and, thus, depicts it as an act of loyalty.[46]

Otherwise, Aramaic employs the noun *ṣlw* /ṣalō/, attested beginning at Qumran. It has survived in only a few instances: in 4Q213a 2:8 for Levi's petition,[47] in 4Q242 1-3:1 as the object of the verb (→ II), and in 11Q10 14:8 as a free translation "I became a prayer in the mouth of" for "I cause the heart of . . . to rejoice [*ʾrnn*]" in Job 29:13. It belongs to the vocabulary of later varieties of Aramaic, however.[48]

צלם *ṣlm* /ṣalm/; נצב *nṣb* /naṣīb/; נצבה *nṣbh* /neṣbā/; צורה *ṣwrh* /ṣūrā/

I. Forms, Lexical Field, and Grammatical Constructions. II. Old and Imperial Aramaic. III. Biblical Aramaic and Qumran. IV. Northern Arabia, Syria, and Eastern Mesopotamia.

I. Forms, Lexical Field, and Grammatical Constructions. The Semitic languages employ the common primary noun *ṣlm* /ṣalm/ to denote the plastic representations of gods and humans widespread in the ancient Near East until the Byzantine era. In Aramaic, doubled consonants at the end of the word are attested since the earliest known texts, but from about the fifth century B.C.E. they were separated, in this case yielding /ṣaləm/.[1] The word is masculine in gender, but in the rapidly blooming memorial epigraphy of the Aramaic languages in the Hellenistic and Roman eras, its gender corresponds to the sex of the person depicted, thus, masculine *ṣlm* /ṣaləm/ for the statue of a man and feminine *ṣlmh* /ṣalmā/ for that of a woman. Since no relief depiction of women with *ṣlm*(*h*) in an Aramaic inscription from earlier times is known, it remains unclear when this development began. Only rarely does *ṣlm* serve figuratively for the facial expression of a living person (→ III).[2]

Because *ṣlm* explicitly designates a plastic representation, it also differs altogether semantically from *dmw* /damū/ "image, likeness,"[3] employed in a more abstract sense for directly perceptible agreements in form. In individual cases, in fact, the two terms can appear together in reference to the same object,[4] but *dmw*, which is more rare in any case, occurs less

frequently for a concrete object than do the comparative prepositional expressions, *bdmwt*, *kdwmt* and *ldmwt*[5] attested since Imperial Aramaic.

In contrast, the noun *nṣb* /naṣīb/[6] serves to denote a stele, an erected stone. In this sense, it can involve a statue with a pictorial depiction, as in the case of the two large Samʾalian royal statues,[7] but the image character, in contrast to *ṣlm*, is not inherent to the meaning of the term. Meanwhile, *nṣb* can denote columns and other generally stone objects,[8] as can the feminine *nṣbh* /neṣbā/.[9] Since the Achaemenid period, northern Arabian sources, and later also Syrian and Judean, evidence the rather specialized usage of *npš*[10] for a stone grave memorial with a stylized face, and sources from the Nabatean kingdom for a pyramidal grave marker.

In addition, the feminine *ṣwrh* /ṣūrā/ "image, form, figure," used to designate both paintings, and reliefs and sculptures, occurs later.[11] Furthermore, beginning in the Achaemenid period, the Iranian word *ptkr* appears.[12]

The noun *ṣlm*, as well as *ṣlmh*, generally appears as the object of a verb of establishment,[13] in West Semitic formulas for dedicatory and honorific inscriptions also in the identifying nominal clause with the subsequent name of the one depicted (→ IV).[14] The nouns *nṣb*/*nṣbh* behave analogously.[15]

II. Old and Imperial Aramaic. Only a handful of instances of *ṣlm* "statue" occur in all of the Old and Imperial Aramaic corpus. All occurrences relate to depictions of human beings. At the beginning of the textual tradition (ca. 850 B.C.E.) stand the bilingual Akkadian-Aramaic dedicatory inscriptions of the king (governor, according to the Akkadian version) of Gosan on a statue that represents the king himself[16] and that he "established"[17] for his own benefit before (*qdm*) Hadad, his local patron deity (l. 16). Simultaneously, the text mentions the dedication of temple vessels in the name of the king (ll. 16ff.).[18] This text apparently employs

ṣlm and *dmw* interchangeably (→ I). The statue with an inscription serves as a demonstration of the prince's loyalty to his divine overlord, but, at the same time, also reflects the claim, inherent in the petition for well-being,[19] that the deity shares responsibility for the king's ruling house and people (*ʾnšwh*, "his people"). The Aramaic text says nothing about Gosan already being an Akkadian vassal at the time.

If the self-awareness of the originally independent Aramaic kings still echoes in the Gosan inscription,[20] in the course of the Neo-Assyrian period, the use of Aramaic inscriptions on graphic depictions expanded to other high-standing personalities from the environs of the king. After the Kuttamuwa Inscription from Samʾal, which employs the word *nṣb* (mid-eighth century B.C.E.; → I), two basalt steles with burial inscriptions for priests from Syrian Nērab are preserved (ca. 700 B.C.E.);[21] both utilize *ṣlm* in the identification of the graphic depiction of the deceased.[22] Additionally, *KAI* 225 places the statue, like the sarcophagus, under divine protection via a curse formula.

Burial or dedicatory inscriptions for individuals survive from the Achaemenid period from different parts of the empire, in fact, namely from Egypt,[23] Asia Minor,[24] and northern Arabia.[25] Yet, to date, only one inscription from Daskyleion in Asia Minor attests the designation *ṣlm*.[26] *KAI* 258.1,4 and 260 B 2.4, also from Asia Minor, have for "stele" the Persian loanwords *ptkr* (→ I) and *stwnh*.[27]

In Imperial Aramaic inscriptions from Tēma,[28] *ṣlm* also appears as the name of a local deity and as a theophoric element.

III. Biblical Aramaic and Qumran. Biblical Aramaic evidences *ṣlm* only in the book of Daniel. There it functions both in the story of the "colossus with clay feet" (Dnl. 2) and in the story of the young men in the fiery furnace (Dnl. 3) as a symbol of royal power, but in each case with different emphases. Daniel 2:31f.,34f. employs it of the gigantic (*śgyʾ*)[29] statue of different materials that King Nebuchadnezzar saw in the dream. According to Daniel's divinely inspired interpretation, it represents the

sequence of different empires up to the dawn of the kingdom of God, in which the materials of descending value[30] represent increasing decay culminating in the feet of mixed clay and iron. Thus, the statue is ultimately unstable and a stone, that then grew into a mountain[31] and represents divine power, destroyed it. The detailed anatomical description of head, breast, arms, torso, hips, legs, and feet (Dnl. 2:32f.) accentuates the form inspired by royal statues (→ II), which although inflated to gigantic proportions, remains, nonetheless, human. Meanwhile, the stone become a mountain breaks with all familiar conceptions.

While the royal symbolism in Dnl. 2 depicts the politico-theological statement that even the greatest human power faces the limits of divine sovereignty,[32] the story of Nebuchadnezzars's similarly large (sixty times six cubits) golden statue in Dnl. 3 foregrounds the relationship between divine and human authority. In the festal consecration ceremony (Dnl. 3:5-7),[33] all subjects of the empire should prostrate themselves[34] on a musical signal ("on command") and do obeisance to the image.[35] The Jewish officials who refused to venerate[36] the statue were vilified and cast into the fiery furnace, but God delivered them from it so that, ultimately even the king converted.

Although in context it does not explicitly involve a cultic image,[37] the Jews' refusal to venerate it bears elements of aniconic polemic, as became more vigorous under the influence of prophetic critique in the postexilic period.[38] Thus, the repetition of the term *ṣlm*, which normally refers to a copy for representation and not for worship, in Dnl. 3:1-3,5,7,10,12,14f.,18 consistently emphasizes that it involves only a human image, and thereby in context loads it with negative connotations. Only the invisible God deserves veneration (3:17, *plḥ*), consequently, homage is also denied the statue, too (3:18, *sgd*). Likewise, the affirmation that only God can deliver (3:17f.) characterizes idol polemic. The usage of *ṣlm* in 3:19 diverges from the typical usage once to refer to the king's facial expression.

The few instances from Qumran add nothing: 1QapGen 20:2 utilizes *ṣlm ʾnpyhʾ* "the form of your face" (in the song praising Sarah), as in Dnl.

3:19; the isolated fragment 4Q243 31:2 seems to belong to a text from the circle of the Daniel traditions.

IV. Northern Arabia, Syria, and Eastern Mesopotamia. Under the influence of Hellenistic culture, the production of plastic pictorial representations of private persons with Aramaic inscriptions underwent an explosive increase in northern Arabia, Palmyra, and Edessa in Syria, as well as in Hatra in East Mesopotamia in the Roman Imperial period.[39] The standardization of new, locally varied Aramaic chancellery languages coincided with a multiplicity of iconographic programs.[40] The introductory formula *ṣlmʾ* (*dnh*) *dy*, etc., "(This is the) statue of" in many inscriptions, revived the West Semitic formulary.[41] At Palmyra, it primarily served the public representation, at Hatra, personal piety.

צפר *ṣpr* /ṣeppar/

I. Etymology, Overview. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology, Overview. In the possible Aramaic base form /ṣeppar/, the concluding /r/ produces the likely secondary /a/.[1] Almost all of the attested vocalized forms conform to this etymology,[2] even Mandaic *ṣipra*[3] and Jewish Palestinian *ṣypr* in a *plene s*pelling;[4] Samaritan has by-forms.[5] Forms with /o/ may be archaic or influenced by Hebrew. In older Aramaic, one finds the spelling *ṣnpr* (sayings of Aḥiqar)[6] with a secondary *n* either as the result of the dissimilation of a geminate[7] or as an incorrect etymological indication of the long /p/.[8] The gender varies; in the oldest Aramaic instance, the word is feminine.

It is difficult to deduce a Semitic ground form. Hebrew *ṣippōr* and presumably also Phoenician *ṣpr*[9] may correspond to /ṣippur/, more original than /ṣippar/,[10] but Ugaritic has two forms: in addition to *ṣpr*,[11] the more abundantly attested and not very similar *ʿṣr*,[12] to which can be linked Akkadian *iṣṣuru*,[13] although with no indication of an old /ʿ/. The link for a common original form is Arabic *ʿuṣfūr* "sparrow; any passerine bird"[14] with both /p/ and /ʿ/. Kottsieper assumes[15] for the Akkadian and Ugaritic the assimilation of /p/ and derives the word from the verb "*ṣpr*, to twitter, to whistle," which is not very well attested, however,[16] and may, rather, belong to a root *ṣbr*.[17] The /ʿ/ is surely secondary.[18]

Despite the not entirely parallel development in the individual Semitic languages, one can say that /ṣippar/, whatever its oldest form may have been, designated an individual, small (song-)bird, in contrast to the collective /ʿawp/ "birds," in addition—as still in Aramaic—to designating a species, presumably the most common small bird, the sparrow.

II. Old and Imperial Aramaic. There are five instances in Old and Imperial Aramaic. The word first appears in the very early Bileam Text from Deir ʿAllā (ninth century B.C.E.) in a somewhat uncertain context in the spelling *ṣpr*; a lacuna begins after the *r*. The passage[19] presumably involves a list of bird species so that the meaning here should more likely be determined as "sparrow":[20] "swallow, . . .-bird (?), dove and house sparrow."[21]

The form spelled with *n* (→ I) occurs three times in the sayings of the Aḥiqar story (fifth century B.C.E.) in the singular absolute *ṣnpr* and constructed as a feminine: "guard your mouth and . . . make your heart hearvy for a word is (*hyj*) a bird";[22] twice in the plural determinate *ṣnpryʾ*.[23]

III. Biblical Aramaic. Biblical Aramaic has four instances, Dnl. 4:9,11,18,30, in the description of Nebuchadnezzar's dream vision. They are plurals, once absolute (4:30: "his hair grew as long as eagle feathers and his nails as bird talons" [*w*^{e}*ṭiṗrōhī k̲*^{e}*ṣipp*^{e}*rīn*]), once determined (4:11: "so that the animals lying under it run away and the birds flee from its branches" [*w*^{e}*ṣipp*^{e}*rayyā min-ʿanṗōhī*]), and twice the construct "the birds of heaven" (*ṣipp*^{e}*rē š*^{e}*mayyā*; 4:9: "Tree . . . all the animals of the field found shade under it and the birds of the heaven sat on his branches" and 4:19: "Tree. . . , under which the animals of the field dwelt and on whose branches the birds of heaven sat, that is you, O King").

IV. Qumran. The three Aramaic specimens from Qumran occur in the Targum of Job (11Q10 13:2; 26:6; 35:8; first century B.C.E.) and translate

Job 28:21; 35:11; and 40:29. The plural construct *ṣpry* appears in 13:2 (Job 28:21): "[from] the birds of heaven they were hid[den]"; the plural determined *ṣpryʾ* in 26:6 (Job 35:11):[24] "God . . . who . . . made us wiser [than] the birds";[25] and the singular absolute *ṣpr* in 35:8 (Job 40:29): "will you laugh with him as with a bird."[26]

קבל *qbl*; קבל *qbl* /qobl/; קבילה *qbylh* /qabīlā/

I. Etymology, Lexical Field, and Constructions. II. G-stem “to Accuse.” III. D-stem “to Receive.” IV. Preposition “Before.” V. Noun “Accusation.”

I. Etymology, Lexical Field, and Constructions. Aramaic *qbl* belongs to a verbal root, common at least in West Semitic. The Aramaic G-stem “to accuse, raise an accusation,” known from the earliest texts, contrasts with the D-stem “to receive, to accept” also known in other individual languages. Both remain largely constant throughout the history of the Aramaic language and some derive them from a common basic meaning “to confront someone,”[1] while others assume two homonymous roots.[2]

Although the verb also seems once to have been native in Canaanite for “to receive,” as evidenced by its use in the Amarna Correspondence,[3] *lqḥ* with the originally less specific nuance “to take”[4] replaced it in Hebrew, Moabite, and Phoenician. Meanwhile, at least the sporadic instances in postexilic prose texts stand under Aramaic influence.

The older stages of the Aramaic languages differentiate between *qbl* in the D-stem for the passive reception of something and various other verbs for the active taking or removing; → *yhb*/*ntn* “to give” serve as antonyms. For a discussion of the lexical field → *nśī* I. For the meaning “to accuse,” however, the G-stem of *qbl* is the typical verb. An Imperial Aramaic commercial ostracon from Idumea[5] also seems to attest a C-stem of *qbl* for “to pay,” but this usage is unusual elsewhere.

The G-stem “to complain, to accuse” can be construed intransitively or with a direct object “before,”[6] frequently supplemented with a prepositional expression with *ʿl* “against,” *l*- or *qdm* “before,” and *ʿl* (*dbr*) or *mn*

“because of” or an object clause following *dy* “about, that.” Meanwhile, the D-stem is generally transitive with that received as a material or abstract object, in which case *mn* “from” may specify the giver. The corresponding t-stem serves as a passive.[7]

Prepositions in conjunction with /qobl/ (from the fifth century B.C.E.)[8] “before, in front of, corresponding to” are especially productive in Aramaic. It represents a *qutl*-noun from the same root and forms the basis of various conjunctions. Legal diction also knows the feminine /qabīlā/ “accusation.”

Yet, to date, no relationship has been established with the homonymous root *qbl*, in the G-stem “to be dark,” and the related noun /qabl/ “darkness.” Aramaic first attests both in the texts from Qumran: the verb in a formulaic expression for the waning moon in the astronomical book of Enoch, the noun in 11Q10 8:6 (Job 24:15) for Hebrew *næšœp̄* “twilight.”[9]

II. G-stem “to Accuse.” The G-stem of *qbl* “to accuse” first appears in a curse formula in the Tell Fekheriye inscription, the oldest written Aramaic witness: should someone remove the name of the donor of the statue, then may the God Hadad be *qblh* “his accuser.”[10]

Thereafter the verb occurs frequently in documentary texts beginning with the Achaemenid period. In letters, it appears with the general nuance “to complain,”[11] but mostly for a formal complaint either before a state authority[12] or to a superior in the official hierarchy.[13]

In private documents, it has the specifically juridical sense of “to accuse.”[14] Here, in a fixed formula, one waives a later accusation before a “prefect”[15] or “judge.”[16] A court record[17] registers an actually executed complaint, but the context is fragmentary; a similar situation pertains in a Nabatean contract from the Dead Sea.[18]

Several texts from Qumran, mostly associated with the Enoch tradition, employ *qbl* in religious language for a complaint to God: Abraham in his prayer about the theft of his wife Sarah,[19] the spirits of the dead about their murders,[20] and the earth about the unnatural sexual behavior of the

Watchers.[21] A few additional instances are fragmentary.[22] In 11Q10 8:2 (Job 24:12), *qbl* translates the Hebrew *šūʿ* "to call for help."

III. D-stem "to Receive." The first examples of the D-stem "to accept" occur in Imperial Aramaic private documents from Samaria,[23] all in the formula *lʾ mqbl ʾnh mn* "I have not received from." The grammatical analysis has always been controversial: either it involves a passive participle "having received," possibly in analogy to the Akkadian stative *maḫir* in the corresponding Neo-Babylonian formula,[24] but with an active meaning "possessing,"[25] or an active for the present indicating the conclusion of the contract.[26] In the second case, however, the perfect indicating coincidence would be more likely.[27] It also appears in the same meaning in contracts from the Dead Sea[28] and a Palmyrene grave warranty,[29] which also continues the Imperial Aramaic legal tradition.

In Biblical Aramaic, *qbl* once denotes the acceptance of gifts from the hand (*mn qdm*) of the king (Dnl. 2:6) and twice the assumption of rule (Dnl. 6:1; 7:18).[30]

Texts from Qumran attest additional expressions and uses of the verb for the acceptance of instructions[31] and offices,[32] and in the context of sacrifices.[33] In 11Q10 it represents the Hebrew *lqḥ*.[34] The contexts of the fragments 4Q213 4:2 and 4Q586 a:2 remain unclear.

The meaning of *qbl*[35] in a marriage contract on an ostracon from Idumea[36] is debated.

The t-passive, very rare in older Aramaic, means "to be accepted" and initially appears only in bureaucratic style.[37] Jewish Palestinian then attests it somewhat more frequently.[38]

IV. Preposition "Before." Prepositional phrases based on the noun *qbl* "front side, in front of" (and accordingly with singular suffixes) appear beginning in the Achaemenid period and typify Aramaic. At the same time, *lqbl* frequently denotes "before" in the spatial sense[39] or "vis-à-vis,"[40]

moreover, “accordingly” in the sense of manner,[41] “against,”[42] and “based on, because of.”[43] In such expressions, it overlaps partially with → *qdm*.

Thus, with the nuance “accordingly” in conjunction with the demonstrative pronouns *znh*/*dnh* and/or the relative particle *zy*/*dy*, the typical basis of subordinating conjunctions in Aramaic, it can also constitute the introduction of (usually) causal clauses or expressions indicating a comparison: *lqbl dnh* “according to”[44] or “on the basis of” (Ezr. 4:16); *lqbl dy* “like,”[45] with a subsequent *ʾyk* “like” also Naveh and Shaked, A5,1, or “because”;[46] *klqbl dnh* “therefore” (Dnl. 2:12,24; 3:7f.,22; 6:10; Ezr. 7:17) or *klqbl dy* “because” (Dnl. 2:8; 3:29; 4:15; 5:12; 6:4f.,23; Ezr. 4:14; 7:14), “since” (Dnl. 2:10,40f.,45; 6:11); in contrast, it is only rarely a concessive “although” (Dnl. 5:22). Such phrases can then be further expanded, like *lqbl dnh dy* “according to that which”[47] or *klqbl dnh mn dy* “for this reason, because” (Dnl. 3:22). Here, despite the spelling as a distinct word and the vocalization *kol* in the biblical text, *kl-* is not the quantifier “all,” but is a combination, otherwise rare in Semitic languages, of the two mono-consonantal prepositions *k-* and *l-*.[48]

The frequent occurrence of these phrases in official Imperial Aramaic letters and private documents, indeed only comparably rare in private letters on ostraca, suggests that it originated in the linguistic register of Achaemenid administrative diction and, thence, spread in the literary language.

The participle *mqbl* “lying opposite” in an attributive function in the path descriptions of Palmyrene grave authorizations[49] apparently also belongs to the noun *qbl*. Some assign it to the C-stem, which is otherwise not well attested in Aramaic,[50] but it could be, and perhaps even more likely is, a D-stem as is often the case with denominal verbs.

V. Noun “Accusation.” The feminine noun *qbylh* /qabīlā/ “accusation” belongs to the meaning of the G-stem (→ II) of *qbl*. It occurs in a few

Imperial Aramaic official letters in reference to an official complaint.[51] Like the verb, it appears once in 11Q10 25:4 (Job 34:28) from Qumran for a complaint before God, where it translates the picturesque Hebrew *ṣʿqh* "cry (of complaint"), thus faded, but entirely in keeping with the original text. It appears with very similar nuances in the post-Christian era, e.g., in Jewish Palestinian,[52] in Jewish Babylonian,[53] and in Syriac.[54]

These later Aramaic languages also attest additional related nominal forms.[55]

קדם *qdm*; קדם *qdm* /qodām/; קדמה *qdmh* /qadmā/; קדמי *qdmy* /qadmāy/; קדים *qdym* /qadīm/

I. Etymology. II. Preposition. 1. Old and Imperial Aramaic. 2.Biblical Aramaic and Qumran. III. Nouns. 1. Old and Imperial Aramaic. 2.Biblical Aramaic and Qumran.

I. Etymology. The root *qdm* "front, before, first" in both temporal and local meanings is common Semitic. The derived meaning "east"[1] arose in Ugaritic and Hebrew out of the tendency to orient oneself, with the Mediterranean at one's back, forward, toward the sunrise. In Qumran Aramaic, the noun with this meaning is probably a loanword.[2] As a verb, *qdm* in the G- and D-stems "to precede, to anticipate" and in the C-stem "to do first" first appears in the post-Christian era.[3]

II. Preposition.

1. Old and Imperial Aramaic. The preposition *qdm* "before," constructed with plural suffixes (e.g., Dnl. 7:13), mostly in a local,[4] although also in a temporal meaning,[5] is frequent. Theologically relevant are Old and Imperial Aramaic expressions for destiny "before God": at the erection of statues, thrones, or steles in a pagan context,[6] where, given the presence of the statue of a deity, "before" can be understood spatially; in relation to treaties concluded before treaty gods;[7] in the blessing formula *bryk* PN *qdm* GN *ʾlhʾ* "blessed be PN by the god DN" on Egyptian burial steles;[8] in the phrase "righteousness before God"[9] or "favor (*rḥmn*) before God."[10] The preposition here assures the quality of the characteristic mentioned, comparable with the Biblical Hebrew *b*^{e}*ʿēnē Yhwh*, Nu. 24:1 etc., *lip̄nē Yhwh*, 2 Ch. 31:20, etc.

2. Biblical Aramaic and Qumran. The pairing of mostly good characteristics with the modifier "before/with God," already known in Imperial Aramaic, also occurs in Biblical Aramaic and at Qumran. Thus, Daniel explains his deliverance from the lions' den in Dnl. 6:23 with "the fact that innocence was found in him [i.e., God]" (*dī qᵒḏāmōhī zāḵū hištᵉḵaḥaṯ lī*, 3ms suff.); the Tobit manuscript 4Q196 17 2:5 (Tob. 13:6) had "do the righ]t before hi[m" (*qw*[*šṭʾ ʿbdw*]*qdmwh*[*y*, 3ms suffix); and the petitionary prayer from T. Levi 4Q213a 1:15f. says "to f]ind your grace before you [. . .] what is well and good with you" (*lʾ*]*škḥʾ rḥmyk qdmyk* [. . .] *dšpyr wdṭb qdmyk*, 2ms suff.). The phrase "evil before my lord/master" (*bʾyš qwdm rby*) appears in 4Q529 1:10.

In respectful speech, the preposition *qdm* can replace other prepositions (*mn qdm* replaces *mn*) if the object is God. This is a further development of Imperial Aramaic court diction in which *qdm* found usage in reference to the king or other high officials,[11] as was still the case in Dnl. 2:9,10; Ezr. 7:14, etc. This manner of speech in reference to a god first appears on an Imperial Aramaic pagan burial stele,[12] then in Biblical Aramaic and at Qumran, e.g., Dnl. 6:11, where Daniel in his upper story "prays and praises his God" (*mᵉṣallē ūmōḏē qᵒḏām ʾᵃᵉlāheh*).[13] Abraham relates in 1QapGen 21:3 of his return to Bethel, "there I praised God" (*wʾwdyt tmn qwdm ʾlhʾ*). In the Book of Giants 4Q533 3:1 "children prayed (or pray!) before him" (] *ṣlw yldyn mn qdmwh* [)[14] and in 4Q557 1:7[15] "and mercy with G[od" (]*wrḥmyn mn qdm ʾ*[*lhʾ*),[16] the pairing *mn qdm* appears instead of the expected *qdm*.[17]

III. Nouns.

1. Old and Imperial Aramaic. Old and Imperial Aramaic attest the morphologically feminine noun **qdmh*[18] "former time, former status," sometimes with suffixes,[19] sometimes with a preposition meaning "chronologically before" with a subsequent noun.[20] In Imperial Aramaic,

the adjective *qdmy* “former, first” can function attributively[21] or substantivally.[22]

2. Biblical Aramaic and Qumran. In Biblical Aramaic and documents from the Judean wilderness, one finds the combination *min qaḏmaṯ dᵉnā* “before, previously,”[23] in comparison to Imperial Aramaic, expanded with *mn*. Otherwise, only 1QapGen 21:23 attests the noun **qdmh* “former time” (*qdmt ywmyʾ ʾln* “before these days”).[24] The adjective */qadmāy/ “former, first” in substantival usage characterizes the first animal in Daniel’s animal vision (Dnl. 7:4: *qaḏmāyᵉṯā* “the first”)[25] and the previous kings in its interpretation (Dnl. 7:24: *qaḏmāyē* “the former ones”),[26] and in adjectival use “the first horns” (Dnl. 7:8: *qarnayyā qaḏmāyāṯā*)[27] of the fourth animal.

In Noah’s dream vision 1QapGen 14:11, “the first shoot” (*ḥlptʾ qdmytʾ*)[28] grows on the stump of the great cedar, which symbolizes Noah.[29] The reference to “the first pilgrimage feast” (*rglʾ qdmyʾ*),[30] probably Succoth, after the flood in 1QapGen 12:14 is also relevant.

Furthermore, the adjective typifies the astronomical book of Enoch;[31] the correct etymology (→ I) of the masculine noun *qdym* “east” appears in 4Q210 1 2:15:[32] “[One calls the east, east] because it is the first” ([*qryn lqdymʾ qdym*] *bdy hwʾ qdmyʾ*).[33] Otherwise, 4Q210 1 2:4,5,6 in the phrase “east wind“ (*rwḥ qdym*)[34] and 4Q548 2 1:9, 4Q244 4:1, and 4Q580 1 1:9 attest this word.

For the adjective in Palmyrene, cf. *PAT* 0259 i.4 (*bzbnyʾ qdmyʾ* “in earlier times”)[35] and l. 9 (*nmwsʾ qdmyʾ* “the former law”)[36] and also in an architectural description;[37] it also functions adverbially *qdmy* “at first.”[38]

קדשׁ *qdš*; קדשׁ *qdš* /qodš/; קדישׁ *qdyš* /qaddīš/; מקדשׁ *mqdš* /maqdaš/

I. Etymology and Lexical Field. II. Usage of the Verb. III. Nouns. 1. “Holiness.” 2. “Sanctuary.” IV. Adjective “Holy.” 1. As an Attributive. 2. Substantivized “Holy One” (God and Especially Angels).

I. Etymology and Lexical Field. All branches of the Semitic languages know the root *qdš* “to be/become holy” and related nominal forms to designate the fundamental religious experience of the holy. In this context, “holiness” means the transcendent perfection of God; therefore, persons (human or angelic), things, places, and times that have a direct connection with God and witness to God’s presence are “holy.” As a concept in the phenomenology of religion, *qdš* first appears regularly in Aramaic from the Jewish theological literature of the book of Daniel and the documents from Qumran, and, in the inscriptions witnessing to pagan personal piety, from the Roman Imperial period. Yet, even if the root does not seem to belong typically to the register of the old royal inscriptions, the documents from the provincial administration, and the practical ethics of the sayings of Aḥiqar, an accidental instance from later Old Aramaic[1] demonstrates that, already in the first half of the first millennium B.C.E., it belonged to the Aramaic lexicon.

In contrast to Hebrew, the verb *qdš* in Aramaic is not in use in the intransitive G-stem “to be/become holy” and appears primarily as a transitive in the factitive D-stem “to make holy, to declare holy” (with a view to the action itself) or in the C-stem “to make holy, to sanctify” (with emphasis on the result).[2] In addition, the root also forms the two masculine nouns /qodš/[3] “holiness” and /maqdaš/ “sanctuary” as well as the very

frequent adjective /qaddīš/ “holy,” which can also be employed substantivally for “holy one.”

The concept of the holy has affinities with that of cultic and ethical purity,[4] as the parallelism of these lexemes in 4Q542 1 1:8.13 demonstrates (→ III.1 and IV.1), but goes beyond it. As an antonym, in relation to a phenomenology of religion approach, the root *ḥll* is first attested at Qumran, in the D-stem “to desecrate,”[5] whose usage here could stand partially under the influence of Hebrew, but need not itself be borrowed.[6] In relation to “holy” in the sociologically or theologically supported ecclesiological sense, the opposite is not “profane” but “heathen.” It is denoted by, among others, *ʿm* /ʿamm/ “people”[7] and in post-Christian Jewish literature the adjective *ʾrmy* /ʾaramāy/, literally “Aramaic.”[8]

No connection exists with the masculine Akkadian loanword /qodāš/ “earring”[9] that first appears in 11Q10 38:8 (Job 42:11) for Hebrew *nœzœm*, but continued in usage later.

II. Usage of the Verb. As a verb, *qdš* first occurs in the D- and perhaps C-stems with the meaning “to sanctify,” that is, for the transfer of the divine quality of holiness to a person or an object, at Qumran. Besides the translation of Lev. 16:19 in 4Q156 2:3, employing the D-stem of the Hebrew cognate in the instructions for the preparation of the altar for the atonement ritual, the same form occurs in a fragmentary context, but presumably also in relation to the cult in 11Q18 32:7 (new Jerusalem). Furthermore, a fragment of the Book of Giants[10] lacking virtually any context may contain an instance of the C-stem with *qš*]*yṭyn* “truthful ones” as object, but the reading is not entirely clear because of a scribal error. As in Hebrew (→ I), then, the D-stem may denote a one-time ritual action and the C-stem an enduring result.

In Palmyrene, too, the D-stem denotes the consecration of persons[11] and objects,[12] the C-stem of things.[13] Here, no semantic distinction is perceptible.

In later stages of the Aramaic language, the D-stem is more frequent and also forms a corresponding t-passive "to be sanctified."[14] Jewish Palestinian and Jewish Babylonian have adopted a few very specific meanings from the Hebrew.

III. Nouns.

1. "Holiness." Similarly, the earliest instances of the noun *qdš*[15] /qodš/ are at Qumran. Initially, it denotes the abstract quality "holiness," as in a list of positive characteristics as the foundation of the upright and holy life.[16] It finds regular usage, however, in a genitive construction with a preceding noun in the construct state as an attributive "of holiness" and, thus, like the adjective "holy" (→ IV.1): with a place,[17] a city,[18] possibly words,[19] or a tithe.[20] 4Q580 2:3 and 11Q18 25:1 have survived without sufficient context. Two other possible instances in defective spellings and fragmentary contexts are dubious and could also be assigned to the adjective (→ IV.2).[21]

The precise meaning of the plural of *qdš* in a Palmyrene dedicatory inscription is debated.[22] A building inscription from Hatra has the singular with a subsequent genitive attributive "of the gods" once,[23] perhaps to indicate a holy precinct.

In later diction, the usage of the word for the quality itself as an attributive in a genitive relationship and metonymically for holiness (in the plural instruments or sacrifices) continued.[24]

2. "Sanctuary." In contrast, *mqdš* /maqdaš/ "sanctuary," also attested beginning at Qumran, refers explicitly to the temple in Jerusalem.[25] Later, it appears in the same sense only rarely as an absolute, but mostly as part of the expression *byt mqdšʾ*, as in the dating formula "after the destruction of the temple" in the gravestones from Zoar,[26] and elsewhere in Jewish Palestinian,[27] in Jewish Babylonian,[28] and in Syriac.[29] The usage of the word may correspond to a perceptible tendency in postbiblical Judaism to restrict the status of holy place to Jerusalem and the temple mount;[30] yet, the adjective *qdyš* designating the cult building appears nonetheless in synagogue inscriptions (→ IV.2).

IV. Adjective "Holy." The adjective *qdyš* /qaddīš/ "holy," is the first form of this root to appear in Aramaic, and it remains the most frequent of all the forms. It characterizes mostly gods and angels, for whom holiness is an essential characteristic, as is already true in late Old Aramaic and in the book of Daniel; it rarely characterizes humans, and only occasionally places and objects that have a special relationship with the divine. In reference to persons, it often occurs substantivally in both the singular and the plural "holy one(s)." Additionally, later Aramaic attests an abstract noun "holiness" based on the adjective.[31]

1. As an Attributive. The prototypical usage of *qdyš* for gods as an attributive of the plural *ʾlhyn* first occurs in Daniel where it consistently appears in the mouths of pagans,[32] which finds a parallel in the expression *ʾ*[*ḥy*]*ʾ qdyšʾ* "the holy brothers" for two unnamed (apparently divine) beings in a Palmyrene dedicatory inscription.[33] Otherwise, it usually appears as a substantival denoting God or angelic beings (→ IV.2).

Sporadically it serves as an attributive of the name of God,[34] of angels (*mlʾkyʾ*),[35] of a holy mountain,[36] of a height (*rym*),[37] of the temple,[38] or of a person like the priest[39] Aaron and his descendants.[40] As a predicative, it appears along with *dkh* in the call "Be holy and pure!" in the Testament of Qahat.[41] A few other instances lack context.[42]

In Palestinian synagogue inscriptions from late antiquity, *qdyš* as an attributive of *qhlh* "community"[43] or *ḥbwrh* "confraternity"[44] designates the community of believers and, together with *ʾtr* "place," the synagogue itself.[45] Contrarily, one employs the noun *mqdš* "sanctuary" (→ III.2) for the sanctuary par excellence, the temple mount in Jerusalem. In the Christian realm, *qdyš* in conjunction with *ʾbhtʾ* "the fathers" serves as a title of the church fathers.[46]

2. Substantivized "Holy One" (God and Especially Angels). As a substantive, *qdyš* in the singular of plural "holy one(s)" often refers to

angels since they are members of the divine court and, thus, participate in God's holiness. Already in the oldest known instance, the designation *bʿl qdšn* "Overlord of the holy ones"[47] for the supreme god, who can elevate something (wisdom?) to himself in heaven, it serves as a word for subordinate divine beings.

Like so many individual aspects of the history of Syro-Palestinian religion, a differentiated understanding of the role of angels and demons in piety, and of the hierarchy of the heavenly pantheon in the first half of the first millennium B.C.E. remains incomprehensible. In early Judaism, mediator figures then underwent a marked up-valuation with an increasing awareness of the transcendence and uniqueness of God, but were no longer understood as independent gods. In the theological literature of the postexilic period, old images like that of the heavenly council received a new interpretation influenced by wisdom and apocalyptic, which also left traces in the book of Daniel and in the texts from Qumran.[48] Thus, the conceptions became further differentiated and *qdyš* in a substantival use functioned alongside → *ʿyr* "watcher" and → *mlʾk* "messenger" (less frequent in Aram.) as an extremely widespread term for "angel." Its usage accommodates the conviction that their participation in the divine perfection and their access to divine knowledge are the defining characteristics of the angels.

The suffix as in *qdyšwhy* "his holy ones"[49] or genitive constructions like *qdyšy šmyh* "the holy ones of heaven"[50] express their close connection with God. The rare intensified form *qdyšy qdyšyʾ* "the holy of holy ones,"[51] that is, "the extremely holy," also presumably refers to angels. Conversely, Qumran no longer describes God as the lord of all angelic powers with *bʿl qdšn* "Lord of the holy ones," as does *TADAE* C1.1:79 (see above), but with *qdyšʾ rbʾ* "the grand Holy One."[52]

The dual designation *ʿyr wqdyš* in the singular for one being[53] and in the plural *ʿyryn wqdyšyn* for a group[54] characterizes Daniel and the book of Enoch. The origin of this distinction remains obscure; synchronically,

however, because of the parallelism and the usage in reference to one angel, it is no longer possible to distinguish between two different classes. Qumran employs only the word *ʿyr* for the fallen angels who, according to Gen. 6:4 begot descendants with human women, while reserving *qdyš* exclusively for the angels who remained true to God. Thus, the addition *qdyš*, which occupies second position in all certain instances of the combination,[55] disambiguates the whole expression and makes clear that it involves good angels. If *qdšyʾ* in 4Q531 22:6 is a defective spelling of the adjective[56] and does not represent the noun (→ III.1), the contrast would be explicit for, then, a fallen angel would say that his opponent dwells "among the holy ones" (*bʿly dyny*).

Angels designated as *qdyš*(*yn*) function as messengers of heavenly commands (Dnl. 4:10,20), decide the fate of humans (4:14, with echoes of the concept of the divine council), and bear eschatological secrets.[57] Lamech believed that they may have sired his son Noah.[58]

In contrast, the referent of the expression *qaddīšē ʿœlyōnīn* "the holy ones of the Most High"[59] in the vision of the dawn of the eschatological kingdom of God in Dnl. 7:18,22,25,27[60] remains controversial. They obtain the eternal kingdom after their battle with the worldly powers. The background of the typical diction in Daniel and later at Qumran suggests interpreting it in relation to the angels, for that corresponds not only with the by far most frequent usage of the substantival adjective *qdyš* per se, but also with the various genitive or possessive constructions that connect it with God.[61] Then, the angels would be the heavenly protectors of the people of God and would fight for them against the powers of chaos hidden behind human empires.[62] In this context, it is difficult, however, to distinguish between the people of God itself[63] and its guardian angels; scholars often suggest a collective interpretation especially of the "son of man," who receives dominion here, as the people.[64] The association is, thus, so close that the two entities, the people and its angels, fuse with one another and the precise relationship may be intentionally left in suspense. The abbreviated expression in 7:21f. further heightens the ambiguity.

Otherwise, in pre-Christian Aramaic, *qdyš* refers only in exceptional cases to humans, as perhaps in *qdyšyn mn ʿmʾ* "holy ones of the people,"[65] although the broader context is unknown; such references are also sporadic in Jewish Palestinian[66] and Jewish Babylonian,[67] and in Syriac for monks.[68]

A pair of other passages cannot be more precisely analyzed because of insufficient contexts, but a form of *qdyš* is clearly legible in each case: 4Q201 1 4:7 (1 En. 9:1);[69] 4Q203 8:5;[70] 4Q245 2:5; 4Q531 19:5; 4Q534 1 2+2:17; 4Q536 2 1+3:2.

67. *DJBA*, 984a, alongside the frequent use for God and the angels already quite early.

68. *LexSyr*, 649b, also for angels.

69. According to *ATTM*, 237 a defectively spelled adj.

70. According to *ATTM*, 680, the third line from the end of G 4:5 may refer to Enoch, previously mentioned in the clause.

קום *qūm*; קים *qym*/qayām/; מקם *mqm* /maqām/; קומה *qwmh* /qawmā/; קים *qym* /qayyām/

I. Etymology, Lexical Field, and Constructions. II. G-stem “to Stand (Up).” 1. In the Full Sense. 2. Figuratively “to Rise,” “to Remain.” 3. As a Phase Verb. III. D-stem “to Decree.” IV. C-stem “to Erect.” V. Noun “Decree.” VI. Noun “Status, Position.” VII. Noun “Growth.” VIII. Adjective “Steady.”

I. Etymology, Lexical Field, and Constructions. In agreement with the other West Semitic languages, Aramaic employs the root *qūm* for “to stand.” In the G-stem, the verb covers a broad spectrum of different usages. Both with a stative nuance “to stand” and with a dynamic “to stand up,” it can denote literally an attitude or a movement, figuratively “to acquire, to appear,” also with an abstract subject, or “to endure, to remain,” and, diminished to a mere phase verb, for the ingressive action “to be about to” together with an additional full verb.

In contrast, the transitive D-stem[1] “to decree, to decide,” at first still quite rare in pre-Christian Aramaic, and the more frequent, also transitive C-stem “to stand up, to erect” with a concrete or an abstract object, with persons as object also “to install, to appoint,” have more specific meanings. Furthermore, both the D- and the C-stem manifest a corresponding t-passive “to be confirmed” or “to be reestablished,” and the C-stem also has in pre-Christian Aramaic an inner passive “to be established” whose functions the related t-stem assumes in the post-Christian period.[2]

Depending on the precise usage, *qūm* overlaps with other verbs or contrasts with them as an antonym: the literal meaning “to stand” corresponds with → *ytb* “to sit, to settle”; for “to begin” → *srī* is also used in the D-stem and its counterpart “to end,” etc. is the C-stem of → *sūp*. The

nuance “to decide, to determine” finds expression through → *gzr*; further, → *śīm* “to set, to place,”[3] later *zqp*, serves for “to establish,” with the counterparts → *mgr* “to topple” and → *ʿqr* “to eradicate,” especially in reference to statues in Old Aramaic also a verb that appears as *yhns*/*thns*[4] and may be traceable to the C-stem of *nūs* or *nss*.[5] The D-stem of → *mnī* and the C-stem of → *tqn*, sometimes also of → *šlṭ* denote “to install, to appoint” with → *šbq* in the sense of “to dismiss” as antonym. In contrast, Aramaic attests the root *ʿmd* “to go up to, to stand,” as in Hebrew, only in the noun *ʿmwd* /ʿammūd/ “pillar” (< /ʿamūd/)[6] and fuses the meaning of the verb with that of *qūm*.

Prepositional phrases can supplement the G-, D-, and C-stems depending on the nuance: in the G-stem “to stand up” *ʿm* “together with” with the nuance “to help” or *ʿl* “against” in the sense of “to accuse,” in the D-stem “to conclude (a contract)” together with *ʿm* “with” and in the C-stem “to install” *l*- “as” or “to appoint” with *ʿl* “over.”

Furthermore, the root underlies a variety of nominal forms, along with the masculine /qayām/ “decree, contract” and /maqām/ “status, position,” the rare feminine /qawmā/[7] “growth, stature,” and the rather frequent adjective /qayyām/ “steady.” Later West Aramaic also attests the feminine /maqāmā/ “matter, thing.”[8]

II. G-stem “to Stand (Up).” Earlier Old Aramaic already attests the G-stem of *qūm* “to stand” or “to stand up,” which remains very productive as a verb in everyday speech in later phases of Aramaic. The precise nuance depends on the nature of the subject and the construction. In relation to persons, the full sense with an ingressive action “to stand up” (→ II.1) cannot always be clearly distinguished from the usage as an auxiliary verb “to set about to, to prepare to.” As in Hebrew, the imperative can also function simply as an interjection “up!” (→ II.3).

1. In the Full Sense. In the royal inscriptions of the Old Aramaic era, *qūm* occurs with a divine subject with the preposition *ʿm* "he arose with me" designating the help that the respective king received from his dynastic deity in disputes with others. The formulation in the Aramaic inscription of Zakkur[9] has parallels in Samʾalian;[10] similarly, later in an Imperial Aramaic private letter, it denotes "to stand by."[11]

In contrast, the sayings of Aḥiqar employ the verb in the context of court ethics for a subordinate before the king, once in the warning against rising before the countenance of the ruler,[12] and again in the assertion that only someone with whom (*ʿmh*) the god El is could stand before (*qdm*) the king, which can be interpreted either as "to serve" or "to survive" (l. 91).[13]

Imperial Aramaic marriage contracts employ *qūm* in the literal sense for "to stand up" as part of a formula by which a spouse initiates divorce by standing and declaring (publicly): "Hereby I reject. . . ."[14] With things as subject, the participle means "standing" and refers in architectural descriptions to walls[15] and perhaps doors (→ VIII).[16]

Biblical Aramaic also has in the narratives of the book of Daniel instances of both the stative usage "to stand"[17] and of the fientic "to stand up, to arise" (Dnl. 3:3,24; 6:20).[18]

Correspondingly, Qumran uses *qūm* for "to stand"[19] and for "to stand up";[20] similarly later, e.g., "Get up!" (to gods) in H74.1 from Hatra or "to stand" of a statue in *PAT* 2786.2.

2. Figuratively "to Rise," "to Remain." The stative and fientic usages also underlie various idiomatic expressions that are identifiable in growing numbers beginning with the Achaemenid period. In a few of the private letters with affinities to colloquial speech, *qūm* occurs for "to remain" in contrast to → *nḥt* "to come down,"[21] once with the unusual *qdmh*[22] probably for "to stand in the way";[23] in conjunction with money and *byd* "in the hand,"[24] it functions as an auxiliary verb "to be, to be situated,"[25] in reference to a price and *ʿl* "to insist on."[26] With the meaning "to stand up"

and the preposition *ʿl* “against” in the legal diction of contracts, it is a term for “to accuse.”[27]

Biblical Aramaic manifests the meaning “to stand” for “to remain” with the eternal kingdom of God (Dnl. 2:44; along with the C-stem, → IV), “to stand up” in the sense of “to appear, to arise” for the sequence of transient human empires seen in visions (Dnl. 2:39 and 7:17,24).[28] The evidence at Qumran corresponds with both “to remain”[29] and “to arise, to appear,”[30] with *ʿl* also “to be responsible for.”[31]

These nuances remained current, such as, e.g., “to have stability” in H272.3 from Hatra, *qūm ʿl* “to be responsible for”[32] or *qūm brš* “to stand at the point” for “to have leadership.”[33]

3. As a Phase Verb. In the G-stem, however, *qūm* often serves merely to mark the ingressive action of the subsequent, mostly syndetically linked verb, and then, if it is not perceived as a mere filler,[34] has the meaning “to get to, to set about.” It is attested in this usage beginning with the Achaemenid period,[35] it cannot always be distinguished from cases in which it has the nuance “to appear” (→ II.2).[36] This usage continues in Biblical Aramaic (Ezr. 5:2)[37] and later.[38] Thus, the corresponding imperative can also be used as a mere interjection “Go!”[39]

Conversely, post-Christian East Aramaic developed from the participle of *qūm* “standing” a prefixed morpheme /qā-/[40] to mark first the process then the present per se.[41]

III. D-stem “to Decree.” In contrast to the broad spectrum of usage for the G-stem, the D-stem “to decree, to decide, to confirm” initially has juridical connotations and appears mostly in legal contexts. The first example, from the late Old Aramaic Asshur ostracon,[42] stands in a destroyed context, but may refer to a written guilty plea.[43] In Dnl. 6:8 it refers to a royal decree with *qym* “edit” (→ V) as object. Precisely the same formulation in 11Q10 35:6f. (Job 40:28) translates the Hebrew *krt bryt*.

Aramaic documents from the Dead Sea also employ the verb for "to confirm" with the subject of a contract as the object[44] or "to fulfill."[45] The t-passive seem to be used in the more general sense of "to be preserved, to remain,"[46] in *TADAE* D1.17:6 probably also corresponding to the active for "to be confirmed"; both remain productive.[47]

IV. C-stem "to Erect." The C-stem "to set up, to erect" is attested regularly with material objects, especially in relation to statues.[48] The verb already occurs several times in this usage in Samʾalian,[49] in Aramaic itself then since the Achaemenid era.[50] The report of the statue of King Nebuchadnezzar in Dnl. 3:1,2f.,5,7,12,14,18 follows the same usage, where the frequent leitmotif-like repetition of "that the king had erected" makes it emphatically clear that it involves a pure human product that deserves no veneration. This formulation also designates the donor of private dedicatory and honorific inscriptions in the memorial epigraphy of the Hellenistic-Roman epoch.[51] In such cases—sometimes in the same text—the more general verb → *ʿbd* (II.1) "to make" also occurs.[52]

With a person as object, the C-stem of *qūm* signifies figuratively "to establish, to install,"[53] regularly with the official nuance "to appoint"[54] and correspondingly of the dominion that God grants (Dnl. 2:21; 4:14; 5:21). With an abstract object, the verb represents "to establish (a kingdom)"[55] or "to issue (an edict)" (Dnl. 6:9,16). On a commercial ostracon from Idumea, it serves to mean "to confirm, to promise,"[56] in the private documents from Samaria with *ʾsr* as object "to enter into a contractual obligation," "to make a contract,"[57] a function the D-stem fulfills otherwise (→ III).

Regarding the singular formulation "to establish a joyous name" in the T. Levi from Qumran[58] → *ḥdwh* IV.2. In 11Q10 25:1 (Job 34:24), the verb translates the C-stem of *ʿmd*, in 30:4 (38:6) *yrī* "to cast," here "to lay the foundation stone."

The inner passive appears in Dnl. 7:4 in the fientic sense of "to become established," in 7:5 in the resultative sense of "to be established," the Ct-stem in 1QapGen 20:29 "to be reestablished" in reference to the healing of an illness produced by God.[59]

V. Noun "Decree." The noun *qym* /qayām/ in the context of private law denotes "obligation,"[60] in a royal edict, "decree" (Dnl. 6:8,16, in 6:8 as the object of *qūm* in the D-stem, → III), in religious speech "covenant."[61] Two fragments from Qumran[62] permit no precise conclusions. Syriac utilizes it for intellectual status, among others, and like the corresponding feminine, also for the resurrection from the dead.[63]

VI. Noun "Status, Position." Of the various other nominal forms of this root, the masculine *mqm* /maqām/ "stance, position" appears in older Aramaic only in texts from the Dead Sea. The Book of Giants seems to use it with the geographical meaning *rwm mqm* "height of the place,"[64] yet with no context; in T. Levi it refers to a lifestyle equated with *šqr wḥms* "lie and violence."[65] In a Nabatean confirmation, *bmqm* functions for "in the presence of."[66]

VII. Noun "Growth." The rare feminine *qwmh* /qawmā/ (> /qōmā/) "stature" first occurs in a fragmentary description of Noah from Qumran,[67] and later in West[68] and East Aramaic.[69] In addition, Syriac attests the masculine "stance, standing, resurrection," etc.[70]

VIII. Adjective "Steady." Finally, the adjective *qym* /qayyām/ "enduring" also belongs to *qūm*. With *lʿlmyn* "forever,"[71] it serves in Dnl. 6:27 as a predicate of God,[72] in Dnl. 4:23 for Nebuchadnezzar's empire, which is fated to endure only if the king acknowledges God's superior power.[73]

In legal diction, in contrast, it connotes "valid, binding"[74] and corresponds to the spectrum of the verb in the D-stem (→ III). Similarly, in reference to sums of money, it represents "established, binding."[75]

According to K. Beyer,[76] *qym* in *TADAE* A4.7:10 involves the adjective for the nuance "indestructible" in reference to doors, but the form is generally understood elsewhere as a G-stem participle "standing" (→ II.1).

S. Amsler, "קום *qûm* to stand up," *TLOT*, 1136-41; H.-J. Fabry, "*qwm*," *ThWQ*, III, 509-16; J. Gamberoni, "קום *qûm*," *TDOT*, XII, 589-612; H. Gzella, *Tempus, Aspekt und Modalität im Reichsaramäischen*. *VOK* 48 (2004).

1. Which in contrast to Canaanite, still forms hollow roots other than → *rīm* on the pattern of verbs with three consonants, see *ATTM*, 488.

2. *ATTM*, 152.

3. → *nṣb* "to plant" is more specific.

קטל *qṭl*; קטל *qṭl* /qaṭl/

I. Etymology, Forms, Lexical Field, and Grammatical Constructions. II. G-stem “to Kill.” III. D-stem “to Kill” (Plural). IV. Noun “Execution.”

I. Etymology, Forms, Lexical Field, and Grammatical Constructions. Aramaic *qṭl* “to kill” may have arisen secondarily from an older **qtl*, which conforms to the Arabic, Old South Arabian, and Classical Ethiopic form of the root and survives in the earliest Aramaic inscriptions from Tell Dan[1] and Sefire.[2] In this case, *qṭl* results from an assimilation /t/ > /ṭ/ under the influence of the /q/.[3] Apart from sporadic, again dissimilated forms such as one instance of *kṭl* in later Old Aramaic,[4] this form of the root established itself in the Imperial Aramaic literary tradition, but appears in Mandean because of the dissimilation of two “emphatic” consonants regular there as *gṭl*.[5] The distribution of cognates indicates a common Central or West Semitic verb.[6] Meanwhile, despite its use as a typical paradigmatic verb in instruction since the grammar by J. A. Danz,[7] it is extremely rare in Hebrew (Ps. 139:19; Job 13:15; 24:24) in contrast to *hrg*, which also occurs at least in Samʾalian,[8] and is, consequently, often regarded as an Aramaic loanword.[9]

As a rule, *qṭl* occurs in the G-stem, but occasionally appears in the D-stem with a probably old plural nuance “to kill many,” but otherwise exactly synonymous.[10] The verb itself does not specify the nature of the killing so that it overlaps the C-stem of → *mūt*, in the G-stem “to die,” on the one hand, and also occurs in the same context as the C-stem of → *ʾbd* “to destroy,” on the other.[11] The antonym is the D-stem of → *ḥyī* “to leave

alive." Furthermore, the G- and D-stems each form their own t-passives "to be killed" and pre-Christian Aramaic also attests the inner passive of the G-stem. It has mostly a resultative nuance,[12] while the t-passive emphasizes the action.[13]

Mostly, a human or divine person appears as the subject; in accordance with the semantics of the verb, the object is animate and is often introduced by an object particle.[14] For atelic circumstances in relation to partially affected objects, *b*- "to kill among" also occurs.[15]

The masculine noun /qaṭl/[16] "execution" appears less often than the verb. Yet, both active and passive participles of the G-stem can function as substantives for "killer" (/qāṭel/) and "killed" (/qaṭīl/; → II).[17]

II. G-stem "to Kill." As a rule, in older Aramaic *qṭl*[18] denotes the killing of enemies in a battle or on the command of superiors. The first use naturally appears in reports of royal deeds like the old Aramaic Tell Dan stele[19] and then very often in the depictions of the military campaigns of King Darius in the Imperial Aramaic version of the Behistun inscription,[20] often in contrast to captive survivors (*ʾḥd ḥyn*)[21] and sometimes also as a substantival passive participle "killed";[22] furthermore, in the context of the report concerning a rebellion,[23] but the context is incomplete. This usage continues in the reports about the raids of the King of Elam in 1QapGen.[24] The Old Aramaic treaties from Sefire employ the verb in agreements prohibiting a coup d'état; there, it refers to the treaty partner and his legal successor whose murder is explicitly forbidden.[25]

Instead, *qṭl* in the genre of court tales designates execution ordered or actually performed on royal command. The relative frequency of this usage gives an impression of perceptions of the shadow side of service at the center of power and the continuous danger of intrigues and caprice. This is true of the framework narratives of Aḥiqar,[26] and equally so for the book of Daniel (Dnl. 2:13; 5:19)[27] and the threat posed Abraham by pharaoh's sheriffs.[28] The context of *TADAE* C1.2:4,23, another court tale set in Egypt, is unclear.

In addition, in religious speech or in narratives, *qṭl* can also appear with divine or demonic beings as subjects. An Old Aramaic grave inscription from Nērab employs it in this sense in the curse against a potential grave robber.[29] It appears here in parallel with the immediately following C-stem of *ʾbd* with *zrʿk* "your descendants" as object. In contrast, it refers to an undeserved death in the story of the demon in Tobit, who murdered the seven fiancés of Tobias's future bride.[30]

In 4Q157 1 2:7 (Job 5:2), as one would expect, *qṭl* translates the Hebrew *hrg* as part of a proverbial expression, 11Q10 10:3 (Job 26:12), less picturesquely, an original *mḥṣ* "to shatter" with God as subject. Additional passages from Qumran do not preserve sufficient context.[31]

The passive forms often appear in Imperial Aramaic, in the book of Daniel, and at Qumran in the context of executions on royal orders; for the inner passive, cf. *TADAE* C1.1:71; Dnl. 5:30 and 4Q550 6+6a-c:7 and for the t-passive, which first assumes the functions of the imperfect of the inner passive and constitutes the only passive in post-Christian times, *TADAE* C1.1:62; Dnl. 2:13 and, to be reconstructed with relative certainty, 4Q550 7+7a:2.[32] The inner passive twice appears negated and is resultative in the sense of "to have survived."[33] The realm of Jewish religion and Jewish religious literature, however, already in pre-Christian times, attests a couple of instances of the inner passive of *qṭl* for the destruction of God's enemies.[34] The contexts of the inner passive in 4Q203 5:3; 4Q558 72:1; 103:1 and of the Gt-stem in 4Q531 23:3 from Qumran are unclear.

III. D-stem "to Kill" (Plural). While the G-stem of *qṭl* can refer to the killing of a few and, as evidenced by morphologically unequivocal forms such as the participles in 1QapGen 22:4,8, also to the killing of many,[35] the D-stem of *qṭl* in all of the certain cases, finds only plural usage: Dnl. 2:14 of the planned bloodbath among the sages of Babylon,[36] 3:22 of the darting flames of the superheated fiery furnace that lapped at the executioner's assistants (with a rare inanimate subject), and 4Q201 1 3:19 (1 En. 7:4) for

the mass death at the destruction (*ḥbl*) of the earth. Jewish Palestinian attests the same distribution.[37]

IV. Noun "Execution." Older Aramaic attests the noun *qṭl* /qaṭl/ "killing" with certainty only in *TADAE* C1.1:46 for "execution," but it remained productive.[38]

קטר *qṭr*; קטר *qṭr* /qeṭr/

I. Etymology. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran, etc. V. Later Aramaic.

I. Etymology. The etymology of Aramaic *qṭr* "to bind" is complicated. Akkadian *kaṣāru* "to knot, to connect, to gather,"[1] Ugaritic *qṣr* "ankle bone,"[2] Hebrew *qṣr* "to harvest" (Phoenician as a noun "harvest"),[3] and Arabic *qaṭara* in the II stem "to link camels to one another"[4] suggest tracing the Aramaic form to **qθ̣r*.[5] According to another suggestion, *qṭr* arose from **qθr* with assimilation of /θ/ to /q/,[6] which takes account of Hebrew *qšr* "to bind" and may be confirmed by the Aramaic *qtr* as the counterpart of Hebrew *qšr* in Pap. Yadin 43:7 (→ IV). A possible Ugaritic *qšr* "to bind" and Jewish Palestinian *qyšwr* "ligation" do not contradict this etymology: the meaning of the first is uncertain[7] and the second may have been borrowed from Hebrew.[8] Sometimes, /q/ dissimilates to /k/,[9] in *qtr* "receipt,"[10] if the same word is involved, the assimilation */θ/ > /ṭ/ would be lacking.[11] According to Beyer,[12] around the ninth century B.C.E., old */θ/ and */θ̣/ shifted to /t/ and /ṭ/ in Aramaic. It is conceivable that the two roots **qθr* and **qθ̣r* intermingled in Old Aramaic times via */qt/ > /qṭ/ and */qṭ/ > /qt/; in Aramaic, *qṭr* prevailed.

The two roots **qθ̣r* and **qθr* display a broad spectrum of meaning: "to bind, to know," "to join together"; with regard to the noun, Aramaic /qeṭr/

(> /qeṭar/), “band, knot,” “bundle,” “association,” “puzzle,” “binding,” “knotted document/obligatory,” “penalty.”

II. Old and Imperial Aramaic. Old and Imperial Aramaic yield no specimens other than the noun “knot” in the ban formula in the exorcism of Uruk.[13]

III. Biblical Aramaic. Biblical Aramaic attests the noun *qṭr* “knot, link” three times, always with → *šrī* “to loosen”: twice in the list of Daniel’s abilities as *mšrʾ qṭryn* “to solve difficult tasks” or “to loosen (magical) bonds” (5:12,16), along with the interpretation of dreams and puzzles,[14] and once in the phrase *qṭry ḥrṣh mštryn* “his hip-joints became powerless/shook” (5:6) in Belshazzar’s reaction to the writing on the wall.[15]

IV. Qumran, etc. At Qumran, the G-stem of the verb appears twice in 11Q10 32:9; 35:8 (Job 39:10; 40:29), both for Hebrew *qšr* “to bind” and in a rhetorical question “can you bind?” The *qatl*- or *qitl*-noun *qtr*[16] appears in a rent receipt from the Dead Sea[17] for “receipt” (from “obligation” or “knotted document”) with the predicate *yhwʾ qym* “will be valid,”[18] like *qšr* in Hebrew.[19] On knots and broken canes as receipts, see Naveh and Shaked.

V. Later Aramaic. Jewish Palestinian,[20] Jewish Babylonian,[21] Syriac,[22] and Mandean[23] attest the verb “to tie” and the noun “knot, association, band.”[24] In magical texts, the noun can mean the knots, the bindings, the fetters (of a spell), the verb “to bind (through magic),” but also in the counterspell “to bind (the bound)”’ *qṭr* stands as a synonym for → *ʾsr* and *ḥtm*. The loosening of knots is expressed mostly with → *šrī* “to loosen” or → *nśī* “to take” (→ II).[25]

קל *ql* /qāl/

I. Etymology and Lexical Field. II. “Voice.” III. “Sound.”

I. Etymology and Lexical Field. With the masculine *ql* /qāl/ “voice, sound,” Aramaic and other West Semitic languages designate either the sound that living beings produce[1] or other noises such as the sound of instruments. The etymological relationship to the overall rare Semitic verbal root *qūl* “to say, to speak,” as often in Arabic, suggests an original usage for human or animal sounds. It does not, however, distinguish between articulated sounds, like speech or song, and others, or between the sometimes subjective difference between sonority and noise. For sounds perceived melismatically or rhythmically, such as song and music, the noun /zamār/[2] serves instead, for speech → *mll* and *ʾmr*, for a call or unarticulated cry /zaʿaqā/,[3] rarely the C-stem of *klī*,[4] for comprehensible calls or recitations the verb → *qrī*, for “to rejoice” *dūṣ*,[5] and for “to make noise” *hmī*.[6] The root *ybb* designates horn and trumpet blasts.[7] Old Aramaic already attests the noun with both nuances, “voice” and “sound, noise.” It serves more often as the object of → *šmʿ* “to hear,” sometimes as the subject of → *slq* “to arise” or → *npl* “to fall” (Dnl. 4:28) indicating the direction from which a sound comes; it also occurs in the adverbial expression *bql*.

II. “Voice.” The earliest specimen of *ql* “voice” occurs in a curse formula from the Old Aramaic Bukan inscription:[8] in the land of the one upon whom the curse falls, the weather god Hadad should not raise his voice for seven years,[9] i.e., the absence of storms should cause drought. The voice of a god as a designation for “thunder” is obvious and was also

widespread in the near cultural surroundings of Syria-Palestine; many instances are known from Ugaritic[10] as well as from Hebrew, one of which, Job 40:5, Aramaic preserved in translation in 11Q10 34:5.[11] As a term for articulated divine speech, it then occurs in reference to the bodiless voice of Dnl. 4:28 that announces the heavenly verdict to Nebuchadnezzar and the message to Noah in 1QapGen 6:15.[12]

In relation to human speech, *ql* may first occur in a saying of Aḥiqar for the "high" (*gbh*), i.e., in context, "august" or "powerful" voice of the king,[13] then in Dnl. 6:21 for the cry (*zʿq*) of the king *bql ʿṣyb* "with a sorrowful voice,"[14] as he inquired after Daniel. For a "noise, cry" that arose (*slq*) to heaven, it occurs in 4Q201 1 4:5 par. 4Q202 1 3:6 (1 En. 8:4) and 4Q201 1 4:9 (1 En. 9:2); similarly, but with no further contexts, in 4Q530 2 2+6-12:23 and 4Q531 14:3.[15] Entirely isolated are 4Q531 29:2 and 4Q561 1 2:1. 11Q10 14:4 (Job 29:10, syntax debated) renders the Hebrew cognate; 38:2 reflects a different vorlage than Job 42:9 MT.

III. "Sound." In addition, *ql* can designate various sounds made by inanimate things. It is attested in reference to millstones (*rḥyn*), which are to stand still because of a famine, in a curse formula,[16] otherwise often for the sound of instruments: in *KAI* 222 A 29 also in a curse in reference to the absence of the sound of the harp (*ql knr*) as a sign of diminishing joy in life in the land of the oath-breaker (cf. Ezk. 26:13; Rev. 18:22) and in Dnl. 3:5,7,10,15 in relation to the festive dedication of the statue of Nebuchadnezzar.[17] In Dnl. 7:11, it denotes the "sound of words." 11Q10 22:2 (Job 33:8; words) and 33:5 (Job 39:24) correspond to MT.

קצץ *qṣṣ*; קצי *qṣī*; קצת *qṣt* /qaṣāt/; קצה *qṣh* /qaṣā̆/; קץ *qṣ* /qeṣṣ/

I. Etymology and Forms. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran, etc. V. Later.

I. Etymology and Forms. The verbal root occurs in some languages as *qṣṣ* "to cut off, to cut down"[1] and as *qṣī*/*ū* "to divide, to separate."[2] The feminine /qaṣāt/ "part" derives from the second form, which led, through the dissimilation of /q/ before /ṣ/, to the by-form *kṣt* in a few Imperial Aramaic documents.[3] Aramaic also forms the plural construct *qṣwy* in the Hebrew expression *qṣwy ʾrṣ* "the ends of the earth" (Isa. 26:15; Ps.48:11; 65:6) and the plural absolute and construct *qṣw*(*w*)*t* "the ends" (Ps. 65:9; Ex. 37:8; 39:4; with article Ex. 38:5), similarly at Qumran.[4]

It is unclear whether the expression (*mn*) *qṣt* means "(from a) part (of)" or "(something) from (a large number)," and whether one may assume a semantic spectrum from "part, piece" and "end, extreme" to "all, total."[5] Alternatively, one thinks of a semantic path from "end, extreme, margin" to "totality." For "end" in the spatial sense is the plural of *qṣh* /qaṣā̆/, "end of the world" is *qṣ* /qeṣṣ/ (> /qeṣ/); → *sūp*.

II. Old and Imperial Aramaic. The cuneiform incantation text from Uruk[6] employs *qṣt*/*kṣt* without preposition in the meaning "fragment." Otherwise, Imperial Aramaic uses the preposition *b*- or a preceding or following *mn*: *bkṣt* "in part/partially" or "in all" in Segal, no. 18.5[7] and *bkṣt šnt* 6 "that belongs to part of year 6" in the tax calculation *TADAE* C3.11:9; in contrast, *mn qṣt* "from/to (part)" appears in relation to wool to be sent in

TADAE A2.2:7 (letter) and a claim to a portion of silver in B4.5:3 (certificate of debt) and 4.6:4 (marriage contract), without context in D4.15b+c:3 (*kṣt*); and, finally, *qṣt mn* "a (part of)" occurs in relation to a granary in *TADAE* A4.5:4f. (petition) and in reference to a private house in B3.10:3 (authorization: described in the subsequent text as a free-standing house with its dimensions and boundaries).

III. Biblical Aramaic. In Biblical Aramaic, the verb *qṣṣ* appears in the D-stem "to cut down" regarding the tree in Nebuchadnezzar's dream vision (Dnl. 4:11), the noun *qṣt* in the prepositional phrase *lqṣt* as a temporal term "at the end of" with months (Dnl. 4:26) and days (4:31). Furthermore, *mn qṣt* "a part of" appears in the interpretation of the mixed iron and clay feet of the statue in Dnl. 2 in "a part of the kingdom will be strong" alongside "a part of it [only the suffixed preposition *mnh*] will be weak" (2:42). Yet K. Koch[8] understands *mn qṣt* as "predominantly." Hebrew adopts the whole expression as *mqṣt*[9] "part, end" (Dnl. 1:2,5,15; Neh. 7:69) and can again provide it with the preposition *l*- "after" (Dnl. 1:18).

IV. Qumran, etc. Qumran attests the verb *qṣṣ* in 1QapGen 13:9,10,11 and 19:15f. in dream visions of trees, as in Dnl. 4 (→ III), and in the t-passive in 4Q558 37 2:3 (of holes, but with no further context). The form *qṣī* "to separate" appears in nV 6:12.[10]

The noun *qṣt*, apart from *kl qṣt* "every end/part" (4Q573 1:8), which has no context, appears only in the singular construct. In contrast, the plural construct *qṣw*[*t*] *ʾrʿ* in "the ends of the earth" (1QapGen 7:19;[11] 4Q201 1 1:7 [1 En. 1:5, partially emend.]) more likely derives from the noun *qṣh* /qaṣǣ/, as does the masculine plural construct *qṣwy* in 11Q10 13:5 (Job 28:24) and 4Q541 9 1:4.

Otherwise, along with *bqṣt* "in a part"[12] only *mn qṣt* "(from) a part of" occurs: 1QapGen 14:16f. (part of a tree) and without context in 1:10;

4Q537 12 2:2 (part of a sacrifice); 4Q541 9 2:6 (a part of sons); and in the Nabatean deed of gift nV 7:19,23,25,29,58,62,67[13] for parts of the pertinent gift.

The noun *qṣ* "end (of the world), last day" occurs often in Enoch: 4Q204 1 5:5 (1 En. 10:14); 4Q206 1 22:2 (1 En. 22:4); 4Q212 1 4:23 (1 En. 91:15); always together with *dynʾ rbʾ* "the great court";[14] without context in 4Q558 28:1 (fragments of prophetic histories).

V. Later. As an attributive in Palmyrene memorial inscriptions, the determined state of *qṣtʾ* probably means "part, division, elite": *PAT* 2730.4 and 2810.3, both with a preceding *brš* "at the head (of the division)" and a subsequent *bʾsṭrṭgwt* "under the command of."

Jewish Aramaic languages, as in Hebrew, often choose *mqṣt* instead of *mn qṣt*, Babylonian Talmudic always does so,[15] sometimes for "part" in contrast to *kwl* "all."[16] Regarding *qṣ* "end," *qṣī* "to cut into pieces," and *qṣṣ* "to cut off" in Jewish Palestinian, see *DJPA*, 500f.; regarding *qṣī* and *qṣṣ* in Jewish Babylonian, *DJBA*, 1033f.

The verb *qṣṣ* appears in Syriac meaning "to cut off" and *qṣī* "to break (bread)"; the noun *qeṣṣā* and the corresponding feminine mean "end," with and without the preposition *b-* (sometimes *mn*) also "in the end, because"; *qṣāṯā* denotes "chunk, portion."[17]

קרא/קרי *qrʾ/qrī*

I. Etymology and Overview. II. Older Aramaic and Samʾalian. III. Biblical Aramaic. IV. Qumran.

I. Etymology and Overview. Four of the five major branches of the Semitic language group attest the common Semitic root *qrʾ* well, only the most southern branch constitutes an exception. Akkadian *qerû*(*m*), Assyrian *qarāʾu*(*m*)[1] means 1. "to call, to invite, to summon" and 2. "to lead away," often as a euphemism for "to withdraw (in death)."[2] In Ugaritic it also means "to call out, to invite, to send for (gods),"[3] in Phoenician primarily "to call, to call to" and "to read";[4] regarding Hebrew, cf. the extensive treatment in *TDOT*, XIII, 109-35. In Arabic usage, the semantic field of "reading" dominates with developments toward "to study"[5] on the one hand, and toward "to read aloud, to declaim, to recite" on the other; the proper meaning of *qurʾān* "Quran" is "recitation." In addition, older Arabic has the well-attested meaning "to gather, to draw together," which Lane[6] cites as the basic meaning in Arabic. If one considers the semantic development of German "lesen" and Latin *legere*, it may cast light on the basic meaning of the root in Semitic, as it often shines through in Arabic where influences of other Semitic languages can be excluded. For Old South Arabian, cf. the few passages and the rather varied approaches to its meaning in Biella[7] ("to summon/to send for") and *BGMR*[8] ("to command," with a question mark); some discuss the possibility of an St-stem (reflexive of the causative). The root does not appear at all in Ethiopic if one disregards later borrowings from the Arabic.

In Aramaic,[9] the basic meaning of the peal is "to speak aloud, to call," with further differentiation on the one hand toward "to summon, to invite;

to invoke; to appoint," almost always in reference to persons or gods, and, on the other, in the direction of "to read, to read aloud, to recite," while one should certainly conceive of "reading" in ancient practice as reading aloud. The post-Imperial Aramaic literary languages[10] confirm this approach; some of the later dialects develop the spectrum of meaning even further,[11] in Mandaic as far as "to create";[12] regarding Samaritan, cf. Tal.[13] A technical juridical meaning becomes apparent in *TADAE* B7.2:7f.,10, where in the construction with *l* + a personal designation and *ʿl* + a divine name, the verb can even be translated "to swear to someone by god"—a development, perhaps, of the meaning "to declare aloud, i.e., publicly." In a few Aramaic dialects,[14] the verb also denotes animal sounds, especially the crowing of a rooster.

Only forms of the peal appear in early Aramaic, in the OT and at Qumran also the hithpaal. The final *aleph* had already disappeared very early on,[15] soon thereafter the root was understood as a III-*ī* and became interchangeable with the older root *qrī*. Already in the earliest instance from the periphery of Aramaic,[16] it is no longer written; its l. 13 has *qrny*.[17] The Imperial Aramaic texts no longer attest this root beginning in the fifth century B.C.E.,[18] but it is spelled historically long thereafter.

II. Older Aramaic and Samʾalian. There are nine certain instances of the root in Imperial Aramaic, with the exception of the Asshur ostracon (seventh century B.C.E.) all from fifth/fourth century Egypt. The verb only occurs in the peal, five times in the imperfect, once in the imperative, and once clearly in the perfect. The remaining two instances[19] manifest the form *qrʾn* with no clear contexts so that the question arises as to whether they are first-person plural perfects or plural participles and the interpretation remains dubious. The first-person singular imperfect *ʾqrʾ* in *TADAE* D7.43:10[20] and the negated third-person singular imperfect *lyqrʾ* in the cave inscription D23.1.13:1[21] do not contribute to the more precise determination of the meaning because of destroyed contexts. The Samʾalian Hadad inscription mentioned above[22] has the verb in the third-person

singular perfect (or imperfect) already mentioned with the first-person singular suffix in the meaning “to call, to summon” (+ accusative someone + *l* + inf.): “Hadad . . . called me to build.” The remaining occurrences exhibit the following meanings:

(1) “to summon” (+ acc. someone): *KAI* 233.12, imperative *qrʾ*: “So, call them here and ask them” (direct speech follows).

(2) “to name” (+ *l* + acc. something): *TADAE* C1.1:165, third-person plural imperfect *yqrʾwn*: “A lion (*ʾryh*) is not in the sea, therefore one names a tidal wave (?) a lion (*lbʾ*).”

(3) “to declare, to swear” (+ *l* someone + *ʿl* by): *TADAE* B7.2 (obligation for a juristic declaration to repudiate an accusation), l. 7, first-person singular imperrfect *ʾrqʾ*: “I, *Mlkyh*, will swear to you by *Ḥrmbytʾl* (divine name) among 4 . . . (unclear title) as follows:” and l. 10, first-person singular perfect in the conditional clause *qryt*:[23] “And if I do not swear to you by these 4 . . .” (the remainder is missing).

(4) “to read” (+ acc. something): *TADAE* D22.51 (the reading is not entirely certain), third-person singular imperfect *yqrʾ*: “blessed be the one who reads this inscription.”

III. Biblical Aramaic. The OT attests the root nine times, eight in the peal (including two passives), and once in the hithpaal. The usage divides—sometimes involving repetitions or in parallel construction—into the meaning “to call” and “to read” as follows: (1) “to call”: Dnl. 3:4; 4:11; 5:7;[24] Dnl. 5:12;[25] (2) “to read”: Dnl. 5:7f.,15f.,17;[26] Ezr. 4:18,23.[27]

IV. Qumran. Qumran attests the root well, *DSSConc* 919 alone has fifty-one entries (s.v. *qrh*), although many readings are uncertain, emended, or without context. The roughly forty remaining—forms of the peal and of the hithpaal—divide again into the basic meaning “to call, to name” on the one hand, and “to read” on the other (the following lists all constructions with the most importance occurrences):

(1) “to call” (+ presumably direct speech): 1QapGen 19:25 *qryt*: “and I called before them. . . .”

(2) “to call, to name” (+ acc. the name): 1QapGen 14:12 ithpaal third-person singular imperfect *ytqrh* “and in (the midst) of his descendants, your name will be called.”

(3) “to name, to designate as” (either + two acc. or as above in *TADAE* C1.1:165 + *l* + acc., including once elliptically with only + acc.): (+ acc.): participle plural absolute masculine *qryn*: 4Q209 (astronomic text) 23:5 “and therefore one names (it) west.” Entirely parallel to this usage are 4Q209 23:3 and 4Q210 1 2:15 “and one names the south, south”; (+ two acc.): *yqrwnh* /yeqrōnnéh/[28] third-person plural imperfect + third-person masculine singular suffix: 4Q246 1 2:1 “and they will call him son of the Most High.” The corresponding passive appears in 4Q246 1 1:9 with ithpaal *ytqrʾ* paralleling *ytknh* (ithpaal *knī*) “to designate”: “he will be called the great [king] and he will be designated by his name.”

(4) “to summon, to invite” (+ *l* someone): third-person singular perfect *qrʾ*: 1QapGen 20:19f. “and he sent (a command) and had all the sages of Egypt summoned [. . .] and summoned me”; similarly 4Q545 1a 1:5,8,10; first-person singular perfect *qryt*: 1QapGen 12:16 “I summoned my sons and the sons of my sons”; 21:21 “And I sent (a message) and invited”; imperative *qry*: 4Q545 1a 1:9 “Summon me, my son, the. . . .” The substantival passive participle /qārī(ʾ)/ “summoned one” seems to appear in the plural construct *qryʾy* (subsequent word is illegible) in 4Q245:[29] “Thereafter, those of the nations who have been called will assemble.”

(5) “to call to” (+ *bšm* a god): first-person singular perfect *qryt*: 1QapGen 21:2 “and there I called to the name of the Lord of eternity”: 19:7 “and there I called to God. . . .”

(6) “to read, to read aloud” (+ acc. something): imperative *qryʾ*: 4Q537 1+2+3:3 (probably related to 1QapGen) “And now, take the tablets and read

everything!”; (+ *b* in, from a writing) participle plural absolute masculine *qryn*: 4Q550 7+7a:5 “they will appear after *Bgsr*[*w*] (PN) reading (aloud) from this document”; (+ *l* someone) infinitive in 11Q18 19:5 “he began to read aloud to me from this document.”

קרב *qrb*; קרב *qrb* /qarāb/; קרבן *qrbn* /qorbān/; קריב *qryb* /qarrīb/

I. Etymology, Lexical Field, and Constructions. II. G-stem “to Draw Near.” III. D-stem “to Bring.” IV. C-stem. V. Noun “Battle, War.” VI. Noun “Sacrifice.” VII. Adjective “Near.”

I. Etymology, Lexical Field, and Constructions. The verbal and nominal forms of the root *qrb*, which differ in the individual languages, all have a common Semitic etymology. In Aramaic, very much as in Hebrew, the intransitive G-stem “to draw near, be near” appears along with a D- and C-stem “to bring here.” Meanwhile, the contrast between immediate proximity expressed by the D-stem and relative proximity by the C-stem,[1] more clearly demonstrated in Hebrew, is less perceptible in Aramaic since “to present, to sacrifice” appears in otherwise identical contexts as the D-stem (Ezr. 7:17) and, as in Hebrew, the C-stem (Ezr. 6:10,17); the same is true of “to bring something before someone.”[2] In the meaning “to bring,” the verb overlaps with the C-stem of *ybl* and → *ʾtī*, in the meaning “to offer, to sacrifice” with that of → *slq* III.2, in the specific meaning “to sacrifice” with the G-stem of → *dbḥ* II.

Related to the verb are the adjective /qarrīb/ near” (substantivally “relative”) and the masculine noun /qorbān/ “sacrificial offering,”[3] which all have a corresponding counterpart in Hebrew. Typically Aramaic is the masculine /qarāb/ “battle,” which exists in Hebrew only as a loanword.[4] Otherwise, for this concept, Hebrew employs *milḥāmā* from the root *lḥm* “to struggle, to fight,” which is not productive in Aramaic outside of *KAI* 320.2; instead, *pgš* “to fight” and /pagš/ “battle” appear later.[5] In older

Aramaic, → *ʿbd qrb* denotes "to fight" (→ V). "To be far" → *rḥq* serves as an antonym for *qrb* in its basic meaning "to be near."

As a verb of spatial relation, *qrb* gains added precision in usage through prepositional supplements: the intransitive G-stem "to draw near" with *l-* in reference to a place (e.g., Dnl. 3:26; 6:21) and *ʿl* in reference to a person,[6] less often with *b-* in the sense of "to touch";[7] the transitive D- and C-stems "to bring near, to sacrifice" with *l-* for the indirect object (e.g., Ezr. 6:10) and/or *ʿl* "on" (Ezr. 7: 17) for the place,[8] with the nuance "to bring before" *ʿl* "before,"[9] in courtly style also *qdm*.[10]

II. G-stem "to Draw Near." Late Old Aramaic first attests the verb *qrb* in the G-stem, regularly with the dynamic nuance "to draw near," while the adjective serves to denote the static "be near" (→ VII). Its usage together with another verb of motion such as *ʾzl*[11] in an animal fable of Aḥiqar[12] also makes this clear. Another saying juxtaposes *qrb ʿly* "Come (closer) to me!" with the antonym *r*[*ḥ*]*q mny* "Get away from me!"[13]

Furthermore, *qrb ʿly* also appears in the Imperial Aramaic narrative frame,[14] although the G-stem is otherwise rare in Imperial Aramaic: the fragment *TADAE* D5.41z:2 preserves no context and both reading and analysis of the likewise fragmentary instances in Segal, 12.2 and 67a.1[15] are unclear. It occurs with a general meaning in Naveh and Shaked, A7,1; B4,2.

Biblical Aramaic employs *qrb* twice absolutely with the nuance "to appear, to turn up."[16] In both passages, it introduces slander of the respective main figure(s) by their enemies at court. With a prepositional expression of direction, it functions instead to designate the location[17] or the person[18] whom the subject approaches.

In addition to the known usages, the texts from Qumran contain *qrb* absolutely to mean "to appear" at the beginning of a narrative unit,[19]

perhaps as an imperative “Come (closer), approach!,”[20] with *ʿl* “to” in reference to persons,[21] and instances with the preposition *b*-. In this usage, *qrb* means “to touch,” either neutrally in relation to objects[22] or in the intimate sense in relation to a person.[23] Further, one can with some certainty emend *q*[*rbw* in 4Q197 4 1:11 (Tob. 6:6) with *l*- and the place designation “to Media.” The also rather certain reconstruction of the ethical dative *l*]*hwn* here indicates ingressive action “to arrive at”;[24] thereby, the verb receives a telic nuance (“to attain”), regularly indicated by → *mṭī*, instead of the otherwise typical atelic nuance (“to approach”).

III. D-stem “to Bring.” The transitive D-stem of *qrb* occurs with the meaning “to bring near, to bring to a place” and persons or things as object; it regularly denotes “to offer, to sacrifice.” This usage cannot be distinguished systematically from that of the C-stem (→ IV), especially since in consonantal spelling not all forms are unequivocal and, after the loss of the /-h-/ between vowels, the imperfect of the C-stem also appears as *yqrb* instead of the original *yhqrb*.[25] Yet, the D-stem alone also occurs in morphologically unmistakable specimens in the absolute sense, to bring “into the immediate (physical) proximity,” as in relation to objects[26] and persons,[27] while both the D- and C-stems can denote “to bring into relative proximity, to carry or bring before someone of higher rank.” The basic difference between absolute and relative proximity, as Jenni[28] has demonstrated for the stem difference of the Hebrew *qrb*, can also be assumed in principle for Aramaic.

Through the overall significant semantic agreement of the two stems, however, they converge in actual usage so that the scribe of *TADAE* A4.7:25 removed the *h* from the original *yhqrbwn* “they will offer” (C-stem) and *yqrbwn* can also be read as a D-stem, as in the parallel passages *nqrb* “we will sacrifice” in 4.8:25, *yqrbwn* in A4.9:9, and *yqrb* “he sacrificed” in A4.7:28 par. 4.8:28. It is unclear whether this involves only

an orthographic (since the historical and the phonetic spellings of the C-stem coexist in Imperial Aramaic) or morphological alteration.

It involves the food, incense, and burnt offerings the Elephantine community promised the Persian governor of Judea in his name on the altar of Yaho as thanks for the requested support in the reconstruction of the local temple.[29] Together with prayer,[30] sacrifice constitutes the foundation of religion; consequently, both are mentioned in the same breath. The verb appears in an analogous usage in Ezr. 7:17 for sacrifice on the altar in temple worship in Jerusalem reintroduced by royal edict and later in 1QapGen 21:2 for Abraham's sacrifice;[31] 4Q547 8:2 is similar. Along with the cultic context in relation to sacrifices in the temple, *qrb* can also represent personal offerings of private individuals as on a few Imperial Aramaic silver bowls from Egypt[32] and votive inscriptions from northern Arabia,[33] always in morphologically unequivocal perfect with *l*- and the deity. This usage continues in Nabatean,[34] Palmyrene,[35] and Hatrene[36] dedicatory inscriptions.

In reference to persons, the verb denotes "to bring before someone, to introduce to someone," before the king in a court context[37] and before God in religious speech;[38] in relation to objects, it signifies "to bring, to offer" and in the sense of immediate proximity.[39]

IV. C-stem. The C-stem of *qrb* seems to correspond largely with the D-stem.[40] Morphologically unquestionable forms occur in miniature inscriptions from the Neo-Assyrian period meaning "to offer,"[41] Imperial Aramaic in *TADAE* A6.3:6f. for "to bring before [*qdm*]" in reference to slaves brought before their masters for punishment, and in the uncorrected text from *TADAE* A4.7:25 for a sacrifice (→ III); similarly in Biblical Aramaic in Ezr. 6:10,17 for temple sacrifice and in Dnl. 7:13 for the "son of man," who is led before the time- and space-transcending "Ancient of Days"[42] for investiture in order to receive from him eternal dominion. Qumran offers no unequivocal specimens.[43] Overall, then, it involves only a relative proximity in which an unbridgeable distance persists; in contrast, the D-stem can indicate both relative and absolute proximity.

V. Noun "Battle, War." The noun *qrb* /qarāb/ first occurs in the Aramaic version of the Behistun inscription and, as the object of → *ʿbd*, means "to fight." It occurs repeatedly for the campaign reports of King Darius,[44] either absolutely, with a local designation following *b*- "near"[45] or *ʿm* "with = against."[46] Daniel 7:21 employs the same expression (in the abs.) for the battle of the growing small horn against (*ʿm*) the holy ones.[47] Both expressions also occur at Qumran, for military campaigns,[48] a war,[49] and the eschatological battle.[50] In 11Q10 31:1; 33:6 (Job 38:23; 39:25), it translates *mlḥmh*. 4Q537 14:3 and 4Q562 1:1[51] are fragmentary.

VI. Noun "Sacrifice." Assured old specimens for Aramaic *qrbn* /qorbān/ "offering (for God)" stem mostly from Jewish texts from Palestine.[52] It has Semitic parallels, however, and is common later in Syriac and Mandean,[53] as well as Hebrew. In Palestinian Aramaic, it designates any kind of sacrifice as a donation and cultic, as once in ossuary inscriptions,[54] in T. Levi[55] and Mk 7:11 and for others in the temple liturgy of the new Jerusalem[56] and the description of Aaron's sacrifice.[57] In Mt. 27:6 and Josephus,[58] it designates the temple treasury. Christian Palestinian also employed it.[59]

VII. Adjective "Near." Imperial Aramaic private documents from Elephantine first attest the adjective *qryb* /qarrīb/ "near" with certainty.[60] Substantivized there, it represents a "relative" in a list with decreasing claims to legal succession or degree of relationship after *ʾḥ wʾḥt* "brother and sister" and before the antonym *rḥ*(*y*)*q* /raḥḥīq/ "stranger" (or "distant relative"?), in individual cases supplemented before and sometimes after with *br wbrh* "son and daughter" and persons with no familial relationship such as business partners, etc.[61] Reduced to *rḥyq wqryb* "nonrelatives and relatives," the expression occurs in Nabatean contracts from the Dead

Sea.[62] Palmyrene grave certificates also employ *qryb* for "relative" in a juridical setting.[63]

It occurs at Qumran both in the relational[64] and in the spatial senses.[65] On 4Q550 7+7a:1 → II.

קריה *qryh* /qaryā, qeryā/; קריה *qryh* /quryā/; קרי *qry* /qaray, qeray/; קרתה *qrth* /qartā/; קיר *qyr* /qīr/

I. Etymology, Lexemes. 1. *qryh*. 2. *qry*. 3. *qrtʾ/h*. 4. *qīr*. II. Usage. 1. Old Aramaic. 2. Texts from Egypt. 3. Texts from the Levant. 4. Heterograms.

I. Etymology, Lexemes. The nouns *qiryā*/*qiryᵉṯā*, *qartā*, *qᵉrē* and *qīr* mean "city, village" and trace to a common basis *qar*,[1] which, in turn, could be a substrate word in the Mediterranean region.[2]

1. qryh. Transcriptions in Greek and Latin texts—the LXX, Flavius Josephus, Eusebius, and Hieronymus—through the fifth century C.E. have the forms καριαθ-, καριωθ-, *cariath*- and *cariah*, that point to the first syllable *qar*-,[3] exactly as does Arabic *qarya*(*tᵘⁿ*). In contrast, the vocalization *qiryā* appears only in the pointing of biblical and targumic manuscripts. It must reflect a specific dialect, similar to the numerous cases of /i/ for /a/ reported with reference to the Old Arabic dialect of Najd. Syriac *qrīṯā* could trace back to */qarītā/, however. Only additional instances can contribute to an explanation of this interchange of /a/ and /i/. It is very old, however, because the Old Babylonian place name *Qí-ir-Da-ḫa-at*ᵏⁱ also appears in the variant *Qar-Da-ḫa-at*ᵏⁱ.[4] The ending *-yōt* instead of *-yat*- represents a well-known pronunciation as, e.g., in *Byt-ʿnt* par. *Byt-ʿnwt* or *ʿštrt* par. *ʿštrwt* (1 S. 31:10), which has a parallel in Phoenician[5] and has nothing to do with the plural.

2. qry. *qry*/*qrʾ* is the word that occurs with the meaning "village" in Targum Onqelos of Gen. 47:21,[6] in Targum Jonathan of Isa. 19:2,[7] and in the Peshitta of Gen. 47:21 (*Q*). Targum Neofiti 1 of Ex. 21:13 employs *qry šyzbh* in the sense of "place of refuge." The word seems to have survived as *qrayya*/*e* in Syriac and Lebanese Arabic dialects. The earliest occurrence of *qry* appears in Ezr. 4:10, where *bqryh dy šmryn* "in the villages of Samaria" intends the broken plural *quryā*. Syriac attests it well and it corresponds to the dialectic Arabic *qura*. The *-h* at the end of the word can either indicate the determined state, as in the Hermopolis papyri,[8] or represent a cataphoric suffix.[9] Syriac and Arabic employ *quryā*/*qura* as the plural of *qrīṯā* and *qarya*, respectively, but, formally, it arises from */qaray, qiray/ > *qᵉrē* with the *-ay* affix often used to form diminutives,[10] thus "small settlement." Palestinian Aramaic also attests the broken plural *quryā*, as the vowel letter *w*, e.g., in *qwryy* in Targum Pseudo-Jonathan of Gen. 24:60 and Num. 21:3 and in Christian Palestinian *qwry*[11] indicate. The word appears in the absolute state in the Aramaic inscription on boundary stones found in Armenia stemming from the first half of the second century B.C.E.[12] A typical characteristic of these inscriptions is the absence of the determined state, presumably under the influence of the scribe's mother tongue.[13] The determined state appears in the Palmyrene tax tables,[14] where *qryʾ* corresponds to the Greek plural χωρία,[15] and possibly in 4Q244 8:4. In contrast, *qryʾ* in *PAT* 2013 may be linked to the Syriac *qrāyā* "invitation." It is written as a tessera, yet, very surprisingly, it does not appear elsewhere there in great numbers although the tesserae themselves serve as invitations and "entry cards" for cultic meals. The word *qry* appears with a suffix as *qryhwn* in 11Q10 8:1 (Job 24:12).

3. qrtʾ/h. In the seventh century B.C.E., the place name *Qarti-Ḫaldi*[16] first attests *Qart-*. The name denotes a city in the Mannaeen region

southwest of Lake Urmia where the Bukan inscription[17] exhibits Aramaic influence. The word then appears in a papyrus from Saqqara from the fifth century B.C.E. as the qualifier of the Egyptian title *p3-sḫ-nsw* "the royal scribe":[18] *psḥns qrtʾ* "the royal city-scribe."[19] It is not necessary to assume Phoenician influence here, although it cannot be excluded either. The word may appear in place names in the place of πόλις, as in *Tigrano-kerta* (Armenia), built in the first century B.C.E., or *Natounissaro-kerta* (Gordyene), if it does not represent the Iranian *krta* "built." *Qart-* certainly appears in Jewish Aramaic synagogue inscriptions in Palestine,[20] in Targum Onqelos of Gen. 4:17, Targum Jonathan of Isa. 19:18, Targum Pseudo-Jonathan of Nu. 22:29 (*qartā rabb^{e}ṯā*), etc.

4. qīr. *qīr* means "city," not only in Moabite, but also in an Old Aramaic dialect as the determined state *Gi-ra-a* ^{uru}*A-za-ar-ìli* in Assurbanipal's reports of his campaigns against the Arabs indicate.[21] The spelling *Gi-ra-a* attests to the use of GI to express the voiced pronunciation of /q/, as in ^{kur}*Gi-di-ra-a-a*[22] for "Qedarites." Similar cases are known from various periods and portions of the Semitic language region.[23] The word *qīr* is also the basis of Jewish Aramaic *qirwā* "city, village." Yet, it should not be associated with Qīr, the area from which the Arameans came originally according to Am. 9:7. The correct reading there would be *qwr*,[24] possibly the equivalent of *ġūr* "mountain."

II. Usage.

1. Old Aramaic. The determined state *qrytʾ* in a treaty of state from Sefire indicates that it refers to a specific city, but the fragmentary context hinders its identification.[25] In contrast, the city (*qryh*) in *KAI* 224.12 is not specified. A decree from the seventh or sixth century B.C.E.[26] explicitly mentions the *ḥzn qrytʾ* "mayor of the place"[27] among those who were to be

punished for failure to observe the pertinent edict, which explains the use of the determined state.

2. Texts from Egypt. Aramaic texts from Egypt often mention specific localities or villages, but they can only rarely be identified, e.g., Korobis[28] or Chastemehi.[29] A pair of texts mention the "citizens of a city"[30] in a stereotypical formula,[31] one presumably refers to the "village elders" (*kšyš qryth*),[32] others mention *qrytʾ* in a letter or a story[33] and employ *qryh* sporadically in a proverb: *kqr*[*y*]*h ḥsynh* "like a fortified city,"[34] [*qryt*] *ršʿyn* "[a city] of evildoers."[35] Most of the instances of *qrytʾ* appear in commercial texts, however.[36]

3. Texts from the Levant. The determined state *qrytʾ* occurs in the Samaria papyri from the Wadi Daliyeh,[37] in a letter to the Persian king (Ezr. 4:11-16), and in his response (4:17-22). In Ezr. 4, it always refers to Jerusalem (4:12,13,15,16,19,21). In contrast, the plural of *qᵉrē* "villages" appears in the narrative portion of Ezr. 4:1-10 (v 10; → I.2) and in the Aramaic of Qumran.[38] In the eschatological work about the new Jerusalem, *qrytʾ* naturally refers to the holy city,[39] but the preserved fragments never mention Jerusalem by name. It is also very likely the reference of the surname ʾΙσκαριώθ (Lk. 6:16)[40] "city dweller"; *ʾīš* finds usage in Aramaic legal formulas[41] or as a title.[42] Following Gen. 10ff., 4Q529 1:9 refers to Babylon.[43]

In *krbyl w-kršy qrytʾ*,[44] the boundary stone of Bahadırlı probably employs the determined plural /qiryātā/, but the absolute plural /qᵉrē/ appears on boundary stones from Armenia: *ḥlq ʾrq byn qry* "he divided the land between the villages";[45] → I.2 on the usage of the noun states. Both *qry* and *qryh* appear in 11Q10. 11Q10 8:1 (Job 24:12) alludes to the "villages" of the suffering (*qryhwn*), but 14:1; 32:6 (Job 29:7; 39:7) mention "city gates" and a "strong city" (*tqʾ qryʾ*).

The Palmyrene tax tables refer to goods that Palmyra leaves "to the villages" (*lqryʾ*) or brings in "from the villages" (*mn qryʾ*).[46] Palmyrene dedicatory inscriptions mention the "Gad (patron deity) of the city" (*gdʾ dy qrytʾ*),[47] i.e., Arak in one text, then the Gad of another city (*gdh dy qrytʾ*)[48] on the site of Chirbet Faruan, and the Gad of a third located near Chirbet Ramadan (*gd qrytʾ*).[49] A dedication "to the jinn of the city" (*lgnyʾ dy qrytʾ*)[50] also refers to Chirbet Faruan. In addition, "the citizens of the city" (*bny qrytʾ*)[51] or "the community of the city" (*dyrʾ dy qrytʾ*),[52] although not geographically identified in any of these cases, commend themselves to their jinn.

The mention of *qryh* in Pseudo-Daniel[53] appears in the context of the flood and Mount Lubar, where, according to Jub. 5:28; 7:1, the ark landed and in whose vicinity the three sons of Noah built a city (Jub. 7:14-17). Since Pseudo-Daniel summarizes the biblical story, the word *qryh* could represent the broken plural *quryā* in keeping with the context of Jub. 7:17: "These three cities are near Mount Lubar." Indeed, *quryā* refers otherwise to "villages," but this text may refer to the initial settlements of Noah's sons.

4. Heterograms. The heterogram QRYTʾ occurs in several ostraca from Nisa and in the Frahang-i Pahlavīk 2:8c, where it represents middle Iranian *rōtastāk* or *rōstāk* "district, province." In the Nisa inscriptions, QRYTʾ seems to denote localities in Mihrdātkirt; it was a *diz* (fortification) and seat of a *dizpat* (*dyzpty*), "fortification commander,"[54] and is always indicated by the heterogram BYRTʾ (→ *byrt*).

קרן *qrn* /qarn/

I. Etymology. II. Of Animals. III. Instrument. IV. Altar.

I. Etymology. Aramaic *qrn* /qarn/[1] rests on a common Semitic primary noun for "horn." Since horns occur in pairs in most animals, the word behaves as a feminine. In addition to the literal sense, it refers to the wind instrument by the same name, to the horns on the corners of horned altars, then, figuratively, to "corner" in general, later also to the crescent moon, in financial contexts to "original capital,"[2] and finally in place names.[3] The dual is attested only in the absolute state (Dnl. 7:7).

II. Of Animals. All the older instances of the concrete meaning "horn (of animals)" occur in symbolic contexts. It first appears in the vision in Dnl. 7 of the four monsters as representatives of the empires. There it denotes the ten horns of the fourth, most terrible being that, in contrast to its predecessors, is not compared to any known animal (Dnl. 7:7; dual). Among them grows another, small, horn before which three of the others are "rooted out" (7:8).[4] The small horn superficially represents Antiochus IV, who desecrated the temple, the uprooted horns stand for three of his dynastic predecessors. It is described as having human eyes and a mouth that speaks insolently (7:8,20), which on the one hand further heightens its unnatural character, and on the other hand exploits the topos of boastful speech.[5] The historical allegory conceals a demonic power, however, that wages war (7:21) against the "holy ones,"[6] and will ultimately be destroyed (7:11). Dnl. 8:8-12 takes up the same theme again.[7] Also in a symbolic context, *qrn* refers to the ram that gores its enemies with its horns in Enoch's animal allegory for King Saul.[8] In contrast to Dnl. 7, *qrn* has positive connotations here.

III. Instrument. The narrative of the festal dedication of the statue of Nebuchadnezzar first employs *qrn* of a wind instrument in a formulaic expression including other instruments (Dnl. 3,5.7.10.15),[9] then 11Q10 33:5 (Job 39:25) representing Hebrew *šōpār*; both instances have → *ql* "sound."

IV. Altar. The usage for "horns" of an altar[10] common in Hebrew occurs in the translation of Lev. 16:18 in 4Q156 2:2 and in the description of the temple cult in the new Jerusalem.[11] It cannot be clearly distinguished, however, from the general usage for "corners" (of a street, of a building, etc.) clearly attested later.[12]

קשט *qšṭ* /qošṭ/

I. Root and Forms. II.1. Elephantine. 2. Aśoka. 3. Palmyra. III. Lexical. 1. Greek Translations. 2. Hebrew Translations. 3. Synonyms and Antonyms. IV. Semantics. 1. Speech. 2. Behavior. 3. Law. 4. Miscellanea.

I. Root and Forms. The root *qšṭ* is not common Semitic, but essentially Aramaic. Most consider Hebrew and Arabic (*qsṭ*) forms to be loanwords.[1] Since East Aramaic exhibits the general West Semitic incompatibility of two emphatic radicals,[2] variants appear there such as *kšṭ* and *qšt*.[3] The relationship with *qšt* "bow" and the verbal derivative "to shoot" is debatable. Indeed, Palestinian Aramaic and Syriac first attest Aramaic forms with this meaning and /ṭ/ instead of /t/, although *qošœṭ* "bow(-shooting)" in Ps. 60:6[4] already reflects a corresponding exchange. A second verbal root *qšṭ* covers the semantic range from "to prepare" to "to adorn." The third, *qšṭ* "to be (proven) correct," appears in only a few verbal forms that are generally spelled *qwšṭ* or *qšwṭ* and are associated with nouns translated "trust, uprightness." Some[5] assume a semantic development from "to shoot an arrow" (i.e., "to aim at") to "what is correct," "truth." Consequently, all[6] or the last two[7] are subsumed under one lexeme. In individual cases, the classification remains unclear.[8] Since the assumption of a development of meaning rests the semantic analysis on an etymological hypothesis, but Imperial and post-Imperial Aramaic attest only a few verb forms in contrast with the noun *qšṭ*[9] and the adjective *qšyṭ*, the meaning must be deduced from usage and the old translations.

II. *1. Elephantine.* Line 158 of the sayings of Aḥiqar reads *kšyṭʾ wyʾmrnh*,[10] apparently in a fragmentary code of behavior for scribes. Depending on the reconstruction, one can understand the adjective *kšyṭʾ* as the object of *yʾmrnh* ("they should speak the truth"),[11] of a preceding verb, or substantivally ("the truthful one").[12]

With no context, *hqšṭ* appears in an epistolary ostracon from Elephantine about barley;[13] the translation "to arrange" or "to prepare"[14] is obtained from later Aramaic.

2. Aśoka. The first Aramaic lines of the Aśoka diglot from Kandahar[15] announces: *šnn* 10 *ptytw ʿbyd zy mrʾn prydrš mlkʾ qšyṭʾ mhqšṭ*, something like the Greek δέκα ἐτῶν πληρη[. . .]ων βασιλεὺς Πιοδασσης εὐσέβειαν ἔδειξεν τοῖς ἀνθρώποις. Most understand *qšyṭʾ mhqšṭ* as paronomasia, either as an affirmation "he promotes the truth" or as an attributive "the king, who. . . ."[16] The nuance remains unclear; if, as most assume, εὐσέβεια and *qšyṭʾ* are imprecise[17] equivalents of the Indian concept of *dhamma*, they refer to proper behavior. Yet in the broader context of Aśoka's mission, *qšyṭʾ* and *mhqšṭ* could literally mean the foundation of piety through the erection of stone edicts. Then *mhqšṭ* could belong with *qšṭ* "to prepare."[18]

3. Palmyra. Palmyrene-Aramaic inscriptions contain several forms spelled *qšṭ*, sometimes as variants of *qšt* "archer,"[19] but once the verb occurs in a rare curse against grave robbers: *wlʾ yqšṭ lmn dy yptḥyhy*,[20] usually understood as "may whoever opens this never be exonerated."[21] A noun *qšṭ* also occurs: in the tax table *ʿl mlḥʾ qšṭ*[ʾ ʾ]*tḥzy ly dy bʾtr dy dms thwʾ mtzbnʾ* "With respect to salt; it seems right to me that it should be sold in a public place."[22] The sense of the table is to record the still unwritten tax regulations. "It seems right to me" differs from *ʾtḥzy dy* "it is determined that" (l. 128) and *hyk dy nmwsʾ mwḥʾ pšqt* "as the law announced, so I

have decided" (l. 128), thus, *qšṭ* may refer to (common) law. It is more difficult to explain *qšṭ* in some grave certificate texts. Following δίκαια in the Greek versions,[23] it seems likely that the suffixed *wqšṭ* as the conclusion of a list with right of usage[24] should be understood as "(legal/customary) right." In conjunction with *tṣb(y)t* "decoration"[25] in the Aramaic text, an Aramaic reader can also understand the word as "adornment."

III. Lexical.

1. Greek Translations. Greek translations of Jewish Aramaic writings from the time of the Second Temple usually render *qšṭ* with ἀληθ- or δίκαιο-: Dnl. 2:47; Theodotion at 4:34;[26] the Greek text of T. Levi at 4Q213a 1:12[27] and 2:9,[28] in keeping with the meaning, has the adjective instead of the noun in the genitive 2:7;[29] also throughout in the books of Enoch where Greek and Aramaic texts are preserved,[30] there occurs a double translation or a later insertion[31] in 1 En. 10:16.[32] This rendering is not systematic, however; ἀληθ- appears repeatedly in the Greek book of Enoch where one would expect *qšṭ* in the lost Aramaic text.[33] In 1 En. 106:18 and 107:2, *bqšwṭ* is understood, contrary to the sense of the Aramaic, as an attribute of Noah's and translated with δικαίως.[34] The reconstruction of a verb in 4Q201 1 6:3 is paleographically dubious.

The Qumran fragments of Tobit also preserve remnants of *q(w)šṭ*, twice corresponding to δικαιοσύνη in 4Q196 17 2:3.5 (Tob. 13:7). Other passages are more difficult. The reading *q* in *bq*[*šṭ*ʾ [35] is highly uncertain; with regard to 4Q196 17 2:9, a comparison with Tob. 13:9f. (Vaticanus) points more to *bny qw*]*šṭ*ʾ [36] instead of Fitzmyer's *bqw*]*šṭ*ʾ.[37] In 4Q197 4 2:2 *dyn qšṭ*ʾ "a lawful right"[38] corresponds to δεδικαίωταί σοι in Tob. 6:13 (Sinaiticus), also with the same δίκαιο- word group. The adjective *qšyṭ* in 4Q197 4 3:9 presumably corresponds to καλός in Tob. 7:7; there is no reason to assume with Lange that it was translated with καλὸς καὶ ἀγαθός in the sense of

Greek “beautiful goodness.”[39] The nuance “straight” appears in *d*]*brny qšyṭʾ lbyt rʿwʾl*,[40] corresponding to ἀπάγαγέ με εὐθεῖαν πρὸς Ραγουήλ (Tob. 7:1 Sin.).

2. Hebrew Translations. In 11Q10 7A:8 (Job 23:7), *rw qšṭ wdt*[corresponds more to LXX (ἀλήθεια γὰρ καὶ ἔλεγχος) than MT; the converse is true of *qšyṭh yplg* in 11:8 (Job 27:17). In 24:7f. (Job 34:13) the rare verb *qšṭ* occurs in the D-stem for the Hebrew *śām* “he arranged” (→ II.2), but presumably evokes the meaning of the noun. In the same section, in fact, the translator employs the noun and verb *šqr* repeatedly (in Job 34:8,10,12,17) and, therefore, appends Job 34:12f. directly.

Additional sporadic agreements manifest themselves in fixed expressions: *blbb dkʾ wbrwḥ qšyṭh wṭbh* “with a pure heart and a right and good spirit” in 4Q542 1 1:10 corresponds to *lēḇ ṭāhōr* and *rūᵃḥ nāḵōn*[41] in Ps 51:12. *ʾrḥ*(*t*) *qšṭ*(*ʾ*)[42] corresponds to the Hebrew *drky ʾmt*/*ṣdq*.[43] Aramaic *nṣbt q*(*w*)*šṭ*(*ʾ*) corresponds to Hebrew *mṭʿt ʾmt*,[44] *dyn qšṭ*(*ʾ*) (“judgment of *šṭ*”) perhaps to the very frequent concept *mšpṭ ṣdq*. Spelled the same way, *dyn qšṭ*[*ʾ* (“judge of *qšṭ*”) has a Hebrew parallel in *dyn hʾmt*.[45]

In the Targums, too, *qšṭ* functions as the most common rendering of *ʾmt* and *ṣdq*, almost entirely so in the Pentateuch of Onqelos. In addition, *bqwšṭʾ* often appears as a formula introducing speech. The adjective *qšyṭ* sometimes renders Hebrew forms of *ʾmn*, *yšr*, and *ṣdq*.

The translation equivalence of Aramaic *qšṭ* with Greek ἀληθ-/δίκαιο- and Hebrew *ʾmt*/*ṣdq* corresponds to ἀληθ- (sometimes δίκαιο-) for *ʾmt* and δίκαιο- for *ṣdq* in the LXX just as in Palmyrene (→ II.3). All of these terms, however, were fluid in the respective traditions and attained their semantic precision through their cotexts and contexts.

3. Synonyms and Antonyms. A near synonym is *yṣyb* "valid, true,"[46] cf. 1QapGen 2:20 with 2:22; Dnl. 2:8 with 2:47; 4Q212 1 3:19f. (1 En. 93:2) with 1QapGen 14:13 and 4Q204 1 5:4 (1 En. 10:16); perhaps the original of 1 En. 106:12 (ἀκρίβειαν . . . ἀλήθειαν). In reference to speech, *bqšṭ* "truly" appears three times with (*w*)*lʾ bkdbyn* "without lies."[47] The apocalypse of weeks[48] contrasts *qš*(*w*)*ṭ* with *ḥms* "violence" and *šqr* "lie, deceit";[49] regarding 11Q10 24 → III.2; similarly 1QapGen 6:3 with D. A. Machiela.[50] Cf. *ALD* 13:3[51] for *ṣdqtʾ*, 4Q542 1 1:9 for *yšyrwtʾ* and 1 1:12 for both together with *tmymwtʾ*. For *qšyṭ* and *ṭb* "good," see 4Q537 10 1 (reading uncertain) and 4Q542 1 1:10; on Tob. 7:7 → III.1, similarly probably also 1 En. 91:4; 92:4;[52] furthermore *dyn* (par. in Dnl. 4:34).

IV. Semantics.

1. Speech. *qšṭ* is often employed in relation to speech and the communication of knowledge, as in the conversation between Lamech and Bettenosh in 1QapGen 2,[53] similarly in 15:20. First Enoch 106f. also relates this story, parts of which are preserved in 4Q204.[54] Qahat's teaching[55] and speech (*mmr*)[56] are also associated with "uprightness";[57] cf. II.1. Furthermore, direct speech can be qualified as true by *mn qšṭ* (Dnl. 2:47)[58] as an introductory formula. In a few passages,[59] the context permits understanding *bqšṭ* as "direct," "frank," comparable to Greek εὐθύς (→ III.1). Elsewhere *qšṭ* does not refer to the manner of speech, but to its content as reliable, like Greek ἀλήθεια.

2. Behavior. A second semantic field concerns the use of *qšṭ* for behavior, sometimes directly and as the object of → *ʿbd* "to do,"[60] which leads to *ʿbdy qšṭʾ*.[61] Mostly, however, the behavior finds expression metaphorically as walking on paths of *qšṭ*, distinguished from evil paths.[62] The doctrine of two paths reflects the ethical dualism of two patterns of behavior and, accordingly, of two fates. In the ninth week of the apocalypse

of weeks, after the destruction of evil, all human beings will view the *ʾrḥt qšṭ ʿlmʾ*,[63] in which *ʿlmʾ* "eternal" refers to the entire expression "path of truth." The path of wrong, in contrast, leads to darkness.[64] The Aramaic Levi Document does not know of a contrast between two paths, but the one path of *qšṭ* that one should not abandon,[65] cf. also *ALD* 2:4f., as well as 4Q213a 1:12[66] and *ALD* 3:9 for the plea for the right path. With the nuance "straight,"[67] *qšṭ* suits this image very well. Other combinations arise through its use with *ʾḥd bqwšṭʾ* "hold firm to *qwšṭ*" in 1QapGen 2:6 and 4Q542 1 1:9, in the second passage paralleling "to walk [*ʾzl*][68] in uprightness." The adjective *qšyṭ* usually designates the same idea of the good of right behavior and those who act in this manner. Three aspects can stand in the background: the image of the straight path, the association with reliability,[69] and the agreement between one's behavior and divine instruction.

3. Law. Associated with this diction is the juridical usage (→ II.3). Repeatedly, *qšṭ* characterizes the word → *dyn* "legal proceeding, legal decision": 4Q212 1 4:16 (1 En. 91:12); *ALD* 3:17,[70] here as in *ALD* 6:2 with reference to the laws and judgments of the Levites according to Dt. 33:10, just as Jub. 31:15. 4Q197 4 2:2 (Tob. 6:13 Sin.) probably refers to the legally valid decision in the case of Tobias and Sarah.[71] Daniel 4:34 is not just a hymn praising God, but "his deeds" refer to 4:31f. and the whole clause, thereby to Nebuchadnezzar's insight that everything God had done to him was right and appropriate. According to 4Q246 2:5f., an expression that recalls 1 En. 91:12 and Dnl. 4:34 refers to the eschatological kingdom of God's people: *wkl ʾrḥth bqšwṭ ydy*[*n*] *ʾrʿ bqšṭ* "and all his paths are *bqšwṭ* and he/it judges the earth *bqšṭ*." The whole lexical field is theologically loaded: God himself is just and guarantees a just verdict, both through the Levites and eschatologically through the upright, his people. Because of lacunae, however, it is unclear whether *dyn* in 4Q205 1 11:2 (1 En. 22:14) means "verdict" or "judge." Sometimes, *qšṭ* can represent *dyn*

qšṭ in an ellipsis, such as (*spr*) *mly qwšṭʾ* in 4Q204 1 6:8f. (1 En. 13:10-14:1), which refers to God's verdict on the Watchers.

4. Miscellanea. Proceeding from Isa. 60:21; 61:11f., the metaphor of "planting" in context with *qšṭ* was widespread in early Jewish texts,[72] i.e., the planting of the righteous, the people Israel. In analogous expressions, *qwšṭʾ* can denote Israel and/or the eschatological upright ones, so also at the beginning of 1QapGen 6, which says that Noah was "planted for uprightness" (*lqwšṭ nṣybt*), i.e., should become the ancestor of the people of God. 1QapGen 6:4[73] may elaborate on Isa. 61:11 if one reads *b<ḥ>zwn qwšṭʾ* "with a belt of *qšṭ*."

In some texts, *qšṭ* appears as an abstract term, either absolutely or in contrast to "wrong." With this nuance in 1QapGen 6:4, the word refers to human "right behavior" or "uprightness" (see above). Yet other texts portray *qwšṭʾ* as an independent, supernatural, positive force equally associated with moral behavior, a higher power, and the historical role of God's upright people. According to the apocalypse of weeks, it belongs to the fundamental cosmic principles of history and manifests itself in various manners during its course, always in opposition to *šqrʾ* "the lie" and *ḥmsʾ* "the violence." Koch compares this contrast with the Iranian antithesis between *asha* and *drug*, traditionally translated "truth"[74] and "lie" or "deceit." Aspects of the concept of *asha* (sometimes also translated "order") and the development of a dualistic worldview may have enriched the semantics of the term *qwšṭʾ*. Historically, it is more likely, at any rate, that *qwšṭʾ* compares with *asha* than with the Egyptian *maat*. Yet the inclusion of this concept in early Jewish texts also led to new concepts such as the relationship to election: according to 4Q212 1 4:12 (1 En. 93:10) some are chosen (*ytbḥrwn*) to be *śhdy qšṭ* "witnesses of *qšṭ*"; among lacunae, 4Q580 1 1:10 also mentions *bḥyr lqšṭ*.

In individual cases, it sometimes remains unclear which of these aspects of the meaning of *qšṭ* stands in the foreground. The expression *dry qwšṭʾ* in 4Q542 1 1:4 means the clans of the Levites[75] and points to a relationship between *qwšṭʾ* and levitical rights. Yet, in 4Q543 1 2:8 it refers to the clans of the end time and suggests an eschatological manifestation of *qwšṭʾ*. 4Q204 5 2:28 (1 En. 107:1) seems to imply the same notion. In 4Q213a 2:7,[76] *zrʿ dq*[*šṭ* could describe the proper behavior of the descendants or the "rights" of the Levites. Presumably, *prds qšṭ*[ʾ[77] refers either to the original status of Adam and Eve in paradise or the future dwelling of the righteous dead, if not paradise itself, as part of the physical and temporal scope of *qwšṭʾ* in contrast to wrong. Other occurrences like 4Q565 1:5 are too fragmentary.

רֵאשׁ *rʾš* /rēš/

I. Etymology. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology. Derivatives of the masculine noun *rʾš* “chief, head” occur in all Semitic languages. Regarding the form of Aramaic /raʾš/ > /rēš/, see *ATTM*, 104,138.

II. Old and Imperial Aramaic. An Old Aramaic specimen occurs in the Sefire treaty text *KAI* 224.11 in the reference to the case that an enemy “demands my head, to kill me” (*ybʿh rʾšy lhmtty*); it implies the practice of beheading an enemy and presenting his head, as, e.g., in the OT in 1S. 17:51,57; 31:9.

Imperial Aramaic does not attest *rʾš* in the literal meaning. It stands *pars pro toto* in regulations of divorce. If one declares hatred for one’s partner in marriage, then “hate-silver” falls “on his/her head” (*ksp śnʾh brʾšh*),[1] i.e., he must pay compensation for the broken marriage.[2] In the figurative meaning “beginning,”[3] the noun occurs in indications of time, *rʾš yrḥʾ* “beginning of the month,”[4] *rʾš mlkwt* [*d*]*ryhwš* “beginning of the reign (i.e., enthronement year) of [Da]rius” in the date of papyrus *WDSP* 1.1 from the Wadi Daliyeh in Samaria.[5] In another metaphorical use, *rʾš* “head” serves in the Behistun inscription of Darius I to designate the leader of a group.[6] In addition, *rʾš* is a *terminus technicus* for “capital” in contrast to *mrby*[7] “interest.”[8]

III. Biblical Aramaic. Biblical Aramaic attests the noun fourteen times, mostly in the literal meaning, six of which occur in the phrase *ḥæzwē rēš*

"face of the head."[9] Daniel 3:27 describes the men in the fiery furnace "the hair of whose head (*śᵉᶜar rēšhōn*)[10] was not singed." The noun appears in descriptions in prominent positions in visions. Daniel depicts for Nebuchadnezzar his vision of a statue, *rēšeh dī ḏᵉhaḇ ṭāḇ* "his head was of fine gold" (Dnl. 2:32),[11] and interprets the head[12] in Dnl. 2:38 as the king. In the animal vision, the third animal, according to Dnl. 7:6, has four heads, *ʾarbᵉᶜā rēšīn lᵉḥēwᵉṯā*,[13] the fourth, according to 7:20, has ten horns on its head,[14] and the Ancient One who sits in judgment in Dnl. 7:9, "the hair of his head (*śᵉᶜar rēšeh*) was like pure wool."[15]

Metaphorically, the noun denotes leaders, as in Ezr. 5:10 *guḇrayyā ḏī ḇᵉrāšēhom* "the men at their heads,"[16] and the phrase in Dnl. 7:1 *rēš millīn* means *summa rerum*.[17]

IV. Qumran. In the Aramaic at Qumran, *rʾš*[18] appears literally in the theologically significant 1QapGen 20:28f. (a treatment of Gen. 12). Pharaoh asks Abraham for healing and Abraham recounts: *wṣlyt ʿl* [*mr*]*dpʾ hw wsmkt ydy ʿl* [*rʾy*]*šh* "thus, I prayed for this [torment]er and laid my hands on his [hea]d" and the plague was removed. Neither the OT nor rabbinic literature mentions the NT practice of healing by the laying-on of hands (e.g., Mk. 5:23; Lk. 4:40).[19] In the sense of "head," *rʾš* also appears in the poem praising Sarah's beauty 1QapGen 20:3: *kmʾ rqyq lh śʿr rʾyšh* "how soft is the hair of her head."[20]

In the sense of "leader,"[21] the noun appears in fragmentary contexts in 4Q566 1 4[22] and 4Q209 28:3, 4Q542 1 1:7;[23] 4Q213 2:10 has the phrase *rʾšyn wšpṭyn* "leader and judge." 11Q18 19 1:2 *rʾšy ḥ*[*dšʾ* "beginnings [of the month]"[24] and the unclear 4Q546 2:1 *b*]*šnt ryšy bršw*[*ty* "in the] year of my beginning, with my authori[ty" (→ II, *rʾš mlkwtʾ*) retain the temporal meaning "beginning." A local meaning often occurs in genitive phrases,

such as “point, peak” of a mountain, → *ṭwr*,[25] rocks, *kp*,[26] or tracts of lands, *ḥwlq*,[27] or as the “source” of a river, → *nhr* /nahar/.[28]

רב *rb* /rabb/; רבן *rbn* /rabbān/; רבו *rbw* /rebbō/; רבי *rbī*; רבו *rbw* /rabū/; רבה *rbh* /rabāē/

I. Etymology, Forms, and Lexical Field. II. Adjective "Large." 1. Literally. 2. Pejoratively. 3. "(Al)mighty" as a Title for God and Outstanding Persons. 4. Substantivally. III. Noun "Leader." IV. Number "Ten Thousand." V. Verb. 1. G-stem "to Grow." 2. D-stem "to Make Great." VI. Noun "Grandeur." VII. Noun "Officer."

I. Etymology, Forms, and Lexical Field. In the Semitic languages, the biconsonantal root *rb*- underlies the various terms for "large." West Semitic differentiated it into forms with a long /bb/ and those with a vocalic ending. The first form is productive in Aramaic chiefly as the adjective /rabb/ "large" with several literal and figurative nuances,[1] but it also appears as a masculine noun /rabbān/ "great one" and as a feminine /rebbō/ "ten thousand" (or also "innumerably many"), while, in Aramaic, the root → *śgī*, characteristic there, assumed the meaning of the related Hebrew verb *rbb* "to be many." Consequently, the concepts of "large" and "numerous" are distinct in Aramaic. Aramaic attests *rbī* [2] as a verb, however, in the G-stem "to grow," in the D-stem "to make great." This can be linked through the common vocalic ending and the short /b/ with the various nominal formations, of which the feminine /rabū/ "grandeur, majesty"[3] and the masculine /rabāē/ "great one"[4] occur in Old Aramaic, later also other forms. Along with the sporadic, regular /rabbīn/, Aramaic also forms the plural of the adjective "large," in both an attributive and a substantival function, very frequently with reduplication of the root: /rabrabīn/.

With the connotation “mighty,” the forms of /rabb/ stand very near the semantic spectrum of → *šlṭ*, the substantive with the nuance “lord” also to → *mrʾ*. For “leader” in the general sense, → *sgn* and → *rʾš* also occur. Old and Imperial Aramaic can already express “mighty” with forms of the root *kbr* “to be many” and the adjective /kabbīr/ “mighty,”[5] although they appear only sporadically. Finally, “to be long” is the meaning of a distinct Semitic root, *ʾrk*, with the related substantives and the adjective, all of which can have both spatial and temporal senses.[6]

II. Adjective “Large.” With regard to the adjective *rb* /rabb/, one can distinguish roughly the literal sense “large,”[7] the pejorative nuance “arrogant,” and from it, in turn, the specific nuance “mighty” (of God: “almighty”) and, as a substantive, “leader, great one, noble,” all with their own respective connotations.

1. Literally. In the literal sense “large,” *rb* refers to things, living beings, and abstract concepts. It belongs to the everyday lexicon and is, consequently, very frequent. In documentary texts, it refers to houses,[8] gates,[9] rooms,[10] ships,[11] vessels;[12] furthermore, in reference to sheep;[13] in reference to persons, the meaning is unclear, perhaps, as later, “older”;[14] also probably in a place name;[15] finally, many times it has an unknown referent.[16]

The Bible and Qumran manifest additional usages: for gifts (Dnl. 2:48), cities (4:27) and other locations such as wildernesses,[17] valleys[18] and seas,[19] Noah’s vineyard,[20] persons in the sense of “older”;[21] but also for immaterial concepts such as a royal banquet (Dnl. 5:1) and one of God’s miraculous acts of deliverance (3:33), the innocence of the books of patriarchs,[22] and the last judgment.[23] Vision reports, in particular, employ *rb* “great” just like *śgyʾ* “many” to illustrate the gigantic proportions of the things seen: a statue (Dnl. 2:31) and mountain (2:35) in Nebuchadnezzar’s dream, the sea (7:2) and the animals that it produces (7:3,17), with their attributes (7:7: teeth; 7:20: horns). Qumran is similar.[24] Size, then,

characterizes the expenditure of royal representation, the might of God, the hidden forces of world history, and, perhaps under the influence of Hellenistic geographers, the extent of the earth and the heavenly world. For a complete list of occurrences, see *ATTM*, 689f.; 2, 478f.

2. Pejoratively. In conjunction with words (***mlyn***) and verbs of speech,[25] ***rb*** appears with the pejorative nuance "magniloquent, arrogant." This can be first identified in reference to the "small horn" of the vision in Dnl. 7.[26] This topos also appears later for the speech of the evildoer.[27] A derivative of this usage is the verb in the reduplicated-stem ***rbrb*** "to boast," which, according to *ATTM*, 2, 97 already appears in 1QapGen 13:14,[28] and certainly, later, however.[29]

3. "(Al)mighty" as a Title for God and Outstanding Persons. Since the earliest textual witness, ***rb*** is already a divine title[30] recognizing divine power. It can also refer to a king,[31] high official,[32] or high priest.[33]

4. Substantivally. In a substantival usage, the adjective can appear as a title, as later the noun ***rbn*** does. In Old Aramaic times, it designates in the plural the elite at the court of the prince.[34] In the empires, it was used for "commander"[35] or in the construct in a compound expression for various functions such as in Elephantine especially the ***rb ḥylʾ*** [36] and others,[37] which continued in later tradition.[38] Regarding the honorific "rabbi," cf. *ATTM*, 690; 2, 479.

III. Noun "Leader." Alongside the substantival ***rb***, the derived noun ***rbn*** refers to "great one, leader." It occurs in *TADAE* B4.3:11, probably already an Imperial Aramaic text, but in a corrupt context, in the court tales of Daniel of those surrounding the king who accompany him at official functions (Dnl. 4:33; 6:18) and debaucheries (5:1f.,3,9f.,23), and similarly at Qumran,[39] even for the leader of the fallen angels;[40] moreover as an honorific like ραββουνι "master" (Mk. 10:51; Jn. 20:16).[41]

IV. Number "Ten Thousand." The number *rbw* /rebbō/ "ten thousand" appears in older Aramaic only in Dnl. 7:10 in the construct relation *rbw rbwn* "then thousand times ten thousand = one hundred million," a combination of the highest number word with multiplication as the highest mathematical operation that could be expressed in everyday language, in reference to the incomprehensible mass of human beings who stand before the throne of the Ancient of Days at the Last Judgment, much like T. S. Eliot's "I had not thought death had undone so many." The connection with *ʾlp ʾlpym*[42] "a thousand times a thousand" in the same verse accords with the old stylistic technique of number parallelism.[43] Scholars usually attribute the form /rebbō/ instead of */rebbā/, to be expected for a *qillāt*-form, to Canaanite influence;[44] the plural *rebb^{e}wān*[45] with */-āt/ is Aramaic. Even the Greek number words only go as high as μύριοι.

V. Verb.

1. G-stem "to Grow." In the G-stem, the verb *rbī* functions as an intransitive for "to grow" and appears with either a concrete or an abstract subject: figuratively of a small braggart[46] or of ascent to the court,[47] literally of the maturation of a human being (l. 18) and of the growth of a tree (Dnl. 4:8,17,19), of hair and fingernails, or along with *ṣmḥ* "to sprout" and *rḥš* "to creep" for organic life in general.[48] In commercial contexts, it designates the growth of capital[49] through interest.[50] Finally, the contexts of *TADAE* A4.5:1,12; 1QapGen 15:19; 4Q545 7:1; 4Q561 3:4 and 6Q8 3:1 are unclear.

2. D-stem "to Make Great." The factitive D-stem "to make great" appears only rarely in older Aramaic. In *TADAE* C1.1:25 it denotes "to rear," as it also did later,[51] while 11Q10 32:3 (Job 39:4) employs the C-stem *qšš* for this purpose. Dnl. 2:48 utilizes the verb in connection to Daniel's promotion by the king, which is otherwise expressed by means of "to install in," however;[52] cf. the G-stem in *TADAE* C1.1:2 (→ V.1).

VI. Noun "Grandeur." Because of the vowel ending, the feminine *rbw* /rabū/ "size" belongs with the verb *rbī*, but occurs mostly in religious language and denotes royal or divine majesty. The first occurrences appear in Biblical Aramaic, where the grandeur of the world tree represents Nebuchadnezzar's kingdom (Dnl. 4:19,33), but the word also explicitly designates royal power (5:18f.) and the surpassing majesty of the kingdom of God (7:27). It also refers to the majesty of God at Qumran[53] or to the wisdom associated with God.[54] In 11Q10 9: 4; 16:4 (Job 25:2; 30:15) it translates *pḥd* and *ndybh*, respectively.

VII. Noun "Officer." A stylistic peculiarity of the narrative framework of Aḥiqar is the use of the noun *rbh* /rabǣ/,[55] which occurs otherwise only in fragmentary context in *WDSP* 7:7. Most associate it with the Akkadian *rabû* and translate it "officer."[56]

רגל *rgl* /regl/; שׁק *šq* /šāq/; ירך *yrk* /yarek/; מעין *mʿyn* /meʿayn/

I. Etymology and Lexical Field. II. General Usage. III. Figurative Usage.

I. Etymology and Lexical Field. The feminine primary noun *rgl* /regl/ "foot"[1] designates the foot of humans and animals including the lower leg in Aramaic just as in other Semitic languages. In analogy to the hand, *kp* /kapp/ serves to denote the sole of the foot, occasionally given added precision as *kp rgl* "sole of the foot,"[2] and *ʾṣbʿ* the "toe" or the "finger" of the hand.[3] The upper leg, of animals the haunch,[4] is the *yrk* /yarek/,[5] as in Dnl. 2:32 or 4Q534 1 1:3. The Aramaic word for the whole leg, including the thigh and the lower leg, but distinct from the foot, is *šq* /šāq/,[6] for the knee, *brk* /berk/.[7] All three terms refer to paired body parts and are, consequently, like *rgl*, feminine in gender. Connected to the legs above are the "stomach," *mʿyn* /meʿayn/ > /meʿēn/,[8] and the "loins, hips," designated with the plural of → *ḥrṣ*. "Lame" is *ḥgyr* /ḥagīr/,[9] from *ḥgr* "to hinder, to lame,"[10] and "shoe" (usually a "sandal") is *śʾn* /śeʾn/ > /śēn/[11] or *mśʾn* /maśʾān/.[12]

In addition to the literal use for the body part, *rgl* can also appear figuratively for "times" in multiplicative terms and, less often, for "table leg"; additional idiomatic expressions also occur (→ III). In contrast, the masculine plural *špwlyn* /šepōlīn/ denotes the foot of a mountain.[13]

II. General Usage. The first Aramaic instances of *rgl* "foot" occur in the wisdom maxims of Aḥiqar, which still belong linguistically to later Old Aramaic. Here, the lifting[14] and placing[15] of one's own feet represents an everyday accomplishment which is, nonetheless, not in the hand of a human being;[16] further, a fetter (*ʾrḥh*)[17] on the feet represents discipline through strict instruction;[18] *rgl* appears once in an unclear context.[19] The context of *TADAE* D3.27:1,3,4,5 is also fragmentary; on B8.4:5; 8.6:10 (blows to the sole of the feet as punishment) → *yd* II.1.

In Daniel and several times at Qumran, the word is part of always rather extensive descriptions of a person or, at least, a human-like body. In reference to the "colossus on clay" feet, *rgl* (Dnl. 2:33f.,41f.) together with *mʿyn* "stomach" (2:32), *yrk* "thigh" (2:32), and *šq* "leg" (2:33) belong to an anatomically detailed vision, depicted from the head down, of a gigantic statue of various metals of diminishing value,[20] while accenting its human form. It symbolizes four sequential empires; the foot "partly of iron, partly of clay" (*minhēn dī parzœl ūminhēn dī ḥ^{a}saṗ*, 2:33), attached to iron legs, stands for Hellenistic dominion.[21] Just as iron and clay do not mix, this rule is also "divided."[22]

Contrariwise, feet appear in the equally apocalyptic vision of the four animals in Dnl. 7 once in relation to the first being standing "on its feet like a human" and provided with a human heart, which symbolizes a human dominion (7:4), and again in reference to the fourth, most terrible monster that "tramples [*rps*] [everything] with its feet" (7:19).

Furthermore, Qumran offers two descriptions of the physiques of extraordinary people that mention their feet in the same context as thighs (*yrk*) and legs (*šq*): the song praising the all-outshining Sarah with her beautiful feet (*špyryn*)[23] and the ominous description of Noah, the elect of God, blessed both with outstanding intellectual gifts and an extraordinary external appearance.[24]

Furthermore, feet are mentioned in the account of Tobias at the river[25] and the regulations concerning priestly law.[26] 11Q10 also has *rgl* in the literal sense for the homonymous Hebrew cognate: 12:1 (the only word in the line, but also in the Heb. text); 14:10; 22:5 (Job 28:4; 29:15; 33:11). In a fragmentary context, it appears alongside "hands" in 4Q206 4 1:12 (1 En. 88:3).

III. Figurative Usage. Of the figurative uses of *rgl*, Imperial Aramaic already attests "times."[27] The usage "table leg" is known from Qumran.[28] Finally, the nuance of *rgl* "(pilgrimage) festival" better attested later,[29] may also already be present in 1QapGen 12:14. In this improper use, agreement with *qdmyʾ* [30] "the first"[31] demonstrates it to be masculine.

רגשׁ *rgš*

I. Etymology and Lexical Field. II. G-stem “to Be Angry.” III. C-stem “to Pressure, to Oversee.”

I. Etymology and Lexical Field. The rather infrequent Aramaic verbal root *rgš*, in the G-stem “to tremble,” in the C-stem “to pressure” or “to oversee,” presumably has a cognate in the Arabic *rağasa* “to thunder.”[1] Hebrew examples[2] are borrowed from Aramaic,[3] especially since other Semitic languages of Syria-Palestine exhibit no connections. Yet, one cannot exclude the possibility that poetic diction preserves original archaisms. Moreover, one cannot determine the moment of a possible borrowing. Aramaic attests the word since the Achaemenid period and it remains productive in both West and East Aramaic. Along with the C-stem “to notice,”[4] East Aramaic also knows the G-stem “to quiver” (along with “to notice”).[5]

II. G-stem “to Be Angry.” The sole older instance of the G-stem appears in the narrative framework of Aḥiqar, probably in reference to the king’s expected reaction to Nadin’s intrigue against Aḥiqar, although between lacunae.[6] To be sure, the customary translation of the imperfect *yrgš* “to be angry”[7] suits the context,[8] but later evidence supports the general nuance “to tremble” (in anger or for some other reason).

III. C-stem “to Pressure, to Oversee.” Daniel 6 employs *rgš* three times in the C-stem, in each case supplemented with *ʿl* and the person involved. It occurs twice with the connotation “to pressure” of the influence that Daniel’s enemies at court exert on the king to disable their successful competitor through intrigue (Dnl. 6:7,16), once in the context of their

surveillance of Daniel (6:12). These differing contexts of usage led, since antiquity, to quite differing definitions.[9] The Hebrew occurrences point to a connotation "unrest," " uproar," and thus "to repair somewhere in agitation,[10] later Aramaic diction points to a basic meaning "to feel," which, in the sense of "to reconnoiter" includes not only the surveillance of Daniel according to 6:12,[11] but, with a something other than normal nuance, could also suit 6:7,16: then the court officials would be seeking to influence the king, not with impertinence but with subtle shrewdness. If one attempts, however, to link this with the meaning of the G-stem and the noun (→ I), all three instances of the C-stem can best be subsumed under the shading "to show unrest, to be active" as the causative counterpart of the G-stem "to be unrestful."[12] The verb stands in complete isolation in 1QapGen 4:1.

Gzella

T. Hansberger, "*rgš*," *ThWQ*, III, 614f.

1. *LexSyr*, 713a; *GesB*[18], 1534.

2. G-stem in Ps. 2:1; the *qitl*-noun /regš/ "unrest," first attested in late Aramaic, in Ps. 55:15 and its fem. counterpart in 64:3.

3. M. Wagner, *Die lexikalischen und grammatikalischen Aramaismen im alttestamentlichen Hebräisch*. *BZAW* 96 (1966), 105.

4. *DJPA*, 516b.

5. *DJBA*, 1059f.; *LexSyr*, 713; *MdD*, 425.

6. *TADAE* C1.1:29.

7. *ATTM*, 692; *DNSI*, 1061.

8. Thus, not a phonetic spelling of the C-stem with loss of the intervocalic /-h-/.

9. J. A. Montgomery, *The Book of Daniel*. *ICC* (1927), 272f., and J. J. Collins, *Daniel*. *Herm* (1993), 265f.; the overview in D. Helms, *Konfliktfelder der Diaspora und die Löwengrube*. *BZAW* 446 (2014), 207 n. 20 has extensive information concerning the paths taken, true and false.

10. So *GesB*[18], 1534.

11. Cf. *ATTM*, 692: "to surveil, not allow out of sight."

12. So in principle also *ATTM*, 692.

רוח *rwḥ* /rūḥ/

I. Etymology. II. “Time to Breathe,” “Space,” “to Make Wide.” III. “Breath.” IV. “Breeze,” “Wind.” V. “Soul.” VI. “Evil Spirit, Demon.” VII. “Spirit of God.”

I. Etymology. The ambiguous root *rūḥ* has a broad spectrum of different connotations, all of which have arisen from the quite general sense “breath,” “to breathe.” The spatial dimension leads to the meaning “to move out,” “to expand.” On one hand, physical experience gives rise to the nuances “breeze,” “time to breathe,” “breathing room,” and thence the broader connotations “space,” “to be/become broad,” “respite,” “rest.” On the other hand, the meaning “breath of life” leads to “soul,” extends further to “spirit” and even “demon.” All of these connotations, although quite different, occur in Aramaic. Admittedly, lexicographers link them to two roots *rūḥ* I and *rūḥ* II,[1] but an appropriate understanding of their cultural background requires the assumption of a single, monosyllabic root. The root is fundamentally a feminine, rarely a masculine in Syriac, while it is masculine or feminine in the astronomical book of Enoch and thus gender-indifferent.[2] The feminine gender applies not only to the grammatical category, but includes the concept, as the Syriac Ode of Solomon 19 demonstrates: “the Holy Spirit opens his/her womb” (l. 4).

II. “Time to Breathe,” “Space,” “to Make Wide.” Several Palmyrene inscriptions employ the noun *rwḥ* in the sense of “time to breathe, pause to breathe.” A dedicatory inscription[3] recalls the lack thereof during a long illness, while two others thank God who heard the prayer and granted a “time to breathe.”[4] The same connotation may occur in the sayings of Aḥiqar,[5] but there *ywm rwḥ* more likely means “windy day.”[6] A very beautifully prepared Palmyrene inscription, which documents an agreement

determining the rights of use of graves in the hypogaeum of Malku, first employs the noun *rwḥ*ʾ in the sense of "space, place,"[7] further the infinitive of the C-stem *mrḥ* (l. 9) and the imperfect of the C-stem (l. 11) with the connotation "to make wide."

III. "Breath." The meaning "breath" appears in a messianic text from Qumran[8] in which the author interestingly mentions the puff of God's breath. A few modern translations of these passages do not take this into account because they understand *mwldh* there as "birth" or "birthday." Now *mwldh* is doubtlessly the passive participle of the C-stem /mōlad/ with the meaning "begotten." In other words, one must translate the clause *kdy bḥyr ʾlhʾ hw' mwldh wrwḥ nšmwhy*: "because God chose him, begot him, and the puff of his breath."[9] The fragment alludes to Ps. 2:7 and is certainly messianic. It also makes clear how the word *rwḥ* could become "spirit of God," the Holy Spirit (→ VII). A synonymous expression with reference to human beings occurs in the treaties of state from Sefire, where *rwḥ ʾpwh*[10] means the "breath" or the "snorting of his nose" in a hostile sense.[11] On the broader lexical field → *nšm*; on "smell" → *ryḥ*.

IV. "Breeze," "Wind." The use of *rwḥ* with the meaning "breeze, wind" appears in the sayings of Aḥiqar (→ II),[12] in 11Q10,[13] in the Targums, e.g., Targum Jonathan of Ezk. 1:3f. and Am. 1:14, and in Dnl. 2:35 and 7:2, which mention the "four winds of heaven." These winds also play a role in the astronomical book of Enoch (1 En. 76) and serve to designate the four cardinal directions.[14] In Dnl. 7:2 they presumably represent the Ptolemies, the Macedonians, Pergamon, and the Seleucids.

V. "Soul." In Dnl. 5:12,20; 7:15; 1QapGen 2:13,17; 11Q10 3:4; 34:6,8 (Job 20:3; 40:10,12) *rwḥ* means "soul." Yet "soul" should not be understood in analogy to the Platonic or Aristotelian use of ψυχή; instead, it involves an inner force from which proceed the human feelings, intentions,

etc. Similarly, the word in this sense can denote the "soul" of a decedent.[15] This nuance already appears in a proto-Canaanite inscription from Wadi el-Ḥōl in Egypt.[16]

VI. "Evil Spirit, Demon." The meaning "demon" is rather well attested. It appears in 1QapGen 20:16,20,26,28,29 and in 11Q10 2:6 (Job 19:17) where *rwḥ hmkt lʾntty* must mean: "a spirit has possessed my wife." Additional more precise designations appear with the use for illness-demons, such as *rwḥ mkdš* [for *mktš*] "spirit of the plague"[17] or *rwḥ šḥlnyʾ* "ulcer-causing spirit."[18] "Spirit of error," [*rwḥ*]*y ṭʿwtʾ*, may occur in 1Q21 31:1; the more general concept of an "evil spirit," *rwḥ bʾyšʾ/h*, occurs in 1QapGen 20:16f. and 4Q538 1-2:4, "spirit of evil," *rwḥ bʾyštʾ*, in 1QapGen 20:28f.[19] A Nabatean incantation text, found about ten kilometers from Beersheba and dated to the period around 100 B.C.E., bans a spirit, apparently a kind of "cupid," that is supposed to be expelled by the smell of burned henna.[20] The first word on the photo clearly reads *ʾʿy*, a C-stem imperative of the Arabic verb *ġawā*: "Expel the spirit [*ʾaġiyy rūḥā*], O henna-smoke!" (l. 1), "Unbind, unbind a man, disenchant him from a woman!" (l. 8). The client of the incantation priest was presumably another woman, perhaps the wife of the man in question. The word *rwḥʾ* later occurs often in Jewish, Syriac, and Mandean spells.[21] An Akkadian derivative *ruḫu*[22] designates a kind of "witchcraft" but should not be directly associated with the Aramaic connotation of *rwḥ* "(evil) spirit."

VII. "Spirit of God." *rūᵃḥ ʾᵉlāhīn qaddīšīn* in Dnl. 4:5,6,15; 5:11f. 14; 6,4 does not refer to a spiritual being, but to an inner power that God bestowed ("inspired") on Daniel for certain circumstances. Theodotion correctly translated the plural as a singular πνεῦμα Θεοῦ Ἁγίου because Aramaic could utilize the plural of majesty with the name "God,"[23] as do Hebrew, Phoenician, Assyrian, and Babylonian.[24] This connotation does not appear, however, in Galilean targumic texts of the book of Exodus which

add the attributive "holy" to *rwḥh*,[25] nor in the Syriac Odes of Solomon 6:7; 11:2; 14:8; 19:2,4; 23:22 (first century C.E.). Some of these poetic pieces have a Jewish Christian background, like Ode 11:2 which attributes the circumcision of the heart to God's Holy Spirit.

רז *rz* /rāz/

I. Etymology. II. Biblical Aramaic. III. Qumran and Synagogue Inscriptions. IV. East Aramaic and Magical Texts.

I. Etymology. The masculine noun *rz* /rāz/ is a Persian loanword, Old Persian */rāza-/,[1] Avestic /razah-/ "loneliness, remoteness,"[2] Middle and Neo-Persian *rāz* "secret," probably not yet borrowed in Achaemenid times, but only later, primarily in the Jewish realm, but also in Syriac and Mandean. The earliest instances are those from Biblical and Qumran Aramaic; it probably arrived in Hebrew via Aramaic, but not in Biblical Hebrew; the Hebrew Sirach and Qumran Hebrew are commonly considered the earliest instances (from ca. second century B.C.E.); it occurs twice in Sirach: in the general maxim concerning behavior in relation to a stranger Sir. 8:18[3] and in relation to an enemy Sir. 12:11 "do <not?> act toward him like someone who reveals something secret."[4] Rabbinical Hebrew then borrowed it from Jewish Aramaic (→ III). In Syriac, the form also appears in writing as *ʾrzʾ*, which points to a preposed vowel;[5] the pointing provides the corresponding ʾ with a *linea occultans*.[6] The Jewish amulet ooKA 3:3[7] has *bryz pryš* or *brwz prwš* "isolated secret/most secret secret" or "entirely in secret" with an ablaut or through assimilation to *prwš* (if the reading is correct).

II. Biblical Aramaic. Biblical Aramaic attests the noun in the singular and the plural.[8] It occurs only in the Aramaic Daniel and there only in the account of Nebuchadnezzar's first dream in Dnl. 2 and once in the account of the second in Dnl. 4. The word *rz* refers to dream contents and dream interpretation.[9] That concealed in the dream is a secret and God is the

revealer of secrets. Only Daniel, gifted with it by God, has the knowledge and the capability to interpret dreams. Thus, *rz* is linked with → *ḥwī* "to announce" (2:27) and mostly with → *glī* I "to disclose, to reveal" (Dnl. 2:19,28,29,30,47). LXX has μυστήριον/μυστήρια (κρυπτά) for *rz*(*yn*). In a concept synonymous with *rz*, and with *glī*, one finds *ʿmyqtʾ* "secrets"[10] and *mstrtʾ* "hidden things" (2:22).[11] The absolute state occurs in relation to Daniel's capacities for solving mysteries (4:6), the determined state for a specific mystery (i.e., the king's dream: 2:18f.,30,47), also as the object of a verb (2:27, *ḥwī*). The absolute plural occurs in reference to the description of God as revealer of secrets (2:28,47), as does the determined plural (2:29, as the object of *glī*). Regarding the lexical field of wisdom → *ḥkm* III.2; *ydʿ* III.2; *pšr* III.

III. Qumran and Synagogue Inscriptions. The word *rz* belongs among the central terms of Jewish apocalyptic times and literature. In the Aramaic from Qumran, it occurs less than in Hebrew;[12] it is a term used primarily in the literary circles of Enoch, Noah, and the priests. Enoch, Noah, and Abraham have a special nearness to God's world and participate in heavenly knowledge. The Enoch traditions may reach back to Achaemenid times. Here *rz* concerns the question of who begot Noah, the projection of events in visions and dreams, knowledge of the heavenly books, and the revelations of the evil angels (Gen. 6). Sections of Enoch, preserved not in Aramaic, but Greek and Ethiopic, are also thematically related (such as 1 En. 9:6; 10:7; 16:3).

It occurs adverbially in the absolute state with *b*- "secretly" as a supplement of → *mll*[13] and in the construct state with a more precise identification of the pertinent mystery,[14] partly in an unclear context.[15] In the determined state, it refers to a previously mentioned mystery.[16] The plural in the absolute state appears in association with the disclosure of secrets by higher beings,[17] as does the construct state with additional definition[18] and the determined state.[19]

Similar uses appear in the Targums. Remarkably, the betrayal (*glī*) of secrets, i.e., perhaps an arcane discipline,[20] is a shameful act according to the synagogue inscription yyEN 3:4.[21]

IV. East Aramaic and Magical Texts. In Syriac (→ I), *rz* denotes "secret, mystery, symbol, sacrament," also in *brāz*(*ā*) "secret, mystical." It forms many derivates, including a verb, in the G-stem "to do secretly," and also appears in other stems.[22] In Mandean, it is a central profane and religious term for everything invisible, concealed,[23] also as an adverb *braz* "secretly, privately" and a denominal verb "to do secretly." Furthermore, *rz* "secret, secret magic" belongs to the terminology of magical texts, including Jewish ones.[24]

רחם *rḥm*; רחם *rḥm* /rāḥem/; רחים *rḥym* /raḥīm/; רחם *rḥm* /raḥm/; רחמה *rḥmh* /raḥmā/; רחמן *rḥmn* /raḥmān/; חבב *ḥbb*

I. Etymology, Lexical Field, and Constructions. II. Verb. 1. G-stem "to Love." 2. D-stem "to Have Mercy." III. Participles. 1. Active "Friend." 2. Passive "Beloved, Darling." IV. Noun. 1. Singular "Womb." 2. Plural "Mercy." 3. Adverb "Voluntarily." V. Noun "Love." VI. Adjective "Merciful."

I. Etymology, Lexical Field, and Constructions. Aramaic attests forms of the root *rḥm* "to love" since the earliest textual witnesses. They were already widespread as verbal or nominal derivations in the older phases of the language. Thus, the one occurrence of *rḥmyn* "mercy" in Dnl. 2:18 (→ IV.2) is not representative of the actual volume of usage. As a verb "to have mercy, feel compassion"[1] and noun with the apparently old double-meaning "womb, mercy," it occurs in all the chief branches of the Semitic languages. Meanwhile, the frequent usage in Aramaic for "to love, to like" reflects an indigenous semantic development;[2] Hebrew and Ugaritic[3] employ instead the no longer productive root *ʾhb*.

Otherwise, Aramaic expresses "to love" with the G-, D-, and C-stems of the root *ḥbb* with the corresponding t-passives, which is also very productive in Arabic, as an adjective *ḥbyb* /ḥabbīb/ "beloved" beginning at Qumran[4] and later as a verb[5] that largely replaced the G-stem *rḥm* in Jewish Babylonian. Both stems of *rḥm* continue in use in Jewish Palestinian[6] and in Syriac.[7] In addition to the substantival active and passive participles of the G-stem /rāḥem/ "friend" and /raḥīm/ "beloved," the masculine noun /raḥm/,[8] in the singular "womb," in the plural "mercy,"

with its feminine counterpart /raḥmā/ “love” and the adjective /raḥmān/ “merciful,” Syriac also attests various other nominal forms;[9] the feminine abstract noun /raḥmū/ “love” is common East Semitic.[10] Furthermore, → *ḥnn*, attested with certainty as a verb beginning with the book of Daniel and Qumran, denotes “to have mercy,” “to favor.”

Resulting from its very broad spectrum of meaning especially in Aramaic, forms of the root *rḥm* there refer to quite different types of affection: the gracious attention of those of higher status such as God or kings; paternal love with the incomparable bond between mother and child as its pure form; the friendship based on fidelity and similar disposition; further the attraction, also with a sensual basis, oriented on the ideal of unity and community; and finally mere fondness. All of these nuances, with various interim stages, already occur in older Aramaic, although distributed across various lexical forms, periods, and genres.

The verb *rḥm* in the G-stem “to love” with its less often attested diminished shading “to like” or “to be grateful” is transitive and usually takes a person as object; the D-stem “to have mercy” can take the supplement *ʿl* “about.”

II. Verb.

1. G-stem “to Love.” In the G-stem, *rḥm* first appears in the later Old Aramaic of the sayings of Aḥiqar in conjunction with *npš* “self,”[11] but because of the lacunae in the lines, in an unclear context,[12] and then in the Imperial Aramaic framework narrative for the king’s favor for his trusted advisor.[13]

The legal terminology of the Imperial Aramaic private contracts, in contrast, employs it in the perfect, weakened to mean “to wish, to want (to choose)” exactly like → *ṣbī* and apparently interchangeable with it for the generalizing expression of the free availability of a transferred property.[14]

In narrative texts from Qumran, the usage for love between husband and wife predominates, as well as for the illegitimate desire of pharaoh who fell in love with Abraham’s wife Sarah after he heard a description of her

beauty,[15] for the demon's possessive and destructive desire for Tobias's bride,[16] and for the authentic, seminal love of Tobias for this woman predestined for him whom he knew at first only from the angel's account but whose feelings agreed with the divine plan.[17] In the first and third cases (i.e., with humans as subject), the adverb *śgy*(ʾ) "very"[18] supplements it. The same passage from Tobit also employs the verb once for the father's love for his daughter.[19] Other examples are fragmentary.[20]

2. D-stem "to Have Mercy." Pre-Christian Aramaic attests with certainty the D-stem of *rḥm* "to have mercy" only once at Qumran, namely in 1QapGen 11:13 for God's mercy on (*ʿl*) the earth that eradicated evil in Noah's song of praise after the flood.

III. Participles.

1. Active "Friend." The active participle /rāḥem/ "friend" already occurs in early Old Aramaic. The earliest instance comes from a state treaty at Sefire and refers to an amiable king in the context of assuring free exchange of messengers between treaty partners.[21] Here, then, it has the connotation "ally."

The three instances in the somewhat later proverbs of Aḥiqar[22] are all more or less fragmentary, but seem to refer in maxims from community ethics to the social environment, not to close confidants; especially since l. 141 recommends not disclosing[23] something (perhaps secrets; the pertinent word at the beginning of the line is lost) to one's own "friends" and not allowing one's own name to be "light" to them, it must mean "others."

In contrast, the petitionary letter of the Jewish community from Elephantine to the Persian governor of Judea concerning the reconstruction of the Elephantine temple utilizes the expression *rḥmyk* "your friends" parallel to *bʿly ṭbtk* "beneficiaries of your goodness"[24] thus, not in an egalitarian fashion but for well-disposed subjects of state power.

Both nuances appear in the texts from the Dead Sea: absolutely *rḥmyʾ* "the friends" in Jason's grave inscription from Jerusalem[25] for the people

who constructed a grave for a deceased private citizen; similarly somewhat later in Palmyra;[26] in Nabonidus's prayer from Qumran between lacunae *rḥmy* "my friends" probably of the closest circle around the king; in 1QapGen 21:21 Abraham's friends; and in 11Q10 38:5 (Job 42:11) *kl rḥmwhy* "all his friends" alongside *kl ʾḥwhy* "all his brothers" for the circle of Job's acquaintances. Meanwhile, language concerning "God's friends" in religious diction presupposes a difference of rank.[27]

Finally, under the influence of Hellenistic titles for rulers, the kings of the Aramaic-speaking states in the Roman east province also employ the epithet /rāḥem ʿammeh/ "loving his people," both in the Nabatean kingdom[28] and in Hatra (/rāḥem māteh/ "loving his country").[29] The model is probably φιλόπατρις or φιλόδημος;[30] on *rḥym* at Palmyra → III.2.

2. Passive "Beloved, Darling." If the active participle of *rḥm* designates an affection (of whatever degree) that proceeds from a self, the passive /raḥīm/ is used for "beloved, darling," and, thus, is oriented on the favorable attitude that proceeds from another. In most cases, it refers to someone favored by God, so already in the earliest instance in a saying of Aḥiqar of one who is *rḥym ʾlhn* "beloved by the gods,"[31] so that they supply him with something good to say. It appears with the same nuance in 1QapGen 2:20 of Enoch[32] and perhaps to be emended in 11Q10 27:1.[33]

Meanwhile, a few honorific inscriptions from Palmyra employ the attributive *rḥym* in combination with *mḥwzh* or *mdythwn* on the model of φιλόπατρις (→ III.1) for loyal citizens who have distinguished themselves as benefactors,[34] but may be a passive participle "beloved of his/her city" here since a plene spelling for a short /e/ as in /rāḥem/ would be very unusual in Palmyrene.[35] Thus, Aramaic appears as a means of expressing a self-conscious municipal middle class.[36]

In the address of a papyrus letter from Egypt in late antiquity, *rḥymy* "my beloved" stands beside *ḥbwby* "my darling" and also refers to esteem

among people.

IV. Noun. The meaning of the *qatl*-noun *rḥm* /raḥm/ depends on the number, in the very rare singular "womb, lap," in the plural "mercy." Lexicalized in *brḥmn*, the latter can also denote "voluntarily."

1. Singular "Womb." In older Aramaic, *rḥm* "womb" occurs only in 11Q10 30:6 (Job 38:8) from Qumran as the literal rendering of *rœḥœm*, here metaphorically for the primal sea the source of all water in creation;[37] the literal meaning, very old judging by the etymology, first appears in post-Christian times.[38] Elsewhere, *bṭn* /baṭn/ (> /baṭən/) "stomach"[39] appears in the meaning "womb."

2. Plural "Mercy." The plural *rḥmyn* for the "mercy" of God or a high-ranking person occurs since Imperial Aramaic. It first appears in the official letter style in the address in the wish for favor for the addressee: *TADAE* A4.3:2[40] and 4.7:2 par. 4.8:2,[41] both with → *qdm*; apparently similarly, although fragmentary, in the wish for blessing in a graffito.[42]

Since Biblical Aramaic, religious speech attests the word expressly for God's mercy. In Dnl. 2:18 it appears in a request for deliverance from mortal danger. At Qumran this mercy appears in petitionary prayer in general,[43] as an attribute of God, who can grant mercy (→ VI)[44] and also demonstrates it,[45] and as the mercy that continues to fail evildoers.[46]

3. Adverb "Voluntarily." Lexicalized as *brḥmn* "voluntarily, as a gift, gratis," the word appears regularly as an adverbial modifier of → *yhb* "to give" in Imperial Aramaic private documents.[47] In this usage, it seems to be synonymous with the somewhat less common expression *brḥmh* (→ V), which is based on the feminine singular.

V. Noun "Love." Originally, *rḥmh* /raḥmā/ may have been the feminine of /raḥm/ (→ IV),[48] but its meaning in older Aramaic is closer to

the plural *rḥmyn*. The nuance "love" evident later[49] may first appear in a formula in a Nabatean marriage contract from the Dead Sea concerning the security of the dowry.[50] If one should, in fact, read *rḥmh* here, the word along with *šwptw* "partnership" refers to marital community.[51] The meaning is weakened to "voluntarily, as a gift" in the Imperial Aramaic legal flourish *brḥmh* or adverbial *rḥmt* with *yhb* "to give" in analogy to the more frequent *brḥmn* (→ IV.3).[52] It appears once in Palmyrene in the combination *mn rḥmʾ* to serve for "out of grace."[53]

VI. Adjective "Merciful." Finally, the adjective /raḥmān/ "merciful" functions as a predicate of God since the earliest Aramaic sources (→ IV.2) and was borrowed in Arabic. The introductory hymn of the Tell Fekheriye inscription (ca. 850 B.C.E.) employs it as an attribute of Hadad, who shares his plenty with the earth.[54] In the later sayings of Aḥiqar, it could appear substantivally as a title, "the merciful" for El in comparison to the king;[55] in the Imperial Aramaic framework narrative, however, it also denotes a gracious king (l. 53). It continues to appear regularly as a divine predicate at Palmyra.[56]

רחץ *rḥṣ*; רחצן *rḥṣn* /roḥṣān/

I. Etymology. II. Biblical Aramaic. III. Aramaic Texts from the Dead Sea. IV. Targums Onqelos and Jonathan.

I. Etymology. The Aramaic root *rḥṣ*[1] has cognates in Akkadian and Arabic. It is not related, however, to the Hebrew root *rḥṣ* "to wash," which other Semitic languages also attest, and, as evidenced by the correspondence of phonemes, arose from an original **rḥṣ́*. Consequently, it appears in Aramaic, where Imperial Aramaic attests it sporadically and then at Qumran, as *rḥʿ*.[2] Semantically, Aramaic *rḥṣ* relates to the realm of benevolence and confidence.

II. Biblical Aramaic. The root *rḥṣ* first appears in Aramaic in the Biblical Aramaic of Daniel as a perfect verb in the Gt-stem. It occurs here together with the preposition *ʿl* in the meaning "to trust, to depend on someone": *wšyzb lʿbdwhy dy htrḥṣw ʿlwhy* "and he delivered his servants, who place their confidence in him (God)" (Dnl. 3:28).

III. Aramaic Texts from the Dead Sea. In the Aramaic texts from the Dead Sea, *rḥṣ* also occurs as a verb in the Gt-stem with the nuance "to trust, to be confident." In 11Q10 32:10 (Job 39:11), [*h*]*ttrḥṣ b*[*h*] "Do y]ou trust hi[m]?"[3] the preposition *b*- introduces the object; in 11Q10 35:2 (Job 40:23), *ytrḥṣ dy yqblnh ʾgwgʾ* "he trusts that the fissure will receive him,"[4] in contrast, the conjunction *dy* "that" introduces an object clause following the verb.

Finally, the Aramaic texts from Qumran contain the masculine substantive *rḥṣn* /roḥṣān/ "security" derived from the same root: 11Q10 9:5 (Job 25:3) *hʾyty rḥṣn lḥš*[. . .] "Is there security for . . .?";[5] 27:1 (Job 36:7) [*wkl r*]*ḥymwhy lrḥṣn yrmwn* "[and all] his [fr]iends will be raised in security."[6] The meaning of the substantive may suggest a more profound semantic nuance for the root *rḥṣ*, namely the feeling of confidence that arises from the feeling of trust and security with something else.

IV. Targums Onqelos and Jonathan. Targums Onqelos and Jonathan continue the use of the substantive *rḥṣn* "security" and of the verb in the Gt-stem. As already in Dnl. 3:28, the verb takes the preposition *ʿl* (e.g., in 2 S. 22:31: *tqwp hwm lkl dmtrḥṣyn ʿl mymryh* "He is power for all who place their confidence in him") or as in 11Q10 the preposition *b*- (e.g., 2 K. 18:5: *bmymrʾ dywy ʾlhʾ dyśrʾl* "he trusted the Memra of the Lord, the God of Israel"). The G-stem also expresses the same meaning "to trust," however; *rḥṣ* belongs to the group of verbs that could easily be employed as passive participles,[7] e.g., 2 S. 22:3: *rḥṣny dʿl mymryh ʾnʾ rḥyṣ bʿdn ʿqʾ* "my security that trusts his Memra in the time of distress." Finally, *rḥṣ* also forms a verb in the C-stem, "to give confidence," e.g., 2 K. 18:30: *wlʾ yrḥyṣ ytkwn ḥzqyh ʿl mymrʾ dywy* "and Hezekiah should not give you confidence in the Memra of the Lord. . .!" Cf. *DJPA*, 522a; *DJBA*, 1070f.

רחק *rḥq*; רחיק *rḥyq* /raḥḥīq/

I. Etymology, Lexical Field, and Constructions. II. G-stem “to Be Far.” III. C-stem “to Remove.” IV. Adjective “Far.”

I. Etymology, Lexical Field, and Constructions. All branches of the Semitic languages know forms of the common root *rḥq* “to be far, to depart,” although its productivity differs widely in the individual languages. It constitutes the opposite of → *qrb* “to be near.” In older Aramaic, the intransitive G-stem occurs primarily as a fixed term in the Imperial Aramaic legal tradition for “to relinquish,” modified with *mn* indicating the thing relinquished. The transitive C-stem “to remove, to take away” (with *mn* “from”) is relatively rare; later in Aramaic, the D-stem “to remove, to banish” appears most, sometimes with a t-passive, sometimes also the C-stem.[1] Usually, the adjective /raḥḥīq/ “far” expresses the state of spatial distance,[2] the verbs → *ʿdī* or → *npq* express the process of going away, and *lqḥ*, → *nṣl* or → *nśī* denote “to remove, to take away.” In reference to legal succession, /raḥḥīq/ can also mean “not related” in contrast to /qarrīb/ “related” (→ IV). It functions as a temporal future expression only quite rarely; otherwise Aramaic generally uses *ʾḥr*.[3]

II. G-stem “to Be Far.” The G-stem of *rḥq* appears literally for “to be far, to go away” once each in late old Aramaic,[4] in Imperial Aramaic[5] and at Qumran,[6] always with *mn* “from.”

It appears more often, however, in Imperial Aramaic legal texts in the first-person perfect together with *mnk* or *mnh* “I/we have distanced myself/ourselves from you/him” as by far the most common expression for

relinquishing a property or legal claim.[7] It regularly occurs there in conjunction with → *ṭīb lbby* to designate a previously satisfied need.[8]

This juridical terminology continues in the phraseology of the Palmyrene grave certification inscriptions, which were rooted in Imperial Aramaic legal traditions.[9] In exorcisms, the verb can also refer to a demon to be expelled.[10]

III. C-stem "to Remove." The C-stem of *rḥq* first occurs in Aramaic four times at Qumran. In the active voice, the verb appears in Levi's prayer in the petition that God remove everything evil from the supplicant,[11] and three other times, presumably in the passive voice:[12] twice in the context of the heavenly journey of Enoch who was taken in a dream into the very remote otherworldly landscape,[13] and once in a fragmentary context in 11Q10 2:3 (Job 19:13).

At least in the latter passage, the verb could also appear as an intransitive meaning "are gone away,"[14] as is sometimes true of the C-stem of *rḥq* in Hebrew (e.g., Gen. 44:4; Ex. 8:24; Josh. 8:4; etc.). For Enoch that is unlikely, however, because the other actions are also passive and, typical for the genre, the visions appear to the visionary only as a nonparticipating spectator,[15] similarly → *ḥlp* IV.

In the magical text ooXX 10:3, the participle "you are removed" stands as the result in accord with the G-stem (→ II).

IV. Adjective "Far." The root appears at Qumran as the adjective /raḥḥīq/ "far" in the spatial sense, mostly defined further by *mn* "from" in reference to distant locations, both earthly[16] and heavenly,[17] or for a relative distance.[18] Figuratively, it appears with → *hwī* in Ezr. 6:6 for "Keep out!" as the king's comment to the opponents of the construction of the Jerusalem temple and temporally in "distant generations" in contrast to the present (*dr*)[19] in 4Q201 1 1:4 (1 En. 1:2). In 11Q10 28:3; 33 (Job 36:25; 39:25) with *mn*, it translates Hebrew *mērāḥōq* "from afar"; the context of *TADAE* A3.5:7 is fragmentary; 4Q571 2 is an isolated fragment.

Contrariwise, two nuances in Imperial Aramaic private documents are specifically juridical: first, corresponding to the verb in the G-stem (→ II) "relinquishing,"[20] and, second, for "not related" (or "not a near relative"?) in contrast to *qryb* "related."[21]

ריח *ryḥ* /rēḥ/; ריח *rīḥ*

I. Etymology. II. Noun "Smell." III. Verb "to Smell."

I. Etymology. Apparently, the noun *ryḥ* /rēḥ/ "smell" is related to /rūḥ/ "wind, spirit,"[1] yet the exact morphological relation is not entirely clear.[2] Like /rūḥ/, it can behave as a masculine or a feminine. The verb *rīḥ*, in the transitive C-stem "to smell," is a derivative. In older Aramaic, the noun occurs once in Daniel and several times at Qumran, the verb beginning at Qumran. Both still appear later,[3] in Mandean only the noun.[4] This distribution makes the assumption of a Hebrew loanword[5] rather unlikely.

II. Noun "Smell." The first occurrence of *ryḥ* "smell" is in Dnl. 3:27 in the phrase *ryḥ nwr* "smell of burning" in the hyperbole of the miracle story of the fiery furnace:[6] the power of the fire left behind not only no visible trace, but it could not even be smelled. At Qumran, it refers to the fragrance of incense offerings.[7]

III. Verb "to Smell." Judging from the parallel versions in 4Q196 14 1:12 (Tob. 6:18, partially emend.), the verb *rīḥ* "to smell" appears in a demon exorcism through the burning of fish entrails and figuratively in 11Q10 33:6 (Job 39:25) for "to smell battle."[8] The readings of 4Q531 16:3 and 11Q18 18:1 are uncertain.

7. 1QapGen 10:17, with *mqṭwrt*; indeed, consistently in a fixed phrase with *nḥwḥ* “aroma of incense offering” (→ *mnḥh* III.3) or “pleasing fragrance” (*ATTM*, 2, 481) in 11Q18 13:7; 22:5; 29:6; 33:1; perhaps also in 4Q204 1 12:29 [1 En. 31:3], contra *DSSStE*, 418f. (*bš*]*m ryḥ* “fragrant [aro]ma”).

8. → *qrb* V.

רים *rīm*; רם *rm* /rām/; רמה *rmh* /rāmā/; רום *rwm* /rūm/; מרום *mrwm* /marōm/

I. Etymology and Forms. II. G-stem “to Be High.” III. C-stem “to Elevate.” IV. L-stem “to Praise.” V. Adjective “High,” “Elevated.” VI. Noun “Height.”

I. Etymology and Forms. The Aramaic *rīm*, as a verb in the G-stem “to arise,” apparently developed from a common Semitic **rūm* “to be high,” whose */ū/ vowel survives in both of the derived masculine nouns /rūm/ “height” and /marōm/ “located high, highland.” Personal names transmitted in cuneiform, however, indicate /ī/ as a thematic vowel in the imperfect of the G-stem, which suggests a secondary transfer in the II-*ī* root class in Aramaic.[1]

For “to arise” in the literal sense of “to stand up,” however, Aramaic generally employs → *qūm* so that *rīm* often denotes either figuratively and/or ingressively “to elevate oneself, to become haughty” or “to laud,” or causatively “to elevate, to make high.” The meaning “to arise” is linked to the rare intransitive G-stem “to be/become high,” “to elevate” with the transitive C-stem and its t-passive. The verb appears with the declarative-estimative nuance “to praise” in older Aramaic in an allomorph of the D-stem, which was apparently uncommon in this time, and for “to overdo” in the related t-stem. Forms such as the participle /marōmem/ in Dnl. 4:34 and the t-imperfect in 5:23 involve an L-stem, apparently formed in Aramaic on the *pawlel* pattern[2] and therefore cannot, or at least not directly, correspond to the Arabic purpose stem *fāʿala* since, according to phonetic

principles, Aramaic would have preserved its /ā/.[3] It can take prepositional modifiers (*l-*, *ʿl*, *ʿd*).

In addition to the substantives (see above), the root also forms the adjective /rām/ "high" in the literal or the figurative ("august") senses. In the spatial nuance "high," *rīm* overlaps the rare Aramaic root *gbh*,[4] → *gʾī* also often represents the connotation of arrogance. Also regularly employed figuratively, → *špl* "to be lowly" functions generally as an antonym, rarely does *mkk* do so.[5] For "poor, miserable" → *ʿnī* II.

II. G-stem "to Be High." The G-stem "to rise, to become high/arrogant" occurs only sporadically; the adjective usually denotes "to be high" (→ V). Besides a possible instance in an Aśoka inscription, unexplained in form and meaning,[6] it can first be identified with certainty as a perfect in Dnl. 5:20. It refers to Nebuchadnezzar's arrogance and has → *lbb* "heart, mind" as subject and parallels *rwḥh tqpt lhzdh* "his spirit gathered strength to behave arrogantly."[7] The perfect here probably designates an ingressive change of state which then provoked divine punishment; the cause that brought the vessel to overflow was, according to the parallel passage Dnl. 4:26-28, the king's sudden feeling of self-satisfaction.

The instance nearest in time[8] is also best understood in context as fientic-dynamic and not stative. In the dream of the olive tree and the cedar, Noah saw how the shoots from the cedar *rʾmʾ* "shot out" *ʿd rwmh* "up to its (the cedar's) heights." Thus, the meaning here is also "to become high" (consequently it is not an adjective), indeed in the literal sense. Similarly, 11Q10 27:1 (Job 36:7), the third instance from earlier times, has the finite verb form *ymwn* "they will arise"[9] in reference to the righteous.

III. C-stem "to Elevate." The C-stem "to make high" is somewhat better attested. It already occurs in Old Aramaic and refers to the erection of a wall in an account of royal deeds[10] and in a clause in a contract from Sefire[11] probably in reference to the prohibited instigation of refugees

against an ally, possibly in the sense that, in arrogance, they renounce their loyalty to the former lord or that, raised from their old dependence, they become arrogant—which better suits the otherwise attested use of the C-stem.

Daniel 5:19 employs the verb with this second nuance for the absolute rule of Nebuchadnezzar, who elevates and humbles,[12] whereby he then became arrogant himself.[13] Here, the verb has affinities with the D-stem of *rbī* "to make great."[14]

The texts from Qumran also exhibit both literal and figurative uses. 1QapGen 22:20 uses the verb for raising the hands of another.[15] Otherwise, Aramaic uses for this first *nśī*, and sometimes *nsb*,[16] but the analogous form in Gen. 14:22 may have influenced the choice of words. 11Q10 33:9 (Job 39:27), "to build a nest on high," also employs it for the Hebrew *rīm*.

As a construction term for "to erect," it appears in a contract[17] along with *ʿmq* "to deepen."

The Ct-passive "to be elevated" first appears in 4Q547 9:6. In this passage, it means "to be elevated," in reference to a priest,[18] who stands above even the angels.[19]

IV. L-stem "to Praise." The specific figurative shading "to laud" belongs to the narrowly defined functional spectrum of the L-stem.[20] In the active, it functions as a rare synonym of other verbs of praise such as the general → *šbḥ* and the likewise specific → *hdr*[21] and appears, along with them, in the praise for God by the reinstalled King Nebuchadnezzar in Dnl. 4:34. The combination of *šbḥ* in first with *rīm* in second and *hdr* in third position may well be based in the fact that Nebuchadnezzar now acknowledges God's superior majesty and glory and thus sees his own dominion in an appropriate perspective.[22]

According to the parallel versions, one should reconstruct an additional form *wry*[*wmmw* in Tobit's call to praise,[23] according to *ATTM*, 2, 93 also at the end of 1QapGen 10:9, which, however, the few and unclear remnants of letters render unverifiable.

In the Lt-stem, the declarative-estimative nuance "to present as august" refers directly to the subject elevated, which then takes on the nuance "to boast, to arise." Such a form also probably appears in *TADAE* C1.1:138, where, with *ATTM*, 488,695 and others, one should presumably correct *ytrwm* to *yrwmm* since older Aramaic nowhere else attests forms of the D-stem on the pattern of trilateral verbs;[24] furthermore, one would expect /y/ in a strong form. This passage intends the boasting positively because it refers to the names (*bšm*)[25] of father and mother and thus fulfills the commandment to honor parents.

Contrariwise, it has a negative connotation in Dnl. 5:23 in the rationale for the divine judgment against Belshazzar: with the blasphemy "against the Lord of heaven [*ʿl mrʾ šmyʾ*]" he had "vaunted himself [*htrwmmt*]." In the light of the uses of the verb otherwise, this refers less to an act of rebellion on the king's part than to the gesture of sitting in God's place at his own feast and drinking wine from God's holy cultic vessels, i.e., of relating the fame reserved for God to himself. In 11Q10 27:3 (Job 36:9) *gbr* functions similarly.

V. Adjective "High," "Elevated." In Aramaic, the adjective *rm* /rām/ "high" replaced the corresponding forms of *gbh*, which is attested only in rudiments, although in light of its use in names[26] it was once apparently the more common root. In addition to the literal sense, it also found figurative use, more often positively for "august" in reference to human and divine beings, sporadically negatively for "arrogant." The earliest instances stem from the proverbial wisdom of Aḥiqar and employ the word for the status difference in the warning not to quarrel with a superior,[27] a maxim widespread in wisdom literature;[28] further in a fragmentary context, perhaps as the object of the C-stem of *špl* "to debase."[29]

To date, no certain Imperial and Biblical Aramaic instances are known, but at Qumran, the literal meaning "high" occurs several times in visions: for a cliff,[30] a mountain reaching to the heavens,[31] and with an unclear reference in relation to the new Jerusalem.[32] It appears figuratively for

"arrogant" in 11Q10 34:6 (Job 40:10, for *gbh*) and 34:7f. (40:12, for *gʾh*), with the reduction of the synonyms available in Hebrew that characterizes this translation, it appears in 5:4 (21:22) as a substantive for "nobles,"[33] whom God judges. The substantival feminine occurs in the place name Ramat Hazor "Heights of Hazor,"[34] the first component of which l. 11 ("these heights. . .") alludes to. In contrast, in 14:10 /rūm/ is meant (→ VI). *ATTM*, 2, 90 interprets *rmwhy* at the beginning of 5:11 as "his high (angels)," but the fragmentary context also permits one to consider a form of → *rmī* "to throw." Beyer suspects the same word in 4Q534 1 1:6.[35]

VI. Noun "Height." Finally, *rwm* /rūm/ designates the abstract concept of "height": so in Dnl. 3:1 of a statue, in 4:7f.,17 of the world tree, and in Ezr. 6:3 of the temple to be newly built. Everywhere, the height is determined more precisely or exactly. Parallels occur in the two tree visions of 1QapGen 13:13; 14:10[36] and in the dimensionally precise description of the new Jerusalem.[37] Furthermore, the height of heaven is part of Enoch's secret knowledge.[38]

The rare noun *mrwm* /marōm/ "highly placed" should be emended in 11Q10 9:5 (Job 25:2) as [*bmrw*]*mh* following the Hebrew counterpart[39] and refers to heaven.

39. According to *ATTM*, 695 borrowed.

רמי *rmī*

I. Etymology, Lexical Field, and Constructions. II. Literally “to Throw.” III. Figuratively “to Place On.”

I. Etymology, Lexical Field, and Constructions. To be sure, the verbal root *rmī* “to throw” has a common etymology as evidenced by its cognates in the major branches of the Semitic languages, including Akkadian and Classical Ethiopic, but among the languages of Syria-Palestine, it is only more productive in Aramaic.[40] In contrast, the few instances in Hebrew, which otherwise uses *ṭūl* and especially *yrī* I for “to shoot,”[41] belong to poetic diction (Ex. 15:1,21; with the nuance “to shoot” Jer. 4:29 and Ps. 78:9), and the meaning of the one possible occurrence in Ugaritic is uncertain.[42]

In Aramaic, this verb occurs in the transitive G-stem, sometimes supplemented with adverbial local designations following the prepositions *l*- “into” (directional), and less often *b*- (locative) or *ʿl* “on.” Most usages fall under the literal use “to throw” of objects or persons, including “to set up” (Dnl. 7:9) or “to cast down.” Occasionally, the word functions figuratively for “to place upon” (of a tax, Ezr. 7:24). Pre-Christian Aramaic expresses the passive through an ablaut (inner passive) or the Gt-stem. Initially, this replaced the inner passive of the imperfect and also spread, at the latest in the post-Christian era, to the perfect. Consequently, the distribution of forms in Biblical Aramaic depends on the conjugation.[43]

Contrariwise, the relationship to the verb *rmī* “to deceive,” attested in Hebrew and post-Christian Aramaic in the D-stem, is controversial. Because of its quite different meaning, lexicographers usually associate it with a homonynous root *rmī* II.[44]

Furthermore, post-Christian Aramaic has the verb *ṭlq* in the D-stem with a related t-passive[45] and, especially East Aramaic, the verb *šdī* in the G-stem[46] for "to throw." Besides possibly in a few Imperial Aramaic ostraca from Idumea,[47] this second verb also already occurs in later offshoots of the Imperial Aramaic written tradition, namely in Frahang and Palmyrene.[48]

II. Literally "to Throw." With the literal meaning "to throw," *rmī* first appears in the book of Daniel where, in most passages, it refers to the punishment of persons thrown into the fiery furnace[49] or the lions' den[50] because of their exercise of religion. In both stories, the issuance of a royal law[51] results, first, in the punishment,[52] then, in God's wondrous deliverance, and, finally, in the king's acknowledgement of the true God. In contrast, the verb in Dnl. 7:9[53] refers to the establishment of thrones in the divine judgment scene.

A series of additional nuances appears in texts from Qumran. In addition to the concrete meaning "to throw on the fire [*ʿl nwrʾ*]"[54] or "to throw into the abyss [*lbwr*]"[55] in a fragment in relation to the fall of the angels,[56] all mostly as in Daniel as a punishment, Qumran also employs the word several times for "to throw down."[57] In the address to a fool, into whose mouth it will be "thrown,"[58] either the first or the second nuance may be intended given the fragmentary context. With *ʿl*, *rmī* appears in Abraham's attack against the great kings in 1QapGen 22:8 and may mean intransitively "to lunge at"[59] or "to shoot."[60] For 1QapGen 6:13, where *ATTM*, 2, 92f. suggests *rmʾ* "he surprised," other editors suggest the adjective *rbʾ* "the great."[61] Regarding 5:11 → *rīm* V.

III. Figuratively "to Place On." Older Aramaic attests the meaning of *rmī* "to place on" only in Ezr. 7:24. There the verb appears with three different terms for taxes (*mndh*, *blw*, *hlk*)[62] as object and the preposition *ʿl* "on someone" in relation to the tax exemption of the temple personnel. It

also appears later with the same nuance;[63] otherwise, older Aramaic has *śīm*[64] or *šwī* II.[65]

The reading and meaning of a supposed additional instance in the Xanthos inscription[66] are debatable since *dmʾ* "estate" may appear here instead of *rmʾ*.[67]

רעי *rʿī*; רעו *rʿw* /raʿū/; רעין *rʿyn* /reʿyān/

I. Etymology and Lexical Field. II. Verb “to Be Well Pleased.” III. “Pleasure, Will.” IV. “Idea, Wish.”

I. Etymology and Lexical Field. In accordance with the principles of Aramaic phonetics, the root *rʿī* “to be well pleased” traces back to an older West Semitic **rṣ́ī* and is related to the Hebrew *rṣī*. The verb appears in Old Aramaic, which still preserved an equivalent of */ṣ́/, as *rqī*.[1] Since Biblical Aramaic, two related nouns appear, a feminine /raʿū/ “pleasure, will” and a masculine /reʿyān/[2] “idea,” less often “wish.” Both also occur as Aramaic loanwords in Qoheleth with the meaning “to strive” and apparently are interchangeable.[3] The semantic spectrum evident in forms of the root is close to that of → *bʿī* “to seek,” → *ṭīb* “to be satisfied,” → *ṣbī* “to wish, to want,” and → *rḥm* “to love, to like, to find pleasing” with their various peculiarities according to context and linguistic register.

II. Verb “to Be Well Pleased.” The earliest instances of the verb appear in a treaty of state from Sefire and, in context, mean “to appease, to pacify,”[4] although debate continues whether the G- or the D-stem is involved here.[5] As a legal term, sales contracts from Samaria also employ it for “to be united with one another [*ḥd mn ḥd*],” probably in the G-stem. It arises from a tradition other than Elephantine documents.[6] Two possible instances of “to accept graciously” at Qumran[7] are debatable paleographically.

III. “Pleasure, Will.” The substantive *rʿw* /raʿū/ “pleasure, will” first occurs in Biblical Aramaic. Ezra 5:17 employs it for a royal decree parallel

to the typical Imperial Aramaic expression *hn ʿl . . . ṭb* "if it . . . pleases."[8] In 7:18 it accompanies *k-* "according to" of God's will. The second nuance predominates in the texts from Qumran. There, in addition to the adverbial usage *krʿwth* "according to his will," as in Ezr. 7:18, in the context of God's omnipotence[9] or a just doctrine[10] in the genitive with another noun in the construct state, the word denotes a sacrifice well-pleasing to God[11] or people who stand in God's favor.[12] The parallels with this and with *bny rṣwnw* in 1QH from Qumran indicate that, with ἄνθρωποι εὐδοκίας, the angels' message of peace at the birth of Jesus (Lk. 2:14) originally meant not people "of good will" (*bonae voluntatis*), but those—not just available through good intentions—well-pleasing to God. The old Syriac version of Sinaiticus has *ʾrʿwtʾ* in this passage.[13]

The noun refers to the human will in religious documents at most perhaps in 1QapGen 2:23, but the preceding text is lost. It is common, however, in legal diction in the combination *mn rʿwt* "from the free will of" with a suffix.[14]

IV. "Idea, Wish." The distribution of *rʿyn* /reʿyān/ is much more confined in older Aramaic. The book of Daniel utilizes it throughout in the sense of "idea," always in the context of disturbance or terror in view of a revelation concerning the relationship between divine and human power. In Nebuchadnezzar's night vision of the statue, it denotes the king's "growing"[15] concern in his bed (*ʿl mškb*, Dnl. 2:28)[16] regarding the future and the thoughts of his heart,[17] which, thanks to Daniel's interpretation, he can recognize himself (2:29). In Belshazzar's horrified reaction to the writing on the wall, it is the subject of the verb → *bhl* "to terrify" and accompanies the paling of the king (Dnl. 5:6,10). Also together with *bhl*, it occurs in reference to Daniel himself in his role as interpreter of Nebuchadnezzar's second dream concerning the world-tree (4:16), and, finally, in Daniel's own vision of the four apocalyptic monsters that leaves him disturbed (7:28). Everywhere, then, the cause is a puzzling and, as with

Hieronymus Bosch, ambivalent/fascinating insight into the invisible fundamental structures of the world.

The nuance "wish," in contrast, surely underlies the use in Qohelet (→ I). J. P. M. van der Ploeg and A. S. van der Woude[18] and *ATTM*, 289, however, also assign *rʿyn* in 11Q10 15:7 (Job 30:3) to this word: "green(ery) was a wish" with a subject *hwʾ* as copula. The alternative interpretation as a masculine plural participle of *rʿī* "to pasture" in a periphrastic construction with → *hwī*[19] is also possible, since the expected /hawō/ "they were" is spelled *hww* or *hwwʾ* [20] and rarely also *hwʾ*.[21] The picturesque expression in Hebrew "who gnaw away [*ʿrq*] the dry land" fundamentally permits both possibilities. The relationship of "idea" and "wish" is semantically easy since, e.g., in many languages "must" functions both epistemically ("it must be the case. . .") and deontically ("he must be present [is obligated]").

שׂב *śb* /śāb/; שׂיבה *śybh* /śaybā/

I. Etymology. II. Usage in Older Aramaic. III. Biblical Aramaic. IV. Aramaic Texts from the Dead Sea.

I. Etymology. The Aramaic root *śīb* "to be/become old," first attested as a verb in post-Christian times,[1] has cognates in Canaanite (especially in Hebrew), Ugaritic, Akkadian, North Arabic, Modern South Arabian, Classical Ethiopic, and in various modern Semitic languages of Ethiopia.[2] It originally had the meaning "to have gray/white hair, to become gray/white-haired" and, consequently, often refers to various degrees of age and aging. After the merger of */ś/ with /s/ in the second half of the first millennium B.C.E.,[3] it also appeared in Aramaic as *sīb*. In addition, → *ʿlym* functioned as the antonym "youth," and *zʿyr* "small" as "young."[4]

II. Usage in Older Aramaic. In a few Imperial Aramaic documents from Egypt, one encounters the root *śīb* as the adjective[5] *śb* /śāb/ "old,"[6] as in *TADAE* B3.10:17: *lqbl zy sbltny wʾnh ymyn sb* "because she supported me,[7] when I was aged of days."[8]

Furthermore, the adjective *śb* occurs at least twice in the framework narrative of Aḥiqar, indeed in a substantival use "old man":[9] *ʾḥyqr zk śbʾ spr ḥkym* "that Aḥiqar, the old man, a wise scribe" and perhaps also (if not adjectival) in l. 17: *śb ʾnh lʾ ʾkhl lmplḥ bbb hyklʾ* "I am (an) old (man), I will not be able to serve in the gate of the palace."[10]

III. Biblical Aramaic. Biblical Aramaic also attests *śīb* several times as an adjective or participle in a substantival use, although here in the plural.

All of the examples come from Ezra and do not denote "old (person)" generally, but the elders of the Jews specifically, e.g., Ezr. 5:5: *wʿyn ʾlhhm hwt ʿl śby yhwdyʾ* "but the eye of their God was on the elders of the Jews"; 5:9: *ʾdyn šʾlnʾ lśbyʾ ʾlk knmʾ ʾmrnʾ lhm* "then we asked those elders; thus we said to them: [. . .]." Ezr. 6:7f.,14 also employs it in the same function as a title.

IV. Aramaic Texts from the Dead Sea. Furthermore, the adjective/participle *śb* "old" appears in the Aramaic texts from the Dead Sea, e.g., in 2Q24 4:13 *śbyʾ dy bhwn* "the oldest among them."[11] In addition, its substantival use in the plural with the meaning "elders" appears frequently, e.g., 4Q562 2:4 *khnym wkl śbyʾ* "the priests and all the elders."[12] It may also constitute a component of the masculine name *brśbʾ*,[13] literally "son of the old (man)."

Finally, *śīb* constitutes an (abstract) feminine verbal noun *śybh* /śēbā/ (< /śaybā/) "(old)age," first identifiable in 4Q204 1 5:6 (1 En. 10:17): *wkwl ywmy* [. . . *w*]*śybtkwn bšlm yt*[*mlywn*] "and all the days of [. . . and] your old age will be [filled] with well-being/peace."[14]

שׁגי/שׁגא *śgʾ/śgī*; שׁגיא *śgyʾ* /śaggī/; שׁגא *śgʾ* /śogā̆/; משׁגה *mśgh* /maśgā̆/

I. Etymology, Forms, and Lexical Field. II. Verb in the G-stem "to Be Many." III. C-stem "to Multiply." IV. Noun "Quantity." V. Adjective. 1. "Many." 2. "Very."

I. Etymology, Forms, and Lexical Field. Through the use of forms of the root *śgī* "to be many," arisen from **śgʾ*,[1] Aramaic differs from other Semitic languages; therefore, the occurrences in Hebrew (Ps. 73:12; 92:13; Job 8:7,11; 12:23; 36:24) are probably borrowings. Because of this development, the meaning of → *rb*/*rbī* in Aramaic is limited to "large" and "to grow." After the merger of */ś/ with /s/,[2] phonetic spellings with *s* appear. In addition to the verb, in the G-stem "to be many" and in the C-stem "to multiply," the root primarily forms the very frequent adjective /śaggī/ "many,"[3] also employed as an adverb "many." Modifiers following *k*- can indicate the quantity via a comparison with both stems.[4] Substantives with the meaning "quantity," masculine /śogā̆/ and feminine /maśgā̆/, are rare and appear first at Qumran; no difference in meaning is perceptible. Normally, Aramaic employs /menyān/ and /manā/ for "number, quantity."[5] The D- or C-stems of *ytr* also denote "to multiply," and *rbī* in the G-stem denotes "to grow." Antonyms of "many" are /ḥassīr/[6] and /zoʿayr/ "few."

II. Verb in the G-stem "to Be Many." Biblical Aramaic first attests the intransitive G-stem of *śgī* "to be many" three times, once in the challenge not to be lazy "so that no damage to the king multiply" (Ezr. 4:22)[7] and twice in Nebuchadnezzar's stereotypical greeting formula in Imperial

Aramaic epistolary style, but not identified as such, *šlmkwn yśgʾ* "may your peace be much!" in his circular to the nations (Dnl. 3:31; 6:26). At Qumran, it refers to Abraham's property,[8] to the "years of the demise" of the evildoer,[9] and in 11Q10 11:7 (Job 27:16) to the Hebrew *kūn* in the C-stem "to prepare," which was probably understood here as "to pile up."

III. C-stem "to Multiply." Even rarer than the G-stem, the C-stem "to multiply" appears in older Aramaic; from pre-Christian times, the texts from Qumran preserve two certain instances: in God's promise of innumerable descendants to Abraham[10] and in 11Q10 4:6 (Job 21:7) for the increase of property rendering the Hebrew *gbr* "to grow."[11]

IV. Noun "Quantity." Qumran also attests the two nouns *śgʾ* [12] and *mśgh*[13] "quantity" in reference to things and abstractions. Instead of the noun in the construct state with the subsequent word "quantity of," as in 4Q541 9 1:5 and 1QapGen 13:14, the adjective "many" appears more frequently in an attributive function.[14]

V. Adjective. The most frequent manifestation of the root, the adjective *śgyʾ* /śaggī/ "many,"[15] already occurs, in contrast, beginning with later Old Aramaic. It can refer to collective or individual nouns, also substantivally to "many," and serve as an adverb "very."

1. "Many." Thus, in the sayings of Aḥiqar it already refers to sons,[16] thorns,[17] stars,[18] and once without context;[19] in the Imperial Aramaic framework narrative in reference to life[20] and days;[21] in the Behistun inscription to lies.[22] It occurs in letters in the context of financial loss,[23] of years,[24] and, without context, of goods,[25] in J. Naveh and S. Shaked, A4,3[26] of a locust plague, and B1,5 of a troop. Other instances are allotted to the opening greeting in the letter formula, in which the sender sends the addressee *šlm wšrrt śgy*(ʾ) "much well-being and health."[27]

In Biblical Aramaic, the word functions in the known sense "many" in reference to the "many years" that the temple stood in Jerusalem (Ezr.

5:11), to the gifts of the king (Dnl. 2:6,48), to the fruit of the tree in Nebuchadnezzar's dream (4:9,18), and to the command to the second animal in Daniel's vision to devour "much flesh" (7:5). In each case, here, it designates abundance and exorbitance, especially in visions. In reference to the height of the tree in 4:7, it appears exceptionally in the sense of a quantity (*rwmh śgyʾ* "its height was many, i.e., great"),[28] not a number. A meaning "high"[29] cannot be derived from this.[30]

The texts from Qumran also employ the adjective with concrete and abstract, with numerable and innumerable terms.[31] Accumulated, it stands for opulence, as in Noah's dream of the olive tree[32] and Abraham's wealth after his Egyptian sojourn.[33] The rendering of the Hebrew *rb* "many" with *śgyʾ* in 11Q10 demonstrates that Aramaic distinguishes it from *rb* "great."[34] The feminine also appears in the singular as *śgyʾ*.[35] Substantivally, *śgyʾyn* denotes "multitude,"[36] but is clearly demarcated from *kl* with a suffix "all."[37] No Aramaic instance of *śgʾyn* "multitude" instead of "all" is known.

2. "Very." As an adverb "very" in the masculine singular absolute, *śgyʾ* occurs beginning in Imperial Aramaic and characterizes emotional states,[38] characteristics,[39] and actions.[40] Biblical Aramaic also has it in reference to emotions, negative (Dnl. 2:12; 5:9; 6:15; 7:28) and positive (6:24), and in the difficult expression from Dnl. 2:31 presumably with the following adjective → *rb* "great,"[41] thus as an intensive.[42] In contrast, neither an adjectival usage for "great" (→ V.1) nor meaning "multiform"[43] conforms to otherwise known usage.

Various other instances of the adverb in the same usage occur at Qumran,[44] in addition, a restrictive use, *wlʾ śgyʾ* "not too much."[45]

Gzella

H. Gzella, "*śgh*," *ThWQ*, III, 744-47.

1. *ATTM*, 102-4.

2. *ATTM*, 102f.

3. < */śaggīʾ/, therefore often still spelled historically *śgyʾ*.

4. With the G-stem, e.g., 1QapGen 22:29 and 11Q10 11:7 (Job 27:16); with the C-stem 1QapGen 21:13 and 11Q10 4:6 (Job 21:7).

שׁהד *śhd*; שׁהד *śhd* /śāhed/; שׁהדו *śhdw* /śāhedū/

I. Verb. II. Nouns. 1. “Witness.” 2. “Testimony.”

I. Verb. Aramaic and Arabic attest the root *śhd*. Its verbal forms in the G-stem exhibit a stative inflection and designate the state of “being a witness,” but classical Arabic *šahāda* and Syriac *sahhed*[1] have the active meaning “to testify, to witness.” The verb occurs in *TADAE* D1.17:6 (*wśhdw ʿl*) in the fragmentary context of a legal document presumably dated to the third century B.C.E. Furthermore, it appears often in Palmyrene honorary inscriptions in the spellings *śhd* or *shd*,[2] always with the active meaning “to witness” in reference to someone’s positive characteristics and accomplishments. The subject can be a deity,[3] the Senate and the people,[4] or the members of a caravan. Otherwise, no verbal forms are preserved in older Aramaic; a couple of alleged instances on clay tables are due solely to false readings and erroneous grammatical determinations in modern secondary literature.

II. Nouns.

1. “Witness.” The noun *śhd* “witness” presumably represents the active participle of the verb *śhd* /śāhed/. The plural *śhd* appears in relation to the deities invoked as witnesses of the treaties of state from Sefire.[5] This usage projects a common legal practice into the world of deities, since every agreement must name the persons who could testify to its conclusion and the corresponding stipulations, although not whether the document appropriately portrays past circumstance. Consequently, beginning ca. 700 B.C.E., Aramaic contracts on clay tablets or papyrus list the names of the pertinent witnesses preceded by *śhd* in the singular or the plural. Hundreds of examples have recently come to light from Assyria, northern Syria,

Egypt, Samaria, and the Judean wilderness. The pertinent documents are in Old, Imperial, Jewish, or Nabatean Aramaic.[6]

In documents from the wilderness of Judah, *śhd* follows the names of the witnesses and is sometimes replaced with *ʿd* "witness."[7]

A couple of individual cases merit closer attention. In the Samaria papyri from Wadi Daliyeh, *śhd* can precede the witness list;[8] the formula *śhdyʾ zy yḥtmwm gṭʾ* [*znh mhymnn hmw*] "The witnesses who will seal this document[9] are reliable"[10] can complete or replace it. In a few Nabatean papyri from Naḥal Ḥever, the names of the witnesses who sign the document follow the expression *śhd ktb ydh*, "Witness, the signature of his hand."[11] The analysis of this phrase as supposed haplography of **ktb bydh*[12] is incorrect as the use of *ktb yd* in the Palmyrene inscription on the grave of Malku[13] and in *m. Ketub.* ii:2f. indicates. Literary texts contain the combination *śhd ḥms*, "false witness" (sayings of Aḥiqar)[14] and *śhdy qšṭ* "truthful witnesses."[15] Furthermore, the word *śhd* occurs in Job 16:19,[16] spelled in a Transjordanian dialect related to Aramaic.

2. "Testimony." The feminine *śhdw*, "testimony" or "evidence," appears in Gen. 31:47,[17] in 4Q542 1 2:12, a fragment of the Testament of Qahat from the third or second century B.C.E., and in the Nabatean signature of Pap. Yadin 15:25 (*śhdtʾ*)[18] from the Babatha archive.

שִׂים *śīm*; שִׂימָה *śymh* /śīmā/

I. Etymology, Lexical Field, and Constructions. II. Literal Use "to Set, to Place, to Lay." III. Figurative Use. 1. "To Install." 2. Various Idiomatic Expressions. IV. Noun "Treasury, Treasure."

I. Etymology, Lexical Field, and Constructions. Forms of the verbal root *śīm* "to set, to place, to lay" appear in all the major branches of the Semitic languages, although with varied productivity. Aramaic uses the verb, mostly as does Hebrew, in the transitive G-stem with a spectrum of meaning similar to the Latin verb *ponere*. Depending on the nature of the direct object, one can distinguish between a literal use with objects and a figurative use with abstract terms; the latter occurs with particular frequency in administrative terminology with → *ṭʿm* "order." With a dual direct object in reference to objects, it has the nuance "to make something into," in reference to persons "to install, to name as." The broad semantic field covered by this lexeme has points of contact with various other verbs. The roots → *ytb*, → *qūm*, and → *škb* typically express the intransitive circumstance "to sit, to stand, to lie," usually with persons as subject; the C-stem of *qūm*[1] often serves the meaning "to set up"; and it together with the D-stem of → *mnī* and the C-stem of → *tqn* or → *šlṭ* denote "to install." Sometimes, *šwī* II in the D-stem represents "to lay" and *šwī* I, likewise in the D-stem and not always clearly distinct from *šwī* II, signifies "to make into."[2]

In the usage meaning "to lay, to place," the verb sometimes takes adverbial modifiers following *b*- "in, to" or *ʿl* "on." The passive took form toward the end of the first millennium B.C.E. through ablaut (inner passive) or the Gt-stem and corresponds with the nuance of the active voice. Passive

constructions often appear in administrative terminology. With the loss of the inner passive, first in the imperfect and then in the perfect, the Gt-stem assumed its functions. The inner passive has a resultative nuance and emphasizes the result "placed," the t-passive points to the action itself. The participle retains this distinction.[3]

In geographical descriptions, the passive participle /śīm/ can denote "located, situated"; the feminine form /śīmā/ serves quite rarely in a substantival use for "treasury, treasure" (like "deposit," literally "stored goods, put away things").

After the fusion of */ś/ and /s/, spellings with *s* appear sporadically already in older Aramaic.[4]

II. Literal Use "to Set, to Place." The earliest Aramaic already attests the verb *śīm* in the concrete sense of "to lay, to place, to set up" very well. It usually refers there to the erection of a statue,[5] but can also denote other construction activities[6] and the attachment of the name to something.[7] Such expressions, furthermore, can include → *ʿbd* (II.1) "to make" in the sense of "to (have) prepare(d)";[8] from Imperial Aramaic onward, → *qūm* in the C-stem more commonly serves for "to erect" statues and inscriptions. In addition, Old Aramaic already manifests figurative meanings (→ III.2); the context of *KAI* 310.9 remains unclear. In later Old Aramaic, one finds the nuance "to lay down" of grave goods,[9] possibly also "to confine, to bind" of persons.[10]

In contrast, the large corpus of Imperial Aramaic exhibits significantly fewer instances of *śīm* in a literary meaning because the pertinent situations rarely find expression in the texts,[11] but there can be no doubt that this verb continued to be productive in the living language.

In the literal usage, passive forms also correspond to the use of the active, as with the participle of the inner passive "is placed"[12] and perhaps "are handed over";[13] the perfect in *TADAE* D7.10:2 is unclear, as is the t-passive "to be attached."[14] It appears more frequently, however, for "to be given" in reference to an order (→ III.1).

Biblical Aramaic knows two instances of the usage with concrete objects, both in the passive: the inner passive of the perfect of the stone placed on the opening (*ʿl pm*) of the lions' den (Dnl. 6:18), and the t-passive participle of wood to be installed in temple walls (Ezr. 5:8).[15]

In 11Q10 4:4 (Job 21:5), the sole relevant occurrence from Qumran, the verb renders literally the synonymous Hebrew cognate *śīm* for "to place one's hand on (*ʿl*) one's mouth."

III. Figurative Use.

1. "To Install." Of the usages with a nonmaterial object, the combination with → *ṭʿm* for "to give an order," attested since Imperial Aramaic, is most frequent by number of occurrences in all of older Aramaic. It belongs to the register of administrative diction and, consequently, appears primarily in official letters from the chancelleries of the satraps. Because of the written style employed there, it occurs in the passive[16] more often than in the active.[17] The letters from the archive of the Bactrian provincial administration follow exactly the same diction.[18] The preposition *l-* indicates the recipient of the order; *mn*, also in a passive construction, indicates the one giving the order, apparently due to Iranian influence.[19]

The same usage also occurs elsewhere in documents that employ the same administrative idiom[20] and regularly in Biblical Aramaic. There, one finds a rather frequent usage of the passive (Ezr. 4:19; 5:17; 6:8,11; 7:13,21; Dnl. 3:29; 4:3; 6:27) approximating Achaemenid epistolary style, but the active also appears (Ezr. 4:21; 5:3,9,13; 6:1,3,12; Dnl. 3:10). The distribution between inner passive and Gt-stem corresponds to the overall situation in Imperial Aramaic: the former appears with the perfect or the participle, the second with the imperfect (Ezr. 4:21). This bureaucratic nuance differs from *śīm* with *ṭʿm* for "to focus attention" (→ III.2 [point f]).

2. Various Idiomatic Expressions. Additionally, since Old Aramaic times, *śīm* functions in a number of other idiomatic expressions in which, as

a widely applicable, semantically loosely defined verb, it overlaps with various other more specific lexemes:

(a) With a plague as object (*mwtn*)[21] it appears in the curse formula of the Bukan inscription meaning "to place upon,"[22] for which, in relation to taxes or other payments, → *rmī* and less often *šwī* II[23] appear later.

(b) Additionally, with → *šm* as object, it can mean "to bestow a name,"[24] but the context always implies an award, thus constituting a distinction from → *qrī* for "to name."

(c) In reference to established terms, *śīm* can mean "to establish" as with sums of money[25] or of quantities.[26]

(d) In Imperial Aramaic epistolary style, the formulation "cause to share in grace" or "to give salvation" with *rḥmn*[27] or → *šlm* as object and a divine subject.[28] Here, there is a close relationship to the meaning of → *yhb* or *ntn* "to give."

(e) Further, an overlap with the lexical field "to give" exists with the expression "to put something (good words) in the mouth" in a wisdom saying of Aḥiqar[29] with "to treat oneself [*npš*] to rest [*šlyn*]."[30]

(f) Twice in Biblical Aramaic, *śīm* appears with *ṭʿm* for "to take note" (→ III.1).[31] Notably, in both passages, it is negated in relation to the religious exercise of the Jewish exiles, which their opponents portray as defiance of the king (Dnl. 3:12; 6:14). Here *ṭʿm* has the meaning "regard, attention, obedience."[32] Distantly related is the use with → *bl* as object "to focus attention" (Dnl. 6:15), which, however, in the one instance, has a positive connotation regarding the efforts of the king to deliver Daniel from a court intrigue.[33] Later Aramaic also attests the noun /hawn/ "mind, understanding" for "attention."[34]

(g) In a corrupt context, but reconstructable using the parallel versions, the Aramaic version of the Behistun inscription employs *śīm* for "to stake"

as a penalty for rebels.[35] In Ezr. 6:11, *zqp* has this meaning.[36] This other verb appears more frequently later for "to erect,"[37] also with the meaning "to crucify."

(h) With a dual object, *śīm* means "to make something into" and Old Aramaic already attests it as such[38] in the corresponding passive "to be made into" in Dnl. 2:5. In this usage, it can hardly be distinguished from → *ʿbd* or *šwī* in the same construction. In reference to a person, it appears once in Biblical Aramaic for "to install" (Ezr. 5:14), as otherwise → *mnī*, *tqn*, or *šlṭ* do.

(i) The passive participle "placed, located" can stand for "placed" in geographical descriptions without implying an active verbal action.[39] A nominal clause can appear instead.[40]

IV. Noun "Treasury, Treasure." The substantival passive participle *śymh* /śīmā/ for "treasure (treasury)" may be first evident in an Imperial Aramaic inscription from North Arabian Tēma where in the phrase *śymtʾ zy mlkʾ* it probably means "the king's treasury," which is to support a local temple.[41] Figuratively for "treasure" in a picturesque comparison of wisdom, it then appears twice in T. Levi from Qumran.[42] Postbiblical Hebrew also adopted it with this meaning.[43] An Aramaic inscription in Greek transcription could use the word (σιμαθα) either for earthly or for heavenly treasures.[44] Examples also occur later, although in the phonetic spelling *symh*.[45]

Typically, however, official diction since Imperial Aramaic employs for treasure the Persian loanword */ganza/ and, correspondingly, for "treasury" *byt gnzyʾ*.[46]

Gzella

H.-J. Fabry, "*śym*," *ThWQ*, III, 757-62; G. Vanoni, "שִׂים *śîm*," *TDOT*, XIV, 89-112.

44. yWG 1:1 in *ATTM*, 353.

45. *DJPA*, 375a; *DJBA*, 805b; *LexSyr*, 470b.

46. → *gnz*.

שׂכל *śkl*; שׂכלתנו *śkltnw* /śokltānū/

I. Etymology and Lexical Field. II. Verb “to Pay Attention.” III. Noun “Insight.”

I. Etymology and Lexical Field. Older Aramaic attests *śkl* as a verb almost exclusively in the Dt-stem “to pay attention, to understand” and may be supplemented with a prepositional expression following *b*- “to.” With this nuance, it may derive from the feminine abstract noun /śokltānū/ “insight,”[1] in which case the t-stem expresses middle voice with affixation of the subject. As in Hebrew, it constitutes a wisdom term. An active D-stem with the meaning “to proclaim” is attested, perhaps already in a Jewish Palestinian ossuary inscription for “to permit publicly,”[2] but the further Aramaic and Semitic etymology is uncertain. After the fusion of */ś/ with /s/, it is also spelled *skl*.

The root *śkl* is not related to the noun *skl* /sakal/ “fool, sinner,”[3] from which, then, the verb in the Dt-stem “to act foolishly” derives. Here, the initial sibilant traces back to an original /s/. Together with *šṭī* “to be foolish,”[4] *skl* forms the antonymous lexical field of *śkl*. In the meaning “to pay attention,” *śkl* also has points of contact with *śīm* and *bl* “mind” for “to focus the mind on something,”[5] but, in the attested usage, it has more of a contemplative nuance and refers to the contemplation of concealed circumstances. For synonyms of the noun → *ydʿ*.

II. Verb “to Pay Attention.” In originally Aramaic texts from pre-Christian times, the verb *śkl* in the Dt-stem “to pay attention” occurs only in Dnl. 7:8. This text describes how, in the symbolic display of world history

in the form of apocalyptic animals, Daniel concentrated on the ten horns on the head of the fourth animal. This introduces the apex of the whole scene, the appearance of the arrogant small horn, its destruction, and the judgment of the world. Otherwise, the word, spelled *skl*, occurs frequently in 11Q10 representing various Hebrew lexemes: mostly *bīn*,[6] and once each *śkl*[7] and *skn*.[8]

III. Noun "Insight." The parallelism with *rwḥ*, *nhyrw*, *ḥkmh*,[9] and *mndʿ* in Dnl. 5:11f.,14 restricts the meaning of the noun *śkltnw* /śokltānū/ "insight" to Daniel's divinely inspired knowledge.

שׂנא/שׂני *śnʾ/śnī*; שׂנאה *śnʾh* /śenʾā/; שׂנא *śnʾ* /śānē/ (< /śāneʾ/)

I. “To Hate, Hatred.” II. “Enemy.” III. In Divorce Law.

I. “To Hate, Hatred.” Texts from the first millennium B.C.E. only rarely use the Aramaic verb *śnʾ* [1] and its derivatives in the simple meaning for the feeling of strong antipathy. Usually, they employ instead terms denoting hostile actions such as the attempt to kill,[2] to destroy, or to damage,[3] or the intention to initiate divorce proceedings. Yet, the emotional connotation may appear in a saying of Aḥiqar,[4] where the noun *śnʾth* characterizes a liar more precisely and forms a contrast with *hymnwth* “his reliability”:[5] *ḥn gbr hymnwth wśnʾth kdbt śpwth* “The courtesy of a man (shows) his reliability, but the lies of his lips (announce) his ugliness.”[6]

The affective nuance may also occur in the fragmentary and unclear context of a passage in the Deir ʿAllā inscription: *hn tśnʾn yʾnš* “if you show hatred, he will be weak.”[7]

II. “Enemy.” The substantival active participle (peal) quite often expresses animosity. In the Sefire inscription, it occurs in political and military contexts,[8] so also in 1QapGen 22:17 and presumably in Dnl. 4:16.[9] In contrast, in *Megillat Taʿanit* it has more of a religious connotation[10] and, in a proverb of Aḥiqar, means personal animosity:[11] “My enemies should die, but not by the sword,” apparently in order to avoid blood revenge.

III. In Divorce Law. In marriage contracts from Elephantine, the verb *śnʾ* expresses the intention to initiate divorce proceedings,[12] but does not designate the actual divorce. This is evident from the use of → *npq* in

clauses like *hn . . . tśnʾnk wtnpq mnk* "if . . . she hates you and goes away from you," wherein *npq* denotes the completion of the intended divorce, as later in rabbinic literature. The phrase *śnʾ l-* appears six times in private documents from Elephantine[13] and is replaced by *śnʾ* with a pronominal suffix twice.[14] The subject of the verb is either masculine or feminine, since the Elephantine papyri attest the right of the marital partner to dissolve the marriage even though marital duties have not been damaged by marital misconduct. These contracts correspond, then, to a legal practice also attested in a few other ancient Near Eastern documents.[15] In this context, the related noun *śnʾh* refers directly to the reason for the divorce, the "hatred," yet it also further denotes the overall legal proceeding, as the expressions *dyn śnʾh* "hatred law"[16] and *ksp śnʾh* "hatred silver"[17] demonstrate. Even without further qualification, the noun *śnʾh* refers to the entire proceeding.[18] The documents from the wilderness of Judah do not employ the verb *śnʾ* to indicate divorce proceedings.

שׂער *śʿr* /śaʿr/

I. Etymology, Form, and Lexical Field. II. Usage.

I. Etymology, Form, and Lexical Field. As in Arabic, the masculine Semitic primary noun *śʿr* "hair" appears in Aramaic as a *qatl*-form /śaʿr/,[1] while in Hebrew the *qitl*-formation /śiʿr/ is productive. In contrast, the usage does not differ; Aramaic also employs it essentially as a collective term for body hair, although it mostly refers specifically to the hair of the head as its more notable manifestation.[2] For the purpose of more precise definition, it occurs in the construct with → *rʾš* "of the head" or *dqn* /daqan/ (< */ðaqan/) "of the beard."[3] Etymologically, it is generally associated with *śʿrh* /śaʿārā/ "barley," *śʿryn* /śaʿārīn/ "barley corns,"[4] which appeared because of its long awns to be a "hairy" grain.

II. Usage. "Hair" and its lexical field are much less prominent in the older Aramaic texts than in Hebrew.[5] The word *śʿr* appears in the everyday sense in the story of the three men in the fiery furnace, the hair of whose heads (*śʿr rʾšhwn*) was not even singed (*ḥrk*)[6] despite the especially high heat, although hair and clothing catch fire easily (Dnl. 3:27), which emphasizes the wondrous character of the deliverance. Unkempt hair signified a lack of culture; consequently, the text says that Nebuchadnezzar's hair[7] became as long (*rbh*) as eagle feathers[8] during his period living as an animal. According to Dnl. 7:9, snow-white hair (again *śʿr rʾšh*) as a sign of advanced age and exalted dignity characterizes the figure of the Ancient of Days, outside of time and space, in the vision of the judgment of the world.[9]

A couple of texts from Qumran employ hair as a characteristic of special people: once in the praise of Sarah's perfect beauty[10] and again in the ominous, but largely fragmentary description of Noah, which bestows superhuman features upon him.[11] His hair[12] is reddish (*śmqmq*),[13] which was still very rare among the native population and, as with David (*ʾdmwny*, "reddish, auburn"), constituted a mark of beauty (1 S. 16:12; 17:42).

G. J. Botterweck, "גִּלַּח *gillach*," *TDOT*, III, 5-20.

1. Later with anaptyxis /śaʿar/, *ATTM*, 112-15.

2. Regarding the feminine form, first clearly attested only later, → II.

3. 4Q561 4-6 2:4.

4. An Aramaic feminine plural, cf. *ATTM*, 717.

5. See Botterweck, 5-20.

6. Dt-stem pass.

7. Here without *rʾš* and thus probably including the beard.

8. → *nšr* II.

9. → *ʿtyq* III; *nqh* II.

10. 1QapGen 20:3, the sole old instance of a woman's hair.

11. 4Q561 11:16; 2:4; 10:4; in addition to the "delicate" beard, → *dqq*; according to *ATTM*, 2, 498, *śʿrn* in 4Q561 1 1:16 is an adjective "hairy" (cf. *DJPA*, 572a), not the plural of an only later certainly attested fem. individual noun *śʿrh* "a single hair" (*DJPA*, 572a.; *DJBA*, 1189f.; *LexSyr*, 689).

12. *śʿrh* in the reading of *ATTM*, 2, 163, thus with a possessive suff. and not a fem.

13. 4Q534 1 1:2.

שאל *šʾl*; שאלה *šʾlh* /šaʾelā/

I. Etymology, Lexical Field, and Constructions. II. General Meaning “to Ask, to Request.” III. Idiomatic Expressions. 1. Salutation. 2. Passive. 3. Noun “Question.”

I. Etymology, Lexical Field, and Constructions. In the older Aramaic languages, the common Semitic verbal root *šʾl* “to ask, to request” appears only in the G-stem. Since a stated question per se implies the wish for an answer, the usage for “to request” arises from the general meaning for a verbal communication; thus, *šʾl* can also find usage as a verb of speech and introduce direct address.[1] In contrast, → *bʿī* “to seek, to wish, to request” emphasizes the intention so that it can also function mostly, in contrast to *šʾl*, as a modal verb “to want to, to be about to.” With the general nuance, “to ask,” *šʾl* generally appears in narrative texts with passages of dialogue, in pre-Christian times chiefly in the framework narrative of Aḥiqar, then in Biblical Aramaic and in narrative texts from Qumran. The frequent usage of the verb in the introductory formula of Imperial Aramaic letters is related to the usage “to ask about someone’s well-being” (→ III.1).

The passive, in pre-Christian Aramaic both in the form of the inner passive and of the Gt-stem, finds usage in the specific sense of “to be questioned,” “to be called to account,” and is part of Imperial Aramaic legal and administrative terminology. Other stems first appear in the post-Christian era, especially the C-stem for “to loan out, to lend.”[2]

In the transitive G-stem, *šʾl* occurs with an animate direct object “to ask someone,” then in Imperial Aramaic often after the object particle *l*-, or with an inanimate object “to ask something.” Both could appear alongside one another in the construction with a dual object “someone something”

(e.g., Dnl. 2:10; Ezr. 5:10). The content of the question or request can also be specified through a prepositional expression with *ʿl* "with respect to."[3] Analogously, the verb with the meaning "to request" takes a dual (Ezr. 7:21) or simple object with the preposition *mn* "from."[4] If the emphasis does not lie on the verbal act itself (see above), a verb of speech such as *ʾmr*[5] can specify the content.[6] No difference in meaning is evident, since *šʾl* appears both with and without *ʾmr* in otherwise identical connections.[7] Furthermore, the particle /ha-/ can introduce a question.[8]

The feminine /šaʾelā/ functions as a verbal noun "question." In addition, nominal forms of the verb appear in names: in analogy to the Hebrew form /šaʾūl/ "Requested One," the passive participle /šaʾīl/ as in Σιλας (Acts 15)[9] and sometimes also another feminine noun of the *qatāl* pattern /šaʾālā/ as in Shealtiel "El is my question" in, e.g., Ezr. 5:2 and already attested in earlier cuneiform.[10]

II. General Meaning "to Ask, to Request." Since its earliest appearance in later Old Aramaic, *šʾl* appears in varied contexts. The relationship between subject and addressee also differs in that, in addition to the purely informative "to ask," various nuances occur ranging from "to ask pleadingly" (when addressing a superior) and "to ask demandingly" (to inferiors). The Asshur ostracon also seems to relate to an official investigation,[11] which may have given rise to the use of the passive for "to be questioned" (→ III.2); it first appears generally for "to ask after" (*ʿl*) someone in a private letter from Hermopolis;[12] and then in an Imperial Aramaic administrative letter for "to request" in reference to an official request[13] and in a petition in relation to a legal authority *šʾl ʿl dnh* "to ask/request concerning."[14] Passages of dialogue in narrative texts employ it similarly for "to ask,"[15] in marital law also for "to ask for someone's hand."[16] It also appears frequently in letters on ostraca without sufficient context.

Biblical Aramaic employs *šʾl* consistently in relation to information demanded by superiors: In Ezra of the opponents to the construction of the temple who want to see authorization from the Jewish elders and ask the name of the pertinent persons to notify (Ezr. 5:9f.),[17] and in Daniel of the king who wants to know his own dream and its interpretation from the sign interpreters (Dnl. 2:10f.,27). Ezra thus utilizes the verb in the context of an official hearing, in Daniel in the sense that the king's wish is an order.

Qumran also manifests *šʾl* primarily in narrative contexts where the question so indicated usually addresses a bearer of superhuman knowledge, however, and aims at higher understanding, as with Tobias who asks the angel about the healing and exorcizing power of fish entrails,[18] Amram, who seeks an explanation from the two angels of the good and evil powers that determine the human fate,[19] or the visionary of the historical apocalypse of the four trees who wants to know from each of them what their name is (*mn šmk*), i.e., what (which empire) each symbolizes.[20] If the widely espoused emendation *wšʾ*]*lw* in 1QapGen 19:25 is accepted,[21] it also applies to pharaoh's question concerning Abraham's divine wisdom and probably also to the fragmentarily preserved question to Daniel in 4Q243 1:1. Beyer's emendation of the lacuna *d*[*y šʾy*]*l* "what is asked" in Enoch's introduction to his vision report[22] conforms to this pattern as does Enoch's question to the interpreting angel in 1 En. 22:6.[23] Edna's question to Tobias and the angel concerning who they are[24] is admittedly neutral, but she does ask it in a similar context of a wondrous encounter. Thus, it regularly involves the communication of divine knowledge, either through an *angelus interpres* in a vision or through an otherwise gifted mediator of superhuman understanding. Further examples of this situation include the literally translated passages in the dialogue between Job and God in 11Q10 30:1 (Job 38:3) and 37:6 (42:4), and in an ironic reversal of roles in 34:3 (40:7). The infinitive in 11Q10 19:7 (Job 31:30) can presumably be emended by comparison to the MT, but the fragmentary context permits no certain conclusions. A few additional passages are likewise fragmentary or uncertain as to the reading.[25] The verb occurs once clearly in the sense of "to petition" in a contract text.[26]

III. Idiomatic Expressions.

1. Salutation. With → *šlm* "joy, well-being" as the object, *šʾl* with a human subject means "to greet," in communication the greeting of a third party ("sends you greetings") in a letter[27] or in an account.[28] With a divine subject, it apparently has the nuance "to be concerned about" and is part of a frequent salutation in Imperial Aramaic letters, between equals[29] and to superiors.[30] It occurs in several variants and with various divine names; the version with only *šlm* is probably an abbreviation.[31] A few examples on ostraca are fragmentary.

2. Passive. For the passive, the perfect still employs the inner passive, but the Gt-stem replaces it in the imperfect.[32] It appears in the context of juridical procedures for "to be questioned"[33] and in letters from superior officials as a threat "to be brought to account (for flawed fulfillment of a task)."[34]

3. Noun "Question." In older Aramaic, only Dnl. 4:14 attests the noun *šʾlh* /šaʾelā/ "question" with the juridical connotation "demand" of a divine verdict alongside *gzrh*[35] and → *ptgm*.

35. → *gzr* VI.

שאר *šʾr*; שאר *šʾr* /šoʾār/; שארי *šʾry* /šērī/

I. Etymology and Lexical Field. II. Verb “to Survive, Remain.” III. Noun “Remnant.”

I. Etymology and Lexical Field. The root *šʾr* “to survive, remain” belongs to the common West Semitic lexicon. In accordance with its medial significance, it appears in Aramaic in the Gt-stem in analogy with the N-stem in Hebrew. More frequent are the nominal forms, masculine /šoʾār/ and feminine /šērī/,[1] both with the meaning “remnant” and, as in Hebrew, semantically not clearly distinguishable from one another. In any case, /šērī/ seems typical of Imperial Aramaic texts from the Achaemenid period, while /šoʾār/ knows a broader distribution.

II. Verb “to Survive, Remain.” In usage as a verb in the Gt-stem, *šʾr* first appears twice in Imperial Aramaic contracts for a sum already[2] or not yet[3] paid. In both passages, *ʿl* “at the expense of” supplements it.[4] A few instances of the G-stem perfect *šʾr* “remain” also occur here,[5] others could be nouns (→ III). At Qumran, the Gt-stem occurs only in small fragments; every case seems to involve eschatological contexts,[6] perhaps under the influence of Hebrew prophecy.

III. Noun “Remnant.” The noun *šʾr* /šoʾār/ “remnant” often appears in Imperial Aramaic in commercial contexts in reference to goods,[7] in the Behistun inscription to troops.[8] In Biblical Aramaic it denotes “the remaining” in general.[9] The examples from Qumran all stem from formulaic expressions in the calculation of the course of the moon in 4Q208-209 (1 En. 73) for the “rest of the night” or “of its light.” Further,

two Nabatean treaties employ it of the rest of the goods or of a harvest.[10] In Palmyrene, it designates the remainder of persons[11] or part of a building.[12]

Similarly general is the use of *šʾry* /šērī/ in Imperial Aramaic,[13] but unlike *šʾr* clearly recognizable as a noun even in the consonantal spelling.

שׁבח *šbḥ*; תשׁבחה *tšbḥh* /tašboḥā/

I. Etymology and Lexical Field. II. “To Praise.” III. “Praise.”

I. Etymology and Lexical Field. In contrast to the common Semitic root *hll* and to the common West Semitic → *ydī*, *šbḥ* “to praise” is, at least during the historical period, a characteristic of the Aramaic lexicon and came, thence, into Hebrew[1] and further into Arabic and Ethiopic.[2] If the once-attested Ugaritic personal name *ʾašbḥ*[3] is related, the verb may have an older Semitic etymology, however.

It appears in the transitive D-stem and, in religious literature, often refers to the praise of gods, including pagan deities (Dnl. 5:4,23). It is difficult to make a semantic distinction between it and → *brk*, → *hdr*, *hll* (rather rare in Aramaic), → *ydī*, and → *rīm* in the L-stem, with which if often stands in parallel, but *šbḥ* could be meant more neutrally and descriptive “to declare someone praiseworthy,” while the other verbs imply more of personal knowledge or thanks for a demonstration of divine grace; accordingly, *šbḥ* also denotes praise for a human being (→ II). Related is the feminine substantive /tašboḥā/ “praise,” which also appears together with nouns from the same root as the verb.

II. “To Praise.” Evidence of *šbḥ* begins with Biblical Aramaic; the book of Daniel uses it five times: twice in the account of Belshazzar and his court praising the idols (Dnl. 5:4,23) and, each time in the first-person, once in the confession of Nebuchadnezzar who has reached knowledge of the true God (4:31,34), and in Daniel’s song of thanksgiving for the knowledge that God has shared with him (2:23). Both of the latter two passages employ *šbḥ* as praise for God for an evident benevolence and appear together with

semantically related terms, → *ydī* in 2:23, → *brk* and → *hdr* in 4:31, and → *rīm* with *hdr* in 4:34. It is therefore entirely possible that *šbḥ* had a more general meaning[4] that was given added precision through parallelism with more specific verbs of thankful confessions or acknowledgments of God's superior majesty, which simultaneously also mention the reason for the praise. The D-stem of *šbḥ* can thereby be understood as declarative-estimative;[5] thus, the verb is more descriptive than confessional.

In 1QapGen 10:8, a call to praise, fragmentary, but apparently directed to the true God, a synonym, here *hll*,[6] rare in Aramaic, joins *šbḥ*. In contrast, 11Q10 14:5 (Job 29:11) employs it in reference to a human—Job himself, whom others once happily praised[7]—with no further terms. The possible emendation of a form of *šbḥ* in 4Q196 17 2:7 (Tob. 13:9), Tobit's song of praise, is uncertain because the verb may have also appeared in one of the numerous lacunae in the preceding section of lines.[8]

As a verb with no specific religious connotation, *šbḥ* therefore also occurs in the diction of the Palmyrene honorary inscriptions for meritorious citizens.[9] Even in later usage, it is not necessarily associated with praise of God, but can additionally represent "to recommend," "to praise," etc.[10]

III. "Praise." The noun *tšbḥh* "praise," first identifiable at Qumran, also belongs to religious diction and refers in hymnic contexts to the praise of God. Like the verb (→ II), other terms often supplement it, such as *brkh*[11] and *hdr*.[12] Qumran also attests it for entities near God such as truth or wisdom,[13] and proper behavior.[14] The latter three occurrences all stand in the admonitions of Enoch and Qahat, which have wisdom connotations; consequently, this noun seems to belong to the fixed vocabulary of ethico-religious paranesis.

Furthermore, in later texts one encounters the nouns *šbḥ*, *šbwḥ* or *šwbḥ* in other patterns, but with the same meaning.[15] The hypothesized reading *šbḥ* toward the beginning of the line in 1QapGen 11:13[16] is uncertain

paleographically, however; consequently, *DSSStE*, 34f., refrains entirely from attempting to decipher it.

שבט *šbṭ* /šabṭ/; חטר *ḥṭr* /ḥoṭr/

I. Etymology and Lexical Field. II. Noun “Stick,” “Stem.” III. Noun “Rod, Scepter.”

I. Etymology and Lexical Field. As a term for “stick, staff,” the masculine /šabṭ/,[1] in a few Aramaic languages secondarily revocalized as a *qitl*-form /šibṭ/, rarely *qutl* /šobṭ/,[2] is common Semitic. The characteristic figurative meaning “tribe” in Jewish literary texts[3] is borrowed from Hebrew; Aramaic otherwise employs the ethnic terms → *ʿm* “people” and *ʾmh* “tribe, clan” for population groups.

In its literal use, /šabṭ/ overlaps with the likewise common Semitic masculine /ḥoṭr/[4] “rod, scepter.” The evidence permits no certain conclusions concerning possible original semantic distinctions. Indeed, a few old non-Jewish instances employ /šabṭ/ in the sense of “(divine) rod,” while, additionally, at least in Samʾalian, which has lexical affinities with Aramaic,[5] /ḥoṭr/ can denote “scepter,”[6] but the limited distribution makes it unclear whether these usages are actually representative of the specific semantics of the two lexemes.

II. Noun “Stick,” “Stem.” For earliest Aramaic, the literal meaning of *šbṭ* “stick” in the metaphorical expression *šbṭ dy nyrgl* “rod of Nergal” as a paraphrase for the plague (*mwtn*)[7] in the concluding curse formula of the Tell Fekheriye inscription[8] is assured. To the contrary, the description of the sin offering in Ezr. 6:17, in which twelve goats are sacrificed for the twelve tribes of Israel,[9] has connections with Hebrew conceptions; indeed, the conceptualization of ethnic identity as an alliance of tribes designated as

such is known only for Israel. Finally, with respect to 4Q548 1 2-2:1 from Qumran, it remains unclear due to the fragmentary context whether it represents the nuance “stick” or “tribe.”[10]

III. Noun “Rod, Scepter.” In the earliest and only clear instance, *ḥṭr* also occurs in the context of upbringing through chastisement;[11] two additional specimens are too fragmentary for a closer determination.[12]

שבק *šbq*

I. Etymology, Lexical Field, and Constructions. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Aramaic Texts from the Dead Sea.

I. Etymology, Lexical Field, and Constructions. The verb *šbq* "to let" represents a characteristic of the Aramaic lexicon and has no direct connections with other Semitic roots; at least in terms of phonetics, Arabic *sabaqa* "to prevent" would come into question,[1] but the semantic development in this case remains unclear.

Aramaic employs *šbq* in the transitive G-stem with a number of differing nuances, which, depending on the nature of the direct object and other complements, can be divided very roughly into "to allow someone to make something," "to leave something, to set aside" or "to forgive," and "to leave someone behind, to dismiss." For "to set free" of persons, Aramaic has the more rare → *ntr* in the C-stem and *pṭr*,[2] both of which occur in this meaning in Imperial Aramaic, or at Qumran *plṭ* in the D-stem.[3] In the Imperial Aramaic written tradition, *l-* often introduces an animate direct object, but *l-* can also indicate the indirect object "to someone" with the nuance "to cede," "to set aside," or "to forgive." Furthermore, the verb can take other adverbial expressions such as *byd* "in the hand." The extensive semantic overlap with the Hebrew verb *ʿzb* "to abandon" manifests itself in the Aramaic translation of *ʿᵃzaḇtānī* "you have abandoned me" (Ps. 22:2) with σαβαχθανι for /šabaqtānī/ in Mk. 15:34 and Mt. 27:46.[4]

The Gt-stem indicates the passive voice "to be ceded, to be set free, to be abandoned," as does, in the first pre-Christian millennium, the inner passive, which in the perfect, as attested through Qumran, and in the

participle also emphasizes the result.[5] In any case, the two categories seem to be partially interchangeable already in Imperial Aramaic, cf. the variation in *TADAE* A6.7:9 and B3.6:9f.[6] Post-Christian Jewish Palestinian also employs the D-stem "to reject," generally in the context of divorce.[7] The *plurale tantum* of the noun *šbqyn* "divorce" (formation unknown), however, already occurs in private documents from the Judean wilderness;[8] Qumran attests the *qitl*-noun /šibq/ "open room, access balcony."[9]

II. Old and Imperial Aramaic. The first specimens of the verb *šbq* occur in the later Old Aramaic of the sayings of Aḥiqar. Already here, it appears in various usages: for "to let" with an article of clothing that an evildoer had snatched (*ʾḥd*), but which one had left in his hand and should bring his case before the sun god (who sees all and, thus, was regarded as the guardian of righteousness),[10] and with gold in the sense "to leave in someone's care, to entrust,"[11] both with "in the hand";[12] it is attested for "to leave behind" of persons,[13] for "to let run" of an ass;[14] it also has the connotation "to let happen" or "to leave someone to themselves" in the sense of an antiauthoritarian upbringing, which, as is well-known, only leads to ruin.[15] In two additional passages, the constructions and precise meanings are not clear.[16] The Philistine prince Adon's plea for help, who asks the pharaoh to send him military assistance and not to abandon him,[17] stems from about the same period.

The occurrences from the Achaemenid period exhibit a similar spectrum of meaning: in the pre-Imperial Aramaic letters from Hermopolis for "to leave behind" of goods[18] and persons;[19] in Imperial Aramaic also of goods[20] and of asses for "to let run"[21] and of persons;[22] further, for "to abandon a post [*mnṭrh*]"[23] and with an infinitive as complement, permissively for "to allow to do, to permit."[24] In the juridical diction of the private document, in contrast, it can mean "to set free,"[25] perhaps also "to remit debts."[26] In a couple of additional instances, the context cannot be reconstructed exactly because of lacunae.[27] The official letters from Bactria employ the verb mostly of persons who are held in some way or hindered in

their work,[28] and once supplemented with an infinitive for "to allow to do."[29]

The passive[30] generally corresponds to the usages also attested in the active voice. It represents "to be set free" of persons[31] and "to be abandoned" of land.[32] The context in *WDSP* 2:7 is unclear as is the nuance in *KAI* 319.18 (freedom from taxes?).

III. Biblical Aramaic. Of the numerous uses of the verb already attested in Imperial Aramaic, Biblical Aramaic attests the nuances "to leave over" (Dnl. 4:12,20,23, of rootstock[33] in Nebuchadnezzar's dream and with the connotation "to spare") and "to allow" (Ezr. 6:7, of the work on the temple). Furthermore, in the Gt-passive stem it represents "to be delivered" (Dnl. 2:44, negated of the eternal kingdom of God that will be delivered to no other nation).

IV. Aramaic Texts from the Dead Sea. On one hand, the approximately twenty instances from Qumran continue the usage documented in Imperial Aramaic: *šbq* here denotes "to transfer property,"[34] "to free a prisoner,"[35] and in the passive "to be left to someone."[36] Much as in Dnl. 4, in Abraham's dream of the cedar and the date palm, it has the connotation "to spare."[37] Likewise, it is used of persons to mean "to let go"[38] and in the wisdom reworking of inheritance terminology, as known in private documents from the Judean wilderness,[39] the ethico-religious legacy of the patriarchs.[40]

On the other hand, decidedly theological uses also appear at Qumran. They include the wisdom motif of abandoning the proper path[41] and, especially, the connotation "to forgive sins."[42] The construction with the suffixed preposition *lh* in 4Q242 1-3:4, which involves the removal of King Nabonidus's guilt by a Jewish exorcist, is unclear; here the preposition may refer either, as an object particle, to the prepended direct object[43] or perhaps, as a *dativus ethicus*, to the subject and thus indicate ingressive action. In any case, this usage also rests on an originally juridical expression "to remit debts."[44] Additionally, it may underlie the petition

“and forgive us our debt” in the Lord’s Prayer (Mt. 6:12: ὀφειλήματα “debts”; Lk. 11:4: ἁμαρτίας “sins”).[45]

The feminine passive participle appears once in a substantival usage in 11Q10 31:4 (Job 38:27) for “abandoned land.”[46]

For a more thorough discussion of these and a few fragmentary examples from Qumran,[47] see Gzella.

שבש *šbš*

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. The etymology of the Aramaic verb *šbš*, in the Dt-stem a middle-passive "to be confused," "to fall into confusion," is uncertain, involving the rare identity of the first and third radicals.[1] It first occurs in the book of Daniel, which attests a rich psychological vocabulary, and then twice at Qumran, but continues to be productive in East Aramaic, which also attests it in the G-stem.[2] Its meaning overlaps with that of → *bhl* "to be terrified" (the two appear together in Dnl. 5:9). The lexical field includes *krī* "to be confused" (Dnl. 7:15); for additional terms → *ʿṣb* "to worry" and → *dḥl* "to fear."

II. Usage. In Dnl. 5:9, *šbš* denotes the terror of Belshazzar's court in view of the eerie flaming writing with the initially puzzling divine verdict and appears here as a synonym of → *bhl* for the reaction of the king himself. In 1QapGen 5:16, the context is too fragmentary for a more precise determination, but it, too, seems to stand in the context of a vision report (in 15:18, by contrast, one might perhaps read a form of *šmš* "to serve, to honor," as Beyer suggests in *ATTM*, 2, 98).[3] Finally, 4Q541 9 1:7 parallels *šbš* with *ṭʿī* "to stray."[4]

3. Contra D. A. Machiela, *The Dead Sea Genesis Apocryphon*. *STDJ* 79 (2009), 63, who is confident of the reading *mtšbšyn*, but the parallelism with → *plḥ* “to serve” would be unusual.

4. → *ḥṭī* V.

שגל *šgl* /šēgal/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Aramaic borrowed *šgl* /šēgal/ "king's consort" from Akkadian; it is usually associated with *ša ekalli* "she of the palace."[1] It traveled further into Hebrew, presumably through Aramaic (Ps. 45:10; Neh. 2:6). The precise status at court of the person so designated is unknown,[2] but the meaning "queen" is certain, at least for the loanword in Hebrew usage. Dnl. 5 (→ II) employs it in the plural along with that of *lḥnh* "lady of the court,"[3] which may imply a quite late devaluation from "queen" to "concubine." Dnl. 5:2,3,10 juxtaposes both groups with the *mlkh*,[4] although it remains unclear whether this term, not historically verified,[5] refers to the queen mother or the main wife.

II. Usage. In older Aramaic, *šgl* occurs only in Dnl. 5:2f.,23 and, in the plural in a stereotypical expression repeated three times, it indicates a group of women who, together with the *lḥnn* (→ I) and the *rbrbn* "nobles" of the king, participate in Belshazzar's decadent and blasphemous celebration as mere extras. The account distinguishes them from the *mlkh* in 5:10 (→ I), who avoids the revelry and only enters the hall after the appearance of the flaming letters on the wall with the divine verdict in order to direct Belshazzar to Daniel who, thanks to his gift of divine wisdom, could read the oracle (5:11f.). The original concept gives way to didactic typification: in foolhardy arrogance, the celebrating king with his entourage of concubines (*šgln*) and other courtesans[6] drinks himself to judgment, while, thanks to her own knowledge of events in the time of Nebuchadnezzar,

Belshazzar's father,[7] the modest queen knows what to do and senses the divine power in Daniel.

6. *lḥnh* was later understood as "concubine."

7. Which would speak for an interpretation of *mlkh* as queen mother.

שׁוי *šwī*; שׁוה *šwh* /šawǣ/

I. Etymology, Lexical Field, and Constructions. II. G-stem "to Resemble." III. D-stem "to Make Into." IV. Adjective "Suitable, Apt."

I. Etymology, Lexical Field, and Constructions. Because of the differentiated meanings in Aramaic as in Hebrew, forms of *šwī* divide synchronously into two homonymous routes, *šwī* I, in the G-stem "to be like," and *šwī* II, in the D-stem "to lay," but the categorization is not always clear[1] and the etymology remains unclear in both cases.

The G-stem of *šwī* I "to be like" can take a prepositional expression following *ʿm* "with" and is difficult to clearly distinguish semantically from the Gt-stem "to agree." Meanwhile, the D-stem "to make into" is doubly transitive, but forms of the corresponding t-passive have affinities with *šwī* II "to lay" and lexicographers sometimes assign them to it.[2] The adjective /šawǣ/ "suitable, apt," which appears with various nuances, belongs to *šwī* I. Meanwhile, → *dmī* represents "to be similar, to resemble" and → *šnī* "to be different."

II. G-stem "to Resemble." The Gt-stem of *šwī* first appears in a contract concerning the apportionment of slaves among the heirs of a mother and means "to agree."[3] In Dnl. 5:21, *šwy* is pointed as a D-stem *šawwī*, which, because of the context, interpreters usually regard as an error for an original G-stem in the sense of an abbreviated comparison "(his heart) became like (that of the animals)."[4] *LexLingAram*, 164 and *GesB*[18], 1539 suspect an inner passive "to be equated," presuming a transitive G-stem; *ATTM*, 704 assumes an intransitive G-stem and suggests an active.

The nuance "to correspond" in a formulaic expression in the astronomical book of Enoch about the light in reference to the course of the moon[5] is intransitive.[6]

III. D-stem "to Make Into." In contrast to the G-stem, the D-stem has the factitive meaning "to make it such that something becomes like," consequently "to make into." It has this meaning in Dnl. 3:29 regarding the edict of Nebuchadnezzar that threatens that the houses of blasphemers would be changed to ruins,[7] here in the t-passive (→ I). The active voice appears at Qumran, although the meaning and assignment to one of the two roots are controversial here, too. In 4Q242 1-3:3, one could accept a nuance "to consider to be equalized"[8] and in 4Q214a 2-3 1:4 "to give a name."[9] Other instances, however, remain entirely uncertain and, contra others, surely belong to *šwī* II "to lay," especially in descriptions of sacrifice[10] and the imposition of tribute.[11]

IV. Adjective "Suitable, Apt." Finally, the spectrum of the usage of the adjective *šwh* /šawǣ/ "like" is broad. In financial contexts, such as the dowry lists of Imperial Aramaic marriage contracts, it denotes "with a value of."[12] Various other nuances appear at Qumran: "sufficient"[13] or "symmetrical."[14] In Jason's grave inscription, it seems to denote "appropriate, worthy."[15]

שׁוּר *šwr* /šūr/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Aramaic indicates the wall of a city[1] with the masculine /šūr/, distinct from /kotl/ or /ʾeggār/,[2] the wall of a house. It already occurs in Hebrew in archaic poetry (Gen. 49:22; 2 S. 22:30 par. Ps. 18:30), and thus may be an old rare synonym for *gdr* "stone fence" and *ḥwmh* "wall," not an Aramaic loanword.

II. Usage. Old Aramaic already attests the word, which regularly designates a strong, attached wall: in Zakkur's list of accomplishments[3] and, in Imperial Aramaic, in a letter concerning the destruction of the Elephantine temple referring to a wall in the city itself.[4] In Ezra, it refers to the renovation of the city wall of Jerusalem in the report of the opponents of the reconstruction (4:12f.,16), and also in the new Jerusalem from Qumran.[5] On the other hand, 4Q196 1:1 (Tob. 1:17) intends the city wall of Nineveh and, figuratively, 4Q213 1-2 2:2 wisdom as a city that no one can conquer. In 4Q537 12:3 *šwr* also denotes the external wall of a city, as mostly at Hatra.[6]

שׁחת *šḥt*

I. Etymology and Lexical Field. II. Verb and Adjective.

I. Etymology and Lexical Field. The root *šḥt* "to be deformed" has cognates in other West Semitic languages, but occurs much less often in Aramaic than in Hebrew. In Aramaic, the C-stem means "to annihilate." The participle /šaḥīt/ functions as an adjective "bad, ruined." The lexical field includes → *bʾš*.

II. Verb and Adjective. In the earliest example, a saying of Aḥiqar, the verb appears in the C-stem "to annihilate," although without sufficient context.[1] The G-stem "to be deformed" occurs in 1QapGen 2:17 for the facial expression of a frightened person. The passive participle *šḥyt* /šaḥīt/ occurs three times in Biblical Aramaic denoting bad behavior, in Dnl. 2:9 a dream interpretation, false under the circumstances, and in 6:5, twice substantivally of the nonexistent error in Daniel's execution of office.[2]

1. *TADAE* C1.1:155.

2. → *ʿlh*.

שיזב *šyzb*

I. Etymology. II. Usage. 1. With a Human Subject. 2. With a Divine Subject.

I. Etymology. Aramaic borrowed the verb *šzb* from Neo-Assyrian in the eighth century B.C.E. at the latest. It occurs both in the framework narrative of Aḥiqar and in the proverbs;[1] in addition, around the middle of the seventh century B.C.E., the name *Nb*(*w*)*šzb* appears on Aramaic clay tablets.[2] Yet, these names can be read either as Aramaic ("Nabû has delivered") or as Akkadian ("Oh Nabû, deliver!"). One would expect the C-stem imperative of *ezēbu* (*ʿzb*),[3] the ground form in which the word was adopted, but the Neo-Babylonian imperative *šūzib* influenced its vocalization in Palmyrene,[4] Syriac, Mandean, Samaritan Aramaic, and Christian Palestinian (*šwzb*) while Jewish and Nabatean scribes retained the old orthography *šyzb*. The verbal form *šyzbh* functions uninflected as a substantive "place of refuge." It occurs in the Targums, e.g., *ʾtr qry šyzbh* "a place, a city of refuge,"[5] *qrwyʾ lšyzbʾ* "cities of refuge,"[6] *šyzbʾ lyt byh lršyʿyʾ* "there is no refuge in it for evildoers,"[7] *lʾ hwt lhwn šyzbwtʾ* "there was no refuge for them,"[8] and developed further in its meaning as a feminine substantive.

Furthermore, originally Aramaic verbs for "to deliver" include the C-stem of → *nṣl*[9] and the D-stem of *plṭ*[10] and constructed in the same manner, i.e., with a direct object and optionally supplemented with *mn* "from."

II. Usage.

1. With a Human Subject. On one hand, a human person can appear as the subject of the verb: e.g., Aḥiqar, who saved Nabû-sum-iskun,[11] Soados, who saved a caravan,[12] various individuals mentioned in private letters,[13] and a person mentioned in a fragmentary court record,[14] on the other, however, characters of a proverb,[15] of a poetic work[16] or of a vision.[17] In Nabatean royal titulature, the verb appears in the stereotypical epithets of King Rabbel II (70-106 C.E.): *dy ʾḥyy wšyzb ʿmh* "who kept alive and delivered his people."[18] According to Dnl. 6:15 King Darius tried to deliver Daniel.[19]

2. With a Divine Subject. In addition, God also frequently stands as the subject of *šzb*, as in private letters[20] or in the stories of the book of Daniel concerning wondrous deliverances (Dnl. 3:15,17,28; 6:17,21,28). A large number of Assyrian and Babylonian personal names consist of a theophoric element and the preterite (*ušēzib*), imperative (*šēzib*, *šūzib*), participle (*mušēzib*), or verbal adjective (*šūzub*) of this verb. A few of them appear in Aramaic texts and could be regarded as Aramaic, at least when an Aramaic deity serves as the theophoric element, such as Bet-El, the divinized "House of God," in ^{d}*Ba-ti-il-še-zib*[21] or *Bytʾlšzb*.[22] This name is attested since the sixth century B.C.E. Around 400 B.C.E., the name *ṣlmšzb* "the (deified) statue has delivered" appears in Tēma.[23] The interpretation of the name *Nb*(*w*)*šzb* as Aramaic is dubious, however, although it appears not just on Aramaic clay tablets (→ I), but also in Aramaic papyri from Egypt,[24] which typically abbreviate it *nbwšh* Nabûšē.[25] Palmyra employed the short form *nbwšy*.[26] The same doubt regarding Aramaic identity also remains in the case of *šzbnbw*,[27] paralleling Babylonian Šūzib-Marduk "Deliver, O Marduk!" and Šūzib-Adad "Deliver, O Adad!,"[28] or, more likely to be read as Šūzub-Adad and Šūzub-Marduk[29] "Delivered by Adad," "Delivered by Marduk," etc. The name *mšyzbʾl* (Neh. 3:4; 10:22; 11:24) is Akkadian, however: Mušēzib-Il "The one who delivers is god."[30] Its Greek transcription as Μασεζεβηλ (Neh. 3:4) or Μεσωζεβηλ (Neh. 10:22) exhibits in the first case

a secondary vocal *a* after a consonant pronounced with no subsequent vowel (*Mšēzib-Il) and in the second, a confusion of *y* and *w*. Furthermore, one observes a religious connotation in the expression “city of refuge” (→ I).

שכב *škb*; משכב *mškb* /maškab/

I. Etymology, Lexical Field, and Constructions. II. Verb "to Lie (Down)." III. Noun "Bed."

I. Etymology, Lexical Field, and Constructions. In Aramaic, the common Semitic root *škb* "to lie (down)," which appears here rarely, but as elsewhere in the G-stem, denotes literally, on the one hand, lying down, usually in association with sleep (*šnh* /šenā/), and euphemistically, on the other, death. Further, it underlies the masculine /maškab/[1] "bed."

II. Verb "to Lie (Down)." The usage "to lie down (to die)" already occurs in the Old Aramaic Tell Dan stele.[2] In Levi's petitionary prayer from Qumran, it appears in the context of a vision.[3] In 11Q10 it translates the Hebrew *škb*,[4] *nḥt*[5] and *šūb* "to return to the dust."[6] The occurrence in 4Q569 2:6 has no context.

III. Noun "Bed." Aramaic attests the noun *mškb* "repository, bed" beginning with Daniel where it regularly occurs in the context of visions in a dream (2:28f.; 4:2,7,10; 7:1)[7] like the verb in 4Q213a 2:14 (→ II). 11Q10 22:10 (Job 33:15) has it for the Hebrew cognate *mškb*.

4. 11Q10 11:10 (Job 27:19), of sleep.
5. 11Q10 1:3 (Job 17:16), of death.
6. 11Q10 24:9 (Job 34:15).
7. → *ḥlm*.

שׁכח *škḥ*; שׁכחה *škḥh* /šakaḥā/

I. Etymology, Lexical Field, and Constructions. II. In the Gt-stem "to Be Found." III. In the C-stem. 1. "To Find." 2. As a Modal Verb "to Be Able."

I. Etymology, Lexical Field, and Constructions. The highly productive root *škḥ*, in the Gt-stem "to be found," in the C-stem "to find," is a lexical peculiarity of Aramaic in comparison to other Semitic languages. It may, indeed, have a parallel in the Ugaritic *škḥ* "to meet," which occurs in a couple of letters,[1] yet the further etymology remains unclear. Verbs of finding took various forms in the individual Semitic languages, such as Hebrew *mṣʾ* from "to arrive at."[2] No relationship to the root *škḥ*, which appears in Hebrew as "to forget,"[3] has been demonstrated.

Depending on context, the Gt-stem appears with either a gerundival or a middle nuance "to be found, to be located," as the semantics of the verb suggest,[4] although Aramaic usually expresses this notion with a nominal clause or → *hwī*, sometimes with the passive participle of → *śīm* "lying, located." Rarely, it has the evaluative sense "to be deemed something," which is otherwise indicated by → *ḥšb* "to recognize." Similarly, the C-stem, which serves here for the active voice, can appear figuratively as a modal verb "to be able," although always negated, thus "to be not in a position to." Normally, → *ykl* represents "to be able," both positively and negatively. The antonym of the meaning "to find" is → *bʿī* "to seek."

The Gt-stem with the meaning "to be found" and related nuances are intransitive and take various prepositional modifiers. Very widespread are locative expressions following *b*- "in, at" (e.g., Dnl. 5:11f.,14; 6:24; Ezr.

6:2) or with persons *ʿl* “with, against” (Dnl. 6:5); when the verb means “to be deemed something,” the pertinent attributive accompanies it, like the adjective *ḥsyr* “(too) light” in Dnl. 2:35. It also occurs sporadically with *l*- “regarding, with reference to” (Dnl. 6:23). In the C-stem, *škḥ* is singly (e.g., Dnl. 2:25; 6:5) or doubly transitive, in the second case denoting “to find someone waiting for something” (e.g., Dnl. 6:12). Essentially the same prepositional modifiers can more closely define the location with the C-stem as with the Gt-stem, thus *b*- “in” (Ezr. 4:15) or “with reference to” (Dnl. 6:6) and *ʿl* “with, against” (Dnl. 6:6), as well as *qdm* “before” or an object clause following *dy* “that” (Ezr. 4:19). With the nuance “to be able,” the verb takes an infinitive following *l*-.[5]

In a Nabatean contract, the rare feminine noun /šakaḥā/ “finding” refers to a mixed orchard.[6]

II. In the Gt-stem “to Be Found.” In the Gt-stem for “to be found,” *škḥ* often implies a test or a preceding examination. It first occurs in the later Old Aramaic of the sayings of Aḥiqar, namely in the literal sense of a thief who is found/discovered.[7] In similar fashion, it appears in an Imperial Aramaic letter in relation to burglars who are discovered and arrested.[8] Meanwhile, another letter employs it with the abstract subject *mḥbl* “damage, guilt”:[9] the writers confirm that they have not left their posts during an uprising so that no guilt can be assigned, or damage attributed, to (*l*-) them.[10] There is a construction similar to that in Dnl. 6:23 (see above), but the nuance remains unclear because of the debatable meaning of *mḥbl* in this passage.

Legal texts sporadically employ *škḥ* of goods found in the possession of a person.[11] Furthermore, it appears regularly in a formulaic entry in the list of import and export duties in *TADAE* C3.7 in the context of oil export,[12] that were “found,” that is, on hand.[13] In the language of accountancy, therefore, it functions for the inventory.

Biblical Aramaic narratives employ the verb once with the nuance "to be discovered, to turn up," already known in Imperial Aramaic, in reference to an old scroll in the royal archive (Ezr. 6:2) that had been sought,[14] and with the nuance "to be on hand," negated of the totally annihilated statue (Dnl. 2:35).[15] It occurs mostly, however, of characteristics found in a person: the outstanding intellectual gifts of Daniel (Dnl. 5:11f.,14; with *b*- "with, in"); negated for the lack of any negligence in his execution of office (Dnl. 6:5, with *ʿl*);[16] and positively for the innocence he demonstrated (6:23).[17] Dnl. 6:24 employs it negated with → *ḥbl* "damage"; after Daniel climbed out of the lions' den, one could find no injury to him. The predicative use "to be found" in the interpretation of the "menetekel"[18] is rare: King Belshazzar was weighed and "found to be too light [*ḥsyr*]" (Dnl. 5:27). As is usual in Imperial Aramaic, the context here also presumes a test through an examination or inventory wherein *škḥ* "to be found" differs from a mere nominal clause "to be, to be located." The pair of instances from Qumran corresponds to the same circumstance: 4Q550 1:5f. of the discovery of a scroll as in Ezr. 6:2,[19] for "to be on hand" 4Q537 1+2+3:2 (negated of lies). It appears in reference to qualities of character (*ṭb*)[20] as with Daniel in a Palmyrene honorary inscription.[21]

III. In the C-stem. Most often, *škḥ* occurs in the C-stem "to find" and can, in this function, appear with a person, a thing, or an abstract entity as object, corresponding entirely to the use of the Gt-stem and essentially its active counterpart. In contrast, it only appears relatively rarely negated for "to be unable."

1. "To Find." The first examples appear in texts from Egypt in a variety of styles, mostly in private letters, and refer to the discovery of goods[22] and persons,[23] but also to characteristics like errors.[24] With an attributive, mostly a passive participle, the verb as the second object means "to find something as, to encounter,"[25] and in analogy with the Gt-stem with the nuance "to be deemed something."[26] It can also involve an accidental find, however.

Contracts frequently utilize *škḥ* in the formulation "what you find" in reference to things in the context of an inventory of property in the form of various goods,[27] corresponding to the Gt-stem as its passive counterpart (→ II),[28] once in the sense of "to be on hand, to have at one's disposal."[29]

The usages of this comprehensive verb demonstrated by Imperial Aramaic diction continue in Biblical Aramaic even for the C-stem. Thus, it appears with persons (Dnl. 2:25), goods (Ezr. 7:16), characteristics like errors (Dnl. 6:5f.), and circumstances (6:12), in the latter case with the active participle in a predicative function "they found Daniel praying."[30] With regard to the detection or discovery of circumstances, an object clause after *dy* "that" can stand instead of the participle as in Ezr. 4:19.[31]

The texts from Qumran contain the same usages: with persons,[32] inanimate objects[33] and with a predicated double object with a participle or another nominal form.[34] As expected, 11Q10 employs *škḥ* in the C-stem for the Hebrew *mṣʾ*.[35] The phrase "to find grace" in 1QapGen 6:23 probably imitates the Hebrew;[36] cf. "to find mercy" in 4Q213a 1:15. 1QapGen 10:12; 4Q562 2:3 are fragmentary.

2. As a Modal Verb "to Be Able." Qumran attests *škḥ* negated as a modal verb "to be unable" (in an intellectual or physical respect) with a subsequent infinitive several times.[37] It occurs only rarely later in Jewish Palestinian.[38] Since Greek also uses εὑρίσκειν for "to have the opportunity, to be able,"[39] analogous formulations such as the one in Mt. 7:17 (Lk. 13:24: ἰσχύειν "to be able") need not trace back to Aramaic substrate influence.

שכן *škn*; משכן *mškn* /maškan/

I. Etymology and Lexical Field. II. Verb in the G-stem “to Dwell.” III. D-stem “to Cause to Dwell.” IV. Noun “Dwelling.”

I. Etymology and Lexical Field. Aramaic attests the Semitic root *škn*, in the G-stem “to settle down, to dwell,” significantly less than in Hebrew. At the same time, the few instances between Imperial Aramaic and Qumran reflect various uses. The G-stem “to dwell” can take God,[1] animals,[2] or an abstract entity like *brkh* “blessing”[3] as subject; the factitive D-stem “to settle” occurs in the pre-Christian era only once in Biblical Aramaic with God, who causes his name to dwell in the temple. In addition to a place name as an adverbial complement,[4] the G-stem can take prepositional phrases following *b*- “in” (Dnl. 4:18) or *ʿl* “on,”[5] and with an occurrence of the D-stem the local adverb *tmh* “there (in the temple).” The title → *sgn* is a loanword.

Furthermore, the masculine noun /maškan/ “dwelling” belongs to the root *škn*. It, however, has mostly religio-cultic connotations, in contrast to *mwtb*[6] “residence.” The substantival passive participle *škynh* “indwelling” for the divine presence first appears in late antiquity in Jewish[7] and Christian[8] texts, but takes up the older usages of the verb for God’s presence in the temple (→ II). Later phases of the language also attest additional nominal forms from the lexical field of “to dwell, to be present” or “to give.”[9]

The meaning of the root *škn* overlaps with that of → *dūr* “to dwell,” → *ytb* “to settle, to sit, to dwell,” and → *šrī* in the sense of “to tarry.” The distribution of the occurrences suggests that *škn* like *šrī*[10] referred more to a

temporary stay and not to a permanent dwelling. Because of the overall only schematically formed lexical field for "to dwell" in older Aramaic, no obvious pair of opposites clearly accentuates this difference.

II. Verb in the G-stem "to Dwell." The earliest instance of the verb in the G-stem stems from the beginning of a private document from Elephantine and is a participle describing the God Yaho as dwelling in Elephantine.[11] It appears in relation to the greater specification and identification of a member of the staff[12] of the same temple. It was regarded as the earthly dwelling of the God who transcends space and time who dwells there as he wishes, but was not statically settled there.[13]

In Biblical Aramaic, the same verb occurs in the tree vision of King Nebuchadnezzar in reference to the birds that nest in the branches of the mighty treetop (Dnl. 4:18). Here, too, it involves tarrying for a certain time, as also in the image of the eagle (*ʿwzʾ*) on the cliff (*kp*) in 11Q10 33:9 (Job 39:28). The wish for eternal blessing (*brkt ʿlmʾ*),[14] however, may intend the ingressive nuance "to settle down."

III. D-stem "to Cause to Dwell." The D-stem of *škn* "to settle" occurs in Ezr. 6:12 as an attributive referring to God who causes his name to dwell in the Jerusalem temple and, consequently, can destroy any who disturb this temple. Thus, the meaning corresponds to that of the G-stem as in *TADAE* B3.12:2 (→ II) and its usage is analogous to that of the same verb in Hebrew (e.g., Dt. 12:11 or Neh. 1:9):[15] it accents the gracious attention of God, not his permanent presence.

In post-Christian times, the D-stem of *škn* also appears with the meaning "to give";[16] it derives from the noun *mškn* "deposit" (→ IV).

IV. Noun "Dwelling." The noun *mškn* occurs beginning with Biblical Aramaic;[17] in the oldest known instance, Ezr. 7:15, it serves, in agreement with the verb (→ III), to describe God, who has his dwelling in Jerusalem, namely in the temple.

It occurs in 4Q156 2:4 from Qumran with the same meaning in *mškn zmnʾ* as the translation of *ʾhl mʿd* "tent of revelation" in Lev. 16:20; further in Enoch's animal vision corresponding to the Hebrew cognate for "tabernacle";[18] and once in a fragment without context.[19]

The word also appears in a cultic context at Hatra,[20] but once in the plural may also indicate "tents" in the quite general sense.[21]

In Palmyrene, *mškn* first appears in the meaning "deposit"[22] as also in later Aramaic languages. This meaning traces to Akkadian influence.[23]

שלח *šlḥ*; שדר *šdr*; אשתדור *ʾštdwr* /ʾāštedōr/

I. Etymologies. II. *šlḥ* “to Send.” 1. Humans/Things. 2. *yd* “Hand.” 3. Reports. III. *šdr*. 1. “Sending.” 2. “Intervention.” IV. *ʾštdwr*.

I. Etymologies. Ugaritic, Phoenician, Hebrew, and Aramaic attest the root *šlḥ* “to send”; in contrast, *šdr* “to send” is Aramaic.

II. *šlḥ* “to Send.” The verb *šlḥ*, Old to Biblical Aramaic peal,[1] Qumran Aramaic pael,[2] takes a direct and an indirect object.[3]

1. Humans/Things. Old Aramaic attests *šlḥ* peal “to send” only with an animate direct object.[4] A nonhuman object appears in the curse of the Sefire inscription: *yšlḥn ʾlhn mn klmh ʾkl bʾrpd* “may the gods send any pest against Arpad.”[5]

In Imperial Aramaic, *šlḥ* peal idiomatically denotes the sending of news (→ II.3), *yšr* aphel the sending of goods.[6] Persons stand as the object of *šlḥ* in *TADAE* C1.1:62 (*gbrn* “men”), C2.1:19 (*prsy* “a Persian”), l. 39 *ḥylʾ* “the army,” Segal, 33.1:1 (*qryqn* “fugitive slaves [?]”). In the literary *TADAE* D23.5b:8, in the context of a war, one reads *ʾštʾ ʾšlḥ bhm* “I will send fire against them (fortifications?).”[7] Examples of the sending (*šlḥ*) of goods appear on ostraca[8] and may reflect a lower register of speech than *yšr* aphel, but also appear in late Achaemenid letters from subordinate (?) officials from Bactria,[9] not in the letters of the satrap himself.

Daniel 3:28; 6:23 explain God’s intervention on behalf of the captives in the fiery furnace and on behalf of Daniel in the lions’ den with the words

šᵉlaḥ malᵓᵃḵeh “he sent his angel”;[10] God helps, then, by means of his messenger.[11]

Qumran Aramaic attests *šlḥ* pael “to send”[12] only with an animate direct object, mostly people;[13] thus, in 1QapGen 20:23 pharaoh is urged that “he should send his wife (i.e., Sarah) away to her husband (Abraham)” (*yšlḥ ᵓntth mnh lbᶜlhᵓ*, elaborating Gen. 12:18-20). The verb also describes God’s intervention in the world with the aid of various mediators. In 4Q558 51 2:4 (a free translation of Mal. 3:23), God announces: *lkn ᵓšlḥ lᵓlyh qd*[*m* “therefore, I will send Elijah befo[re.”[14] The sending of prophets, idiomatic in Biblical Hebrew, occurs only here in Aramaic.[15] In 1QapGen 20:16, one finds *šlḥ lh ᵓl ᶜlywn rwḥ mkdš* “the Most High God sent him (pharaoh) a spirit of plague.”[16] In 1QapGen 22:26 (of captives) and 11Q10 32:4 (Job 39:5),[17] *šlḥ* means “to set free, to send to freedom.”

2. yd “Hand.” The idiomatic *šlḥ yd* “to raise the hand” already occurs in Old Aramaic[18] as a hostile act in the Sefire Treaty inscriptions:[19] *bry* [*l*]*yšlḥ yd bbrk* “my son will [not] raise his hand against your son.”[20] The expression *šlḥ lšn* “to send out the tongue,” i.e., “to get involved”[21] in *KAI* 224.21: *ltšlḥ lšn bbyty* “you should not get involved in my house.”[22]

Biblical Aramaic attests the usage in Ezr. 6:12 in the decree of King Darius in a comparable context. Any foreign king who *yišlaḥ yᵉḏeh lᵉhašnāyā* “raises his hand to alter (the decree)”[23] faces the threat of divine punishment. In contrast, one should understand *šᵉlīᵃḥ passā ḏī yᵉḏā* (Dnl. 5:24) in the interpretation of the flaming writing on the wall literally as “the palm of the hand was sent.”[24]

3. Reports. The sending of reports occurs in Old Aramaic only in the Asshur ostracon *KAI* 233.19: *mlᵓkty ᵓšlḥ lk* “I send you my message.”[25] In Imperial Aramaic, *šlḥ* peal in this meaning is frequent, less often the

passive ithpaal,[26] in the context of official exchange of correspondence; the phraseology may manifest Akkadian influence.[27] The addressee follows *l-* or *ʿl*; explicit direct objects are the missives[28] and the greetings.[29] In accord with the potential direct objects, one should interpret elliptical formulations as "to send, communicate (a report)"[30] or "to send (instruction), to command."[31] The use of the verb with and without object in the letters from the Bactrian archive accord with these circumstances.[32]

Because of the verbal image, the singular form of the masculine singular pael participle with third-person feminine singular suffix in the saying of Aḥiqar C1.1:82, *ky ṣnpr hy mlh wmšlḥh gbr lʾ lb*[*b*] "for a word is (like) a bird, who sends it out: a man without understandin[g]," merits mention here.

Imperial Aramaic usage continues in Biblical Aramaic.[33] Except for one, specimens stem from the official Aramaic documents in Ezra that deal with the reconstruction of the Jerusalem temple. Direct objects are the writings *paršægæn ʾiggartā* "copy of the letter" (Ezr. 4:11; 5:6),[34] *piṯᵉgāmā* "the communication" (4:17; 5:7), *ništᵉwānā* "the document" (4:18),[35] and in Ezr. 5:17 the written "will of the king" *rᵉʿūṯ malkā*.[36] Ezr. 6:13 has the elliptical *šᵉlaḥ dāryāwæš* "Darius commanded," similar to Dnl. 3:2, where the officials were called together for official purposes (*malkā šᵉlaḥ lᵉmiḵnaš laʾᵃḥašdarpᵉnayyā* "the king commanded the satraps to assemble").[37]

Qumran Aramaic does not attest this official Imperial Aramaic phraseology, but it echoes it in the expression *šlḥ qrʾ* "he sent, called/he had called."[38] Finally, 1QapGen 20:8f.: *wšlḥ lʿwbʿ dbrhʾ* "he sent in haste, he brought her/he had her bring quickly" is also comparable.

III. *šdr*.

1. "Sending." The verb *šdr* pael "to send"[39] is still rare in Imperial Aramaic. It appears in an ellipsis in the saying of Aḥiqar *TADAE* C1.1:101 [*sn*]*yʾ šdr lrmn*[ʾ] "the t[hornbush] sent (news) to [the] pomegranate tree," like *šlḥ* elsewhere (→ II.3), with subsequent verbatim speech. In the Bar Kokhba letter Pap. Yadin 55:4f.,6, it denotes the sending of people.[40] It is frequent in late Aramaic.[41]

2. "Intervention." In the ithpaal, *šdr* means "to step in/to bother, to intervene,"[42] as in Dnl. 6:15, where Darius *h^{a}wā mištaddar l^{e}haṣṣālūṯeh* "sought to save him (Daniel),"[43] although he had violated the decree of the king and had prayed to his God.[44]

IV. *ʾštdwr*. The noun vocalized *ʾæštaddūr* "rebellion, war," which characterizes the inhabitants of the city in the letter to Artaxerxes protesting the reconstruction of Jerusalem (Ezr. 4:15) and in his written response (4:19),[45] could be associated with *šdr* ithpaal (→ III.2), but is probably a loanword from the Persian **āxštidrauga*.[46] Qumran Aramaic attests the word in 11Q10 31:1 (for Job 38:23, *milḥāmā*) and 33:6 in the phrase *zʿqt ʾštdwr* "war cry" (for Job 39:25, *t^{e}rūʿā*), always paired with *qrb* "battle."[47]

44. Regarding the context → *nṣl* III.

45. Paired with *mᵉraḏ* “uprising”; → *mrd*.

46. Rosenthal, 63.

47. → *qrb* V.

שלט *šlṭ*; שליט *šlyṭ* /šallīṭ/; שלטן *šlṭn* /šolṭān/

I. Root and Cognates. II. Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Root and Cognates. The root *šlṭ* with the basic meaning "to have power" or "to exercise power" is typically Aramaic. Cognates in Arabic and Ethiopic can, thus, best be understand as Aramaic loans, just as in Hebrew[1] and Akkadian.[2] Ugaritic *šlyṭ*[3] is probably a name with an unclear etymology and can hardly be associated with the same root.[4] In addition to the verb in the G-stem for "to have power, control over,"[5] C-stem "to empower," the frequent adjective *šlyṭ* /šallīṭ/ "powerful," constructed similarly to the verb, is also attested, as is, furthermore, the masculine noun *šlṭn* /šolṭān/, usually "dominion" or "ruler." It is vocalized in Biblical Hebrew and twice in Biblical Aramaic (→ III) as *šilṭōn*.[6]

II. Imperial Aramaic. Old Aramaic does not yet attest the root *šlṭ*; the first instances are known from Imperial Aramaic. In the documentary texts from Egypt, one finds forms of *šlṭ* predominantly in private documents. The noun *šlṭn* appears only once; it means "legal authority": *wyntnwn ly šlṭnʾ* "that they give me authority," i.e., to sell the grain mentioned in the same written order.[7]

The adjective *šlyṭ* signifies the rights of the owner: according to *TADAE* B3.5:19, after the death of Ananis, his children should be *šlyṭn* "authorized to dispose of"[8] his portion. Line 20 of the same document adds that the other person *lʾ yšlṭ b-* "shall have no authority to dispose of (the house)."[9] At the same time, this is the sole Imperial Aramaic occurrence of the verb.

In contrast, numerous instances of *šlyṭ* occur, but all in the same legal sense as in the example discussed.[10] Three other cases have no preposition as in the passage mention above.[11] Various prepositional phrases complement the others. Most frequently, *b-* denotes the property, including slaves.[12] It occurs twenty-six times.[13] Then follows *l-* with the infinitive of the corresponding verb expressing the action for which someone is authorized (twelve times); in this usage, it also designates a specific command in an official letter from the Bactrian archive.[14] The combination of *b-* with the object of the authorization and the infinitive of the verb following *l-* also occurs (twice). For Palmyra, see *PAT*, p. 415.

III. Biblical Aramaic. Biblical Aramaic exhibits the root thirty-three times, of which all except for *šallīṭ* in Ezr. 4:20; 7:24 occur in Daniel; both as the verb *šlṭ* (seven times) and in the nouns *šolṭān* (fourteen times), *šilṭōn* (twice; on the form → I), and *šallīṭ* (ten times). One can compare the fifteen examples of the Hebrew cognate: as a verb (five times in the G-stem: Eccl. 2:19; 8:9; Est. 9:1 [2×]; Neh. 5:15; three times in the C-stem: Ps. 119:133; Eccl. 5:18; 6:2), as the noun *šilṭōn* (twice: Eccl. 8:4,8; cf. Sir. 9:13), and as the adjective *šallīṭ* (four times: Gen. 42:6; Eccl. 7:19; 8:8; 10:5; cf. Sir. 9:13) with the feminine form *šallœṭœṯ* (once in Ezk. 16:30, in pause); in contrast, *šolṭān* does not appear. Of these fifteen occurrences, nine appear in Qoheleth; the others also stem from the postexilic period, except for *hū haššallīṭ ʿal-hāʾārœṣ* in Gen. 42:6, which may, however, be a later explanatory gloss.

In the G-stem, the verb denotes the exercise of ruling power, as in Dnl. 2:39. Another person, such as an official authorized by the king, can also be in the position to exercise it (Dnl. 5:7,16). In the figurative sense, it denotes “to assume authority” in reference to fire (3:2) or lions (6:25). The C-stem means “to give power, to empower” and has the king (2:38) or a high functionary (2:48) as object. Other than this latter passage, all instances of

the verb have the preposition *b-* as complement indicating over whom or where the power will be exercised.

The noun *šilṭōn* appears in Dnl. 3:2f. (twice) personified "ruler" as *šilṭōnē m^{e}ḏīnāṯā*, i.e., the high officials who govern the provinces of the Persian empire (along with other official titles).

In contrast, the noun *šolṭān* functions as a verbal abstract in the sense of "power, dominion" in Dnl. 3:33; 4:19,31 (2×); 6:27 (2×); 7:6,12,14 (3×),26; 7:27 (2×). The plural in Dnl. 7:27 refers to the empires of the world. The word appears in context with other terms from the same lexical field: *malḵū* "dominion, ruling power"[15] in 3:33; 4:31; 6:27; 7:14,27; *r^{e}ḇū* "majesty, grandeur"[16] in 4:19; 7:27; *y^{e}qār* "honor, dignity"[17] in 7:14.

Furthermore, the form *šallīṭ* occurs ten times, two of them substantivally for "official" (Dnl. 2:15) or "ruler" (5:29).[18] In both cases it accompanies the preposition *b-* indicating the realm of dominion. Seven additional passages employ the word as an adjective "mighty" (Dnl. 2:10; 4:14,22,23,29; 5:21; Ezr. 4:20), all except for Dnl. 2:10 also with *b-* in the sense described. Finally, it occurs in an impersonal construction in Ezr. 7:24, *lā šallīṭ* followed by the infinitive meaning "it is not permitted to."

The theological use of *šallīṭ* is most clearly evident in the contrast between contingent secular power and the absolute dominion of God. As the holy ones[19] in Nebuchadnezzar's dream in Dnl. 4:14 explain, the supreme God rules over human power (*šallīṭ b^{e}malḵūṯ ʾ^{a}nāšā*) and is free to bestow it upon whomever he will. The dream interpretation in Dnl. 4:22,23,29 then relates this statement to the king. An echo of the same theological conviction resounds in Dnl. 5:21. From this perspective, *šallīṭ* and *šolṭān* are part of the theological vocabulary in Daniel that consistently describes God's superior dominion over human kingdoms and realms. In contrast to them, his dominion, as Dnl. 6:27 emphasizes, has no end.

Theodotion translates *šallīṭ* in Dnl. 4:22(25),29(32) with the verb κυριεύειν "to rule," but in Dnl. 4:14(17) has κύριος εἶναι "to be lord." The unrevised old translation (Old Greek [OG]) employs ἐξουσίαν ἔχειν "to have power" in Dnl. 4:14(17),29(32). In Dnl. 4:23, both versions (Theodotion 4:26; OG 4:27) read the noun /šolṭān/ for the plural absolute *šallīṭīn*, in the consonantal text spelled defectively *šlṭn*, and render it with ἐξουσία "power."

IV. Qumran. At Qumran, *šlyṭ* appears in eighteen passages.[20] As elsewhere in Aramaic, it means "to be empowered, to have power"; various prepositions complement it: *b*-, *ʿl* or *l*- with infinitive, the latter expressing the nuance "to be able."[21] A passage in Abraham's petition[22] illustrates the various constructions: *dy ʾnth mrh wšlyṭ ʿl kwlʾ* "for you are Lord and rule over everything," *wbkwl mlky ʾrʿʾ ʾnth šlyṭ lmʿbd bkwlhwn dyn* "and you have power over all the kings of the earth to execute justice against all of them." It also represents the power of God in 4Q542 1 1:2f. and 4Q550 7+7a:1, secular dominion in the vision of the four trees in 4Q552 1 2:6, and in the juridical sense "authority to dispose of" in 1QapGen 22:24 (→ II). The noun can also function in the sense of "owner," as in 11Q10 32:6 (Job 39:7), *wngšt šlyṭ lʾ yšmʿ* "and he (the wild ass) does not heed the goading of an owner."

The verb *šlṭ* in the G-stem generally has the meaning "to exercise power," so that its usage is very similar to that of *šlyṭ* although the verb gives clearer expression to the dynamic nuance "to exercise dominion" in contrast to "to be ruler" as the comparison of 1QapGen 20:13 (see above) and l. 15 *wʾl yšlṭ blylyʾ dn lṭmyʾ ʾntty* "so that he (pharaoh) is not able in this night to sully my wife" demonstrates. In addition to *l*- and the infinitive for "to be able," as here, the verb also finds usage like the adjective with the prepositions *ʿl* (six times) or *b*- (four times). As an astronomical term, the verb further denotes "to shine" in reference to stars.[23]

In the C-stem, it means "to empower someone, to allow to exercise power," as in the sense of the power to make political decisions ("to name") in 4Q196 2:5,8 (Tob. 1:21f.) and generally in 4Q213a 1:17 (T. Levi, here as a request to God, "let no opponent rule over me"). The inner passive *ʾšlṭt* "I was empowered" occurs in 4Q544 3:1, Amram's vision of the battle between the evil and the good angels, and alternates with the passive participle of the C-stem in 4Q544 1:11; 2:11,15 for the angels who have power over every human fate.[24]

Finally, the noun *šlṭn* /šolṭān/ occurs in fourteen passages[25] and has the basic meaning "dominion," as in *šlṭnh šlṭn ʿlm* "his dominion is an eternal dominion,"[26] explicitly in the religious sense *šlṭn šmyʾ lʾrʿ nḥt* "the dominion of heaven came down to the earth" in the Book of Giants,[27] and generally *ʿbdy šlṭnʾ* for "rulers" in the Persian Empire in the court tale of the edict of Darius.[28] On the astronomical use in reference to stars in 4Q209 28:2, see above.

For a more detailed treatment of the usages sketched here and a discussion of the other pertinent instances, sometimes only preserved in fragments, see Gzella.

שלי *šlī*; שלו *šlw* /šalū/; שלין *šlyn* /šelyān/; שלה *šlh* /šalāe/; נוח *nwḥ*; ניח *nyḥ* /nayāḥ/

I. Etymology, Forms, and Lexical Field. II. Verb "to Be Calm." III. Noun "Undisturbed Fortune," "Negligence." IV. Noun "Calm." V. Adjective "Calm, Carefree."

I. Etymology, Forms, and Lexical Field. Forms of the Semitic verbal root *šlī*[1] "to be calm, carefree" and its nominal derivatives occur in Aramaic and Hebrew, and also in Akkadian,[2] Ugaritic, and Arabic. Old Aramaic already attests it; along with the verb, older material already has the feminine /šalū/ "calm, negligence,"[3] the masculine /šelyān/ "calm," and the adjective "calm, carefree."

The root *šlī* with its various derivatives denotes internal calm and freedom from external disturbances, sometimes pejoratively for the associated carefreeness and negligence. Consequently, its opposite consists of verbs of internal agitation like → *bhl* or *krī* "to terrify" (in Dnl. 3:24)[4] and → *ʿṣb* or *yṣp* "to be concerned" as well as more specific emotional states such as → *dḥl* or *zūʿ* "to be anxious." In contrast, older Aramaic has *nūḥ*[5] for external calm as the absence of motion. It is sometimes ingressive "to come to a stop" as in the settling of the ark,[6] but also for the calm of the earth after the destruction of evil,[7] and with a similar connotation in the C-stem "to create calm."[8] The related masculine *nyḥ* /nayāḥ/ "calm" may, indeed, already occur in *TADAE* C1.1:92 figuratively for *bnyḥ* "in calm, satisfaction," but it is not entirely certain because of the possibility of lost letters at the end of the line.[9] In Jewish and Christian Aramaic languages of late antiquity, forms of this root occur regularly for the calm of death. For

“to tarry,” Aramaic employs instead → *šrī*, for “to dwell” → *ytb*,[10] or, rarely, → *škn*.

Apparently unrelated to the root *šlī*, the word *šlh* in Dnl. 3:29 erroneously appears in the pointing as *šālū*, but most likely intends the Akkadian loanword /šillā/ “impertinence, blasphemy” no longer known to the Masoretes.[11]

II. Verb “to Be Calm.” As a verb, *šlī* “to be calm” appears only sporadically, but can already be identified in an Old Aramaic treaty of state from Sefire in a clause concerning fugitives. It prohibits one ally from accepting fugitive subjects of the other and saying to them: *šlw ʿl ʾšrkm* “remain calm in your place.”[12] The connotation “to dwell without concern” may also shine through here, i.e., it involves not granting renegades a home, but the meaning may converge with that of → *ytb* “to dwell, to remain” in exactly the same context in ll. 6f.

On the other hand, the nuance in the Aramaic of late antiquity seems to have narrowed more to “to be negligent” probably under the influence of the nominal forms;[13] Syriac, e.g., attests it, however, in the meaning “to be calm, still.”[14]

III. Noun “Undisturbed Fortune,” “Negligence.” The connotation “negligence, carelessness” of the feminine substantive *šlw* /šalū/ already manifests itself clearly in Biblical Aramaic: according to Dnl. 6:5, despite every effort, those who envy Daniel could discover no error in his reliable execution of office, neither *šālū* nor *šᵉḥīṯā* “error,”[15] that would provide an occasion for an accusation.[16] The same meaning underlies the king’s admonition in Ezr. 4:22 not to behave negligently in order to avert damage from the government,[17] and the expression *dī lā šālū* “without omission” in Ezr. 6:9. The word also appears late with this meaning.[18]

Consequently, it may be different in its usage in the otherwise atypical sense “calm, well-being” in Dnl. 4:24 and pointed on the pattern of the

regular verb as a *qatilat* form with a consonantal /w/ (→ I), as in Hebrew, since Hebrew *šālēw* "calm" and *šalwā* "calm" consistently have the connotation "carefree." Because it corresponds precisely to the meaning of the adjective *šlh* "calm" in Dnl. 4:1, however (→ V), and the transition from "carefree" to "negligent" is fluid, in any case, there are reasons to assume that this is also true of the noun and only the punctuation has distinguished the two nuances "calm" and "negligence" in two different forms. At the same time, the lexicographical tradition usually assumes two different lemmata.[19] In any case, *šlwtk* "your rest" in Daniel's interpretation of Nebuchadnezzar's dream in 4:24 alludes to *šlh* "peaceful, content" in 4:1: the king's good fortune will only endure if he acknowledges God as the true ruler and, as atonement for his arrogance, act justly.

IV. Noun "Calm." The masculine form *šlyn* /šelyān/ "calm" occurs in Aḥiqar's admonition not to allow oneself rest (*šlyn lnpšk ʾl tśym*) after assuming a debt (*hn tzp zptʾ*) until it is repaid,[20] and probably on an ostracon.[21] The same word, negated, appears in reference to a fire flickering turbulently in Enoch's vision;[22] the parallel versions enable the reconstruction of the context of the Aramaic fragment.

V. Adjective "Calm, Carefree." Finally, older Aramaic attests the related adjective *šlh* /šalǣ/ "calm, carefree" once (Dnl. 4:1). The parallelism with *rʿnn* /raʿnan/ "prosperous," literally "lush green, luxuriant" and probably adopted from Hebrew,[23] makes it clear that the positive connotation stands in the foreground here. Nonetheless, according to 4:27f, the king's self-satisfaction brings divine punishment because "pleasant rest" does not lead to "pure virtue" on its own.

שלם *šlm*; שלם *šlm* /šalem/; שלם *šlm* /šalām/

I. Etymology and Lexical Field. II. G-stem “to Be Complete.” III. D-stem “to Pay, to Repay.” IV. C-stem “to Hand Over.” V. Adjective “Whole, Undamaged.” VI. Noun “Joy, Well-being.”

I. Etymology and Lexical Field. In all the branches of the Semitic languages, verbal and nominal forms of the root *šlm* with the G-stem meaning “to be complete” are very productive. Individual nuances crystallize in context since the concept of completeness has other implications depending on the subject. With reference to objects, the connotation is “to be ready, finished,” to persons “to be perfect, flawless,”[1] to numerical concepts “to be complete” and, to specific times and periods, “to be over, past.” The transitive D-stem functions mostly as a financial term “to pay”[2] and the rarer C-stem denotes “to hand over, to deliver.” Elements of the semantic spectrum of this verb have points of contact with that of → *mlī* “to be full,” in the D-stem “to fill,” while *bṭl* indicates the cessation of an activity.[3] “To return” is mostly the C-stem of → *tūb* or simply → *ytn*/*ntn* “to give.” In official diction, furthermore, the lexicalized causative forms *šyṣ*ʾ (Ezr. 6:15) and *škll* (Ezr. 4:12f.,16; 5:3,9,11; 6:14) probably adopted from or influenced by Akkadian denote “to complete.”[4]

Of the two nominal forms in use, the adjective /šalem/ “whole, complete, undamaged” corresponds to the meaning of the verb in the G-stem and has a synonym in *gmyr* /gamīr/ “perfect, complete.”[5] Its meaning in the introduction to the letter in Ezr. 7:12 is debated, however; presumably *šlm* must be supplied to attain the expression for “complete salvation.”[6]

Finally, the masculine substantive /šalām/ "peace, well-being," which occurs primarily in the wish and the greeting formula, has a related, but independent semantic nuance. It may quite generally denote the well-being of an individual, including physical health and peace of mind. The analogous Hebrew form /šalōm/, perceptible in the plene spelling *šlwm*, serves to mark Jewish cultural identity and often appears as a farewell at the end of Jewish Palestinian grave and synagogue inscriptions.[7]

II. G-stem "to Be Complete." In the stative G-stem, *šlm* functions generally like the adjective (→ V) and sometimes takes *l*- "for" plus an indirect object. Only the usage of *tšlm* in *TADAE* B3.13:11 seems unusual. In context, it must mean "to be completely paid out" (with *b*- "in") and, thus, corresponds to the D-stem "to pay" employed elsewhere in the same contract (→ III);[8] consequently, some have suggested a passive form of this stem, perhaps a misspelled t-passive *tštlm*.[9]

Otherwise, the verb designates the state of completion and represents the end of construction (Ezr. 5:16, negated of the not yet finished temple), the immaculate beauty of a person,[10] and the "completion," i.e., "being past" of times.[11] In analogy to the latter usage, it can also appear with other numerical concepts when it means "to be complete."[12]

III. D-stem "to Pay, to Repay." The meaning of the D-stem "to pay, to repay" with that to be paid as the object, optionally complemented with *l*- for the indirect object and *b*- for the nature of the payment,[13] is more narrowly defined than that of the G-stem. It appears regularly since the Neo-Assyrian period in debt certificates corresponding to the Akkadian *šallumu*.[14] It appears with the same meaning in business letters[15] and a proverb concerning the repayment of a loan.[16] In an expansion of this usage, the verb can also mean "to replace, to requite."[17]

It appears figuratively for "to repay, to requite" in 11Q10 23:5 (Job 33:26)[18] and 24:5 (Job 34:11)[19] and in the passive in 23:6 (Job 33:27).[20] In

addition, it serves in an astronomical context in a description of the phases of the moon as "to complete."[21]

IV. C-stem "to Hand Over." The C-stem of *šlm* appears only sporadically in older Aramaic. Besides the uncertain and partially emended instance in *KAI* 222 B 24, where the context requires the meaning "to fulfill" (of a contract),[22] it usually denotes "to give back" or "to hand over." Ezr. 7:19 utilizes it for the return of the temple implements to (*qdm*) God, Dnl. 5:26 for God's recall of Belshazzar's dominion.[23] Admittedly, the causative nuance of the G-stem "to make complete," i.e., "to end" could also stand in the foreground,[24] since nothing is handed over, but is taken away. In 1QapGen 20:32, the verb refers to the return of Sarah, in 4Q542 1 1:4 to the heritage of the fathers (i.e., the religious law and its traditions), handed over to the descendants of the patriarchs. At Palmyra, too, it means "to hand over."[25]

V. Adjective "Whole, Undamaged." The adjective *šlm* /šalem/ "whole, complete, undamaged" first appears in Aramaic at Qumran, but because of the ambiguous spelling, the discussion also attributes a few instances to the noun "peace, well-being" (→ VI). Because of the meaning "complete," the use for light in an astronomical context[26] involves the adjective with substantial certainty, as does 11Q10 32:2 (Job 39:2).[27] Contrariwise, *ʿbd šlm* in 4Q246 1 2:6 can mean "to make whole"[28] or "to make peace." Similarly, the word in 4Q535 3:2 in the context of a birth could represent the adjective in the full sense "complete, undamaged, sound"[29] or the noun for "it goes well for him." If one reads the paleographically unclear passage 4Q242 4:2 as *šlm šl*[*m*,[30] it would involve a combination of noun and adjective "complete health," although the line breaks off thereafter. A few other instances are too fragmentary for a precise determination.

VI. Noun "Joy, Well-being." The root appears in the form of the noun *šlm* /šalām/ "well-being" since the earliest Aramaic. It can first denote "peace" as the well-being of an entire people.[31]

It usually refers, however, to personal well-being and is related semantically to the concept "life"[32] and the adjective /šarīr/ "healthy." One can ask for it for oneself and for others, through the dedication of a statue, for example,[33] or wish for it in the formalized greeting. Since the appearance of Aramaic letters in the later Old Aramaic period in official[34] or private correspondence,[35] therefore, it appears as part of various expressions in the prescript. The Aramaic documents from Egypt preserve dozens of instances;[36] now, the writings of lower officials from Bactria join them.[37] Scribal training transmitted these formulas. They divide into a concise version *šlm* PN (*mn* PN) "Well-being to PN (from PN)" as an address formula of the epistolary ostraca, whose tone is mostly matter-of-fact[38] and *šlm* (PN) "Well-being (to PN)" as the shortest variant[39] and several types of more extensive salutations and felicitations with *šlm* as the object of the verbs → *šʾl*,[40] → *šlḥ*, or the C-stem of *yšr*,[41] or in the construct state with the name of a temple.[42] In combination with *b*-, the word also functions like an adverb "healthy," as in letters in the "reunion formula" with the verb → *ḥwī*.[43] Together with *l*- or *qdm*, it denotes "it is going well (for me, etc.)," perhaps expanded with *tnh* "here";[44] as the object of *šʾl* with a human subject "to ask about the well-being," it means simply "to greet," even in narratives.[45] For an extensive taxonomy, cf. D. Schwiderski, *Handbuch des nordwestsemitischen Briefformulars*. *BZAW* 295 (2000), 107-11,115-54; similarly, Ezr. 4:17; 5:7; Dnl. 3:31; 6:26. A greeting can also stand at the end.[46] In the predication "PN is a well-being" it means "it goes well for PN."[47] "Healthy" appears often with verbs of travel,[48] as "in peace" of a good death.[49]

15. *TADAE* A3.8:2; D1.13:8; 1.17:5.
16. *TADAE* C1.1:131.
17. As in reference to the personal liability of subordinate state officials for possible damages resulting from misbehavior *TADAE* A6.15:8; Naveh and Shaked, A6,10; probably also "to replace" later in 1QapGen 7:5, although between lacunae.
18. For Heb. *šūb*.
19. For Heb. *šlm*.
20. For *šwī* "to be appropriate, sufficient."
21. Of the light of the full moon: 4Q210 1 3:5 (1 En. 78:6f.).
22. Cf. J. A. Fitzmyer, *The Aramaic Inscriptions of Sefire*. *BietOr* 19/A ([2]1995), 108.
23. Ultimately, God installs and deposes kings: 2:21; → *mlk* IV.
24. So *LexLingAram*, 169: *finivit*, similar to Theodotion's ἐπλήρωσεν and the *conplevit* of the Vulgate.
25. *PAT* 0322.4, with *ʿl ydwh* "into his hands."
26. 4Q209 7 3:7.

27. A simplified translation of a Heb. formulation with the D-stem of the verb *mlʾ* “to fill.”

28. So *ATTM*, 2, 149,493.

29. Cf. *ATTM*, 2, 164.

30. With *ATTM*, 2, 139.

31. *KAI* 320.2, with the word *lḥmh* “war,” unusual in Aramaic, as an antonym; otherwise → *qrb* has this meaning; perhaps also in *KAI* 224.8, but the reading is uncertain; see Fitzmyer, *Sefire*, 150.

32. → *ḥyī*.

33. *KAI* 309.8f., for the well-being of the king, his descendants, and his people.

34. First in *KAI* 233.1.

35. Attested since the Hermopolis papyri.

36. See Schwiderski, 789-91 for an overview.

37. Naveh and Shaked, B1,1; 2,1; 4,1f.; 6,1f.

38. E.g., *TADAE* D7.16:1; 7.20:1f.

39. So, besides many other examples, *TADAE* A2.1:3; 3.7:1f.

40. E.g., *TADAE* A3.7:1; 4.7:1f.

41. E.g., *TADAE* A6.3:1, together with *ḥyn* “life”; D7.21:2f., with *šrrt* “health.”

42. Cf. *TADAE* A2.2:1.

43. E.g., *TADAE* A2.1:2.

44. Cf. TADAE A4.2:2.

45. → *šʾl* III.1.; similarly in animal fables: *TADAE* C1.1:94,168.

46. Schwiderski, 231; Naveh and Shaked, B1.7; 3.5; 6.7.

47. 1QapGen 21:19; 4Q197 4 3:7 (Tob. 7:5); cf. 2 S. 20:9.

48. 4Q197 4 1:2 (Tob. 5:21); 4 3:4 par. 4Q196 14 2:7 (Tob 7:1); 4Q544 1:9.

49. 4Q196 18:12 (Tob. 14:2).

שֵׁם *šm* /šem/

I. Etymology, Form, and Grammatical Constructions. II. As an Identifying Characteristic. 1. Basics. 2. “Name” in the Written Witnesses. 3. Naming. III. Expanded for “Reputation.” IV. Name of God. V. Fixed Expressions.

I. Etymology, Form, and Grammatical Constructions. Common to all Semitic languages is the masculine substantive “name” /š-m/ with a vowel that varies in the individual languages between */i/[1] and */u/.[2] Probably under the influence of the labial /m/, the Aramaic ground form /šem/ was sometimes pronounced /šom/;[3] the word occurs rarely with a prosthetic glottal stop *ʾšm*.[4] The plural has the feminine ending, in the absolute /šemahān/, but behaves in agreement as a masculine. In addition to its function as an identifying characteristic, the name also refers to the person and one’s reputation, in religious speech to the name of God as a sign of God’s personal nature that makes it possible for people to address him and to find in him a counterpart. The word often appears with the verb → *qrī* “to name,” but can also function as the object, e.g., of → *ḥbl* “to damage” or → *śīm* “to apply, to attach.” In the designation of God’s name, it regularly appears with verbs of address, praise, and honor. Furthermore, it is a component in compound expressions, especially *bšm* “in the name/at the commission of; relating to.” The expression *šm* with *l*- means “to have a name”; *mn šmk* is “what is your name?”; and one usually replies “I PN” for “my name is,” i.e., a nominal clause with a personal pronoun and the personal name.

II. As an Identifying Characteristic.

1. Basics. The name serves first to identify a person or a place. In reference to people, it sets the individual apart from the group and is therefore maximally definite in grammatical terms. It thereby represents the unalterable identity of a self-conscious subject throughout the subject's life and continues after death to be the anchoring point in the memory of others. At the same time, it is embedded in cultural traditions, can reflect a religious or political commitment or simply a preference of the name-givers (as a rule, primarily parents), or emphasize an external or internal trait perceived as characteristic.

Aramaic names have roots in the conservative West Semitic onomasticon[5] with its common stock of theophoric elements, divine names in nominal or verbal phrases, that express a trait of the respective deity or its relationship to the bearer,[6] in addition to certain abbreviations,[7] and through the addition of hypocoristic endings such as /-ā/[8] and single word names.[9] Within this stock, transmitted over centuries, sometimes millennia, Aramaic names, especially in consonantal spellings, are not always distinguishable from Canaanite or Arabic. A few lexical elements are typically Aramaic, however: *zbn* "to buy" or *yhb* "to give," patterns such as *qātōl*, or the gentilic affix /-āy/ as a hypocoristic ending.[10]

In Aramaic texts, West Semitic names could also interchange with Mesopotamian, Egyptian, and beginning in the Achaemenid period, Iranian names. In the Hellenistic-Roman period, one can also find Greek, Latin, and Arabic names in Aramaic-speaking regions. Especially in bilingual and bicultural societies such as Roman Palmyra, persons sometimes had two names that may have translated one another, sounded alike, or were entirely unrelated.[11] Direct conclusions drawn from the language of a name concerning its bearer or his or her often imperceptible ethnicity are mostly impossible, but certain theophoric elements reflect a cultural affiliation, such as /Yō-/ or /-Yā/ as an abbreviation for the God of Israel in Jewish personal names.

The inventory of Aramaic names, including distribution and meaning, is available in specialized onomastic studies for the individual corpora of inscriptions.[12]

Besides people, divine beings, and animals, places, bodies of water, sometimes buildings,[13] and other things like stars[14] or abstract concepts like the letters of the alphabet,[15] the months and festivals have names, in fact even some objects do.

2. "Name" in the Written Witnesses. Name and existence interlink inextricably. In the representational culture of the Old Aramaic principalities in Syria, which produced the first textual witnesses, kings record their own names in history in the reports of their deeds; with them begins the self-introduction of the author at the beginning of the respective inscriptions. Consquently, it is also very important that this name be preserved; the introduction[16] of another name stands under a curse, therefore.[17] The treaties of state from Sefire wish that the descendants[18] of an oath-breaker "inherit no name" (*ʾl yrt ʾšm*).[19] Conversely, by nature, a coup d'etat involves destroying the name of the toppled prince.[20] (An additional instance of *šm* occurs in a highly damaged context in *KAI* 202 C 2, another royal inscription.)

With the appearance of private grave memorials, the quest for *memoria* in the time of ancient Near Eastern empires spread further among the upper class,[21] who looked to the forms of expression in the royal inscriptions and also wished for an enduring remembrance.[22] In the Roman Near East, this pursuit, with the added influence of the Hellenistic practice of publicly honoring private individuals, then became the driving force for the brisk production of epigraphy.[23] One must distinguish, however, between inscriptions honoring civil beneficence, as in Palymra and in late antiquity in Jewish Palestinian and Samaritan synagogues, and personal memorial, dedicatory, and grave inscriptions that continue an older practice.

Beginning with the Neo-Assyrian period, Aramaic written witnesses also document administrative practice. Here, the name serves primarily practical purposes: it identifies individual persons in correspondence and in legal affairs, and indicates the owner of slaves and objects. From the Achaemenid period on, official texts frequently employ the construction PN *šmh* "a certain PN,"[24] probably under Persian or Akkadian influence;[25] the same construction also appears in Ezr. 5:14. Thereby, the voices of

individuals who make contracts[26] and file official petitions,[27] as well as the names of persons involved in penal proceedings[28] first become audible. In Ezr. 5:4,10, too, the opponents of the temple construction ask for the names of those responsible in order to report them (Ezr. 5:4: *mn ʾnwn šmht gbryʾ* "what are the names of the men"; 5:10: → *šʾl šm* "ask for the names").

3. Naming. The Aramaic sources rarely speak of the act of naming, which is of such theological significance in the OT, or of renaming after a decisive event. The new name of Daniel after his entry into royal service (Dnl. 2:26; 4:5,16; 5:12)[29] corresponds to the Mesopotamian custom of changing the name at the beginning of a new phase of life.[30] In the context of the book of Daniel, it represents the complex identity of people who assert themselves in a foreign environment with all its possibilities, on the one hand, yet remain true to their religio-cultural traditions, on the other. One can understand the dual cultural identity of the Palmyrene elite similarly: in Aramaic, the participle of the Gt-stem of → *qrī*, "who was (also) called," indicates the second name, in Greek ὁ καί (cf. Acts 13:9). Qumran sporadically mentions naming (by the father) in the context of biographical details concerning the patriarchs.[31]

In some cases, the name itself suggests possible reasons for its choice. Papponymy, i.e., naming a child after its grandfather, widespread in Greco-Roman times, appears in genealogical information in Palmyrene inscriptions and related, at least originally, to the fact that the child was considered a substitute for the already deceased family member, which also finds expression in the so-called "substitute names."[32] If not pure convention, the choice of a theophoric element can express a religious commitment, as to Hadad or Baal in Syria or to the God of Israel in Palestine, and in the case of Nabatean basilophoric names, also to a certain king. Time or circumstances of the birth appear, e.g., in Haggai (/ḥaggāy/) or Shabbatai (/šabbatāy/) "the one born on a feast day/Sabbath," Silas (/šaʾīl/) "the one asked for," etc. Since bilingual Palmyrene inscriptions still sometimes translate name elements,[33] they were apparently considered significant.

In symbolic contexts, “to have a name” can also signify “to stand for something.” Thus, the visionary of a historical allegory of four empires asks about the names (*mn šmk*) of the trees that symbolize these empires; the reply of the first tree is: “Babylon.”[34] Further, the gates in the vision of the new Jerusalem bear the names of the tribes of Israel whom they represent.[35] Consequently, a nickname can also be included under the term *šm*, as the use with the verb *knī b-* in the D-stem “to call by a nickname”[36] indicates.[37]

III. Expanded for “Reputation.” Because of the close connection of name and person, *šm* also represents a person’s reputation. It is already a recurring theme in the Old Aramaic proverbial wisdom of Aḥiqar. Honoring one’s parents demands taking pride in the name (*bšm*) of father and mother;[38] through shameful behavior, one soils the name of past and future generations of one’s own family.[39] Therefore, in the presence of others, one must consider their regard.[40] Thus, the name determines not only the continued life of a person in the memory of others, but, above all, how one remembers this person. To acquire[41] a good name (*šm ṭb*) is a gift of the gods, just as is a long life.[42] In the religious literature from Qumran, this deeply rooted conception recurs at the surface of the Aramaic tradition: the mention of the name[43] in future generations guarantees continuity,[44] and the descendant’s good reputation because of upright behavior is also a reason for the ancestors to rejoice;[45] conversely, the shame of the individual transfers to the family.[46] The topic of the king’s fame echoes in a court novella.[47]

IV. Name of God. Just as the name of a person renders his individuality namable and confirms his existence, the name of God enables access to his person. The statement that he causes his name to dwell in the temple (Ezr. 6:12)[48] refers to his presence, per se. Consequently, the concept of the name of God occurs regularly in the language of personal prayer, as evident in Biblical Aramaic and the texts from Qumran. The hymn of thanksgiving praises it (Dnl. 2:20),[49] it is holy[50] and revered,[51] thus bearing the very characteristics of God;[52] by sharing his “great”[53] name, God reveals himself

to the believer and makes himself known;[54] he can therefore be addressed in prayer.[55] The same verbs and modifiers used of God also refer to his name. Similarly, *šm* can appear in relation to God with the nuance "reputation" when, in hymnic praise, it means the knowledge of God's great deeds across the generations.[56] In God's case, the naming of his name is already closely related to praise (as in other ancient cultures).[57]

The angels, called upon especially in later magical texts to protect against evil, also have names; older Aramaic transmits them primarily in the books of Enoch, as well as parts of Daniel, and, from Qumran, Tobit and the Testament of Amram.[58] The names of the fallen angels do not differ essentially from those of the holy ones since even the former once stood in God's service. Characteristic in most cases is the theophoric element El,[59] which clarifies the angels' alignment with God.

V. Fixed Expressions. In addition to the expression *šm ṭb* for "a good reputation, fame" and the regular use of *šm* with certain verbs (→ I), the word appears frequently as part of fixed expressions that associate the name closely with a person. As *bšm* "in the name," it can mean "on behalf of" and refer both to people[60] and to God.[61] Especially in legal diction, however, it also means "in reference to," in which case it designates the subject of a contract[62] or a clause of one,[63] just like *ʿl dbr*.[64] While *bšm* and *ʿl dbr* characterize an action, *ʿl šm* means "in the name of";[65] *lšm* may function similarly for a city built in the name of God[66] and in contracts from the time of the second rebellion with the name of the rebel leader Bar-Kosiba in the sense of *nomine et auspiciis*.[67] In addition, other prepositional expressions with a similar meaning occur sporadically later.[68]

שמין *šmyn* /šamayn/; כוכב *kwkb* /kawkab/

I. Etymology, Form, and Lexical Field. II. As Part of the Visible World. III. 1. As the Dwelling Place of Divine Beings. 2. Visionary Journeys to Heaven. IV. Stars and Zodiac Signs.

I. Etymology, Form, and Lexical Field. Just as the ubiquitous heaven belongs among the universal human impressions, the word for it is also a common primary noun in the Semitic languages. Aramaic /šamayn/ traces back to a form of the *qalī* pattern in the dual[1] or *plurale tantum*.[2] No clear conceptual foundation for this variation in number is known. In Aramaic, the substantive behaves mostly as a masculine plural in agreement,[3] but can also occasionally, as e.g., sometimes in Syriac, function as a masculine or feminine singular. As a meteorological term, "heaven" designates the realm above and beyond the earth and, seamlessly, the sky above as the associated habitat of divine beings. Consequently, "heaven" functions as an antonym of → *ʾrʿ* "earth"; the two together constitute a pair repeatedly attested throughout the older phases of the language[4] as a figurative paraphrase of totality.[5] Aramaic does not attest an independent lexeme for "underworld."

In both nuances, /šamayn/ often appears in the construct state together with associated phenomena, on the one hand as "sky" with birds or certain meteorological phenomena such as winds or dew, and on the other as a title in the designation of God or of the angels, and extended metonymically for God himself. Furthermore, it combines with various prepositions to indicate direction: *l*-[6] or *ʿd*[7] "(reaching) to heaven," *mn*[8] "from heaven," or *tḥwt* "under heaven"[9] as a synonym of *ʿl ʾnpy ʾrʿ* "on the surface of the earth."[10] The masculine *kwkb* /kawkab/[11] denotes "star." Sun[12] and moon[13] as once divine beings and the planets and zodiac signs[14] each had their own names.

II. As Part of the Visible World. As a visible part of the universe, heaven is distinct from the earth accessible to human beings (→ I). The earth can also occasionally divide into the habitable dry land, the sea,[15] and other areas such as the mountains;[16] cf. 1QapGen 7:1, but, because of a lacuna in the text, it is unclear whether the reference to zodiac signs, sun, moon, and stars in l. 2 constitutes a contrast. In contrast to earthly nature, it has undergone no alteration so that Aramaic also attests *kywmy šmyn* "like the days of heaven"[17] as an expression for eternal duration (cf. Dt. 11:21; Ps. 89:30); only a teleological perspective such as Mk. 13:31 associates "heaven and earth" as an expression for "everything" with transience.

In the spatial sense, *šmyn* represents the habitat of birds.[18] Here, the word primarily means "air, sky," for which Semitic languagues originally had no independent word.[19] The "birds of heaven" in the collective expression *ʿwp šmyʾ* (Dnl. 2:38) or as a plural of individuality *ṣpry šmyʾ* (Dnl. 4:9,18) constitute a distinction within the animal world to the land animals (*ḥywt brʾ* "animals of the field");[20] together, they contrast with humanity. In royal ideology, *ʿwp šmyʾ* functions in Dnl. 2:38, on the one hand, as the object of Nebuchadnezzar's unlimited claim to power (admittedly, it does not mention the sea), and *ṣpry šmyʾ* (the birds that nest in the branches of the world tree) in 4:8,19, on the other, as a picture of the comprehensive protection that the king offers everything in his dominion. The tree that reaches to heaven (Dnl. 4:8,17,19)[21] represents Nebuchadnezzar himself and illustrates the ambivalence of all secular dominion with its majesty in the constant tension between ruling authority and ruinous hybris.

More often, *šmyn* appears in the context of various meteorological phenomena; to be sure, in the texts from the book of Daniel and from Qumran, in which they occur in concentration, they are always embedded in visions. The expression *ṭl šmyʾ* "dew of heaven,"[22] which recurs as a leitmotif in the account of Nebuchadnezzar's dream, its interpretation, and its realization (Dnl. 4:12,20,22,30; summarized in 5:21), may designate a basic provision of nature: the king, dehumanized in banishment, is indeed stripped of his majesty and shares the habitat of the animals of the field, but

the dew and herbs[23]—both positively connoted terms for the nurturing aspect of the essentially good creation, attendant upon humanity—keep him alive so that at the end of his period of penance, as soon as he has recognized God as the supreme Lord, he is able to return to office.

In contrast, the images of the vision of Dnl. 7, loaded with mythical reminiscences, have cosmic connotations. The four animals as symbols of the four sequential empires ascend to an apocalyptic otherworldly landscape of the sea churned up[24] by the four winds of heaven (*ʾrbʿ rwḥy šmyʾ*; Dnl. 7:2), which may recall the hostile power of chaos associated with the sea in ancient Canaanite mythology.[25] The "son of man" constitutes the counterpart. He comes "together with the clouds of heaven" (*ʿm ʿnny šmyʾ*) and, before the throne of a divine figure elevated above time and space, receives from this figure eternal dominion after the destruction of earthly powers (Dnl. 7:13). The myth of Baal, rider of the clouds, and his victory over chaos resounds here.[26]

At Qumran, the four winds of heaven also appear as a destructive power that defoliates and destroys the olive tree in Noah's vision.[27] In addition, 11Q10 13:2 (Job 28:21) has *ṣpry šmyʾ* for Hebrew *ʿwp hšmym*.[28] Otherwise, *šmyn* appears more often in astronomic contexts, either in the actually redundant phrase *kwkby šmyʾ* "stars of heaven"[29] or in the technical astronomical expression *mʾny šmyʾ* "heavenly bodies";[30] *mzlt šmyʾ* "zodiac signs of heaven"[31] is also a double expression (→ IV). These texts add precision, primarily in the written tradition, to the Aramaic lexical field "heaven."

In relation to the heavenly gates of the wind, the expression *rwḥy šmyʾ* serves in the literal sense for the "winds of heaven," on which the figurative meaning "cardinal directions" rests;[32] otherwise, *rwḥyn* without *šmyʾ* also serves this purpose.[33] Further, the stars exit the gates of heaven when they rise;[34] thus, they function as portals that link heaven, as sky, with the firmament above.[35] From them descend not only wind and rain, but through them, cries of lament and the fragrance of sacrifice also arise to God (→ III.1).

According to the teleological historical perspective of apocalypticism, however, heaven is also only preliminary: in a reversion of the old function of *šmyn* as an eternal concept,[36] according to the ten weeks apocalypse, at the dawn of the eschaton, a *šmyn qdmyn* "first heaven" will pass away.[37]

A few other examples from Qumran resist definition because of the lack of context.

III. *1. As the Dwelling Place of Divine Beings.* At the same time, heaven is also the dwelling place of divine beings, and, in the principalities of Syria, since Old Aramean times, gods were venerated who were linked with meteorological or astral phenomena.[38] With Attar or Ištar, who appeared as stars in heaven, and with the fertility god Hadad, whose voice was believed to be heard in thunder[39] and who was *gwgl šmyn wʾrq* "irrigator of heaven and earth" because of his dominion over the rain,[40] the two aspects of heaven as a visible space above the earth and as the habitat of the gods fused. Old Aramaic inscriptions explicitly mention "gods of heaven";[41] a treaty of state from Sefire calls as witnesses heaven[42] along with previously mentioned gods, and then earthly powers such as springs and the cosmic phenomena day and night,[43] presumably based on a Hittite model.[44] In a somewhat later letter of the vassal prince Adon, "heaven and earth" probably serve to designate the area of dominion of a West Semitic deity mentioned in the preceding, now lost text.[45] The name of the West Semitic god Baʿalšamin, still venerated in Roman times,[46] is programmatic; the greeting formula of a pre-Imperial Aramaic private letter from Hermopolis attests the popular veneration of a *mlkt šmyn* "queen of heaven."[47] The writers of this letter belonged to a community of Aramaic-speaking Syrians who probably originally emigrated to Egypt. El, the chief god of the sayings of Aḥiqar, also has ties with heaven.[48]

Beginning in the Achaemenid period, the understanding of divine power expanded to include all-encompassing kingship.[49] In the greeting formulas of official letters from Elephantine in this period, in addition to *ʾlh šmyʾ* "god of heaven,"[50] one also finds the title *mrʾ šmyʾ* "lord of heaven."[51]

Such neutral terms for the supreme god permit coming to agreement with the Persian government on a common basis in questions of religion,[52] but need not be of Iranian origin. Instead, they could also develop West Semitic theologoumena.[53]

Via the general understanding of heaven as God's dwelling place (Dnl. 2:28), Biblical Aramaic adapts this conception with its specifically mediating function ("God of heaven": Dnl. 2:18f.,37,44; Ezr. 5:11f.; 6:9f.; 7:12,21,23; "lord of heaven": Dnl. 5:23; additionally, *mlk šmyʾ* "king of heaven": 4:34). Thus, the proper commitment to the God of Israel can also be linked to the overarching veneration of a divine ruler even among other nations. Therefore, messengers from God come "from heaven" (Dnl. 4:10,20,28), one raises one's eyes to "heaven" in prayer (4:31).[54] The angels[55] constituted the heavenly host (Dnl. 4:32).[56] Under the influence of this close association, *šmyʾ* "the heaven" can also occasionally represent God himself (Dnl. 4:23).

The Aramaic texts from Qumran root in the same terminology; "Lord of heaven" appears especially in 1QapGen,[57] further also "King of heaven"[58] or simply "heaven,"[59] and "Ruler of heaven" (*šlṭn šmyʾ*).[60] The frequent reference to the angels accommodates the growing interests in angelology. They are called *bny šmyn* "heavenly beings,"[61] sometimes *ʿyry šmyʾ* "the watchers of heaven"[62] or *qdyšy šmyʾ* "the holy ones of heaven."[63] Likewise, a more precise conception appears, as in the meteorological realm: the fragrance of sacrifice can simply rise to "heaven,"[64] but as God's residence, gates seal[65] heaven, through them the cry of lament reaches God[66] and visionaries gain access (see below).

2. Visionary Journeys to Heaven. The desire to reach heaven may be the hidden root of all mythology. In this regard, however, the attempt to storm heaven in one's own power represents a sign of hybris that became proverbial in the tower of Babel, but also still echoes in the world tree of Nebuchadnezzar's night vision (Dnl. 4:8,19, → II). Insight into the heavenly world during their lifetimes opens only to particularly gifted individuals such as Enoch: Levi enters it in his vision through the "gates of

heaven”[67] and an extensive report of revelation is associated primarily with the figure of Enoch (cf. already Gen. 5:24). He tells of high mountains and valleys and a paradisiacal landscape (1 En. 17–19; 21–36), the courses of the stars (73; 77–79; 82:22), the winds and seasons (76; 82); thus, he sees heaven as a whole. Qumran preserves fragments of a vision report. The new Jerusalem may also involve a heavenly vision, but none of the preserved fragments say so.

IV. Stars and Zodiac Signs. Terminologically, *kwkb* /kawkab/, which is also a common Semitic primary noun, distinguishes the stars from *šmš* /šamš/ “sun” and *śhr* /śehr/ “moon”; the latter two appear alone in lists such as 1QapGen 7:2; 13:11. Before Qumran, *kwkb* appears only in a comparison of the many unknown star names with people as unknown beings in a proverb of Aḥiqar.[68] In texts from Qumran, along with two passages translated directly from the Hebrew in 11Q10 9:8; 30:5 (Job 25:5; 38:7), the word appears mostly in the books of Enoch in various contexts: falling stars symbolize the fall of the angels at the beginning of the allegorical history of the world in the form of an animal vision;[69] the notion of stars as an angelic host (→ III.1) appears in the name Kokab-El;[70] the interpretation of stars *nḥšy kwkbyn* (“omen of the stars”) belongs to the civilizing capacities that the fallen angels shared with humanity;[71] in the astronomical book, the west is the direction the stars arrive after their exit from the gates of heaven[72] and their course.[73] Astronomical terminology refers to the stars further as *mʾny šmyʾ* “heavenly bodies.”[74] Their fixed course is the “action [*ʿbd* /ʿobād/] of heaven”;[75] it demonstrates the planned arrangement of creation.[76]

Already in Old Aramaic times, the individual stars had their own names, as *TADAE* C1.1:164 demonstrates (see above). All the names of the zodiac signs are first transmitted in Aramaic in a “brontologion,” an astrological brontology, from Qumran.[77] In contrast to the umbrella term *mzl* /mazzal/ borrowed from Akkadian,[78] they completely accord with the known mosaics with captions in West Semitic, including Aries[79] and Pisces:[80] *dkrʾ*

/dakarā/ “Aries,”[81] *twrʾ* /tawrā/ “Taurus,”[82] *tʾwmyʾ* /toʾāmayyā/[83] “Gemini,” *srṭnʾ* /sarṭānā/ “Cancer,” *ʾryh* /ʾaryæ/ “Leo,”[84] *btwltʾ* /batūltā/ “Virgo,” *mwznyʾ* /mawzenayyā/ “Libra,”[85] *ʿqrbʾ* /ʿaqrabā/ “Scorpio,” *qštʾ* /qaššātā/ “Sagittarius,”[86] *gdyʾ* /gadiyā/ “Capricorn,” *dwlʾ* /dawlā/ “Aquarius,” and *nwnjʾ* /nūnayyā/ “Pisces.” The two divergences from Hebrew and the agreements with the Syriac tradition attested later prove these names to be genuinely Aramaic.

9. Dnl. 7:27.

10. nV 1:33; *ATTM*, 2, 205-8.

11. And then /kōkab/.

12. → *šmš*.

13. *śhr* /śehr/, *ATTM*, 704; 2, 489.

14. Collective: *mzl* /mazzal/, 1QapGen 7:2.

15. → *ym*.

16. → *ṭwr*.

17. *TADAE* A1.1:3, in the wish for enduring dominion.

18. → *ṣpr*.

19. Later *ʾwr* /ʾawēr/ is borrowed from Greek ἀήρ, see *ATTM*, 506; for the words for "breath" → *nšm*.

20. → *ḥyī* IV.

21. Regarding the nuances of the verb form → *mṭī* II.3.

22. → *ṭl*.

23. → *ʿśb*.

24. C-stem of *gūḥ*.

25. → *ym* IV.

26. → *ʿnn* II.

27. 1QapGen 13:16; the fragmentary text seems to combine motifs from Dnl. 2 and 4.

28. Aramaic also attests *ʿwp*, see above on Dnl. 2:38 and cf. 4Q531 2+3:4, but it was apparently more refined diction, however.

29. 4Q209 23:5 par. 4Q210 1 2:16 (1 En. 77:2).

30. 4Q209 23:7 (1 En. 77:3).

31. 1QapGen 7:2.

32. 4Q209 23:2 (1 En. 76:14).

33. 1QapGen 22:8; 11Q10 33:8 (Job 39:26); → *rwḥ* IV.

34. 4Q211 1 2:4 (1 En. 82:25); → *trʿ*.

35. /raqīʿ/ adopted as a Heb. loanword, cf. *ATTM*, 697; no independent Aramaic lexeme is known.

36. *TADAE* A1.1:3, see above.

37. 4Q212 1 4:23f. (1 En. 91:16); cf. Mk. 13:31.

38. Cf. E. Lipiński, *SAIO* II (1994), 193-201.

39. → *ql*.

40. *KAI* 309.2.

41. *KAI* 202 B 25; the subsequent text may have had "gods of the earth," but the text is extremely fragmentary.

42. Presumably together with the earth in the subsequent lacuna.

43. *KAI* 222 A 11; the context of the word in B 7 is unclear.

44. Cf. J. A. Fitzmyer, *The Aramaic Inscriptions of Sefire*. *BietOr* 19/A (^{2}1995), 76, with bib.; so also, e.g., Dt. 4:26, etc.

45. *TADAE* A1.1:2.

46. H. Niehr, *Baʿalšamem*. *OLA* 123 (2003), 89-184.

47. *TADAE* A2.1:1, cf. Jer. 7:18; 44:25.

48. *TADAE* C1.1:79; an addition, yet unclear, instance of the word occurs in l. 189.

49. → *mlk* III.

50. *TADAE* A3.6:1; 4.3:3,5; 4.7:2,27f. par. 4.8:2,27; 4.9:3f.; → *ʾlh* II.2.

51. *TADAE* A4.7,15 par. 4.8,14; → *mrʾ* IV.1.

52. See already A. Vincent, *La religion des Judéo-Araméens d'Éléphantine* (Paris, 1937), 92-143.

53. On the discussion, see K. Koch, *Daniel 1–4*. *BK* XXII/1 (2005), 160-64.

54. Similarly 4Q196 6:8 (Tob. 3:12) and 4Q213a 1:8 from Qumran; → *nṭl*.

55. → *qdš* IV.2.

56. → *ḥyl* III.

57. 1QapGen 7:7; 12:17; with "and of the earth" 22:16,21; → *mrʾ* II.5.

58. 1QapGen 2:14.

59. 4Q541 9 1:3.

שמע *šmʿ*

I. Verbal Root and Etymology. 1. Common Semitic. 2. Common Aramaic. II. Biblical Aramaic. III. Qumran.

I. Verbal Root and Etymology.

1. Common Semitic. The verbal root *$*s_1mʿ$ is common Semitic and occurs in every branch of the Semitic family of languages.[1] The verb serves to denote auditory perception in the most general sense and often has connotations of "to obey" and "to understand" that result from pure hearing.[2] The root appears in the various languages either with the regular reflections of Semitic *$*s_1$ or often with the loss of the voiced pharyngeal.[3] Reflections of the root in Semitic in unaltered form are Amorite *śmʿ* (*yiśmaʿ*),[4] Ugaritic *šmʿ*,[5] Canaanite *šmʿ* (Hebrew *šāmaʿ*;[6] Phoenician *šmʿ*),[7] Arabic *samiʿa*, Sabaean $s_1mʿ$,[8] and North Ethiopic *smʿ* (e.g., Classical Ethiopic *sämʿa*).[9] The following languages exhibit the loss of the pharyngeal: Akkadian *išme* (*šemûm*),[10] Punic *šm*,[11] and Amharic *sämma*.[12] Modern South Arabian attests the transition from */s_1/ > /h/, e.g., Soqotri *h*(*y*)*émaḥ*;[13] the latter root also manifests the devoicing of the pharyngeal. Modern South Arabian also exhibits the loss of the nasal, to be replaced with the nasalization of the vowel, Jibbāli *šĩʿ*/*yšũʿ*. The presumptive base vowels are /i/ in the perfect[14] and /a/ in the imperfect.[15] The perfect, especially in Northwest Semitic, manifests the transition from /i/ > /a/.[16]

2. Common Aramaic. The root is widespread in both older and modern Aramaic. Many varieties exhibit the loss or alteration of the pharyngeal.

Unaltered as *šmʿ*, the root occurs in Old Aramaic,[17] Imperial Aramaic,[18] Nabatean and Palmyrene,[19] Syriac,[20] as well as Western Neo-Aramaic *išmeʿ*[21] and Turoyo *šomīʿ*.[22] Mandaic *šma*[23] and various North-Eastern Neo-Aramaic languages[24] attest the loss of the pharyngeal and the shift to the root class III-*ī*. A few older varieties belong in this group, but offer historical orthography with ʿ.[25] In several modern varieties ʿ has become ʾ.[26]

The thematic vowel in the perfect is usually /a/,[27] in the imperfect also mostly /a/,[28] but also /u∼o/.[29] The verb occurs primarily in the G-stem and the corresponding t-stem and less often in the D- or C-stem. The peculiar short imperfect of the Gt-stem *ytšmʿ* "may it be heard" without metathesis /tš/ > /št/ attested in Old Aramaic merits mention.[30]

A series of nominals derive from the root, e.g., Syriac *šemʿā* "news, report, obedience,"[31] *mašmʿā* "hearing"[32] or Mandean *šima* "faculty of hearing."[33]

Old Aramaic already attests the meaning "to obey" for the G-stem,[34] otherwise the verb denotes auditive perception per se:[35] for hearing prayers[36] or hearing a word (*mlh*);[37] similarly in Imperial Aramaic,[38] in private letters in reference to news,[39] similarly in official letters of reports.[40]

II. Biblical Aramaic. Biblical Aramaic exhibits *šmʿ* in nine verses exclusively in Daniel, eight times in the G-stem and once in the Dt-stem. Attested are the perfect forms of the peal *šᵉmaʿ* (6:15) and *šimʿeṯ* (5:14,16), the imperfect forms of the peal *yišmaʿ* (3:10) and *tišmᵉʿūn* (3:5,15), and the participle *šāmᵉʿīn* (3:7; 5:23). Daniel 7:27 has the imperfect of the Dt-stem *yištammᵉʿūn*.

In the peal, the verb essentially denotes the act of hearing per se. In four passages, the sound[41] of several musical instruments[42] stands as the object

of the verb *šmʿ*: Dnl. 3:5 *b^{e}ʿiddānā dī-ṯišm^{e}ʿūn qāl* . . . “as soon as you hear the sound of . . . (you should bow down and pay homage to the golden statue that Nebuchadnezzar has erected)”; Dnl. 3:7 *beh-zimnā k^{e}ḏī šām^{e}ʿīn kol ʿammayyā qāl* . . . “as soon as all nations heard the sound of. . . . (all peoples, nations, and languages bowed down and paid homage to the golden statue that Nebuchadnezzar had erected)”; Dnl. 3:10 refers to the order and the king repeats it in 3:15.

In Dnl. 6:15, the object of hearing is a certain circumstance:[43] *ʾœḏayin malkā k^{e}ḏī mill^{e}ṯā š^{e}maʿ* “when the king then heard of the situation (it displeased him greatly and he turned his attention to Daniel, in order to save him).” Daniel 5:23 employs the verb without object in relation to idols who have no faculty of hearing: . . . *dī lā ḥāzayin w^{e}lā šām^{e}ʿīn w^{e}lā yāḏ^{e}ʿīn šabbaḥtā* “(you and your nobles, your secondary wives and concubines, you have drunk wine from them, and the gods of silver, gold, bronze, iron, wood, and stone), who do not see and cannot heart and do not understand, you have praised.”[44] Finally, the verb appears twice together with the preposition *ʿal* “regarding” in the meaning “to hear of/about”: Dnl. 5:14 *w^{e}šimʿeṯ ʿ^{a}lāk* [*K ʿlyk*] *dī rū^{a}ḥ ʾœlāhīn bāḵ* “I have heard of you that the spirit of gods is in you” and Dnl. 5:16 *waʾ^{a}nā w^{e}šimʿeṯ ʿ^{a}lāk* [*K ʿlyk*] *dī ṯikkul* [*K twkl*] *pišrīn l^{e}miṗšar w^{e}qiṭrīn l^{e}mišrē* “I have heard of you that you give interpretations and can resolve difficult tasks.”

The sole passage with the Dt-stem of the root *šmʿ* in the meaning “to obey” is Dnl. 7:27: . . . *w^{e}ḵol šolṭānayyā leh yiṗl^{e}ḥūn w^{e}yištamm^{e}ʿūn* “(his kingdom is an eternal kingdom) and all powers will serve and obey him.” On the basis of the Jewish Aramaic *ʾištemaʿ*[45] *BLA*, §275q and *ATTM*, 714 prefer the Dt-stem to the Gt-stem. Yet this emendation, following *ʾištammaʿ*[46] and the Mandean Dt-stem[47] with the same meaning, does not seem necessary.

The LXX renders *šmʿ* in the peal with ἀκούω, in the ithpaal with ὑπακούω or πειθαρχώ. The Peshitta employs the same root *šmʿ*. The Vulgate has *audio* for the peal, but *oboedio* for the ithpaal.

III. Qumran. Qumran also attests the uses of *šmʿ* known from Daniel, although, because of the many passages, more formal and syntactic phenomena occur that cannot be located in Biblical Aramaic. The not infrequently fragmentary state of the preservation of the texts often hinders unequivocal interpretation, however.

An object usually follows the verb, most frequently the lexeme *mlh* "word," e.g., [*mny hwʾ kwl ʾnwš d*]*y ykl yšmʿ mly qdšʾ* [*rbʾ*] "everyone will come from me who hears the word of the great holy one"[48] or *wkdy šmʿ ḥrqnwš mly lwṭ ʾzl* "when Hyrcanos heard the word of Lot, he went away."[49] The statement *mʾ ʿṭr mlʾ nš*[*mʿ*] "how we hear (only) the whisper of a word!"[50] also belongs here. Other substantives as objects include → *ql* "voice," *šmʿtʾ qlh* "you heard a voice";[51] *tmhyn* "wonder,"[52] *tmhyn šmʿt* "I heard a wonder";[53] *ngśh* "urging," *wngśt šlyṭ lʾ yšmʿ* "and he did not hear the urgings of a powerful person";[54] *qbylh* "complaint," *wqbylt ʿnyn yšmʿ* "he will hear the complaint of the oppressed"[55] or a pronoun such as *lmšmʿ ʾdn šmʿtk* "just as an ear hears, I have heard you"[56] and *yšmʿnh* "(he prays to God and he) will hear him."[57]

Because of the state of preservation of the texts, the objects are unclear in 11Q10 19:5 (Job 31:29) or 4Q197 4 3:13 (Tob. 7:10), for example. Biblical Aramaic does not, but a few times Qumran attests a complementary clause with *dy* "that" as object, e.g.: *wšmʿt dy śbʿ śg*[*y bmṣryn* "Then I heard that a great abundance ruled in Egypt";[58] *wšmʿ mlk swdm dy ʾtyb ʾbrm* "the king of Sodom heard that Abraham had brought back. . . ."[59]

Prepositional objects also follow *šmʿ*. Qumran has *b-* with *ql* "voice" in *wšmʿ ʾlhʾ bqlh dy ʾywb* "and God heard Job"[60] and *l-* with a pronoun in [*wkʿ*]*n šmʿ ly ʾḥy* "Now hear me, too, my brother."[61] The addressees of imperative forms at Qumran include: God in *šmʿ nʾ wʾnh ʾmll ʾšʾlnk whtybny* "but hear, I will speak. I will ask you, so answer me!";[62] Noah in [*wkʿ*]*n ʾṣt wšmʿ ʾnth* "and now, listen and hear!"[63] and male descendants in [*š*]*mʿw bny* "hear, my sons."[64]

The meaning "to obey" for *šmʿ* in the G-stem with the preposition *l-* occurs in *whwʾ ʾmr yšmʿwn lh wʾzlyn lʿbdyhwn* "and he said: (The personified forces of nature) will obey him, and they go to their activities."[65] 4Q550 1:1 employs the t-stem known from Dnl. 7:27:[66] [*wmš*]*tmʿyn lptryzʾ ʾbwk* "and they obyed your father Patirēsā."[67]

Otherwise, of the derived stems, Qumran has only the C-stem of *šmʿ* in [*wm*]*šlḥt qdyšʾ rbʾ ly ql ʾšmʿ* "and the embassy of the great Holy One caused me to hear a voice."[68]

שמש *šmš* /šamš/ (< /śamš/)

I. Form. 1. Phonetic Shift. 2. Tiberian Pointing. 3. Gender. II. As a Heavenly Body. 1. Astronomical. 2. Various Fixed Expressions. 3. Sunlight. III. As a Heavenly Being. 1. Sun God. 2. "Sun of God." 3. "Daughter of the Sun."

I. Form.

1. Phonetic Shift. The monosyllabic root /śamš-/ of the Semitic word for "sun" underwent various phonetic shifts in Aramaic. In the fourth century B.C.E., the pronunciation of its phonemic sibilant /ś/, often represented by *lt* in Neo- and Late Babylonian, still differed from the fricative palato-alveolar /š/ as the cuneiform transcriptons ^{d}*Il-ta-mi-iš*, ^{d}*Il-te-meš* etc. of the corresponding theophoric elements, often abbreviated ^{d}*Tam-meš*, demonstrate.[1] At the same time, the shift /ś/ > /s/ already entered a few first milliennium B.C.E. Aramaic dialects in the event that the spellings *smš* in *TADAE* B3.6:9 from Elephantine (427 B.C.E.) and *sa-mi-iš* from Persepolis[2] do not merely distinguish between /ś/ and /š/. An additional possible example of /ś/ > /s/ from Elephantine is *sbrw* in *TADAE* A4.2:7. Palmyrene inscriptions, Biblical Aramaic, and manuscripts from Qumran attest the same shift very well as, e.g., *ysgyn* "they multiply" in 4Q201 (4QEn^{a}) and *stwʾl* "winter of God" in 4Q204 (4QEn^{c}) from the first half of the second century B.C.E. or the late first century B.C.E., respectively, demonstrate. Somewhat later, an original /śaggīʾ/ "much" is spelled *sgy*[3] n Pap. Yadin 57.5,[4] "grain" *sʿryn* in Mur 8:1,[5] and "the hater" *snʾh* in Meg. Taʿanit 26 (thirteenth century C.E. MS).[6] The oldest Syriac examples for /ś/

> /s/ stem from the middle of the third century C.E. Pap. Dura 151, l. 15f.; the first example from Jewish Babylonian dates to the second century C.E. where the plural of the determined state of the word "grain" appears twice in the spelling *sʿry*.[7] This shift is regular in the Syriac and the Jewish Aramaic literary languages, although *šmš* represents an example that can by explained as the assimilation of the etymological /ś/ to the initial /š/ as in the parallel case of /šeršā/ < *śrš* "root."

In any case, this assimilation did not permeate spoken languages, as indicated, e.g., by *smšʾl* "sun of god" on an eighth-century C.E. inscribed magic bowl found on the island of Biǧān in Iraq.[8] Instead, *šmsyʾ* in Frahang I:11c assimilates the pronunciation of the word in Arabic. Also very widespread in spoken languages is the addition of a labial /b/ or /p/ between /m/ and the immediately following consonants.[9] This pronunciation explains the Greek transcription of the personal name Šamšay as Σαμψαι(ο)ς in the Jewish papyri of the first centuries B.C.E. and C.E.,[10] and also the classical Ethiopic spelling of the name of the fallen angel Šamši-El as Simipesiʾel (1 En. 6:7; 69:2; with variants), in Greek Σαμψιηλ. It was transliterated in Classical Ethiopic spelling as *smpsʾl* and vocalized arbitrarily when the Ethiopic consonant signs were provided with obligatory vowel markings in the fourth century C.E. Neo- and Late Babylonian attest the shift /m/ > /w/ between or after vowels very well, as the Aramaic transcription *šwš* for Šamaš and the Greek spelling Σαος demonstrate. In contrast, the Middle and Neo-Assyrian shift from /w/ between vowels to a glottal stop and a long vowel led to the Aramaic spelling of the theophoric element Šamaš as *ss*, as in, e.g., *ssnwry* in *KAI* 309.7,[11] and later *ššy* for Šamšau.[12]

2. Tiberian Pointing. The monosyllabic ground form of the root had the vowel /a/, which the syllabic spelling $^{m.d}$*Il-ta-mi-iš-ma-ḫir* from the fifth

century B.C.E. still attests.[13] Instead, the Tiberian pointing as *šimšā* (Dnl. 6:15) indicates a pronunciation with [i] or [y], as in *Šimšōn*. Personal names from Dura-Europos in the second century C.E. such as Ιαβ-συμσος[14] and Αβιδ-σιμ-σ[ος][15] also attest this. They exhibit the loss of the short vowel /a/ in an unaccented syllable and the resulting indefinite quality of the vowel.[16] Furthermore, *šimšā* is the Mandaic form, *šemšā* the Syriac.

3. Gender. The noun *śmš* > *šmš* is gender-ambivalent in Aramaic. This alternation appears in the astronomical book of Enoch from Qumran (1 En. 72–82) in 4Q211 (4QEnastr^{d}) 1 1:3 from the second half of the first century B.C.E. It has *šmš* as the subject of the verbs *npq wʿl* "goes forth and sinks," both in the masculine. Meanwhile, in 4Q209 (4QEnastr^{b}) from the beginning of the first century C.E., it stands as the subject of the feminine verb in *ʿlt šmšʾ* "the sun sinks," and the suffix in *ḥrtyh* "their sections" also appears as a feminine form. In contrast, the participle *mšrh* "beginning" and the stative *šry šmšʾ* "the sun begins" are masculine. In other passages, the gender depends on the reconstruction of the context. One may suspect the influence of the masculine gender of Šamaš in Akkadian since the astrological series Enūma Anu Enlil was the chief inspiration of the astronomical book of Enoch.[17] This assumption is quite plausible, but cannot be confirmed because of the scarcity of useful sources from older times. In any case, the numerous Aramaic masculine names from Mesopotamia with Šamaš as a theophoric element hardly point to an understanding of the sun as female nor do they attest feminine gender in syntactical agreement when this theonym constitutes the subject of a verbal clause. The name of a slave $^{m.d}$*Šá-mas-im-mì* sold in 713 B.C.E. by an Aramean named Gabru constitutes an exception.[18] The word for "sun" is also only rarely a feminine in Syriac.

II. As a Heavenly Body.

1. Astronomical. The disk of the sun with seventeen rays and the inscription *šm*[*š*] appears on an eighth-century B.C.E. bronze bowl decorated with astral symbols.[19] The word "sun" also occurs often in the books of Enoch, e.g., in 4Q209 (4QEnastr^{b}) 6:9 which says that the moon will be *mṭmr ʿm š*[*mš*] "concealed with the s[un]." This happens when the two come into conjunction, i.e., when they stand in the same heavenly degree of longitude. This temporal usage of *ʿm* also occurs in Dnl. 3:33; 4:31; 7:2; consequently, the translation "concealed by the s[un] is certainly incorrect (cf. 1 En. 73:7). The Deir ʿAllā inscription alludes to a solar eclipse.[20]

2. Various Fixed Expressions. The word *šmš* appears quite often in the fixed expressions *mwʿ*(*ʾ*/*h*) *šmš* "east,"[21] *mʿrb šmš* "sunset"[22] or "west,"[23] and *mdnḥ šmš* "east"[24] or *mʿly šmš*, "sunset" (Dnl. 6,15). The phrase *mn ṭlʾ lsmš* "from shadow to sun"[25] means "complete," as does *šmš wḥnh ṭll* "resting in sun and shadow" in Nabatean contracts.[26] The juxtaposition of sun and shadow indicates that the whole parcel of land is involved in the purchase: *ḥnh* is the active participle of the root *ḥnī*.[27]

3. Sunlight. The sayings of Aḥiqar mention the sun in a curse that wishes death upon those who do not honor their parents: "May the sun not shine [on him]."[28] An aphorism in the same collection compares the king with the sun: "The king is as beautiful to see as the sun [*kšmš*] and his rays are precious to those who walk the earth."[29] The same image recurs later in relation to God in the Syriac Odes of Solomon, which were presumably composed in an older Aramaic dialect: "The Lord is like the sun above the earth" (11:13; cf. 15:1f.). Ode 16:15f. describes the role of the sunlight: "The barn of the light is the sun, the barn of darkness is the night. // The sun works until the day is bright, the night brings darkness on the face of the earth."

III. As a Heavenly Being.

1. Sun God. The following already mention the sun god: Aramaic inscriptions from Syria,[30] Samʾalian,[31] and the Deir ʿAllā inscription[32] where the sun appears as a goddess, moreover the sayings of Aḥiqar,[33] an epistolary ostracon from Elephantine,[34] a few inscriptions from Wadi el-Hudi,[35] and perhaps the lengthy cave inscription from Sheikh Fadl.[36] Additionally, Aramaic inscriptions from Asia Minor, from Kesecek Köyük,[37] and from Gözne[38] mention Šamaš. Later, the sun deity appears in several Palmyrene inscriptions,[39] one dedicated to a "Šamaš, the god of your father's house,"[40] while three grave inscriptions express a heavenly life with the sun deity after death: *whʾ npšʾ dh mwlyʾ bšmš* "and, in fact, this grave marker brings Šamaš near."[41] The participle *mwlyʾ* belongs to the C-stem of the Arabic verb *waliğa* "to be near." In Hatra, the "rectangular" temple was dedicated to the sun god, who was identical with Maren "our Lord," the father in the Hatrene triad of deities consisting of Maren, Marten, and Bar-Maren. Thus, H107.6f. reads: *dy bnʾ brmryn lšmš ʾbwhy* "which Bar-Maren built for his father Šamaš." A variety of the inscriptions also mention Šamaš. The legends of coins from Hatra read: *ḥṭrʾ dšmš* "Hatra (i.e., pens) of Šamaš."[42] Šamaš also appears as the theophoric element of many Aramaic personal names, whether written in alphabet or cuneiform script.

2. "Sun of God." An interesting pheneomon in the Jewish writings of the Persian period is the very prominent concept of a heavenly host, presumably developed under Iranian influence. They adopt the sun god under the name Šamši-El "sun of God" with the Hebrew theophoric element *ʾl* instead of the Aramaic *ʾlh*. He already appears in the oldest parts of the book of Enoch (1 En. 6:7; 8:3), whose earliest Aramaic manuscripts trace back to the third or second century B.C.E. He taught humanity the "signs of the sun" (*nḥšy šmš*), i.e., astronomy, and belongs, therefore, among the ten angelic teachers, but is also listed as the fifteenth fallen angel. Furthermore, Šamši-El appears in the Nabatean personal name *šmšʾl-bʿl* "the sun god is Lord," so far attested only once.[43] The Greek translation of the books of

Enoch originally transcribed the name as Σαμψιηλ, which also served as the basis for the Classical Ethiopic version, but the ψ has fallen out in the archetype of the Greek versions of the Cairo manuscript 10759 (fifth/sixth century C.E.), as it has also in the Chronicle of Syncellus. There, the name of the angel appears as Σεμιηλ or Σαμιηλ, and the Greek text of the Apocalypse of Baruch 4:8 9:7 and the Christian versions of the Martyrdom of Isaiah 1:8; 2:1; 3:13; 5:15 adopt this corrupt form. The original name of this evil spirit was Malki-Raʿ "evil king" (1:8); it appears further in a recension of the Testament of Solomon 7:1-8, the second Sibylline Oracle l. 215, the Greek original of the Slavonic book of Enoch, the Gnostic texts from Nag Hammadi, the document *Adversus haereses* by Irenaeus, Bishop of Lyon (second century C.E.), etc.[44] In rabbinic tradition, the name *šmʾl* first appears in the statements by R. Jose, the fourth century Palestinian Amora in Targum Pseudo-Jonathan on Gen. 3:6 and, as an exception, on Amariac magic bowls.[45] The spelling *šmʾl* apparently involves a transcription of the corrupt Greek name; its vocalization as *Samāʾel* has nothing to do with the Jewish name Σαμάηλος attested in papyri.[46] It is a Greek transcription of Šamaʿ-El "God has heard (the prayer)."

3. "Daughter of the Sun." A Nabatean incantation text, found about ten kilometers from Beersheba and dated to circa 100 B.C.E., mentions the female figurines of five incantation priestesses,[47] one addressed by the name "daughter of Šamaš,"[48] while three others are addressed as *brtʾl* "daughter of El." Such figurines are well known; they were presumably deposited in sanctuaries in order to recall the symbolic dedication of a woman into the service of a deity, here Šamaš. The Koran alludes repeatedly to the faith of the pagan inhabitants of Mecca, who venerate deities of lesser rank as "daughters of Allah."[49]

שמש *šmš*

I. Etymology and Lexical Field. II. Meaning.

I. Etymology and Lexical Field. Within the Semitic languages, the verbal root *šmš* "to serve" is only productive in Aramaic, but apparently has an Egyptian cognate.[1] The mediating path leading to this unexpected distribution has not been explained. In Aramaic, the verb appears in the transitive D-stem and finds very frequent usage in later phases on the language.[2] In addition to the corresponding t-stem "to utilize," they attest still other nuances such as "to pass time" or "to have marital intercourse." In the majority of the few older instances, however, it means cultic service and, thus, functions as a synonym of the better-attested root → *plḥ*.

II. Meaning. The earliest occurrences of the verb *šmš* appear in religious literature. In Dnl. 7:10, it occurs in the court scene for the "thousand times thousands" (*ʾlp ʾlpym*) who serve the "ancient of days"[3] and the parallelism with *rb rbwn qdmwhy yqwmw* "a thousand times ten thousands stand before him" proves it to be a term for liturgical veneration. Of the certain instances from Qumran, 4Q246 1 1:8 refers to the world dominion of the "son of God," whom all serve,[4] while Dnl. 7:10 echoes in 4Q530 2 2+6-12:17 from the Book of Giants. The reading and interpretation of 1QapGen 15:18 are uncertain, especially since according to some editors, a form of → *šbš* may occur here.

Palmyrene honorific inscriptions employ *šmš* for both religious[5] and political[6] offices. At Hatra, the t-passive "to be served" also first appears.[7] In nV 7:28,62,[8] "to serve" refers to a wife's care. Later nominal forms are also attested.[9]

שׁנה *šnh* /šanā/; ירח *yrḥ* /yarḥ/; שׁבה *šbh* /šabbā/

I. Etymology and Lexical Field. II. Noun "Year." 1. Generally. 2. In Dates. III. Noun "Month." IV. Noun "Sabbath, Week."

I. Etymology and Lexical Field. The feminine Semitic primary noun *šnh* /šanā/ denotes the "year," regardless of the underlying calendrical order. It consists of twelve months, Aramaic *yrḥ* /yarḥ/ (→ III), which, in the Jewish tradition, in turn, each consist of four weeks, denoted by the feminine /šabbā/ (→ IV). Yet, according to the Babylonian calendar it numbers a total of 360 days, in the Jewish lunar calendar regularly 354,[1] and, according to the solar calendar at Qumran, 364 days.[2] It is unknown by what regular or more likely sporadic[3] intercalations Qumran dealt with the ten days difference between the lunar and solar calendars in order to keep the number in step with the duration of the earth's orbit of 365¼ which governs the change of seasons.

The terms /šanā/ "year" and /yarḥ/ "month," along with /yawm/ "day" mostly occur in dates in documentary texts, /šanā/ and /yawm/ also in literary writings to denote precisely or approximately a longer or shorter duration and /šanīn/ after /bar/ or /barat/[4] in the construct, literally "a son/daughter of," with a number indicating the age of a male or female person in years. Meanwhile, the month as a more general temporal term, which lies between these two units in length, plays only a subordinate role outside precise datings. With numbers or signs indicating a specific number of years, /šanīn/ appears, as is typical in Semitic languages, in the absolute state with a masculine ending, but agrees syntactically as a feminine (cf. Ezr. 5:11).

II. Noun "Year."

1. Generally. As a general term for age, ***šnh*** occurs as a suffixed plural "his years" along with the plural of ***ywm*** "his days" also common in this meaning already in the oldest known Aramaic inscription.[5] It states as the reason for the dedication of a statue the wish of the royal donor for a long life granted by the gods.[6] Figuratively for a long duration, the "seven years" in curse formulas in the Sefire treaties of state and the Bukān inscription intend the misfortune that an oath-breaker should encounter.[7]

As indications of age, ***br šnn*** (for men) and ***bt šnn*** (for women) first appears in Imperial Aramaic marriage contracts[8] and, in a clause concerning legal succession, mentions the death of a marital partner at the hypothetical age of one hundred years.[9] Likewise, Dnl. 6:1 employs the word for the age of King Darius at the beginning of his reign as do many grave inscriptions known from later times.[10]

Furthemore, ***šn(y)n śgyʾn*** "many years" can denote an indefinitely long period[11] and ***šnh bšnh*** the distributive expression "year by year," as for certain, regularly recurring activities.[12]

Indications of time occur frequently in 1QapGen, where they give the accounts epic breadth,[13] and sporadically in a few other Aramaic texts from Qumran.[14] A few additional instances are severely fragmentary, but probably reflect the same usage.

2. In Dates. Hundreds of instances in Imperial and post-Imperial Aramaic sources, mostly legal and commercial texts, less often memorial inscriptions, employ ***šnh*** as part of dating formulas.[15] They have either ***bšnt*** in the construct with a subsequent cardinal number, or rarely in the absolute ***bšnn*** with a number,[16] sometimes with another preposition.[17] In the time of the empires, the enumeration follows the regnal year of the respective king, as first attested from Neo-Babylonian times with Nebuchadnezzar,[18] then very frequently in Achaemenid documents, and in Biblical Aramaic (Ezr. 5:13; 6:3; Dnl. 7:1); among the Nabateans, of their king. In the Hellenistic and Roman Near East, however, dates were otherwise often calculated after the Seleucid year from 312/311 B.C.E.[19] Occasionally, the dating could also

be following an event, as an Old Aramaic comment on a temple offering from Hazael already dates in relation to a river crossing[20] or the gravestones from Zoar in late antiquity do in relation to the destruction of the Jerusalem temple.[21]

III. Noun "Month." In contrast to "year," *yrḥ* "month" is apparently restricted largely to dates in legal and commercial documents[22] and also appear on this model in Ezr. 6:15. As a unit of time like the twelve months between Nebuchadnezzar's warning dream and the self-satisfied walk of the king in Dnl. 4:26, the month is otherwise atypical and hardly occurs in literary texts such as those from Qumran: the two wisdom uses in 11Q10 5:3; 32:1 (Job 21:21, for *ḥdš*; 39:2, for *yrḥ*) translate the Hebrew; the usage for the phases of the moon in 4Q210 1 3:6 (1 En. 78:1) is specifically astronomical. Names typically designate the months; they are rarely enumerated.

In this regard, the old Semitic month names rooted in daily life and the cultic order continue in usage into the Hellenistic-Roman period: 1. *nysn* Nisan (March/April); 2. *ʾyr* Iyyar (April/May); 3. *sywn* Siwan (May/June); 4. *tmwz* Tammuz (June/July); 5. *ʾb* Ab (July/August); 6. *ʾlwl* Elul (August/September); 7. *tšry* Tishri (September/October); 8. *mrḥšwn* Marcheshwan (October/November); 9. *kslw* Kislev (November/December); 10. *ṭbt* Tebet (December/January); 11. *šbṭ* Shebat (January/February); 12. *ʾdr* Adar (February/March). The Jewish tradition intercalated a short-term, second month of Adar in order to synchronize the calendar once it became apparent that it had become too distant from the course of the seasons.[23] In contrast, there was probably no forecast yet. Unlike Hebrew, Phoenician, and Ugaritic, Aramaic does not employ the same basis for "moon"[24] as for "month,"[25] but an independent lexeme, *śhr* /śehr/.[26]

IV. Noun "Sabbath, Week." Aramaic does not have an indigenous word for "week"; /šabbā/ is borrowed from Hebrew and traces to /šabbat/

"Sabbath."[27] In contrast, the noun /šabūʿ/[28] derived from the number "seven" may very well be an Aramaic form,[29] but the concept of the seven-day week in Aramaic texts from Qumran stands under Jewish influence. Festivals lasted seven days.[30] The loanword *šbh* appears at Elephantine.[31] Weekdays are enumerated from the Sabbath.[32]

שני *šnī*

I. Etymology, Lexical Field, and Grammatical Constructions. II. G-stem "to Be Different," "to Change." III. D-stem "to Change." IV. C-stem "to Alter." V. In Legal Diction.

I. Etymology, Lexical Field, and Grammatical Constructions. Aramaic *šnī*, in the G-stem "to be different, to change," preserves a common Semitic root **šnū*. The intransitive G-stem has a middle nuance and can function both statively and ingressively. The transitive D-stem constitutes a factitive counterpart "to alter, to transform" whose passive forms[1] semantically approximate the G-stem again. Compare the variation between the two forms in Dnl. 5:9f.: the G-stem expresses the fact that "his face changed" in reference to Belshazzar turning pale, but the Dt-stem expresses the queen's encouragement in the following verse "may it not change." Likewise, Dnl. 7:7 employs the passive participle of the D-stem for "to be different," precisely like the perfect of the G-stem in 7:19,23f. In addition, the D-stem can mean "to violate (a law)" (Dnl. 3:23). Like the D-stem, the rarer C-stem denotes "to change (consciously/willingly)" once and, similarly, "to violate" sporadically (Ezr. 6:11f.). In this latter usage, one otherwise sometimes encounters → *ʿbr*. Regularly, *šnī* denotes alteration in the facial expression,[2] sometimes also in the mood,[3] of a person as a negative reaction to a frightening experience and, consequently, often parallels other verbs of distress, especially → *bhl*. In this function, the verb belongs to the highly developed psychological vocabulary of the book of Daniel. In addition, it appears in visions. Meanwhile, instances of the verb in older Aramaic concentrate in Daniel, for the difference between reality, as it appears and as it truly is, belongs to the central themes of the book. In contrast, *hpk* in the Gt-stem better serves to denote a complete

change.[4] Sometimes, the root also occurs as a term for “to alter” or “to differ.”[5]

Regardless of its meaning, *šnī* can take as modifiers prepositional expressions with *mn* “from” with “to be different” in the G-stem or “to alter,” passive “to be/become changed” in the D-stem, or with *ʿl* “in” relating to change in the appearance of feelings of a person, otherwise also generally *b*- “with reference to” (Dnl. 6:18; on contracts → V).

II. G-stem “to Be Different,” “to Change.” With a stative nuance, the G-stem of *šnī* first means, quite generally, “to be other, different” and often, but not solely, refers to visible differences. Thus, it appears in Dnl. 7:3,19,23 in the vision of the four animals as symbols of the four empires in reference to the different beings and, especially, the fourth that differs so from the others.[6] In parallel, the interpretation of the horns of this animal in 7:24 clearly further distinguishes the tenth, most horrifying from its predecessors with *šnī* (*whwʾ yšnʾ mn qdmyʾ*).

The ingressive connotation “to change” underlies the negated expression *wsrblyhwn lʾ šnw* “and their pants (or: cloaks) were unchanged” in Dnl. 3:27; the passage describes how the three condemned exited the fiery furnace unharmed. Likewise, it serves in 6:18 in the story of Daniel in the lions’ den to explain the sealing of the stone:[7] nothing should change with regard to Daniel (*lʾ tšnʾ ṣbw bdnyʾl*), i.e., no one should secretly intervene and come to his assistance.

It specifically represents the alteration in the facial expression as a sign of terror in reference to Belshazzar’s reaction to the initially incomprehensible divine verdict on the wall in Dnl. 5:6,9, in both instances with → *zyw* “radiance; fresh, sound skin tone” as subject.[8] In this meaning, the verb seems synonymous with the otherwise somewhat more frequent Dt-stem (→ III). It parallels → *bhl* to “terrify” in 5:6 for the shaking of the bones.[9]

In Qumran, the G-stem of *šnī* occurs, besides the usages for an alteration of the facial expression known from Daniel,[10] for "to be different" in reference to the trees in Enoch's vision[11] and in reference to an unpreserved physical characteristic in the prophecy of Noah's birth,[12] and once more in an entirely obscure context.[13]

III. D-stem "to Change." The D-stem represents the factitive counterpart of the G-stem and means "alter" with a view to the result, while the C-stem explicitly denotes a conscious and controlled alteration (→ IV). The D-stem can also designate a higher agency, as in Dnl. 4:13 in relation to Nebuchadnezzar's heart that one will change[14] and "to deform" in regard to the activity of evildoers in 4Q201 1 2:12 (1 En. 5:4). The active can also mean "to disdain, to transgress," as in Dnl. 3:28 and 4Q204 5 2:18 (1 En. 106:14), for which Ezr. 6:11f. has the C-stem.

Semantically, the passive forms overlap with the G-stem "to be different," as in the t-passive for a person in *TADAE* C1.1:200, four times in Dnl. 2:9, and frequently for the face or the attitude (→ II): Dnl. 3:19;[15] 5:10; 7:28 (→ IV); 1QapGen 2:2,11f. The passive participle can also function for "to be different," as in Dnl. 7:7 (→ II). Several fragments from Qumran contain still other instances that remain, for the most part, grammatically and semantically obscure, including *yšnʾ* in 11Q10 24:3 (Job 34:9), that could be either a G- ("to change") or C-stem ("to alter").[16]

IV. C-stem "to Alter." The relatively rare C-stem also means "to alter," but seems always to express a higher agency, and thus the subject's control, and to emphasize the action, thus with the sense "intentionally to alter." Negated, it refers to a law[17] that no one should alter (Dnl. 6:9,16), affirmatively with the change of the time periods that God, as the Lord over time, establishes (2:21), and for the insolence of the final, God-opposing ruler, to imitate God in this regard (7:25). Like the D-stem, however, the C-stem can also denote "to transgress" (Ezr. 6:11f.).

The Daniel manuscript 4Q112 14:9 reads for Dnl. 7:28, not the Dt-stem (→ III), but the C-stem *yhšnwn*, which is not used elsewhere, however, for an involuntary alteration of the complexion and probably results from a scribal error due to the semantic proximity of the two stems.

V. In Legal Diction. Finally, *šnī* occurs in legal diction. The few, mostly fragmentary instances from the Samaria papyri[18] involve the formulaic expression *ʾw hw yšnh bʾsrʾ znh* "or if he alters something in this contract." By form, the verb could in principle be either the G- or the D-stem, but, since the independent personal pronoun seems to designate the acting subject and the preposition *b*- the affixed object,[19] the meaning here may be, not the intransitive "to differ," but the factitive "to alter," which, however, belongs in the active more to the D-stem based on known usages.[20]

Contrariwise, a few Nabatean contracts from the Dead Sea mean "to differ from" as evidenced by the preposition *mn*,[21] so that the verb here can stand in the G-stem. Otherwise, the verb → *ʿdī* functions for "to differ," likewise with *mn* "from."

שׁעה *šʿh* /šāʿā/

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. Terms for smaller time units have no standard in nature like the day or the year, and therefore also differ in Semitic in the respective individual languages. The Aramaic feminine /šāʿā/ "moment, hour" may have a Canaanite cognate in a letter from Amarna,[1] but its etymology remains unclear. From Aramaic, it spread into Postbiblical Hebrew,[2] as well as Arabic and Ethiopic.[3] The plural has the masculine ending /šāʿīn/, but agrees syntactically as a feminine. For "instant," Aramaic has → *zmn* and → *ʿdn*.

II. Usage. The first examples of *šʿh* stem from the book of Daniel. There it means "moment" most generally, thus a subjectively perceived brief period of time. It functions mostly as an adverb *bh šʿtʾ* "in the same moment, immediately" for a sudden occurrence (Dnl. 3:6,15; 4:30; 5:5), and once as *šʿh ḥdh* for "a moment long" in reference to Daniel's reaction to Nebuchadnezzar's disturbing dream. The Roman division of the day into twelve hours led to the chronological specification of *šʿh* as "hour," so that Nabatean private documents can use the word for precisely defined irrigation periods.[4] It is understandable, then, that as *šʿn śgyʾn* in 1QapGen 13:13 it can denote "many hours," which would be contradictory with regard to the original meaning. For "immediately," Qumran attests *br šʿthwn*[5] with a suffix corresponding to the person of the superordinate verb.[6] It is unclear whether *bh bštʾ* "in the same year"[7] in 4Q550 1:3 should

be emended to *bh bš*<ʿ>*tʾ* "immediately." A dedicatory inscription from Palmyra may have *šʿh* for "time"[8] like the later "hour of need."[9]

שפל *špl*; שפל *špl* /šapel/; שפלו *šplw* /šapelū/

I. Etymology and Lexical Field. II. C-stem "to Humiliate." III. Adjective "Lowly." IV. Noun "Humiliation."

I. Etymology and Lexical Field. Of the common Semitic (with the exception of Ethiopic) root *špl* "to be lowly," Aramaic attests as a verb mostly C-stem "to humiliate," but Syriac also has the G- and the D-stems ("to humiliate").[1] The nuance "to run, lead downstream" in Jewish Babylonian[2] may represent a special development. The Dt-stem "to bow," however, may already appear in 4Q569 1-2:4, although in a fragmentary context and not entirely clear paleographically. Daniel first attests the adjective /šapel/ "lowly," Qumran the feminine /šapelū/ "humiliation." In both the literal and figurative senses, → *rīm* "to be high, arrogant," serves as an antonym, in addition to the frequent *gʾh* "pride."[3]

II. C-stem "to Humiliate." All six known instances of the C-stem of *špl* in older Aramaic have the figurative meaning "to humiliate," said mostly of the arrogant: first in a proverb of Aḥiqar,[4] in Dnl. 4:34 of God's might,[5] in 5:19 of royal authority and in contrast to the C-stem of *rīm* "to elevate." With → *lbb* "heart, mind" as object, in contrast, it appears in 5:22 for "to be humble," which Belshazzar fails to be, in the interpretation of the vision of the four empires and the rise of the last potentate in 7:24 with the connotation "to topple (a ruler)."[6] In the political theology of the book of Daniel, then, it designates the fullness of royal power, which is nonetheless subordinate to God's omnipotence. 11Q10 34:7 is a literal translation of Job 40:11, as is Dnl. 4:34 with *gʾh* "the proud" as the object of "to humiliate." God challenges Job, in an ironic refraction, to do the same.

III. Adjective "Lowly." Like the verb, the adjective *špl* /šapel/ "lowly" in Dnl. 4:14 also has a figurative meaning. Here, it functions in the construct state with *ʾnšym*[7] as a superlative "the lowliest of people," whom God can elevate.[8] It probably also has a figurative intent in 1QapGen 0:7, but it appears there between lacuna. It is literally "to be low" in nV 7:13,49.[9]

IV. Noun "Humiliation." Older Aramaic attests the noun *šplw* /šapelū/ "humiliation" with certainty in 4Q542 1 1:6. It occurs in Qahat's admonition to subsequent generations to hold firm to the religious heritage of their fathers so that they do not experience humiliation and *nblw* "shame." *ATTM*, 2, 93 suspects an additional instance in 1QapGen 7:20, which lacks context, however, and the unclear remnants of letters may point more to the otherwise unattested form *śklw* "insight" from → *śkl*.[10]

שפר *špr*; שפיר *špyr* /šappīr/; שפר *špr* /šopr/; שפרפר *šprpr* / šaparpar/

I. Etymology. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology. Presumably, the root *špr* "to be beautiful" has a long history in West Semitic; its cognate in Amorite personal names at least suggests so.[1] Contrariwise, East Semitic (as represented by Akkadian) has no traces of this root with the same meaning. In Northwest Semitic, it is limited to Aramaic, although Hebrew borrowed it, cf. *šāpᵉrā ʿalay* "(my heritage) is beautiful to me" in Ps. 16:6[2] and the feminine name *šiprā* in Ex. 1:15.[3] The etymologies of (*rūḥō šāmayim*) *šiprā* in Job 26:13 and (*ʾimrē-*)*šāper* in Gen. 49:21 are unclear.[4] No relationship exists with Hebrew *šōpar* "horn"[5] and Ugaritic *špr* in *KTU* 1.108:10.

The adjective /šappīr/ "beautiful" and the masculine substantive /šopr/ "beauty"[6] occur as nominal forms.

II. Old and Imperial Aramaic. Old Aramaic attests the root only in the form of the adjective /šappīr/ (spelled *špr*) which functions as a synonym of the adjective *ṭb* "good":[7] [. . . *kl mh z*]*y špr wkl mh zy ṭ*[*b* . . .] "[everythin]g that is beautiful, and everything that is goo[d]."[8]

The same adjective occurs eight times in texts transmitted from the Achaemenid period. Papyri from Egypt preserve six of them in various nuances, especially in the (originally pre-Imperial Aramaic) sayings of Aḥiqar. It characterizes inner personal qualities and wisdom: *trtyn mln*

špyjrh “two things are outstanding,” i.e., sharing wine and the exercise of wisdom.[9] Another shading occurs in *špyr mlk lmḥzh* “The king is beautiful to see.”[10] It refers similarly to a characteristic attitude, as in *ʾyš špyr mddh* “a man, whose character is excellent (and whose heart is good).”[11] *TADAE* C3.28:109, A2.2:12, and D 23.1.8:9 mention various beautiful things, but the fragmentary context complicates their identification. Two additional specimens stem from outside Egypt, the first of which appears in a second century B.C.E. grave inscription from Turkish Arebsun praising a queen as *špyrʾ ʾnt mn ʾlhn* “you are more beautful than goddesses”;[12] the second stems from a second-century C.E. Aramaic-Greek diglot from Armazi in Georgia praising a women deceased at a young age as *ṭb wšpyr* “good and beautiful.”[13]

Imperial Aramaic does not attest the verb *špr* “to please, to do something good,” to be sure, but Palmyrene does quite frequently.[14] None of them employs it in the impersonal construction *špr l-/qdm* “it pleases” (“it is beautiful in the judgment of”) as does Biblical Aramaic, however.

III. Biblical Aramaic. As a verb, the root appears three times in Biblical Aramaic; all instances stem from the book of Daniel. It occurs with various prepositions: *ʿal* in *malkā milkī yišpar ʿ^{a}lāḵ* “O king, may my counsel please you” (Dnl. 4:24); *q^{o}ḏām* in *š^{e}pār q^{o}ḏām daryāweš wah^{a}qīm* “it pleased Darius and he installed” (6:2), i.e., Darius decided to install 120 satraps over the kingdom. Here, the complement appears in the form of an independent clause introduced syndetically with *wa-*; in Dnl. 3:32 *l-* with the infinitive follows instead: *š^{e}pār q^{o}ḏāmay l^{e}haḥ^{a}wāyā* “it pleases me to make known,” i.e., it seems appropriate to the speaker (King Nebuchadnezzar) to make known in the kingdom the signs and wonders that the supreme God had demonstrated to him. The use of the verb in these passages expresses a close connection between *špr* and that which is appropriate, suitable, and pleasing.[15]

The adjective occurs twice in the identical expression *ʿopyeh šappīr* "its foliage was beautiful" in reference to the tree in Nebuchadnezzar's dream that the king first reports in Dnl. 4:9 and to which Daniel refers in 4:18 when he gives the interpretation. These passages associate the concept of beauty with plenty and wealth.[16] Theodotion renders *šappīr* in 4:9,18 (enumerated with MT) with ὡραῖα "beautiful" (4:12) and εὐθαλῆ "blossoming" (4:21). He always translates the verb with ἀρέσκειν "to please" (4:27; 6:2). The unrevised Greek version has no equivalent in these cases. The noun /šaparpar/ "daybreak" appears in Dnl. 6:20; the unrevised version translates it with πρωί "early morning" and Theodotion expands it to τὸ πρωὶ ἐν τῷ φωτί "at daybreak."

IV. Qumran. Forms of the root appear in concentration in the passage with the song of praise to Sarah's beauty in 1QapGen 20:2-9, the adjective *špyr* four times, the verb twice, and the noun also four times: *špyr* "beautiful" was the appearance of her face (l. 2), her light complexion (l. 4), her arms (l. 4), and her feet (l. 5f.); no virgins or brides who enter the bridal chamber *yšprn* "are more beautiful" (l. 6)[17] than she; she *šprh* (l. 7)[18] "is more beautiful" than all women in *šwpr* "beauty"[19] and *šprhʾ* "her beauty"[20] surpasses them all (l. 7). Yet, with all this *šprʾ* "beauty" there is also much wisdom in her (l. 7). The last praise, then, fuses beauty and wisdom and thereby portrays Sarah as the ideal woman. When pharaoh saw her, he marveled at *šprhʾ* "her beauty" (l. 9).[21] The adjective *špyr* also occurs in 4Q197 4 1:17 and 4 2:1;[22] 4Q202 1 2:3;[23] 4Q213a 1:16;[24] 4Q561 1 1:2.[25] Traces of the adjective *špyrʾ* can still be perceived in 1QapGen 7:18,[26] and of the noun *šprʾ* in 4Q553 9:1, but because of the unclear context, the meaning is uncertain. In 1QapGen 13:14, one probably finds an additional instance.[27] For instances in a legal formula in treaties from the Dead Sea, see *ATTM*, 2, 498f., for memorial inscriptions *DNSI*, 1184f.

שרי *šrī*; משרי *mšry* /mašrī/

I. Etymology and Lexical Field. II. G-stem “to Loosen.” 1. Literally. 2. Figuratively “to Interpret” and “to Linger.” III. D-stem “to Begin.” IV. Noun “Camp.”

I. Etymology and Lexical Field. Admittedly, the root *šrī* “to loosen” has a common Semitic etymology, but, of the languages of Syria-Palestine, is apparently only productive in Aramaic. The one Ugaritic instance occurs in poetic language;[1] the one or two occurrences in Hebrew[2] may be either borrowings from Aramic or poetic archaisms.

Since the earliest period, Aramaic attests first forms of the verb. The G-stem can function literally and transitively for “to unbind,” and figuratively and transitively for “to resolve”[3] and intransitively for “to settle, to camp, to tarry.”[4] Only a small step leads from the literal nuance “to loosen a knot (or the like)” to the metaphorical “to solve a problem”; it occurs in Biblical Aramaic with → *qṭr* as object. The usage for “to camp” may have arisen from an abbreviation of “to loosen the field pack” or the like. The D-stem functions as an auxiliary verb “to begin” with the corresponding full verb in the infinitive following *l*-.[5] Dnl. 5:6 uses a participle of the t-stem with the meaning “to loosen” of shaking joints and points it as a Dt-stem *mištārayin*, but, semantically, it approximates the G-stem. It is unclear whether it involves an independent nuance or a pointing error because of otherwise unusual usage.

The texts from Qumran also first manifest the feminine verbal noun /mašrī/ “camp, dwelling.” Antonyms of the literal meaning “to loosen” are → *ʾsr*, *kpt* or → *qṭr* “to bind,” of “to tarry” → *ngd* “to set out,” and of the D-stem “to begin,” *bṭl* “to cease.”[6]

II. G-stem "to Loosen."

1. Literally. Older Aramaic since the earliest attested phase of the language frequently utilizes the G-stem of *šrī* in the literal sense "to loosen (something bound)." In a treaty of state from Sefire, the probably negated form [ʾ*l*] *tšryh* "do not let him loose" parallels the imperative *ʾsrh* "bind him," i.e., "take him prisoner."[7] In Dnl. 3:25, the verb, a passive participle in an attributive function "unfettered," also refers to prisoners, namely the three young men in the fiery furnace, and in explicit contrast to the passive participle of *kpt* "to fetter" in 3:23f. The loosening of the fetters is part of the wonder of deliverance. The usage in Enoch's letter to the fallen angels in the Book of Giants has a theological nuance. It demands that they set free what they have captured,[8] here with the substantivized passive participle of *ʾsr* as the object.[9] In 11Q10 32:5 (Job 39:5), the verb represents the D-stem of the Hebrew verb *pṭḥ;* the passage speaks literally of releasing a wild ass.

2. Figuratively "to Interpret" and "to Linger." Of the two figurative nuances, "to interpret" and "to camp," the first occurs initially in Dnl. 5:12,16. It involves Daniel's capacity for interpreting dreams, solving puzzles, and "knots"[10] in the obvious metaphorical sense of disentangling difficult questions, which predestines him to explain the mysterious writing on the wall after the king's scholars proved to be overwhelmed. In both passages, *šrī* constitutes a parallelism with → *pšr*; in 5:12, rather than the D-stem participle *m*^{e}*šārē* in MT and as in 5:16, one should probably read a G-stem infinitive and point it as *mišrē*.[11] If the pertinent emendation, so far without alternative, *ʾš*]*rʾ* "[I will interpr]et" in 4Q246 1 1:3 following *ATTM*, 2, 147 is correct, it involves the same usage with a vision (*ḥzw*)[12] as object.

Better attested is the usage for "to encamp, to tarry." Semantically, this intransitive construction approximates the middle-passive. Meanwhile, the form occurs in the oldest datable instance, an Imperial Aramaic hunting inscription from Cilicia, probably in the Gt-stem for "to picnic."[13] The participle with the meaning "to tarry" —of the light that dwells with God —

in Dnl. 2:22 is pointed as a passive participle *šᵉrē*, which one can easily explain semantically as an active usage "dwelling" for "released,"[14] but some assume an originally active form /šārǣ/.[15] In 1QapGen 20:34 and 22:8, the verb denotes "to pitch a tent, to camp" in reference to a person, in 4Q246 1 1:1 to the spirit of God who settled on a visionary, and in 4Q531 22:6 (Book of Giants) to the heavenly beings who tarry "among the holy ones" (*bqdšyʾ*),[16] here paralleling → *ytb*. In contrast to the otherwise largely synonymous verb → *škn*, *šrī* is not apparently defined as a temporary stay. Because of the lacuna in the context, 4Q556 14:2 is unclear.

III. D-stem "to Begin." Further, *šrī* appears in the D-stem for "to begin" and is mostly complemented by the respective full verb in the infinitive after *l-*, rarely in the particple.[17] It can refer to a wide variety of verbal actions: the distribution of goods,[18] construction measures,[19] and at Qumran, also farming,[20] drinking,[21] verbs of speech[22] and of motion.[23] It occurs in the book of Enoch with remarkable frequency, namely for the beginning of the evil that the fallen angels and their descendants effected among human beings,[24] and in the animal allegory of world history;[25] as well as in reference to the beginning of the motion of the sun in the astronomical book of Enoch.[26] Two possibly synonymous instances of the Dt-stem in the Book of Giants[27] have been preserved without sufficient context.

In contrast, the participle in Dnl. 5:6, vocalized as a Dt-stem (→ I), is a middle-passive for "to loosen" in referent to Belshazzar's shaking hip joints (*qṭry ḥrṣh*)[28] and actually corresponds to the active meaning of the G-stems,[29] but has parallels in Syriac.[30]

IV. Noun "Camp." The feminine *mšry* /mašrī/ "camp, dwelling" first appears at Qumran. In 1QapGen 21:1, it denotes an encampment and three other times in fragments largely without context.[31] Additional nominal forms occur in later Aramaic languages, especially Syriac.[32] Of them, 4Q196 2:11 (Tob. 2:1) already attests the feminine *šrw* /šarū/[33] "meal."

שרֹשׁ *šrš* /šorš/ (< /śorš/?)

I. Etymology, Form, and Lexical Field. II. Meaning.

I. Etymology, Form, and Lexical Field. Some assume an original form /śorš/ for the masculine primary noun *šrš* /šorš/ "root,"[1] whose initial /ś/ became not /s/, but under the influence of the final sibilant /š/ in accordance with the principles of phonetics;[2] some assume a similar development for → *šrš* "sun."[3] In a few post-Christian Aramaic languages, the word appears as a *qitl*-form.[4]

It appears from Old Aramaic times and occurs since regularly in obvious figurative expressions for the survival of individuals or their descendants. It differs semantically from → *ʿqr* III "rootstock," but sometimes occurs with it in the same context. Since no derivatives of *šrš* are yet known in older Aramaic, which uses *ʿqr* for "to eradicate" instead, *šᵉrōšī* in Ezr. 7:26 may be a misspelling of the Iranian loanword → *srwšy* "discipline."

II. Meaning. In the curse formula of an Old Aramaic inscription from Sefire, *šrš* already metaphorically represents "descendant," which should be denied the party who violates the treaty.[5] Otherwise, these treaties of state utilize *ʿqr* in clauses that also obligate dynastic successors. In a fragmentary, perhaps similar context, one should reconstruct *šrš* at the end of *KAI* 202 B 28. Daniel 4:12,20,23 uses it in the expression *ʿqr šršwhy* "his rootstock" symbolically for the foundation of Nebuchadnezzar's kingdom. In the dream of the cedar and the date palm,[6] it denotes the solidarity of

Abraham and Sarah. Occurences in 4Q530 2 2+6-12:8; 4Q542 3 1:1; 4Q558 21a-b:2; 26:1; 6Q8 2:1 (dream) have no context.

שתי *štī*; משתה *mšth* /maštāʾ/; משתו *mštw* /maštū/; שקי *šqī*; צבע *ṣbʿ*

I. Etymology, Lexical Field, and Grammatical Constructions. II. Drinking as an Everyday Activity. III. In the Context of Banquets. IV. Nouns "Drink, Drinking Bout."

I. Etymology, Lexical Field, and Grammatical Constructions. Since most branches of the Semitic languages attest the root *štī* "to drink," it may belong to the common basic lexicon, although *šrb* replaces it in Arabic. In Aramaic, the verb appears in the transitive G-stem, either absolutely with that drunk—mostly water (*myn*) or wine[1]—as object. A prepositional modifier with *b*- can indicate the drinking vessel.[2] Subjects are usually people. The form [*lmš*]*t*[ʾ] "to drink" in Enoch's animal allegory[3] is almost completely reconstructed.[4] Nothing contradicts the possibility that *štī*, as in Hebrew, could also apply to animals and plants. In reference to an angelic being, however, whose spiritual body assumes human form, one statement explicitly indicates that eating and drinking are only apparent.[5] Like a few other words that begin with a sibilant,[6] this verb can take a prosthetic glottal stop in the perfect. Daniel 5:3f. first attests this phenomenon that has parallels at Qumran[7] and occurs later in Syriac and Jewish Aramaic languages.[8]

Instead of *štī*, the root *šqī* "to give to drink, to water" in the C-stem[9] and once *yhb* "to give" with *myʾ* "water" as object[10] denote causative action; *nsk* "to pour out"[11] denotes "to make a libation" (usually with wine). The verb *ṣbʿ* occurs in the D-stem with the specific meaning "to moisten" (Dnl.

4:12,20,30; 5:21). If solely drinking is not meant, *štī* also occurs regularly with → *ʾkl* "to eat." These instances mostly involve depictions of banquets (→ III).

In addition, the root appears in the form of the masculine noun /maštǣ/, which designates either the object of drinking ("beverage") or as *pars pro toto* the event ("drinking bout," cf. the English *drinks*). The feminine /maštū/ "marriage celebration" also derives from *štī*.

II. Drinking as an Everyday Activity. As an activity of everyday life, drinking first appears in a few proverbs of Aḥiqar. One describes the sharing (or libation?) of wine as a "beautiful," i.e., "noble," deed,[12] and another aphorism advises against drinking water entrusted to one so that one may enjoy even greater trust and may guard even gold.[13] The context of *TADAE* C1.2:6, a passage from the Bar-Puneš tale, is unclear.

Further, the verb occurs in a few Imperial Aramaic letters from Elephantine. A report concerning the destruction of a well[14] mentions drinking water (*myʾ*) in (*b*-) this well (*brʾ*) alongside the causative verb *šqī* "to give to drink" in relation to the provision of water for a garrison; drinking water typically came from wells or cisterns. The petitionary letter of the Elephantine community concerning the reconstruction of the temple emphasizes abstinence from wine as a gesture of mourning and fasting.[15] Similarly, in the context of religious prescriptions, one finds the prohibition against drinking something in another letter,[16] but the object of the verb has been lost with the text in the preceding lacuna. As evidenced by various commercial texts, wine was very widespread[17] and was used for pleasure as well as for cultic purposes, serving, thus, as a standard component of banquets (→ III), although it was not essential. Many deities also abstained: a Palmyrene dedicatory inscription is dedicated to a god "who drinks no wine [*dy lʾ štʾ ḥmr*]."[18] Diodorus Siculus states that the pre-Islamic Nabateans also did not consume wine (μήτε οἴνου χρῆσθαι).[19] In contrast, an ostracon with a writing exercise form Idumea explicitly mentions a group of persons who drank wine.[20]

III. In the Context of Banquets. In addition, the enjoyment of wine constitutes a hallmark of the depiction of banquets in narrative passages such as the court tales of Daniel and a few documents from Qumran. In Old Aramaic times, in contrast, only Samʾal attests funerary meals, which may reflect Anatolian influence; along with pictorial representations of such celebrations, an inscription from this region also contains the wish that the "soul" of the deceased be able "to drink" together with the gods.[21]

The oldest preserved portrayal of a banquet in Aramaic literature is Belshazzar's feast in Dnl. 5. The drunken king arrogantly blasphemes to an almost double degree in that, along with his court, he desecrated the holy vessels from the Jerusalem temple by drinking from them (Dnl. 5:2f.)[22] and then praising the idols (5:4).[23] The introduction has the verb *štī* with *ḥmr* "wine" as object almost *pars pro toto* for the entire feast: "he celebrated" (5:1).[24] Thereby, the text clearly distinguishes Belshazzar as a degenerate ne'er-do-well from his father Nebuchadnezzar, a "noble pagan," whose fate, even during his festive mood, is sealed. In the same context, *bt mšth* denotes the location of the event (→ IV); the frequent repetition of forms of the same root *štī* elevates drinking here to a negatively connoted leitmotif.

In relation to regular banquets, in contrast, *štī* "to drink" usually appears together with *ʾkl* "to eat": Abraham's altar dedication[25] and the following celebration for his friends,[26] Raguel's hospitable entertainment of Tobias and the angel (→ I),[27] Usiel's marriage to Miriam,[28] the cultic meal in the new Jerusalem,[29] and in analogy to the noun *mšth* (→ IV) in relation to Abraham's feast for the Egyptian nobility,[30] and Melchizedek's entertainment of Abraham.[31] Meanwhile, at the "new wine festival" that Noah arranged after the first vintage, celebrants only drank.[32] The otherwise positively connoted combination of *ʾkl* and *štī* undergoes a perversion to the unnatural, however, in the report concerning the ruin that the giants produced on the earth by eating the flesh of living beings and drinking their blood.[33]

IV. Nouns "Drink, Drinking Bout." Of the two nominal derivatives of the root already attested in pre-Christian Aramaic, *mšth* /maštǣ/ occurs first alongside *mʾkl* "food," for "drink" (→ III),[34] in the combination *bt mšth* "festival hall," and second representing the event (Dnl. 5:10). In the context of Belshazzar's banquet, it denotes a wicked place that honorable figures such as the queen and Daniel enter only in cases of extreme need. Qumran first attests the noun *mštw* /maštū/; both passages where it appears employ it explicitly for a marriage celebration.[35]

תבר *tbr*

I. Etymology. II. Old and Imperial Aramaic. III. Biblical Aramaic. IV. Qumran.

I. Etymology. Derivatives of the root *θ*br*, so Ugaritic,[1] also occur in Hebrew, Phoenician, Akkadian, and Ethiopic.

II. Old and Imperial Aramaic. The only Old Aramaic instances of the verb "to shatter" in the G-stem[2] appear in a curse formula in the Sefire inscription *KAI* 222 A 38f.: *wʾyk zy tšbr*[3] *qštʾ wḥṣyʾ ʾln kn yšbr*[4] *ʾnrt whdd* [*qšt mtʿʾl*] "As the bow and this arrow are broken, so may Inurta and Hadad break [the bow of Matiʿel]."[5] The Imperial Aramaic letter of the Jews from Elephantine reports the shattering of the stone columns of their temple.[6] The verb appears often in images and allegories (→ III and IV), as in the sayings of Aḥiqar: *rkyk lšn m*[*lk*] *wʿlʿy tnyn ytbr* "Soft is the tongue [of a kin]g, but it breaks the ribs of a dragon"[7] and *mʾn ṭb ks*[*y*] *mlh blbbh whw z*[*y*]*tbyr hnpqh brʾ* "A good jug hol[ds] a word inside it, but [a]broken one lets it out."[8]

III. Biblical Aramaic. Biblical Aramaic only attests the G-stem as a participle passive feminine singular absolute in the interpretation of Nebuchadnezzar's dream (Dnl. 2:42). The toes of the statue, partly iron, partly clay, symbolize the fact that "the kingdom will be partly strong, partly fragile" (*min qᵉṣāṯ malḵūṯā tœhᵃʷē ṯaqqīpā*[9] *ūminnah tœhᵃʷē ṯᵉḇīrā*). In the interpretation, Daniel combines two lexical fields: breaking of material (→ II), here clay, and of immaterial (→ IV), here the kingdom.[10]

IV. Qumran. Qumran Aramaic attests only the G-stem[11] and the passive Gt-stem. The verb appears in the material meaning only in Noah's vision of the olive tree in 1QapGen 13:16 when the four winds of heaven "strike off its branches and shatter it" (*mʿnpn lh wtbrn lh*).[12] In the revision of Gen. 14, the verb means "to conquer": as in 1QapGen 21:32, *ʾtbr mlk swdwm wʿrq* "the king of Sodom was conquered and fled";[13] and later in reference to Abraham's campaign against the Transeuphratenes, 1QapGen 22:8f., *hwwʾ qṭl bhwn blylyʾ wtbr ʾnwn* "he massacred them in the night and conquered them."[14] In 11Q10 34:7f. (Job 40:12), *kl rmt rwḥ ttbr whṭpy ršyʿ*[*yn tḥw*]*tyhwn* "All arrogance will be shattered, and he has extinguished all evil[doers amon]g them,"[15] the verb translates the Hebrew *knʿ* in the C-stem. The form *mtbryʾ* in 4Q566 1:3 in a fragmentary context is ambiguous, although probably a participle masculine plural determined in the Gt-stem.

Stadel

תוב *tūb*; (א)תוב *twb*(ʾ) /tūbā/

I. Etymology, Lexical Field, and Grammatical Constructions. II. G-stem "to Return." III. C-stem "to Give Back." IV. Adverb "Again."

I. Etymology, Lexical Field, and Grammatical Constructions. Aramaic *tūb*, in the G-stem "to return," belongs to the Semitic verbal root *θ*ūb*. Old Aramaic still retained the initial interdental and, in accordance with Old West Syrian orthography, spelled it with *š*, after its fusion with /t/ then, at the latest in Imperial Aramaic, consistently with *t*.[1] The intransitive G-stem, which occurs with persons and abstract subjects, literally means "to return" or figuratively "to diverge from, to turn,"[2] and appears in conjunction with an additional verb to mean "to do again." Further, the transitive C-stem "to give back" is extremely productive in Aramaic. In addition to material terms, it can also take abstract terms as object; it often appears with → *ptgm* "message"[3] for "to answer," for which Aramaic also has an independent verb in → *ʿnī* I.

Both G- and C-stems take various prepositional complements to express adverbial relations: both frequently take *l*-, with the G-stem to indicate direction "toward" or "to," with the C-stem for the indirect object "to someone" and in the Imperial Aramaic tradition and later in East Aramaic also for the direct object; for persons, *ʿl*, mostly "to," also appears with both stems, but in the G-stem also for "on" or "against." With the G-stem as a verb of motion, furthermore, the ablative *mn* "from" can also appear, rarely *b*- "with."

The adverb /tūbā/ "again" or, in official style, "further," also derives from the same root.

II. G-stem "to Return." Old Aramaic already employs the G-stem of *tūb* "to return"[4] figuratively. In the conclusion of a treaty of state from Sefire, it occurs with a place name as subject and refers to the return of a region to (*l*-) the dynasty of a treaty partner.[5] Neo-Assyrian legal documents employ it with *ʿl* in the curse formula at the end for "to turn against someone."[6] It probably denotes withdrawal from an oath, although following a lacuna, also in Imperial Aramaic in *TADAE* B7.1:5 and perhaps in D2.25:4 (although entirely without context).

The three Biblical Aramaic examples all employ it in relation to the rehabilitation of Nebuchadnezzar, to (*ʿl*) whom, when at the end of his penance he acknowledged God as the supreme ruler, his mind (*mndʿ*, Dnl. 4:31,33)[7] as well as his dominion and royal dignity returned (4:33).[8]

Qumran first manifests the usage as a verb of motion, where, however, it is regular in journey reports.[9] It functions figuratively, e.g., in reference to evil that returns onto (*ʿl*) someone's (namely the transgressor's) head, as in 4Q550 7+7a:6, and in 11Q10 23:3 (Job 33:25)[10] for the return of youth. The nuance "to diverge from" already attested in older legal diction also appears.[11] Finally, as an auxiliary verb "to do again" with a syndetically appended similar form of a main verb, it first appears in reference to the regular course of the stars in the astronomical book of Enoch[12] and to Noah's renewed praise of God.[13] A few additional instances are unclear in terms of their contexts.

III. C-stem "to Give Back." The C-stem of *tūb* "to give back" also already appears in Old Aramaic texts. A treaty of state from Sefire employs it in a clause concerning the return of fugitives[14] and with a divine subject for the restoration of the dynasty of a treaty partner in relation to the return of a territory.[15] The Old Aramaic spelling *šūb* still appears here (→ I). The verb also occurs in the Asshur ostracon, now as *tūb*, for the return of prisoners.[16] A saying of Aḥiqar employs it figuratively; it warns against

attacking[17] a righteous person with an arrow because he stands under the protection of the gods and they will redirect the arrow to (*ʿl*) the shooter.

Imperial Aramaic letters employ the verb in the literal sense for "to give back" with goods, whether stolen property[18] or property attained in some other illegal manner,[19] similarly in legal texts[20] and in sales contracts from Samaria specifically for the return of the sales price in the case of a legal dispute.[21]

The verb may already function for "to answer" in Segal, 59.4, which can not be verified because of the absence of a broader context; Biblical Aramaic first attests this usage with certainty. Here, the verb occurs several times with the Iranian nouns → *ptgm* "report" (Dnl. 3:16; Ezr. 5:11) or → *nštwn* "official letter" (Ezr. 5:5) as objects, which point to the roots of this expression in Achaemenid chancellery style. In this style, it appears in Dnl. 2:14 with *ʿṭ* "counsel"[22] and → *ṭʿm* "understanding" as objects, for a clever response by Daniel. In Ezr. 6:5, it literally represents the symbolically significant return of the temple implements[23] that inaugurates the reconstruction of the Jerusalem cultic center; as in *KAI* 224.24 (see above), this passage employs the verb to express historical continuity.

These usages grounded in Old Aramaic occur then in the texts from Qumran. Here, *tūb* appears in relation to the return of persons[24] and goods.[25] 11Q10 employs it often for "to answer,"[26] so possibly also 4Q550 5+5a:5.[27] Contracts from the Dead Sea attest the same semantic spectrum.[28]

IV. Adverb "Again." The related adverb /tūb(ā)/ occurs since Imperial Aramaic and appears in Achaemenid texts in the spellings *twb*[29] and *twbʾ*.[30] According to *ATTM*, 722, both represent the form /tūbā/, whose unaccented final adverbial ending /-ā/ was not always written at first. It may be that one should not exclude the possibility of a by-form */tūb/ without this ending, but the later body of occurrences do not evidence it, since an unaccented /-

ā/ had fallen out again secondarily in the time of the vocalizations of Aramaic.[31] Furthermore, /tūbā/ could be expanded to /tūbān/.[32]

In the meaning "again,"[33] this adjective corresponds semantically with the verbal root, but it appears regularly at least in official texts as a pure particle of apposition "further."[34] This dual usage is still very frequent in post-Christian Aramaic,[35] where the word in the second sense often introduces a new narrative unit.

תוה *twh*

I. Etymology. II. Meaning.

I. Etymology. The verbal root *twh* with the G-stem meaning "to terrify" is very rare in Aramaic; some conjecture an etymological relationship with → *tmh* "to astonish," which finds phonetic support in the readily explicable shift /m/ > /w/, but the nuances, at least in Biblical Aramaic, already seem distinct from one another.

II. Meaning. The sole occurrence of *twh* in older Aramaic is the reaction of Nebuchadnezzar to the wondrous scene in the fiery furnace (Dnl. 3:24).[1] Here, it appears alongside → *bhl* "to terrify" and → *qūm* "to stand up,"[2] which points to a sudden, but not necessarily pleasant, stimulus. Later, the root also occurs in East Aramaic.[3]

Gzella

---

1. Regarding the form, cf. *BLA*, §46v′.

2. Ingressive "suddenly," as K. Koch, *Daniel 1–4*. *BK* XXII/1 (2005), 254, suggests, is unlikely, since *qm* would probably stand in first, not second, position.

3. *DJBA*, 1196b; *LexSyr*, 818; *MdD*, 485.

תור *twr* /tawr/; תורה *twrh* /tawrā/; עגל *ʿgl* /ʿegl/

I. Form and Meaning. II. Masculine "Cattle of Both Genders." III. "Steer" Figuratively. IV. Feminine "Cow." V. "Calf." VI. Derivatives.

I. Form and Meaning. The word */θawr/[1] is a Semitic and Indo-European (ταῦρος, *taurus*) primary noun, an old *Wanderwort* "cattle," in Arabic, Aramaic, and Indo-European only masculine in gender, but it can include female animals. Already in pre-Christian times, the Aramaic pronunciation changed in two respects from the original /θawr/: already before 800 B.C.E. /θ/ > /t/,[2] in contrast to Abyssinian > /s/, Akkadian and Canaanite also > /š/, and in second century B.C.E. Aramaic /aw/ > /ō/ initially in closed,[3] then in some of the Aramaic languages also in an open syllable,[4] and contrary to Akkadian throughout and Canaanite in part[5] since the beginning of the traditions. This results for Aramaic in the masculine singular absolute /θawr/ > /tawr/ > /tōr/, the determined /tawrā/ or /tōrā/, and the masculine plural absolute /tawarīn/ > /tawrīn/ > /tōrīn/.

II. Masculine "Cattle of Both Genders." The masculine means "cattle of either gender." In the story of Nebuchadnezzar's penitential period, it appears several times as a grass-eater along with the king: Dnl. 4:22,29,30; 5:21; all in the plural absolute /tōrīn/. Elsewhere, it denotes cattle as sacrificial animals: the singular absolute *šwr*[6] in l. 3 of the Kuttamuwa inscription from Samʾal (eighth century B.C.E.);[7] Imperial Aramaic then in the spelling *twr TADAE* A4.10:10 (407 B.C.E.) along with "sheep" and "goats"; triglot from Xanthos, *KAI* 319.17 (fourth century B.C.E.; in the Greek text βοῦν); the singular determined *twrʾ* in the new/heavenly

Jerusalem from Qumran 11Q18;[8] further in T. Levi according to a manuscript from the Cairo Geniza;[9] also in Palmyrene;[10] the plural absolute *twryn*: Ezr. 6:17; 7:17 along with rams and lambs; 11Q18;[11] *bny twryn* "young cattle": Ezr. 6:9; *pr twryn* "yearling" in T. Levi.[12]

III. "Steer" Figuratively. Additionally, "steer" also functions as an image: the singular determined *twrʾ* in the astrological brontology 4Q318[13] for the constellation of Taurus; in 1QapGen 17:10; 21:16[14] as a toponym *ṭwr twrʾ* "the mountain of the steer";[15] the plural determined *twryʾ* in Enoch's animal vision 4Q206[16] as an image of Noah and his sons.

IV. Feminine "Cow." The feminine "cow" occurs in the singular absolute after a number in an apparently widespread Old Aramaic curse formula: *KAI* 222 A 23 (Sefire; eighth century B.C.E.) much like *KAI* 320.5 (Bukān; eighth century B.C.E.) "May seven cows suckle to no effect!"; similarly *KAI* 309 (Tell Fekheriye; ca. 850 B.C.E.) in the Aramaic alphabet of the eleventh century B.C.E. with apparently twelve misspellings,[17] including in l. 20 after a number, where Old Aramaic rarely has the thing counted in the singular, but mostly in the plural, so that one would expect *swr<h/n>* / θawr<ā>/ or /θawar<ān>/ "may a hundred cows suckle to no effect!" Contrariwise, in the Samʾalian (→ II) inscription of Panammuwa (eighth century B.C.E.),[18] *šwrh*, along with other grains, apparently refers to "sorghum" (cf. Isa. 28:25). The singular determined *twrtʾ* appears on an ostracon from Idumea[19] (fourth century B.C.E.) denoting a sacrificial animal.

V. "Calf." Semitic has an independent word for "calf," as a masculine /ʿegl/, as a feminine /ʿeglā/. In contrast, /parr/ "young cattle"[20] is Hebrew.

VI. Derivatives. Two derivates of *twr* "cattle" denote "cattle breeder," "cattle herder," "cattle plowman." They are formed either through the addition of the gentilic affix /-āy/[21] or through transition to the *qattāl* noun

form.[22] They allow for the readings /tawrāyǣ/ or /tawwārayyā/ on the plural determined-state noun *twryʾ* on an ostracon from Idumea (fourth century B.C.E.).[23] Otherwise, there is a verb in the D-stem "to plow with cattle."[24]

תמה *tmh*; תמה *tmh* /temh/

I. Etymology, Lexical Field, and Grammatical Constructions. II. Verb "to Astonish." III. Noun "Wonder."

I. Etymology, Lexical Field, and Grammatical Constructions. Aramaic and Hebrew know the verbal root *tmh*.[1] In accordance with the middle meaning "to astonish," it occurs as a G- or Gt-stem, although no semantic difference is apparent. The basis of the astonishment usually appears in the prepositional expression following *ʿl*. There may be a relationship to → *twh* "to terrify" since the two share the same lexical field and, especially, since a shift from /m/ to /w/ can be explained phonetically with no problem.[2] The preserved Aramaic texts, however, employ *tmh* more for a wondrous, somewhat enduring astonishment, while *twh* in Dnl. 3:24 refers to a sudden terror. Common to both is the relationship with a sensory, more precisely, visual perception. They belong to the extremely differentiated psychological vocabulary in theological literature. Later, *tmh* also seems to denote "to be dim."[3] The masculine /temh/ (> /temah/) "wonder"[4] belongs to the root *tmh*.

II. Verb "to Astonish." As a verb, *tmh* first appears in religious literature from Qumran. Here, the G- and Gt-stems seem to have largely synonymous usage, the first twice in Noah's reaction to the vision of a luxuriant olive tree, once in a periphrastic construction with a durative nuance *hwyt tmh* "I stood rapt in astonishment"[5] and then again in the perfect;[6] further as a command "be not astonished!"[7] probably likewise after a vision, but in an extremely fragmentary context. The Gt-stem

appears in the same text for pharaoh's reaction to Sarah's perfect beauty and, in contrast to the G-stem, could have the nuance that the desire of the king became immediately inflamed and had its object abducted immediately. The stems of the other two occurrences are not clear: 11Q10 10:2 (Job 26:11) has the verb in the image of the reverential trembling of heaven in view of God's omnipotence as a translation of the Hebrew *ytmhw* with *mn* and could be either an Aramaic G- or Gt-stem; 4Q205 1 12:8 (1 En. 26:6) involves Enoch's astonishment over the gigantic mountains that he saw on his journey to heaven (see above on 1QapGen 13:15); the verb can be emended either as a G-stem *t*]*mht* or as a Gt-stem *ʾt*]*mht*.

III. Noun "Wonder." Since the book of Daniel, Aramaic attests the noun *tmh* /temh/ "wonder." Daniel uses it twice for God's wondrous acts of deliverance, each time in the plural along with → *ʾt* "sign" and in a hymnic confession by the king who attained the recognition of the true God after the deliverance of the three young men from the fiery furnace (Dnl. 3:33) and of Daniel from the lion's den (6:28). At Qumran, in contrast, it occurs once in 11Q10 4:5 (Job 21:6) for the Hebrew *pallāṣūṯ* "terror, shuddering," and again in 6Q8 1:6 from the Book of Giants in relation to a giant's disbelief of a probably preceding but now lost vision report.[8]

תקל *tql*; תקל *tql* /teql/ (שקל *šql* /šeql/); מתקל *mtql* /matqāl/

I. Etymology and Grammatical Constructions. II. Verb “to Weigh.” III. Noun “Shekel.” IV. Noun “Weight.”

I. Etymology and Grammatical Constructions. Aramaic *tql* “to weigh” arose from older Semitic *θ*kl* and appears in the transitive G-stem, which can be optionally supplemented with adverbial modifiers following *b*- “on (a scale)” or, with the nuance “to pay,” *l*- “to someone,” for example. As a verb, the root appears significantly less frequently, however, than the masculine substantive for the weight /teql/[1] ubiquitous in legal and commercial texts “shekel.” The very frequent spelling *šql*, often abbreviated *š*, is probably borrowed from Akkadian /šeql/ as the historical orthography for the old */θekl/.[2] The “menetekel” of Dnl. 5 depends on a double entendre of verb and noun. The likewise masculine noun /matqāl/ “weight” belongs to the same root. Apparently no relationship to the homonymous verb *tql* “to stumble”[3] exists, however. “Scale” is /mawzen/.[4]

II. Verb “to Weigh.” Legal and commercial texts for the Neo-Assyrian period first evidence the verb *tql* “to weigh,” like the noun “shekel,”[5] then in Imperial Aramaic *WDSP* 17:3, and with the nuance “to pay (what has been weighed out)” *TADAE* B2.6:24.[6] Both nuances occur, in addition, in Aramaic treaties from the Dead Sea: “to pay” in V 36:6; 37:3,[7] the passive participle *tqylyn* “weighed out” in V 88:2.[8]

Overall, however, the verb is rather rare so that it is not recognizable as such in the puzzling oracular saying with the divine verdict on the blasphemer Belshazzar in Dnl. 5:25 *mnʾ mnʾ tql wprsyn* and, alongside the

supposed, equally frequent noun "mene,"[9] appears to be a substantive, which it is also vocalized as in the transmitted text.[10] The passive perfect *t^{e}qīltā* "you will be weighed" in Daniel's interpretation according to 5:27 demonstrates, however, that *tql* is meant instead as a passive participle /taqīl/ "weighed"; V 88:2 attests such a form in the plural *tqylyn* (see above), which was, therefore, actually in use in contemporaneous Aramaic. The defective spelling *tql* instead of the customary *tqyl* makes it even more difficult, however, to choose the correct reading. Instead of the apparently capricious sequence of weights in the illogical order "mene," "shekel," "half-mene," therefore, it involves a nominal clause referring to the king "(you will be) paid out, weighed, and apportioned," announcing the end of the kingdom.

III. Noun "Shekel." Beginning in Neo-Assyrian times, in contrast, *tql*/*šql* "shekel" appears in hundreds of instances.[11] There can be no wonder, then, that Belshazzar's scholars thought of this, the most frequent form of the root in the unvocalized text of the writing on the wall, just as with the word "mene."[12] In contrast, thanks to his giftedness with divine wisdom, Daniel was in the position to extract the true message from the ambiguous text (→ II). The play with administrative terms such as weights and the verbs "to pay" and "to weigh" indicates the deep roots of Biblical Aramaic literature in Achaemenid administrative diction.[13] From Qumran, the noun also appears in 4Q535 2:3,[14] and without context in 4Q580 1 2:11.

IV. Noun "Weight." The noun *mtql* /matqāl/ "weight" with the apparently largely or entirely synonymous feminine *mtqlh* /matqālā/ is relatively rare. It refers to specific information, such as, in Imperial Aramaic, the feminine in the expression *bmtqlt* "according to the weight of" in reference to the respective standard[15] and probably the masculine at Qumran in 4Q535 3:3 of a certain, numerically specified weight (→ III).[16]

Gzella

P. B. Hartog, *“šql,” ThWQ*, III, 1063-66.

תקן *tqn*

I. Etymology and Lexical Field. II. Usage.

I. Etymology and Lexical Field. The verb *tqn* “to be/become firm” belongs to a common Semitic root. In addition to the intransitive G-stem, it appears in the transitive C-stem “to install” and D-stem “to prepare.”

II. Usage. The G-stem occurs in 4Q206 4 2:4 (1 En. 89:8) for “to set up” of the ark in Enoch’s animal vision, the C-stem “to install” in the passive in Dnl. 4:33 for the restoration of Nebuchadnezzar’s kingship, and the D-stem “to prepare” in Palmyrene.[1]

Gzella

1. *PAT* 1787.4, of a grave.

תקף *tqp*; תקף *tqp* /toqp/; תקיף *tqyp* /taqqīp/

I. Etymology. II. Old and Biblical Aramaic. III. Aramaic Texts from the Dead Sea.

I. Etymology. The root *tqp* occurs in Aramaic and as *ṯqf* in Arabic. It also appears in Hebrew, where it is usually considered to be an Aramaism, however.[1] Its meaning depends on the notion of power, either as such ("to be strong") or as a concrete phenomenon (Arabic and Hebrew "to overpower").

II. Old and Biblical Aramaic. The root *tqp* hardly appears before Biblical Aramaic. The Tell Dan stele may contain an instance of the adjective *tqyp* /taqqīp/ "strong" in l. 6,[2] but the passage is severely corrupt and preserves only remnants of two letters,[3] so that it supports no further conclusions.

Biblical Aramaic, however, has *tqp* as a verb in the G- and D-stems, as a noun, and as an adjective. In the form of the noun, the root appears in the determined state as *tqpʾ* [4] "strength, power," namely in Dnl. 2:37: *dy ʾlh šmyʾ mlkwtʾ ḥsnʾ wtqpʾ wyqrʾ jhb lk* "for the God of heaven bestowed on you the kingship, power, strength, and honor." Dnl. 4:27, *hlʾ dʾ hyʾ bbl rbtʾ dy ʾnh bnyth lbyt mlkw btqp ḥsny wlyqr hdry* "Is this not the grand Babylon that I built as a royal residence through the power of my might and to the honor of my majesty?" vocalizes the construct as *tᵉqapō*, perhaps an error for *tᵉqopō*.[5]

As an adjective, the root takes the form *tqyp* /taqqīp/, a formation that typifies the adjective in Aramaic and, accordingly, means "strong, mighty,"

as in Dnl. 2:40: *wmlkw rbyʿyh* {*rbyʿʾh*} *thwʾ tqyph kprzlʾ* “and a fourth kingdom will be as strong as iron”;[6] likewise in Ezr. 4:20: *wmlkyn tqypyn hww ʿl yrwšlm* “mighty kings ruled over Jerusalem.” In Dnl. 3:33, *wtmhwhy kmh tqypyn* “and his wonders, how mighty they are!,” this adjective expresses a feeling of trembling before the wonders of the Most High.[7]

Finally, as a verb in the G-stem, *tqp* means “to be/become strong,” as in Dnl. 4:8: *rbh ʾylnʾ wtqp* “the tree grew and became strong” and the corresponding interpretation of the image in Dnl. 4:19: *ʾnt*{*h*} *hwʾ mlkʾ dy rbyt wtqpt* “it is you, O King, who grew and became strong.” Dnl. 5:20, *wkdy rm lbbh wrwḥh tqpt lhzdh*, literally, “and when his heart became haughty and his spirit became emboldened to behave arrogantly,” supplements the verb *tqp* with a subsequent infinitive following *l*-. Finally, the D-stem has the factitive meaning “to make strong.” It appears once in Dnl. 6:8: *ʾtyʿṭw kl srky mlkwtʾ . . . lqymh qym mlkʾ wltqph ʾsr* “all the high officials of the kingdom prepared . . . to issue the royal decree and to enforce a prohibition,” in the figurative sense of “to make valid, to put into force,” i.e., to make legally binding.

III. Aramaic Texts from the Dead Sea. The same verbal, substantival, and adjectival uses of the root *tqp* also appear in the Aramaic texts from the Dead Sea. There, the substantive *tqp* appears frequently with the meaning “strength, might,” as in 1QapGen 22:30f.: *wʾhwh lk sʿd wtqp* “I will be support and strength for you.” The spelling in the construct and absolute states varies since, in addition to *tqp*, the forms *tqwp* and *twqp* also occur, e.g., 4Q531 22:3 (Book of Giants): *mt*]*gbr wbtqwp ḥyl drʿy* “[I have] demonstrated [myself as mi]ghty and through the power of the strength of my arm”;[8] *twqp*, in contrast, in 1QapGen 20:14: *dbrt ʾntty mny btwqp* “my wife was taken from me by force”; which suggests a dual morphological

realization of the substantive as /tqop/ and /toq(V)p/ in this phase of Aramaic. The legal documents from Naḥal Ḥever employ the substantive *tqp* with the meaning "valid document,"[9] a specialized meaning also well known from Nabatean that can be traced, as an Akkadian loan translation, to Assyrian *dannatu* "valid tablet,"[10] in which the original significance of the Akkadian root *dnn* "strength" refers figuratively to juridical power, i.e., the legal efficacy of the treaty.[11]

The adjective *tqyp* occurs with the meaning "strong," e.g., in 1QapGen 1:22: *msyr tqyp* "a strong captive."[12] In 22:31, *wʾsprk lk ltqyp* "(and I will . . .) be for you a shield against any who is stronger than you," the meaning "to overpower" shines through the adjective in a substantival usage in reference to anyone who attempts to overpower Abraham. Finally, the adjective *tqyp* also expresses the strength, i.e., the intensity of an action, e.g., 1QapGen 2:8: *ʾdyn btʾnwš ʾntty bḥlṣ tqyp ʿmy mllt* "thereupon, my wife Bettenosh spoke to me with great ferocity"; 20:10f.: *wbkyt ʾnh ʾbrm bky tqyp* "and I, Abraham, cried bitterly (literally: a strong crying)." As in Daniel (→ II), it also denotes a feeling of shakiness, as in 4Q205 2 2:29 (1 En. 89:30): *wḥzyh tqyp wrb wd*[*ḥyl*] "and its appearance was mighty and great and fearsome."[13]

The verb *tqp* in the G-stem also appears frequently in the meaning "to be/become strong," supplemented with a prepositional expression following *ʿl* "over, against someone/something," as in 11Q10 2:1 (Job 19:11): [*wtq*]*p ʿly rgzh* "[and] his wrath against me [became st]rong";[14] 1QapGen 20:18: *wlswp trtyn šnyn tqpw wgbrw ʿlwhy mktšyʾ wngdyʾ* "and at the end of two years, the plagues and blows became more ferocious and stronger for him." In disputes, "to be strong over against someone" developed into the meaning "to conquer someone," employed transitively in 4Q203 9:4 (Book of Giants): *wkwl ṣbw lʾ tqptkh* "and nothing conquered you";[15] 1QapGen 21:25f: *wtqp mlk ʿylm . . . lmlk swdm* "but the king of Elam . . . conquered

the king of Sodom."[16] Similarly, the root *tqp* occurs in the C-stem and, together with the preposition *b*-, has the meaning "to grasp, to hold, to take possession of," either literally[17] or figuratively.[18]

תרע *trʿ* /tarʿ/; תרע *trʿ* /tarrāʿ/; אסף *ʾsp* /ʾasopp/; בב *bb* /bāb/; דש *dš* /dašš/

I. Etymology and Lexical Field. II. Literally “Gate.” III. Figuratively “at Court.” IV. Astronomically. V. “Gatekeeper.”

I. Etymology and Lexical Field. Behind the Aramaic masculine /tarʿ/ “gate” hides the common Central Semitic[1] noun */θaġr/ with metathesis /ġr/ > /rġ/ and then /ġ/ > /ʿ/, and then secondarily expanded to /taraʿ/.[2] It usually denotes a large, stable external gate of a building or a city, in an expansion of the usage for the palace gate, also “at court,”[3] and in astronomical contexts the “gates of heaven.”

Its literal meaning overlaps with that of /dašš/ “door, wing of a door,” borrowed from Assyrian *dassu*, which supplanted native Aramaic */dalt-/.[4] Imperial Aramaic sometimes employs /dašš/ in relation to private houses[5] when it denotes “door”; in juxtaposition, it obtains its specific meaning “wing of a door.”[6]

Sporadically, Imperial Aramaic exhibits /bāb/, also an Akkadian loanword, for the external gate of a building,[7] which also means “post, entry” in lists, corresponding to its meaning in Late Babylonian,[8] and survived in the East Aramaic languages.[9] The interchange of /tarʿ/ and /bāb/ in the same expression for “palace gate” in the framework narrative of Aḥiqar[10] demonstrates the extensive degree of synonymity. The word for the gate area, /ʾasopp/ (> /ʾasop/), also arose from Akkadian;[11] it is masculine in gender and finds usage in Aramaic often in the vision of the

new Jerusalem.[12] An additional Akkadian loanword from the same semantic field is /(ʾa)skoppā/ “threshold.”[13]

Finally, the masculine *nomen professionis tr*ʿ /tarrāʿ/ “gatekeeper” also derives from /tarʿ/.

II. Literally “Gate.” In the literal sense, *tr*ʿ first occurs in a late Aramaic proverb of Aḥiqar for the gates of a city of evildoers that is abandoned to plundering,[14] i.e., injustice will be repaid. The root of the verb *yṣʿwn* is disputed; it may involve a form of *ṣʿī* “they (the gates) bow.”[15] In legal documents from Elephantine, the word refers to the outer gate of a house,[16] in the letter concerning the destruction of the local temple to its stone doors (→ I).[17] The sole instance in Biblical Aramaic with a concrete meaning (on Dnl. 2:49 → III) designates the opening—perhaps a metal hatch—of the doubtless very large fiery furnace (Dnl. 3:26).

Both nuances recur at Qumran: with around sixty specimens (including dual occurrences and fragments without context), by far more of the passages refer to the twelve city gates named for the tribes of Israel[18] in the vision of the new Jerusalem,[19] sometimes more precisely defined with (*ʿl*) two wings (*dšyn*; → I).[20] The word also denotes the outer gate of a house[21] and the porthole of the ark.[22] The usage for “city gate” in 11Q10 14:1 (Job 29:7) accords with the Hebrew text. On the usage as an astronomical term, → IV. For additional instances of the meaning “gate,” see *DNSI*, 1233.

III. Figuratively “at Court.” Occasionally, *tr*ʿ stands as an abbreviation of *tr*ʿ *hyklʾ* “palace gate” with *b*- in tales from the royal court *pars pro toto* for service at the court, first in the framework narrative of Aḥiqar (→ I)[23] and then in Dnl. 2:49 (*btr*ʿ *mlkʾ*; cf. Est. 3:2f.; 5:9,13; 6:10).

IV. Astronomically. As a technical astronomical term, *tr*ʿ[24] means the twelve gates of the western, northern, eastern, and southern quadrants

through which the winds pass,[25] as do stars[26] when they appear in the firmament. The human appeal to God also enters[27] and one accesses heaven[28] through them.

V. "Gatekeeper." The professional designation *trʿ* /tarrāʿ/ "gatekeeper" appears without a proximate context in a few Imperial Aramaic commercial ostraca from Idumea.[29] In Ezr. 7:24, it stands in the middle of a list of temple personnel exempt from taxes sorted in descending status and at Hatra in the construct state with subsequent personal names.[30]

IRANIAN OFFICIAL TITLES IN BIBLICAL ARAMAIC

According to the original plan for this dictionary, all non-Aramaic administrative terms would be assigned to an appendix. But because they were integrated morphologically, quite normally, into the Aramaic lexicon —like, e.g., /rāz/ (→ *rz*)—the new editor included them alphabetically, as a rule, and restricted the corresponding appendix to Iranian official titles that comprise a closed, small group in terms of lexical field, function, and distribution. In Aramaic, most of them begin with *aleph* and, following the alphabetic principle, should have been treated in the first fascicle. Their forms, partially corrupted in the transmission of the biblical text, have assimilated to the likely reconstruction of the form in the headings and bodies of the respective articles. This decision should limit the interruption of the alphabetic sequence to the unavoidable cases, but not separate substantively related terms. For the English translation, it was determined to be best to leave these terms in this appendix along with this more general material about the terms.

Only terms that occur in Ezra and Daniel are included; several additional titles for workers in the Persian administration on quite different levels now appear in the texts from the Bactrian archive in J. Naveh and S. Shaked, *Aramaic Documents from Ancient Bactria (Fourth Century B.C.E.)* (London, 2012), with discussions of etymology and meaning: *ʾpdyt* "chief," *ywbr* "grain vendor,"[1] *srwšy* "taskmaster,"[2] *srkr* "leader, administrator," and *ptpkn* "distribution officer" (for the allocation of rations). Among the specific terms for the various kinds of servants,[3] the Bactrian texts attest, in addition to the perhaps generic *hnškrt*, the probably specialized functions *ʾsngšn*, *ḥštrkn*, and *rytkn*, and finally for contractually obligated shepherds *wzn* "goose keeper" and *dmydtknn*, perhaps "animal keeper." They should now be added to dictionaries such as *DNSI*.

The exact function of a certain official in the Achaemenid administrative hierarchy, however, is unknown in most cases. Therefore, the

use of these titles in Biblical Aramaic—in the court narratives of Daniel, which primarily employs them for a certain official coloration, more than in Ezra—are only rarely precise. Remarkably, different official designations occur in Daniel and Ezra.

W. Hinz, *Altiranisches Sprachgut der Nebenüberlieferungen*. *GÖF* III/3 (1975); K. Koch, *Daniel 1–4*. *BK* XXII/1 (2005); J. Tavernier, *Iranica in the Achaemenid Period (ca. 550-330 B.C.)*. *OLA* 158 (2007).

1. Cf. *ywdn* in *TADAE* A4.5:5.

2. → *srwšy*.

3. → *ʿbd*; *ʿlym*.

אדרגזר *ʾdrgzr* for */ʾaddarzagar/

So far, the title, to be reconstructed based on Iranian **handarzakara*[1] as /ʾaddarzagar/, occurs only in Dnl. 3:2f. where it appears with metathesis and in the plural as *ʾ^{a}dargāz^{e}rayyā* in a list of dignitaries whom King Nebuchadnezzar gathered to dedicate his statue. The noun **handarza* "instruction, commission" may underlie the word; it is also known in Imperial Aramaic.[2] Suggested translations vary between "counselor," "generals," or "tax collector."[3] If one assumes a list planfully constructed and essentially ordered by descending rank, this term, following the satraps,[4] prefects of provincial administration,[5] and governors,[6] introduces a second group of high officials in internal civil service.[7] Their area of responsibility cannot be determined, however.

4. See below at *ʾḥšdrpn*.
5. → *sgn*.
6. → *pḥh*.
7. Cf. Koch, 277.

אחשדרפן ʾḥšdrpn /ʾaḥšadrapān/

The best-known of the Iranian official titles is *ʾḥšdrpn* /ʾaḥšadrapān/. It designates the satraps (**xšaθrapāna*),[1] i.e., the supreme administrators of a major Achaemenid province.[2] It appears in Imperial Aramaic in the spelling *ḥštrpn* in the Xanthos triglot.[3] Yet, the official correspondence of the Egyptian satrap Aršama and that of the Bactrian governor Achvamazda (who presumably also held the rank of satrap) do not employ the official designations *ʾḥšdrpn* or *ḥštrpn*, but the honorific *mrʾy* "my lord."[4]

Biblical Aramaic employs the word in Dnl. 3:2f.,27 and 6:2f.,4f.,7f. Daniel 3:2f.,7 uses it at the beginning of a long and a shorter list of royal dignitaries;[5] in Dnl. 6:2f.,4f.,7f., it denotes the 120 satraps of the empire, to whom Daniel and two other high officials (*srkyn*)[6] were subordinate. The satraps confronted Daniel together with his two colleagues as their collective opposition in the story of the lions' den since they envied the foreigner, who even had another religion, his rapid ascent (which still occurs repeatedly in such closed milieus, just as sometimes in academics) and defamed him.

4. → *mrʾ*.

5. Regarding the possible layered structure, see above at *ʾdrgzr*.

6. → *srk*.

אפרסך *ʾprsk* /ʾeprasak/

In Aramaic, the term *ʾprsk*, following Iranian **frasaka*[1] and the vocalization of the plural *ʾ^a^pars^e^k̲āyē* in Aramaic, should probably be reconstructed as /ʾeprasak/; only Ezr. 5:6 and 6:6 also attest it; however, in Akkadian it occurs as *iprasakku*.[2] Most understand it as "investigative official" or "justice official."[3] In the contexts of the two Biblical Aramaic passages, it refers to the officials from the province who reported to Darius concerning the construction work on the Jerusalem temple. Their letter has the character of an official report. The word is not identical with the designation *ʾprstk* (see below), but the Tiberian vocalization assimilates it, hence the long *ā*; it seems like a gentilic adjective which led erroneously to a translation as the name of a people (Αφαρσαχαιοι, *Apharsacei*) in the LXX and the Vulgate.

---

1. Hinz, 97; Tavernier, 420f.
2. *AHw*, I, 385.
3. Cf. the suggested translations in *GesB*[18], 1469.

אפרסתך *ʾprstk* /ʾeprastāk/

Only Ezr. 4:9 attests *ʾprstk*, following the Iranian **frastāka*,[1] probably originally /ʾeprastāk/. The word refers to administrative officials in Samaria and comes after "judge"[2] and before the unknown words *ṯrplyʾ* and *ʾprsyʾ*, which probably mean "people from Tarpel"[3] and "people from Sippar."[4] At the end of the verse stand three clear ethnicities: "people from Erech, Babel, and Susa." The asyndetic addition of *ṯrplyʾ* after the syndectic connection between *dynyʾ* and *ʾprstkyʾ* clarifies the shift from official to population designations, not further motivated in terms of content, but the combination of these different and largely unknown terms already led in the LXX and the Vulgate to an interpretation of the plural *ʾprstkyʾ* as the name of a people (Αφαρσαθαχαιοι, *Apharsathei*) and apparently influenced the vocalization of the similar-sounding *ʾprsk* (see above).

Because of the etymology, W. Eilers[5] thinks that the function may have involved emissaries, but the context of Ezr. 4:9 suggests only that it involves staff members of the governor of Samaria.[6] Further conclusions about the precise meaning of this evidence are not currently possible.

6. Cf. Hinz, 97.

הדבר *hdbr* /hadabār/

The title *hdbr* /hadabār/, attested frequently in Daniel, traces to Iranian **hadabāra*, literally "cobearer."[1] In each case, it designates dignitaries at the royal court as a body and with no more precise indication of their function: summarily in Dnl. 3:24; in 3:27 in distinction to satraps, prefects, and governers, and is thus, perhaps, an umbrella term for the high officials in inner service of 3:2f.,[2] similarly in 6:8; in 4:33, it appears along with *rbrbyn* "nobles"[3] for Nebuchadnezzar's inner circle whom he seeks out in his rehabilitation at the end of his banishment. Since, on the one hand, the *hdbryn* differ from the provincial administrators and, on the other, appear with the possessive suffix except in 6:8 (3:24; 4:33) or in the construct state with *mlk* "of the king" (3:27), they apparently denote functionaries from the king's inner circle. A more precise definition is impossible, however, and the ancient translations already rendered these terms quite differently.[4]

---

1. Hinz, 109.

2. See above at *ʾdrgzr*.

3. → *rb*.

4. Cf., e.g., the Vulgate: *optimates* in 3:24 and 4:33, but *potentes* in 3:27, and *senatores* in 6:8; the Greek versions are similarly diverse.

כרוז *krwz* /krōz/

The etymology of *krwz* /krōz/ “herald” was long disputed, but it is now generally traced to Iranian **xrausa* “crier.”[1] In Dnl. 3:4, it denotes the royal herald who proclaims throughout the empire the order to fall before the statue of Nebuchadnezzar. The denominal verb *krz*, in the C-stem “to cry out,” serves in Dnl. 5:29 for proclaiming Daniel third in the kingdom after the decipherment of the flaming script. The noun and the verb remained part of the lexicon in post-Imperial Aramaic times;[2] in the legal diction of Nabatean contracts from the Dead Sea, the noun serves for “dispossession,”[3] and the verb in the G-stem, analogously, for “to dispossess.”[4]

4. nV 42:16f.

תיפת *typt* /tīpat/

According to a supposed connection with the Iranian **tīpati*,[1] *typt* /tīpat/ may designate an officer in the bodyguard or a police commander.[2] Two instances, *TADAE* A4.5:9 and Dnl. 3:2f., employ the word along with judges,[3] i.e., probably for the executive.

Gzella

---

1. So Tavernier, 431, with discussion of other suggestions.
2. So the traditional translation: *ATTM*, 723; *GesB*[18], 1545.
3. → *dīn*.

NUMBERS

Cardinal numbers are sometimes written out; in documentary texts such as contracts or lists, however, they are often indicated through a system based on vertical lines for the ones and horizontal lines for the tens.[1] Beginning in the first century B.C.E., letters of the alphabet also appear in this function.

The cardinal number words for "one" and "two" originated as adjectives, the higher number words are substantives. Of these, the other ones from "three" to "ten" behave in terms of gender agreement (indicated in each case in the article heading) in reverse to the gender of the thing enumerated. The tens are formed with the plural of the corresponding one with a masculine ending, "two" and "two hundred" are dual forms.[2] Independent lexemes represent "hundred" (/meʾā/), "thousand" (/ʾalp/) and, as the largest independent word, "ten thousand" (/rebbō/).[3]

Qatīl forms of the cardinals with the gentilic /-āy/ denote the first ten ordinals; as in many other languages, the two ordinals "first" (/qadmāy/)[4] and "second" (/tenyān/)[5] in Aramaic diverge from this pattern.

The fractions "third" to "ninth" are substantives on the *qutl* or *qatīl* paradigm.[6] For higher fractions, one employs distributive terms.[7]

The individual languages form the cardinals between "eleven" and "nineteen" through various combinations of the one with the ten, either with a syndetically appended one (e.g., *ʿśrh wtryn* "twelve") or with a preceding one in the construct state (thus *try ʿśr*, Dnl. 4:26; Ezr. 6:17). The older Aramaic languages already attest a variation here.[8] In composite cardinals over "twenty," the elements often descend, linked syndetically with /wa-/.

Old and Imperial Aramaic attest only some of the number words[9] and reach to "thousand." In contrast, the dimensions of the vision of the new

Jerusalem and of the astronomical calculations of the book of Enoch from Qumran, which write them out because of the literary character of the text, attest them in abundance. Generally, dates have cardinal numbers.

---

1. Old and Imperial Aramaic instances of signs appears in D. Schwiderski, *Die alt- und reichsaramäischen Inschriften*, vol. I: *Konkordanz.*. *FSBP* 2 (2008), 844-905; see also F. Rosenthal, *Die aramaistische Forschung seit Theodor Nöldeke's Veröffentlichungen* (Leiden, 1939), table 5.

2. Given the spelling *ʿśrn* "twenty" is a plural, however, since the expected spelling of the dual would be spelled **ʿśryn*.

3. → *rb*.

4. → *qdm*.

5. Alternatively /ˀoḥrān/ "another," → *ˀḥr*.

6. With the independent lexeme /palg/ for "half," → *plg*.

7. Thus, e.g., "half a seventh" for "fourteenth"; *ATTM*, 460f. gathers the relevant examples from the calculations in the astronomical book of Enoch.

8. Cf. T. Muraoka and B. Porten, *A Grammar of Egyptian Aramaic*. *HO* 32 (^{2}2003), 87-90.

9. They appear in concentration in *TADAE* A6.2.

1 חד(ה) *ḥd(h)* /ḥad(ā)/

The form /ḥad/, as a feminine /ḥad(ā)/ with apharesis of the first syllable from an original Semitic */ʾaḥad/ "one," is typically Aramaic. In addition to the numerical use, the cardinal number also denotes "single,"[1] negated "not one,"[2] and as a pronoun "the same"[3] or as an indefinite article,[4] in fixed expressions such as *kwl ḥd wḥd* "each individual"[5] or *ḥd ḥd* "one another," regularly in multiplicative expressions for "times,"[6] and accordingly as a distributive "each."[7] Additionally, the adverb *kḥdh* or *kḥdʾ* /kaḥadā/ "together"[8] is rather frequent, sometimes supplemented by *ʿm* "with."[9] A subsequent *lḥdh* /laḥadā/ means "very,"[10] as otherwise /śaggī/[11] often functions. The etymologically unrelated word /qadmāy/[12] constitutes the pertinent ordinal, "first."

N. Lohfink and J. Bergman, "אֶחָד *ʾechādh*," *TDOT*, I, 193-201; G. Sauer, "אֶחָד *ʾeḥād* one," *TLOT*, 78-80; M. Sprungmann and B. Schlenke, "*ʾhd*," *ThWQ*, I, 136-41.

1. Cf. *TADAE* A4.7:29: "in a single letter."
2. *TADAE* A4.7:19.
3. Cf. 1QapGen 20:8; *pm ḥd* "from the same mouth."
4. E.g., *ṣlm ḥd* "a statue" in Dnl. 2:31; *ʿrb ḥdh* "a ship" in 4Q206 4 1:14 (1 En. 89:1), followed by the det. *ʿrbʾ* "the ship"; likewise 1QapGen 19:14; 4Q197 4 1:6 (Tob. 6:2). The situation is more complicated in Syriac, though; cf. M. Waltisberg, "Einzelheiten der syrischen Grammatik," *Mediterranean Language Review* 24 (2017) 35-84, esp. 37-52.
5. 4Q204 1 6:1 (1 En. 13:6).
6. E.g., *TADAE* A4.7:3; Dnl. 3:19.
7. As in 4Q554 2 2:21 par. 5Q15 1 1:5: "four ells per street."

8. E.g., Dnl. 2:35; 1QapGen 19:15; 21:25.

9. 1QapGen 21:21; 22:1.

10. As, e.g., in 1QapGen 20:33; 22:32.

11. → *śgī*.

12. → *qdm*; cf. 1QapGen 12:14f. for a variation between cardinal in the date and a subsequent ordinal involving the construction.

2 תרין *tryn* /terayn/, תרתין *trtyn* /tertayn/

The Aramaic word for “two” /terayn/[1] also diverges from the ground form through the shift /n/ > /r/, singular in Northwest Semitic. It preserves the old dual, however. It transformed into /tar-/ sometime after 200 B.C.E.[2] Suffixed, it denotes “(we, etc.) two.”[3] Furthermore, it is part of the number *try ʿśr* “twelve,” that designates the months of a year, for example, (Dnl. 4:26) or the tribes of Israel (Ezr. 6:17), and in agreement with this, the twelve gates of the new Jerusalem.[4] “Second” is either /tenyān/[5] or /ʾoḥrān/ “other”;[6] “half” is the unrelated noun /palg/.[7]

H.-J. Fabry, “*šnym*,” *ThWQ*, III, 1030-34.

1. < */θ(e)nayn/; cf. R. D. Hoberman, “Initial Consonant Clusters in Hebrew and Aramaic,” *JNES* 48 (1989) 25-29, for the possibility of an initial doubled consonant.

2. Cf. *ATTM*, 107.

3. E.g., 1QapGen 19:16.

4. → *trʿ*.

5. Based on the older form with /n/.

6. → *ʾḥr*.

7. → *plg*.

3 תלת(ה) *tlt*(*h*) /talāt(ā)/

Aramaic /talāt/ “three” arose from the common Semitic */θalāθ-/ and is therefore spelled in Old Aramaic, which still retained */θ/, with *š*, after they fused with /t/ toward the end of the Old Aramaic period,[1] then, in accordance with the pronunciation, with *t*. Sometimes, “three” refers not to a precise number, but to “a few,”[2] as in the *tlt ʿlʿyn* “three ridges” in the mouth of the second animal in Daniel’s vision Dnl. 7:5,[3] perhaps also of the pharaohs who sought for Abraham,[4] similarly, the three burdened Amorites[5] and the three days spent seeking Aḥiqar.[6] “Two or three” probably has the same significance.[7] Three is the precise number of the young men in the fiery furnace (Dnl. 3:23f.), likewise the world history;[8] the highest officials in the kingdom, superior even to the satraps as their supervisors, are a triad according to Dnl. 6:3.[9]

Substantivally, the determined state of the feminine form[10] /talāttā/ means “the three,” thus “the number 3,” in a list[11] or in reference to the position as “number three” in the empire offered to Daniel (Dnl. 5:16,29), for which, however, the synonymous ordinal /talītāy/ can stand, even in the same text (Dnl. 5:7). Just as Dnl. 4:26 mentions “twelve months” instead of “one year,” Dnl. 6:8,13 mentions “thirty days” (the period in which no one may direct a request to a god or person except the king).

H.-J. Fabry, “*šlwš*,” *ThWQ*, III, 939-42.

1. *ATTM*, 99f.
2. As in the English “two or three.”

3. → *ʿlʿ*.
4. 1QapGen 19:24.
5. 1QapGen 21:21; cf. 22:23.
6. *TADAE* C1.1:39.
7. 4Q201 1 2:6 par. 4Q204 1 1:25 (1 En. 3:1), of years.
8. → *qrn*.
9. → *srk*.
10. I.e., with a masc. reference.
11. *TADAE* C1.1:187.

4 (ה)ארבע *ʾrbʿ(h)* /ʾarbaʿ(ā)/

In Aramaic, the cardinal number /ʾarbaʿ/ “four,” as in other Semitic languages, suitably retains its quadriradical ground form, while derived formations like the ordinal /rabīʿāy/ “fourth,” the fraction /robʿ/ “fourth”[1] and various other forms such as the noun /marabbaʿ/ “quadrant”[2] with the loss of the first radical, then assimilated to the triconsonantal scheme dominant in the formation of words.

“Four” symbolizes completion, as the four directions[3] visibly express. Their designations vary: /garbæ/,[4] /ʿellāy/[5] or /śamʾāl/[6] for “north”; /taḥtāy/[7] for “south”; /maʿrab/ “west”;[8] and /madnaḥ/[9] or /mawʿæ/[10] “east”; beginning with Qumran, also the Hebrew loanwords /ṣeppōn/ “north,”[11] /darōm/ “south,”[12] and /qadīm/ “east.”[13]

In addition to space, vision reports also divide world history into four (ever more barbarous) empires until the dawn of the final judgment and the beginning of the kingdom of God: in Nebuchadnezzar’s dream of the statue of four metals (Dnl. 2:31-35),[14] in Daniel’s vision of the four monsters from the sea (Dnl. 7:1-28),[15] and in a fragmentarily preserved allegory of four trees from Qumran[16] that seems to combine motifs from Dnl. 2 and 7. For the other instances from Qumran, see Fabry, “*ʾrbʿ*,” 281-83.

H.-J. Fabry, “*ʾrbʿ*,” *ThWQ*, I, 277-83; idem, “*rbyʿy*,” *ThWQ*, III, 604-6.

1. In Imperial Aramaic, very often as currency “quarter shekel,” abbreviatred *r*, later “quarter sela”; cf. *ATTM*, 2, 354 regarding the change of the unit of weight.

2. 4Q554 2 2:13; 5Q15 1 2:5.

3. → *rwḥ*; *šmyn*.

4. 4Q210 1 2:6 (1 En. 76:6).

5. Lit. “above,” → *ʿly* III.1.

6. Lit. “left”; 1QapGen 21:8; 22:10; 4Q210 1 2:1 (1 En. 76:3); 4Q554 2 3:20 par. 5Q15 1 2:2.

7. Lit. “below,” → *ʿly* III.1.

8. Toward the sunset; e.g., *TADAE* A4.1:7; 1QapGen 17:8,10; 21:9.

9. Toward the sunset; e.g., *TADAE* B3.7:7; 1QapGen 21:9,12,16f.,20.

10. Frequent, especially in descriptions of real estate from Elephantine, e.g., *TADAE* B2.3:4f.

11. 1QapGen 16:10, etc.

12. E.g., 1QapGen 17:12.

13. 4Q210 1 2:4 (1 En. 76:5).

14. → *dhb* II.

15. → *gp*.

16. 4Q552-553.

5 חמשׁ(ה) *ḥmš(h)* /ḥameš(ā)/

The Aramaic word /ḥameš/ “five” arose from an older */ḫameš/.[1] Five is the number of the sons and daughters of Noah;[2] five years pass from the planting of a vineyard to his first “wine festival” (12:15); for the same period, Sarah hid in Egypt until pharaoh’s emissary sought Abraham’s hospitality.[3] Several dimensions in the vision of the new Jerusalem are multiples of five.[4] “Five” does not occur in Biblical Aramaic.

H.-J. Fabry, *“ḥmš,” ThWQ*, I, 1009-15.

1. In Syriac the masc. form *ḥammeš* became fem. *ḥamšā*, assimilating the syllable structure for the neighboring /ʾarbaʿ/, /ʾarbʿā/ “four”; cf. W. Diem, “Syrische Kleinigkeiten,” in *Studia Semitica necnon Iranica. FS R. Macuch* (Wiesbaden, 1989), 67-72.

2. 1QapGen 12,11.

3. 1QapGen 19:23.

4. 4Q554 1 1:12,15; 5Q15 1 2:6; cf. Fabry, 1015.

6 שׁת(ה) *št*(*h*) /šett(ā)/

The common Semitic */šedθ/ “six” became /šett/ (> /šet/) in Aramaic. No special usages are known, although the plural /šettīn/ occurs for the height in the dimensions of the statue of Nebuchadnezzar in Dnl. 3:1 (width six ells) and of the Jerusalem temple in Ezr. 6:3 (twenty ells wide). In Syriac, the feminine (*štā*) determined state assimilated to biradical nouns.[1]

---

1. A. Spitaler, “Das Femininum des Zahlworts für *zwei* im Hebräischen und für *sechs* im Syrischen,” in *Semitic Studies. FS W. Leslau* (Wiesbaden, 1991), 2, 1497f.

7 שבע(ה) *šbʿ(h)* /šabʿ(ā)/

Originally, the Semitic word /šabʿ/ “seven”[1] is a *qatl* form that transformed in a few Aramaic languages into *qitl* (as in the Biblical Aramaic vocalization) or *qutl* forms.[2] While “four” symbolizes completion, “seven” represents a long time or a large amount. Both nuances already appear in stereotypical Old Aramaic curse formulas: whoever falls under the ban, famine will dominate his land for seven years[3] and not even a maximal commitment of seven cows, ewes, or wet nurses will satisfy a nursling.[4]

Nebuchadnezzar’s seven-year period of penance stands in the same tradition (Dnl. 4:13,20,22,29)[5] as does his command, issued in anger, to heat the fiery oven seven times (*ḥaḏ šiḇʿā*) hotter than usual (Dnl. 3:19); the excess (*yattīrā* “very strong”) is also evident in the fact that a darting flame killed the executioner’s assistants (3:22). Similarly at Qumran, Abraham lived seven years in Egypt;[6] the demon in love with Tobias’s bride Sarah murdered seven of her fiancés;[7] in the apocalypse of ten weeks, the “witnesses of the truth” are to receive seven-fold wisdom and knowledge.[8] Other heptads may also have symbolic significance: Ezr. 7:14 mentions “seven counsels” in the king’s letter to Ezra; 4Q550 1:5 mentions a scroll of Darius sealed with seven seals. An observation of nature notes the seven delta distributaries of the Nile.[9] The seven days of the week[10] in the Jewish division of time begin with Sunday as the first day; the astronomical book of Enoch calculates the lunar phases by sevenths and fourteenths.[11]

“Seventy” intensifies the concept even more: the Tell Dan inscription, with its propagandistic rhetoric, mentions seven kings as a very high number of enemies;[12] the fallen angels will be fettered for seventy generations[13] until judgment,[14] thus a long time, difficult to conceive.

H.-J. Fabry and C. Stettler, “*šbʿ*,” *ThWQ*, III, 823-32; E. Otto, “*שֶׁבַע šeḇaʿ*,” *TDOT*, XIV, 336-67.

1. > /šabaʿ/.
2. *ATTM*, 700.
3. *KAI* 320.12; 222 A 27; 223 A 5.
4. *KAI* 320.5f.,7; 222 A 22f., cf. 24; 223 A 1. *KAI* 309 has “100” in this formula.
5. Here *ʿiddānīn* “times,” → *ʿdn* III; cf. 4Q242 1-3:3,7.
6. 1QapGen 22:28.
7. 4Q196 6:12 (Tob. 3:15).
8. 4Q212 1 4:3 (1 En. 93:10).
9. 1QapGen 19:12.
10. → *šnh* IV.
11. 4Q209 1 1:3; 7 2:11.
12. *KAI* 310.5f.
13. → *dūr* III.1, because of the *d*[before the lacuna, a rather certain emendation.
14. 4Q202 1 4:10 (1 En. 10:12).

8 תמנה *tmnh /tamānǣ/*, תמניה *tmnyh /tamāniyā/*

In Aramaic, the foundational */θamānī/ “eight” appears as /tamānǣ/ as a result of the fusion of /θ/ and /t/ at the end of the Old Aramaic period. According to the ten weeks apocalypse in the book of Enoch, the eighth week (/tamīnāy/)[1] is the one in which the evildoers will be delivered to the true ones for judgment.[2] Otherwise, ancient times yield no remarkable usages.

---

1. From */tamīniyāy/: *ATTM*, 725.
2. 4Q212 1 4:15 (1 En. 91:12).

9 (ה)תשע *tšʿ(h)* /tešʿ(ā)/

"Nine" occurs so rarely that it first appears only at Qumran. Besides the possible indications of dimensions and time, it denotes the "nine mountains" of which the archangel Michael reports in prehistorical conversation.[1]

1. 4Q529 1:3, extremely fragmentary.

10 (ה)עשׂר ʿśr(*h*) /ʿaśr/, /ʿaśarā/

Common Semitic /ʿaśr/,[1] before or after the ones, forms the numbers "11" to "19," in the plural "20." Otherwise, it appears sporadically: in reference to the ten horns of Dnl. 7:7,20,24,[2] the ten jubilees from Noah's birth to the flood,[3] and Abraham's ten-year wandering.[4] The verb *ʿśr* (pael) "to tithe"[5] derives from it.

H.-J. Fabry, "*ʿśr*," *ThWQ*, III, 233-40; R. North, "עֶשֶׂר *ʿeśer*," *TDOT*, XI, 404-9.

1. In Aramaic later > /ʿaśar/.

2. → *qrn*.

3. 1QapGen 6:10; 500 years after Gen. 5:32.

4. 1QapGen 22:27.

5. 4Q213b 1:4f.; cf. "to give a tenth" in 1QapGen 22:17.

100 מאה *mʾh* /meʾā/

The feminine *mʾh* /meʾā/ “hundred” is common Semitic and, except as the basis of the hundreds,[1] rare. In the curse formula *KAI* 309.20-22 it constitutes a variant for “seven” (see above); in Ezr. 6:17 it refers to the sacrifices to dedicate the temple (e.g., 100 steers, 200 rams).

B. Ziemer, “*mʾh*,” *ThWQ*, II, 545-53.

1. Counted with the ones: *tlt mʾh* “300,” etc., in the dual for “200.”

1000 אלף ʾlp /ʾalp/

Masculine *ʾlp* /ʾalp/,[1] rare in Aramaic, denotes a large quantity: the seed disseminated for naught in *KAI* 309.19; members of Belshazzar's court in Dnl. 5:1; and the thousand times a thousand righteous ones in 7:10,[2] taken up in 4Q530 2 2+6-12:17.

Gzella

J. Duhaime, "*ʾlp*," *ThWQ*, I, 197-200.

1. > /ʾaləp/.

2. → *rb*.

HISTORICAL OUTLINE OF ARAMAIC GRAMMAR

The depiction of the linguistic data in the dictionary strives for a higher historical precision than in the typical grammars and lexica, which are mostly purely descriptive. Consequently, a brief outline should clarify the preliminary decisions made here (especially in phonetics and the reconstruction of the pronunciation of Imperial Aramaic based on them). At the same time, it introduces the foundations of Aramaic accidence and morphological syntax by disclosing very succinctly the linguistic terminology employed (as in reference to verbal forms and stems that play an important role for the differences of meaning throughout the individual articles) and the associated determinations of function. It is intended as a mere supplement to the textbooks in use: the definitive reference grammar for Biblical Aramaic continues to be *BLA*; as an introduction, the basically synchronic (and diachronically not always entirely accurate) presentation by F. Rosenthal, *A Grammar of Biblical Aramaic*. *PLO* 5 ([7]2006), continues to be useful. To date, there is no modern scientific reference grammar of Old or Imperial Aramaic. For a start, see H. Gzella, "Language and Script," in H. Niehr, ed., *The Aramaeans in Ancient Syria*. *HO* 106 (2014), 71-107, for Old Aramaic, and idem, "Imperial Aramaic," in S. Weninger, ed., *The Semitic Languages* (New York, 2011), 574-86, for Imperial Aramaic.

1. Script and Spelling

With the shift in the scribal culture of Syria-Palestine from the cuneiform to the alphabetic script shortly after 1000 B.C.E., this new system spread from the Phoenicians also among the Arameans. Twenty-two letters served to notate the significantly different consonants; *plene* spellings with "vowel letters" (*matres lectionis*) also increasingly indicate long vowels, at first primarily at the end, later increasingly also internal to the word.[3] In post-Achaemenid times, e.g., at Qumran, such vowel letters also indicated short vowels in certain cases. The orthography of official texts, royal inscriptions, legal and commercial documents, as well as formal letters was

firmly normed already from the beginning and became even more firmly unified in the Achaemenid chancellery. Texts at larger distances from such chancellery traditions (such as private letters) sometimes exhibit a less conventional and more phonetic spelling, but, in pre-Christian times, as a whole oriented around the administrative and literary diction prevalent at the time; see A. Millard, "The Alphabet," in H. Gzella, ed., *Languages from the World of the Bible* (New York, 2011), 14-27.

2. Phonology

The transmitted form of Biblical Aramaic texts stands under the influence of later linguistic developments, either through revisions leading to the final redaction (in the case of the book of Daniel ca. 165 B.C.E.) or through the altered pronunciation that rests on the pointing of the established synagogal recitation. If one wishes to position Biblical Aramaic in its historical context—that is, the Imperial Aramaic scribal tradition—it is advisable to establish the pronunciation of Achaemenid Imperial Aramaic of ca. 500 B.C.E. as the common starting point, i.e., around the time when Imperial Aramaic arose as the binding standard. With no fixed vocalization, its pronunciation can only be approximated, but can be delimited through a combination of *plene* spellings, transcriptions in other alphabets, later vocalization traditions,[4] and comparative historical Semitics. Such a reconstruction creates a common framework for biblical and extrabiblical texts and is always indicated in the lemma headings. In this regard, the forward slashes (/. . ./) signify a "phonemic" abstraction, i.e., they indicate only the pure sounds that distinguish meaning (phonemes) without consideration for further variations in the actual pronunciation (allophones).

The oldest witnesses to the Aramaic language display twenty-seven consonants. One can group them by articulation point and manner as follows: the vocalic laryngeal /ʾ/[5] and its voiceless counterpart /h/, similarly the pharyngeal /ʿ/[6] and /ḥ/,[7] the velars /g/ and /k/, the sibilants /z/ and /s/,[8] the dentals /d/ and /t/, the interdentals /δ/[9] and /θ/,[10] the bilabials /b/ and /p/, the palatovelar /š/,[11] the lateral /ś/,[12] and a sound based on Semitic */ṣ́/, which was probably originally pronounced like /q/; furthermore, the

“emphatic” counterparts of the voiceless velar, sibilant, dental, and interdental, thus /q/, /ṣ/, /ṭ/ and /θ̣/, whose pronunciation changed in the course of time from the /ˀ/-off glide (glottalization) to the /ˁ/-off glide (pharyngealization) or, as far as /q/ is concerned, velarization;[13] finally the lateral /l/, the “tongue”-/r/,[14] the dento-nasal /n/ and the bilabio-nasal /m/, and the semi-vowels /w/[15] and /y/. These distinctions are certain and can be demonstrated directly from Aramaic spellings; sometimes an additional distinction is made between /ḥ/ and /ḫ/[16] and between /ˁ/ and /ġ/,[17] although both are consistently spelled with *ḥ* and ˁ, respectively. The transcriptions of Aramaic do not take account of /ḫ/ and /ġ/, but the etymological derivations do. All of the consonants, even the laryngeals and pharyngeals (gutturals), could be lengthened, i.e., they were articulated longer between beginning and silence (traditionally, but imprecisely, called gemination). As phonemic vowels, short /a/, /e/ (from a Semitic */i/), and /o/ (from a Semitic */u/), long /ā/, /ī/, /ū/, and /ǣ/ (pronounced like a long *ä*, arisen secondarily from a final /-ī/),[18] and the semi-vowels /aw/ and /ay/ are directly, or at least indirectly, demonstrable.

Since the Phoenician alphabet adopted by the Arameans has only twenty-two different letters (here transliterated in italics), a few of them served in Old Aramaic to indicate multiple consonants: *š̌* for /š/, /ś/, and mostly /θ/,[19] *z̤* for /z/ and /δ/, *ṣ* for /ṣ/ and /θ̣/, and *q* for /q/ and the Aramaic counterpart of */ṣ́/.[20]

Between Old Aramaic and Achaemenid Imperial Aramaic, certain variations in spelling and sometimes transcription of different pronunciation changes are identifiable: undisputed is the fusion of the interdentals /θ/, /δ/, and /θ̣/ with the corresponding dentals /t/, /d/, and /ṭ/ prior to circa 700 B.C.E., since they are then spelled mostly with *t*, *d*, and *ṭ*,[21] and ca. 650 B.C.E. that of */ṣ́/ with /ˁ/, represented in spelling with ˁ instead of the older *q*.[22] Especially for the old */δ/ in the very frequent demonstrative pronoun and

the relative particle, however, the historical spelling with *z* persisted on into post-Achaemenid times, thus *znh* for /denā/[23] and *zy* for /dī/ "that."[24] In Biblical Aramaic the phonetic spelling has been put into effect, consequently only *dnh* and *dy* appear there.

The first case of the loss of the syllable closing /ʾ/ with the lengthening of a preceding short vowel[25] may well have been even earlier. It led to the fusion of verbs III-ʾ [26] with verbs III-*ī*.[27] Because some historical spellings of corresponding forms with ʾ persisted for a long time, however, and phonetic spellings with *h* appear more frequently only beginning ca. 600 B.C.E.,[28] the precise window in time for the change remains uncertain. The lemma heading will indicate the original form of the root for these verbs.

Furthermore, Old Aramaic times probably also already saw the beginning of the shift from /h/ to /ʾ/ for the prefix of the C-stem, first in the imperfect with the loss of /-h-/ between vowels, then analogously, also at the beginning of the perfect and the imperative (/ha-/ > /ʾa-/), whereby the haphel became an aphel.[29] Historical spellings preserve forms with the etymological *h*, however. It cannot be ruled out that a monophthongization of /aw/ and /ay/ to /ō/ and /ē/, respectively, took place already at this time in parts of the language.[30]

Transcriptions of personal names in cuneiform suggest the beginning of two further developments around 500 B.C.E., the dissimilation of /a/ to /e/ in the prefix of the G-stem imperfect, first before the thematic vowel /a/[31] and the anaptyxis (syllable expansion) of a double consonant (i.e., two different consonants, not a long, or "geminate," consonant) at the end of a word with a helping vowel (*ə*) that then became a full vowel.[32] In post-Achaemenid times, because of the increasing use of vowel letters for short vowels, both developments become evident and also appear in the pointing of Biblical Aramaic. The lemma headings transcribe nouns[33] without the inserted

vowel, although the section concerning etymology and form will refer to the phenomenon in relevant cases.

In contrast, the degeminating spelling characteristic of Imperial Aramaic[34] is probably not a phonetic, but an orthographic development: as in the other Semitic languages of Syria-Palestine, Aramaic also typically assimilates /n/ in the contact position.[35] In Achaemenid spelling, then, such long consonants appear with a prefixed *n*[36] that persisted for a period in post-Achaemenid times under the influence of the Imperial Aramaic chancellery tradition and also occurs in Biblical Aramaic.[37] The variation in spellings without *n* and the rapid extinction of this peculiarity with the erosion of Achaemenid orthography point, however, to a purely graphic peculiarity and not to a nasalized pronunciation. Therefore, the transliteration in the lemma headings employ a spelling with *n* and the reconstructed vocalization will assume assimilation.[38]

Even after the fall of the Achaemenid Empire, Aramaic remained the vernacular in large parts of Syria-Palestine and Mesopotamia so that it, under the surface of the Aramaic literary languages of the Greco-Roman period that still followed Achaemenid conventions, changed throughout the region where it was dispersed. The first reliably post-Achaemenid developments, which also underlie the pointing of Biblical Aramaic, but partly, however, continue older processes, are the expansion of the prefix vowel /e/ in the G-stem imperfect with all thematic vowels[39] and a regular separating vowel with previously word-ending double consonants.[40]

With a few additional phonetic changes, first evident in the post-Achaemenid period and therefore not considered in the reconstruction, Aramaic approaches its Tiberian form: ca. 200 B.C.E. /e/ before a root-ending /h/, /ḥ/, /ʿ/, or /r/ was generally assimilated with /a/,[41] before sibilants sometimes conversely /a/ > /e/,[42] and the monophthongizations /aw/ > /ō/ and /ay/ > /ē/ were finalized;[43] they may have already begun in some varieties even earlier. Furthermore, in the same period, long final consonants became short[44] and the fusion of */ś/ with /s/, a process that

probably did not follow a straight line of development, was finalized.[45] After 150 B.C.E., /ʾ/, /ʿ/, and /r/, even in internal positions, were no longer elongated, whereupon preceding vowels were mostly lengthened compensatorily.[46] Then, unaccented final vowels dropped out of spoken Aramaic,[47] but were partially retained in the traditional recitation of Biblical Aramaic, etc. and are therefore supplied with vowel signs there.[48] Furthermore, stops, already aspirated somewhat earlier in a weak articulation,[49] developed fricative allophones so that a *daghesh* marks plosive pronunciations of /b, g, d, k, p, t/ in Biblical Aramaic.[50] If /ḥ, ḫ/ and /ʿ, ġ/ were once still differentiated, they now fused together.

Even later, namely ca. 250 C.E., the loss of short, unaccented vowels in open syllables was finalized.[51] Only thereby did the Aramaic of the vocalized traditions acquire its characteristic phonetic form in comparison, e.g, to Hebrew or Arabic.

Finally, Biblical Aramaic pointing reflects a few even later changes: /-ūn/ > /-ōn/ with a suffix,[52] as in all Aramaic, and the diminishment of /e/ > /i/ and /o/ > /u/,[53] so that, e.g., the imperfect preformative here, contrary to the older Aramaic vocalization, is pointed *yi-*; in addition, /a/ > /e/ in closed, unaccented syllables.[54]

The accent falls mostly on the last syllable, although the evidence of individual languages is complicated by stress shifts.[55] Isolated pausal forms in Biblical Aramaic[56] were transferred from Hebrew and not original, nor, presumably, are sporadic cases of compensatory lengthening instead of the reduction of unaccented short vowels in open syllables.[57] Similarly, compensatory lengthening before internal, reduced /ʿ/ was often not executed.[58] The Tiberian pointing of Biblical Aramaic is thus even more heterogenous than that of Biblical Hebrew. Some fragments of the book of Daniel from Qumran are closer, however, to Imperial Aramaic spelling than to MT.

3. Morphology and Morphosyntax

The independent personal pronouns serve, as in other Semitic languages, to designate the subject in nominal clauses or for emphasis (in contrasts, for example: “I, however, . . .”) in verbal clauses:

	Singular	**Plural**
first-person	*ʾnh* /ʾanā/ “I”	*ʾnḥn*(*h*) /ʾanáḥnā/ “we”
second-person masculine	*ʾnt* /ʾáttā/“you”	*ʾntm* /ʾattūm/ “you”
second-person feminine	*ʾnty* /ʾáttī/ “you”	(*/ʾattenn/ “you”)
third-person masculine	*hw* /hū/ “he”	*hm*(*w*) /hóm(ū)/ “they”
third-person feminine	*hy* /hī/ “she”	*hny* /hénnī/ “they”

Imperial Aramaic orthography spells the forms of the second person with *n*.[59] The same is true for Bibical Aramaic, where, however, *ʾnt*(*h*) is pointed *ʾant* and was at least originally pronounced /ʾat/,[60] since /n/ regularly assimilates with following consonants and */ʾant/ is unlikely. Imperial Aramaic differentiates in the third-person singular between *hw* and *hy*, while Old Aramaic has the spelling *hʾ* for both forms. In Biblical Aramaic, probably under Hebrew influence, the two appear graphically as *hwʾ* and *hyʾ*. Daniel has for the second- and third-person of the masculine plural, both of pronouns and the perfect endings (see below), /-n/ instead of /-m/ (*ʾattūn* in 2:8), like later phases of Aramaic, but also already in private letters from Hermopolis. In the vocalization of the same forms, the /e/ of the feminine is transferred to the masculine and diminished to /i/,[61] thus *himmō*(*n*) (Ezr. 5:4 *ʾinnūn*). The unaccented final /-ā/ of the second-person masculine singular fell away in post-Imperial Aramaic,[62] but the /-ū/ of the third-person masculine plural was preserved because of the shift of accent to the ultima and, in Daniel, supplemented with /-n/. The third-person masculine plural appears in Biblical Aramaic as *ʾinnīn* (Dnl. 7:17); Old and Imperial Aramaic do not yet attest the second-person feminine plural reconstructed from later evidence.

The demonstratives are *znh* /dénā/,[63] *zʾ* /dā/, and *ʾl*(*h*)/*ʾln*/ʾellæ(n)/ “this/these” (masculine and feminine singular, common plural) and analogously *zk* /dek/, *zk* /dāk/, and *ʾlk* /ʾellæk/ “that/those”;[64] /d/ here traces back to */δ/ and, in these frequent forms, is also spelled with *z* in Imperial Aramaic, as is also the relative particle *zy* /dī/. Meanwhile, Biblical Aramaic consistently has phonetic spellings with *d* and used, as already in Old Aramaic, the independent personal pronoun of the third person for the distant deixis “that” (Dnl. 2:32,44). The interrogatives are *mn* /man/ “who?” and *mh* /mā/ “what/?” Indefinite expressions often have *gbr* /gabar/ “someone”[65] and, beginning with the letters from Hermopolis, *mndʿm* /meddeʿm/ “something.”[66]

Nominals, including the adjective, inflect according to gender (m/f), number (sg., pl., and remnants of the dual), and state (abs., det., const.), although not every feminine is externally marked, and sometimes the singular and the plural differ in gender (this will be indicated for the lemmata concerned). Individual attempts to identify the remnants of a productive case inflection in Aramiac have failed. Endings mark the three other dimensions:

	Singular	**Plural**	**Dual**
masculine absolute	/-Ø/	-(*y*)*n* /-īn/	/-ayn/
masculine construct	/-Ø/	-*y* /-ay/ (>/-ē/)	= pl.
masculine determined	-ʾ /-ā/ (<*/-āʾ/)	-*y*ʾ /-ayyā/ (<*/-ayyāʾ/)	= pl.
feminine absolute	-*h* /-ā/ (<*/-at/)	-*n* /-ān/	/-tayn/
feminine construct	-*t* /-at/	-*t* /-āt/	/-tay/
feminine determined	-*t*ʾ /-tā/ (<*/-tāʾ/)	-*t*ʾ /-ātā/ (<*/-ātāʾ/)	-

For forms of the determined state, a phonetic spelling with *h* sometimes appears as early as Old Aramaic instead of the historical spelling with ʾ. The dual survives for the numbers “two” and “two hundred” and for natural

pairs such as body parts. A few nominals employed adverbially preserve the old feminine ending */-at/, such as, e.g., *qblt* “as a complaint,”[67] *rḥmt* “voluntarily,” (often),[68] or *ʾntt* “for the woman,”[69] perhaps through analogy with adverbs ending in /-īt/ and /-ūt/. The absolute state is the unmarked nominal that appears both in expressions of number and totality and as predicative adjectives, and is always cited in the lemma headings; the construct denotes a genitive relationship with the following word and can be paraphrased through *dy*; the determined state indicates the greatest degree of definiteness and, beginning in post-Christian East Aramaic, replaces the absolute state as the naming form. Gentilic adjectives with the ending /-āy/ (like names of nations) form the plural of the determined state with /-ǣ/ instead of /-ayyā/, which becomes the typical plural ending in East Aramaic. Nominals of the form *qatl*, *qitl*, and *qutl* probably have a two syllable plural basis /qVtal-/.

In addition to this type, very frequent in all Semitic languages, Aramaic also knows many further nominal forms with and without external augmentation.[70] Some of them are firmly associated with definite meanings, such as *qattīl* for adjectives[71] or *qattāl* for professional designations,[72] those with the prefix /ma-/[73] often for a location.[74]

Nominals of various paradigms exhibit a few peculiarities in inflection: feminines with the original endings */-āt/, */-īt/, and */-ūt/ lose the /-t/ in the absolute state in Aramaic, but retain the long vowel so that, in such cases, the naming form indicated is, e.g., /malkū/ (< */malkūt/) “kingdom.” In the plural, meanwhile, the ending vowel extends to a triphthong before vocalic endings, as with /-ā/ absolute /-awān/, construct /-awāt/, determined /-awātā/; with /-ī/ analogously /-iyān/, /-iyāt/, /-iyātā/; with /-ū/ then /-uwān/, /-uwāt/, /-uwātā/.[75] The nominals with */-ī/ (Aramaic > /-ǣ/) behave similarly, like e.g., the participles of roots III-*ī*: for the masculine in the singular absolute and construct /-ǣ/, determined /-iyā/,

in the plural absolute /-ayn/, construct /-ay/, determined /-ayyā/; for the feminine singular absolute /-iyā/, construct /-iyat/, determined /-ītā/, for the plural absolute /-iyān/, construct /-iyāt/, determined /-iyātā/. Other individual nominals manifest additional peculiarities: /bayt/ "house"[76] behaves, at a no longer precisely definable moment, in the singular absolute like a feminine ending in a long vowel and /-t/, thus /bay/ (det. /baytā/), and in the determined state of the plural has the determined plural /bāttayyā/; /ʾettā/ "woman"[77] takes the suppletive basis /nešīn/ for the plural;[78] /bar/ "son"[79] retains in the plural basis /ban-/ the old /n/; and, once again, others expand a biconsonantal basis with an extension like /ʾab/ "father"[80] to /ʾabah-/ or reduplication like /rabb/[81] to /rabrab-/. For /ʾab/ "father," /ʾaḥ/ "brother",[82] and /ḥam/ "father-in-law,"[83] forms with suffixes beginning with consonants (see below) preserve an old const. in /-ū/. Sporadic instances of the plural ending /-īm/ for the masculine absolute in Biblical Aramaic (Dnl. 4:14; 7:10; Ezr. 4:13) and at Qumran are Hebraisms. Akkadian, Iranian, Greek, and other loanwords are incorporated in differing degrees into the Aramaic inflection of nominals.

Pronominal suffixes can be added to the construct of a noun to indicate a possessive relationship ("my," "your," etc.), to prepositions for an adverbial relationship with a pronominal element ("as for you," "with us"), and to verbs for a pronominal direct object ("they wrote it," "I saw him," etc.). With a nominal basis ending with a consonant, as is generally the case in the masculine singular[84] and in the entire feminine, a linking vowel appears before a suffix beginning with a consonant[85] whose value seems essentially to correspond to that of the original vowel of the pertinent suffix:

	Singular	**Plural**
first-person	*-y* /-ī/	*-n*(ʾ) /-ánā/
second-person masculine	*-k* /-ák(ā)/	*-km*/*kn* /-okūm, -okūn/
second-person feminine	*-ky* /-ék(ī)/	*-kn* /-ekenn/
third-person masculine		

	-h /-eh/	*-h*(*w*)*m*/*hwn* /-ohūm, -ohūn/
third-person feminine	*-h*(*h*) /-áh(ā)/	*-hn* /-ehenn/

In contrast, the suffixes attach to the nominal basis of the plural masculine construct and of the dual masculine and feminine construct, all ending with /-ay/, with no linking vowel, and also in the cases of /ʾabū-/, /ʾaḥū-/ and /ḥamū-/ (see above),[86] one can distinguish two series of suffixes:[87]

	Singular	**Plural**
first-person	*-y* /-ayy/	*-yn*(ʾ) /-áynā/
second-person masculine	*-yk* /-áyk(ā)/	*-ykm*/*ykn* /-aykūm, -aykūn/
second-person feminine	*-yky* /-áykī/	*-ykn* /-aykenn/
third-person masculine	*-wh*(*y*) /-áwhī/	*-yh*(*w*)*m*/*yhwn* /-ayhūm, -ayhūn/
third-person feminine	*-yh*(*h*) /-áyh(ā)/	*-yhn* /-ayhenn/

In the third-person masculine, /-hī/ developed from */-hū/, /-aw-/ through dissimilation of the */-ay-/. Masculine suffixes of the second-/third-person plural with /-n/ occur in Daniel and later Aramaic. Biblical Aramaic pointing reflects the secondary shift /-ūn/ > /-ōn/.[88] With suffixes to a base ending in a vowel,[89] it has in the second-person masculine singular *-āḵ*,[90] in the third-person feminine *-ah*,[91] and in the first-person plural *-anā*,[92] otherwise the expected monophthongization /ay/ > /ē/ and in the third-person masculine singular /aw/ > /ō/, in the first-person singular the abbreviation /-ayy/ > /-ay/ (→ 2). Sometimes, the third-person feminine plural manifests a gender difference between the masculine form in the consonantal text and the feminine form in the vocalization (Dnl. 7:8,19).

Alterations in the syllable structure with the addition of suffixes or endings result in the retention of unaccented short vowels that otherwise drop out in an open syllable.[93]

Prepositions indicate spatial, temporal, or logical relationships. Most frequently encountered are /ba-/ “in,” /la-/ “for, to,” and /ka-/ “like,” along with /ʾel/ “toward,”[94] /bayn/ “between,” /men/ “from, out of,” /ʿad/ “until,” /ʿal/ “on, against,” /ʿemm/ “with,” and a few original nouns reduced in usage to prepositions, such as, e.g., /ḥalp/ “instead of,”[95] /qobl/ “before, according to,”[96] /qodām/ “before,”[97] or /taḥt/ “under.” The suffixed forms /ʾel/, /bayn/, /ʿal/, /qodām/, and /taḥt/ have an expanded basis with /-ay/, i.e., they take the “plural suffixes” (see above). The respective articles note the functions of certain prepositional supplements with verbs. Very often, /la-/ indicates the indirect object, which developed in the Imperial Aramaic tradition into its use also as a marker for a(n often animate) direct object,[98] while the Old Aramaic languages of Syria employ the particle /ʾiyyāt/ for this purpose and West Aramaic uses the related form /yāt/.[99] Both object particles appear in Biblical Aramaic. Other ubiquitous function words are the conjunctions /wa-/ “and” and /ʾaw/ “or,” the conditional particle /hen/ “if,’” and various subordinating conjunctions based on the relative particle /dī/ combined with a preposition like /ka-/ (e.g., *kzy* /kadī/ “when”) or a prepositional expression with /qobl/.[100] Object clauses and other subordinate clauses also follow an introductory /dī/ ‘that”; the respective articles note the construction with verbs.[101] The marker of existence /ʾīt(ay)/ “there is,” negated /layt(ay)/ “there is not,” employed with /la-/ denotes “to have,” since Semitic languages have no independent verb for this. As negations, Aramaic has /lā/, and older Aramaic /ʾal/ in prohibitions. Furthermore, Aramaic employs deictic particles such as /hā/, /ʾarū/, or /(hā)lū/ “look!”[102] and adverbs such as /ʾayk/ “how?,” /ʾān/ “where?,” /ʾap/ “also,” /ken/ “thus,” /kaʿat/ “now,” /tūb(ā)/ “again,”[103] and still others.

Verbal roots designate verbal actions. They always appear in a certain stem indicating kind of action (unmarked, factitive, and causative) and

voice (active and nonactive, i.e., middle passive, passive, and the associated categories such as reflexive). All stems form finite conjugations and certain paradigmatic verbal nouns (participles and infinitives). The finite forms each conjugate according to person, gender, and number; the participles, like other nominals, decline. The unmarked stem (G-stem or peal) can differentiate between dynamic and stative verbs.

The finite conjugations indicate the semantic categories of tense (the temporal relation of a circumstance), aspect (internal contour), and mood (relationship of a statement to actual, possible, or desired reality). Tense distinguishes, first, between past and present-future, aspective between the subjective portrayal of an action as complete (or punctiliar) and incomplete (in process), and mood between epistemic (various nuances of possibility) and deontic (demands). These three basic semantic categories overlap so that, e.g., the present is always in process, the future generally uncertain and, thus, approximating mood, and a specific demand or an account of consecutive events is usually inclined toward the punctiliar mode of portrayal. Such relationships are evident throughout the language.[104] Since tense, aspect, and mood appear in only two or three verbal categories in Old Aramaic, one begins with broad and fluid spectra of function instead of simple basic meanings,[105] spectra that then become fixed in specific usages according to context into a clearer temporal, aspective, or modal nuance.[106]

In Old and Imperial Aramaic, including Biblical Aramaic, a perfect formed with affirmatives (also designated the affirmative or suffix conjugation) and an imperfect formed with pre- and affirmatives (prefix conjugation) are also productive, the second in a long (sometimes also simply called imperfect) and a short form (jussive). This short imperfect survived in post-Achaemenid Aramaic only at Qumran and thereafter disappears entirely throughout Aramaic; it differs from the long form by different endings in a few forms. The basis of both conjugations is already determined by the superordinate verbal stem; the pre- and affirmatives of the perfect and both the long and short perfect that appear on this basis are alike in all the stems. The perfect covers various shades of the past,[107] in the G-stem the vowel in the second syllable of the base form is lexical;[108] here is the paradigm for → *ktb*:

	Singular	**Plural**

first-person	*ktbt* /katáb-(ə)t/	*ktbn* /katáb-n(ā)/
second-person masculine	*ktbt* /katáb-t(ā)/	*ktbt*(*w*)*n* /katab-tūn/
second-person feminine	*ktbty* /katáb-tī/	*ktbtn* /katab-ten/
third-person masculine	*ktb* /katab-Ø/	*ktbw* /katáb-ū/
third-person feminine	*ktbt* /katáb-at/	*ktbw* /katáb-ū/

In Imperial Aramaic, the masculine form replaces the third-person feminine plural; so far, there are no Old Aramaic instances. Post-Imperial Aramaic, however, displays here an independent form *ktbh* /katab-ā/.[109] Biblical Aramaic preserves the unaccented final long vowel of the perfect; the loss of the short vowel and the shift /e/ > /i/ led in the first- and third-person singular to *kiṯbeṯ* "I wrote" and *kiṯbaṯ* "she wrote." Otherwise, the base is *k*^{e}*ṯaḇ*. This base, however, also appears in the third-person feminine singular (*b*^{e}*ṭelaṯ* "she stopped," Ezr. 4:24).

The long imperfect operates in the functional realm of present-future, duration/incompleteness, and epistemic modality. Here, too, the base in the G-stem has a lexical vowel, for verbs of action, mostly /o/:[110]

	Singular	**Plural**
first-person	*ʾktb* /ʾa-ktob/	*nktb* /na-ktob/
second-person masculine	*tktb* /ta-ktob/	*tktb*(*w*)*n* /ta-ktob-ūn/
second-person feminine	*tktbyn* /ta-ktob-īn/	*tktbn* /ta-ktob-(ə)n, -ān/
third-person masculine	*yktb* /ya-ktob/	*yktbwn* /ya-ktob-ūn/
third-person feminine	*tktb* /ta-ktob/	*yktbn* /ya-ktob-ān/

It is questionable how long the old /a/ preformative vowel survived in Old and Imperial Aramaic and when /e/ (as in the later pointings) replaced it.[111] For the second-/third-person feminine plural, the vocalizations indicate /-ān/ on the analogy of the masculine instead of the original */-n(ā)/, but the moment of this shift is unknown.[112]

In contrast, the short imperfect for demands and wishes[113] differs in spelling from the long form only in the second-person feminine singular and the second-/third-persons plural:

	Singular	**Plural**
first-person	*ʾktb* /ʾa-ktob/	*nktb* /na-ktob/
second-person masculine	*tktb* /ta-ktob/	*tktbw* /ta-ktob-ū/
second-person feminine	*tktby* /ta-ktob-ī/	*tktbn* /ta-ktob-(ə)n/
third-person masculine	*yktb* /ya-ktob/	*yktbw* /ya-ktob-ū/
third-person feminine	*tktb* /ta-ktob/	*yktbn* /ya-ktob-(ə)n/

In post-Imperial Aramaic, the long form replaced the short imperfect. In the Tell Fekheriye inscription, the preformative /l-/ instead of /y-/ of the nonnegated short imperfect already appears, in Biblical and Qumran Aramaic only with → *hwī*. East Aramaic generally has /l-/ or /n-/[114] instead of /y-/.

As a rule, the second persons of the short imperfect without preformative are identical with the imperative; the short imperfect negated with /ʾal/ functions as the negative imperative. At least since Imperial Aramaic, the active participle *ktb* /kāteb/ in a predicative function as a present or process form becomes increasingly integrated into the verbal system and sometimes also serves as a historical present. Together with the perfect or imperfect of → *hwī*, it constitutes a periphrastic conjugation expressing duration or process in past and future. The passive participle *ktyb* /katīb/ has mostly resultative nuances and finds frequent usage as an adjective. Beginning with Imperial Aramaic, the infinitive is *mktb* /maktab/ (> /miktab/), which functions with the preposition /la-/ mostly as a verbal complement to auxiliary verbs; Old Aramaic also attests forms without the *m*-prefix (/ktab/?).

Except for the participle, the verbal forms could be complemented with a suffix to mark a pronominal object. The first person singular has /-nī/ "me,"[115] otherwise the suffixes are identical to those with the noun (see above), e.g., /yahabtā-hā/ "you have given her." Since Imperial Aramaic, the third-person plural independent person pronouns replaced the corresponding suffixes. Typically, suffixes attach to long imperfect forms without afformative through the energicus ending /-an/, which apparently has no function otherwise, with no linking vowel. In pronunciation, the /-n/ presumably assimilated to the /-k/ of the suffix, as in /yaśīmákkā/ "he places you" (< /yaśīm-án-kā/).

Derived stems only change the base, the D-stem (pael) for factitive nuances doubles the middle consonant of the root, and the C-stem (haphel/aphel, on which, → 2) takes the prefix /ha-/ (> /ˀa-/). The G-, D-, and C-stems each have a t-stem with infixed /-t-/ for middle-passive or reflexive nuances (ithpeel, ithpaal, and ittapal) and until the end of the first millennium B.C.E. an inner passive formed by a vowel shift on the basis of the active; afterward, the respective t-stems assumed their functions. The ground forms are:

	Perfect	**Imperfect**	**Participle**	**Infinitive**
Peal	/katab/	/yaktob/	/kāteb/	/maktab/
Ithpeel	/ˀetkateb/	/yetkateb/	/metkateb/	/ˀetkatābā/
Pael	/katteb/	/yakatteb/	/makatteb/	/kattābā/
Ithpaal	/ˀetkattab/	/yetkattab/	/metkattab/	/ˀetkattābā/
Aphel	/ˀakteb/	/yakteb/	/makteb/	/ˀaktābā/
Ittapal	/ˀettakteb/	/yettaktab/	/mattaktab/	/ˀettaktābā/

The meanings of verbs that form both a D- and a C-stem differ individually. The inner passive[116] first disappears in the imperfect, so that its t-stem already appears with a passive nuance. The perfect of the inner passive sometimes has a resultative meaning. A sibilant at the beginning of

a root usually fuses with the /-t-/ of the t-stems via metathesis.[117] The infinitives of the derived stems manifest both diachronous and synchronous variations.[118]

Various verb classes manifest alterations resulting from unstable root letters: syllable-ending /ʾ/ disappears with compensatory lengthening so that verbs III-ʾ have fused with those III-*ī*; /n/ as the first consonant of the root is assimilated, as is /l/ in *lqḥ*,[119] and the imperative then has a biradical basis.[120] In the imperfect, various verbs with an initial /y/ lengthen the second consonant of the root[121] and also have a biconsonantal imperative;[122] the C-stem retains an original initial /w-/. Forms with preformatives and prefixes of verbs with a doubled second radical lengthen the first: /ʿallat/ "she entered," but /taʿʿol/ "you enter";[123] in ithpeel, pael, and ithpaal they behave regularly. Hollow roots with long middle vowels retain them in the long imperfect[124] and otherwise have the vowel corresponding to that of regular verbs.[125] Active G-stem participle and pael are regular, although a reduplicated stem sometimes occurs.[126] Verbs ending in vowels (III-*ī*) retain the etymological /-ī/ in the perfect and imperative,[127] but it becomes /-ǣ/ in the imperfect, participle, and G-stem infinitive. Many verbs, by contrast, have a perfect with /-ā/ instead of /-ī/.[128] Suffixed III-*ī* forms diphthongize the long vowel before the linking vowel.[129]

4. Syntax

In older Old Aramaic, the word order verb-subject-object dominated in verbal clauses and subject-predicate in nominal clauses.[130] Alterations of sentence structure, probably first in part under Akkadian, then Persian influence, at the latest from Imperial Aramaic, lead, however, to the erosion of the pattern of a fixed word order and a tendency to move the verb back and the direct object forward, a tendency notable also in Biblical Aramaic. The same influences resulted in the very typical proleptic suffixes such as

brh dy PN “his son, the son of PN” = “PN’s son.” Other syntactical phenomena correspond, on the whole, to the Northwest Semitic evidence: coordination generally resolves double subordination; compound subjects, collectives, and passive predicates sometimes diverge from regular syntactical agreement.

---

3. I.e., *w* for /ū/ (and later /ō/), *y* for /ī/ (and later /ē/), and *h* for /ā/ and /ǣ/.

4. Excluding secondary alterations such as, especially, the loss of unaccented short vowels in open syllables.

5. Glottal stop.

6. Laryngeal spirant.

7. Guttural *h*, as in the pronunciation roughly between *h* and German *ch* as in “ach!”

8. Perhaps still pronounced with a dental projection, i.e., /^{d}z/ and /^{t}s/.

9. As in English *this*.

10. English *thin*.

11. Like *sh* in English “ship.”

12. Whose original pronunciation may have sounded like the hissing of a goose.

13. I.e., with elevation of the back part of the tongue against the palate.

14. Probably “rolled,” i.e., pronounced as in Italian.

15. As in English *water*.

16. As between German “Loch” or “ach.”

17. Spirantized *g*, as, e.g., in Modern Greek or Standard Dutch; see *ATTM*, 101f.

18. Cf. *ATTM*, 97.

19. In contrast, the Tell Fekheriye inscription has *s* for /θ/.

20. Regarding *ḥ* as a possible representation also of /ḫ/ and ʿ also of /ġ/ see above.

21. *ATTM*, 100f.

22. H. Gzella, *A Cultural History of Aramaic*. *HO* 111 (2015), 38f.; formerly dated to ca. 600 B.C.E.

23. From */δenā/.

24. From */δī/.

25. With the typical Aramaic */-aʾ/ > /-ē/ (*ATTM*, 138: /-ǣ/).

26. I.e., with /ʾ/ as the third radical.

27. Ending in a vowel; *ATTM*, 104-6 dates this between the ninth and eighth century B.C.E.

28. Which probably also had to do with the beginning of a rather slow expansion of a less standardized orthography such as in private letters.

29. *ATTM*, 148.

30. Contra *ATTM*, 116-20.
31. I.e., the first step of the “Barth-Ginsberg law,” *ATTM*, 109f.
32. *ATTM*, 112.
33. Such as the *qatl*, *qitl*, and *qutl* paradigms.
34. Also called dissimilation of geminates.
35. Thus, e.g., /ˀáttā/ “you” from */ˀanta/, spelled *ˀt* in Old Aramaic; exceptions arise with /ḥ/ as in *mhnḥt* /mohanḥet/ “one who brings down” in *KAI* 309:2; → *nḥt*.
36. Like *ˀnt* “you.”
37. *ATTM*, 89-95.
38. Like → *ḥnṭh* /ḥeṭṭā/ “wheat.”
39. *ATTM*, 110f.
40. *ATTM*, 113-15; consequently, Biblical Aramaic also has segholates.
41. *ATTM*, 107f.
42. *ATTM*, 115f.
43. *ATTM*, 116-20.
44. → *gw*; *ATTM*, 120-22.
45. → *šmš* /šamš/; *ATTM*, 102f.
46. *ATTM*, 122.
47. *ATTM*, 122-25.
48. *ATTM*, 124f.
49. I.e., generally after a vowel.
50. *ATTM*, 125-28.
51. *ATTM*, 128-36.
52. According to *ATTM*, 136 ca. 400 C.E.
53. *ATTM*, 138-40: 7th-8th cent. C.E.
54. *ATTM*, 140f.
55. *ATTM*, 142-47.
56. Such as *ḥāyil* in Dnl. 3:4; Ezr. 4:23; → *ḥyl*.
57. E.g., *mārīm* “he raised” [→ *rīm*] in Dnl. 5:19.
58. Cf. *BLA*, §40g.
59. Old Aramaic attests only *ˀt* for the 2ms.
60. I.e., with a simplified /-t/ at the end (→ 2) and on analogy with the plural articulated as a plosive, as in Syriac.
61. Cf. *ATTM*, 138-40.
62. *ATTM*, 122-25.
63. Rarely spelled *dnh*, *zn*(*ˀ*) or *dn*(*ˀ*).
64. With the by-forms *znk* or *zkm*/*dkm*, *zky* and *ˀlky*, Biblical Aramaic *dikkēn*.

65. → *gbr*.

66. → *ydʿ*.

67. *TADAE* A6.8:3; → *qbl*.

68. → *rḥm*.

69. *TADAE* B3.8:22.

70. For an overview see *ATTM*, 425-45.

71. E.g., /ḥakkīm/ “wise,” → *ḥkm*.

72. Such as /tarrāʿ/ “gatekeeper,” → *trʿ*.

73. Later > /mi-/, as in Biblical Aramaic pointing.

74. Like /maškab/ “bed,” → *škb*.

75. Cf. Biblical Aramaic const. *malk̲wāt̲*, det. *malk̲wāt̲ā*.

76. → *byt*.

77. → *ʾnth*.

78. In *KAI* 309.22f., in contrast, /nešawān/.

79. → *br*.

80. → *ʾb*.

81. → *rb*.

82. → *ʾḥ*.

83. First attested in the post-Achaemenid period, cf. *PAT* 0117.3.

84. Except for /ʾab/, /ʾaḥ/ and /ḥam/.

85. I.e., throughout, except for the 1s /-ī/ “my.”

86. Yet /ʾabī/ “my father.”

87. Sometimes called sg. and pl. suffs., since the former occurs mostly with sg. and the latter with pl. bases.

88. *ATTM*, 136.

89. Pl. suffs.

90. In a consonantal text *-yk*.

91. Consonantal text *-yh*.

92. Consonantal text *-ynʾ*; *ATTM*, 153.

93. E.g. *ʿab̲d̲ōhī* “his servant” in Ezr. 5:11 from /ʿabadawhī/, as with other *qatl-*, *qitl-*, and *qutl-* nominals with an originally bisyllabic pl. base, which can still be observed in the spirantized *d̲* in the

vocalization; in contrast *ᶜᵃb̲ed̲* “servant” on the ground form /ˁabd/ after anaptyxis /ˁabəd/, spirantization, lengthening of the half-vowel to a full vowel, and the loss of a vowel.

94. In the course of time replaced by /ˁal/.

95. → *ḥlp*.

96. → *qbl*.

97. → *qdm*.

98. Also in later East Aramaic.

99. See H. Gzella, “Differentielle Objektmarkierung im Nordwestsemitischen als Konvergenzerscheinung,” in *Nicht nur mit Engelszungen*. *FS W. Arnold* (Wiesbaden, 2013), 113-24.

100. → *qbl*.

101. E.g., → *ydᶜ*; *šmᶜ*.

102. Frequent in Biblical Aramaic in vision reports, → *ḥzī*.

103. → *tūb*.

104. See H. Gzella, “Some General Remarks on Interactions between Aspect, Modality, and Evidentiality in Biblical Hebrew,” *FO* 49 (2012) 225-32.

105. In outdated portrayals often traced back to relative phases of time or a binary aspect system.

106. See the extensive treatment in H. Gzella, *Tempus, Aspekt und Modalität im Reichsaramäischen*. *VOK* 48 (2004); for Daniel also, similarly, T. Li, *The Verbal System of the Aramaic of Daniel*. *SAIS* 8 (2009).

107. Without differentiating between punctiliar and durative, in addition to resultative, preformative (“Hereby. . .”), sometimes also in statements that are timelessly valid (gnomic) and in the protasis of conditional clauses for relative prior time.

108. Usually /a/ for action and /e/ for stative verbs.

109. Likewise in Biblical Aramaic pointing.

110. Biblical Aramaic /u/, → 2.

111. → 2 regarding the Barth-Ginsberg Law.

112. *ATTM*, 147.

113. Negated with /ˀal/.

114. Which probably arose from /l-/.

115. With the auxiliary vowel /-anī/.

116. Peal: pf. /katīb/, impf. /yoktab/, ptc. /katīb/; pael: pf. /kotteb/, impf. /yakottab/, ptc. /makattab/; aphel: pf. /ˀokteb/, impf. /yoktab/, ptc. /maktab/.

117. With /-tz-/ > /-zd-/.

118. Cf. briefly *ATTM*, 150.

119. → *nśī*.

120. E.g., /qaḥ/ “take!”

121. /yaddaʿ/ “he knows.”

122. /hab/ “give!”

123. Often written degeminatively *tnʿl*.

124. Although shortened in the short form.

125. Thus, in the pf. /qām/, impf. /yaqūm/.

126. → *rīm*.

127. > /ay/ for affirmatives with /i/ and > /aw/ for those with /ū/.

128. > /-ay-/ before consonantal affirmatives occurs often, > /-āt/ in 3fs and /-aw/ in 3pl.

129. E.g., /haḥwiyán(ā)/ “he showed us.”

130. Often with a personal pronoun as copula, e.g., Dnl. 2:38: “you are the head of gold.”

Alphabetical Aramaic-English Word List
(Transcribed according to Imperial Aramaic Orthography)

ʾb /ʾab/ “father”

ʾbd (v.) “perish”

ʾbdn /ʾabdān/ “demise” → *ʾbd*

ʾbl (v.) “mourn” → *ʿṣb*

ʾbn /ʾabn/ “stone”

ʾgr /ʾeggār/ “wall” → *ktl*

ʾgrh /ʾeggarā/ “letter” → *spr*

ʾdr /ʾedder/ “threshing floor” → *ʿwr*

ʾdrgzr */ʾaddarzagar/ official in the inner circle of civil service → Iranian Official Titles

ʾwṣr /ʾ*ōṣar*/ “store(house)” → *mlk*

ʾzd /ʾazd/ “known”

ʾzl (v.) “go” → *hlk*

ʾḥ /ʾaḥ/ “brother”

ʾḥh /ʾaḥā/ “sister” → *ʾḥ*

ʾḥydh /ʾaḥīdā/ “puzzle”

ʾḥr /ʾaḥar/ “after, then” → *ʾḥry*

ʾḥry /ʾaḥaray/ “after, behind”

ʾḥrn /ʾoḥrān/ “other” → *ʾḥry*

ʾḥšdrpn /ʾaḥšadrapān/ “satrap” → Iranian Official Titles

ʾyln /ʾīlān/ “tree”

ʾymh /ʾaymā/ (> /ʾēmā/) “terror”

ʾkl (v.) “eat”

ʾlh /ʾelāh/ “god”

ʾlp (v.) “learn,” “teach” (*pa*)

ʾlp /ʾalp/ “thousand” → Numbers

ʾm /ʾemm/ “mother” → *ʾb*

ʾmh /ʾamā/ “servant” → *ʿbd*

ʾmh /ʾommā/ “tribe, clan” → *ʿm*

ʾmn (v.) “trust” (*ha*)

ʾmr (v.) “say” → *mll*

ʾmr /ʾemmer/ “lamb”

ʾnb /ʾebb/ “fruits” → *ʾyln*

ʾns (v.) “oppress, force”

ʾnp /ʾapp/ “nose,” “face” (dual), “surface”

ʾnš /ʾenāš/ “human being”

ʾnth /ʾettā/ “woman, wife”

ʾntw /ʾettū/ “marriage” → *ʾnth*

ʾsh /ʾasǣ/ “physician” → *ʾšp*

ʾswr /ʾasūr/ “fetter” → *ʾsr*

(ʾ)*skph* /(ʾa)skoppā/ “threshold” → *trʿ*

ʾsp /asopp/ “gate area” → *trʿ*

ʾsprnh /ʾosparnā/ “complete, precise”

ʾsr (v.) “bind, take captive”

ʾsr /ʾesār/ “prohibition” → *ʾsr*

ʾʿ /ʾaʿ/ “wood, beam,” “boards” (plural)

ʾprsk /ʾeprasak/ “investigative officer” → Iranian Official Titles

ʾprstk /ʾeprastāk/ “emissary”(?) → Iranian Official Titles

ʾṣbʿ /ʾeṣbaʿ/ “finger, toe” → *jd*

ʾrbʿ /ʾarbaʿ/ “four” → Numbers

ʾrgwn /ʾargawān/ “(reddish) purple”

ʾrz /ʾarz/ “cedar” → *ʾyln*

ʾrḥ /ʾorḥ/ “path, street, lifestyle”

ʾryh /ʾaryǣ/ “lion”

ʾryk /ʾarīk/ “long”

ʾrk /ʾork/ “length”

ʾrkh /ʾarakā/ “duration”

ʾrm /ʾaram/ “Aram” → *ʿm*

ʾrmy /ʾaramāy/ “Aramaic; pagan” → *ʿm*

ʾrʿ /ʾarʿ/ “earth, ground”

ʾš /ʾoš/ “foundations” (plural)

ʾšʾ /ʾæššā/ “fire”

ʾšp /ʾāšep/ “incantation priest”

ʾšrn /ʾāšarn/ “woodwork, lumber”

ʾštdwr /ʾāštedōr/ “rebellion” → *šlḥ*

ʾt /ʾāt/ “sign, wonder”

ʾtwn /ʾattūn/ “oven” → *nwr*

ʾtī (v.) “come”

ʾtn /ʾatān/ “female ass” → *ʿrd*

ʾtr /ʾatar/ “place”

bʾyš /baʾīš/ “evil, bad” → *bʾš*

bʾr /beʾr / (> /bēr/) “well” → *štī*

bʾš (v.) “be bad, displease”

bʾš /bōš/ “(something) bad” → *bʾš*

b(ʾ)*tr* /bātar/ “after, behind” → *ʾtr*

bb /bāb/ “gate” → *trʿ*

bbh /bābā/ “pupil” → *ʿyn*

bdr (v.) “scatter” (*pa*)

bhylw /bahīlū/ “haste” → *bhl*

bhl (v.) “hurry” (*itp*), “frighten” (*pa*)

bṭl (v.) “stop,” “install” (*pa*) → *sūp*

bṭn /baṭn/ “belly, womb” → *rḥm*

byrh /bīrā/ “fortification”

byt /bayt/ (> /bēt/) “house”

bkī (v.) “cry” → *ʿṣb*

bl /bāl/ “spirit, mind”

blw /belō/ “income” (tribute) → *hlk*, *mndh*

blī (v.) “decay,” “annihilate” (*pa*)

bnī (v.) “build”

bnyn /benyān/ “building” → *bnī*

bʿī (v.) “want, seek, request, be about to”

bʿw /baʿū/ “petition” → *bʿī*

bʿl /baʿl/ “lord, husband, owner, member”

bʿl (v.) “marry” (*ha*) → *bʿl*

bqr (v.) “examine, investigate” (*pa*)

br /bar/ “son”

br /barr/ “open field”

brʾ /barrā/ “outside” → *br* /barr/

brh /barā/ “daughter” → *br*

bry /barrāy/ “external” → *br* /barr/

brk (v.) “bless, praise” (*pa*)

brk /berk/ “knee” → *brk*

brk (v.) “kneel” → *brk*

brkh /barakā/ “blessing” → *brk*

bśr /baśar/ “flesh”

bšlm /ba-šalām/ “all right, in good order” → *šlm*

gʾwh /gaʾwā/ (> /gēwā/) “arrogance” → *gʾī*

gʾī (v.) “be grand, arrogant”

gb /gobb/ “hole”

gbwrh /gabūrā/ “strength” → *gbr*

gbr (v.) “be strong”

gbr /gabar/ “man” → *gbr*

gbr /gabbār/ “hero” → *gbr*

gbrw /gabbārū/ “strength” → *gbr*

gw /gaww/ “interior”

gūḥ (v.) “stir up” (*aph*) → *šmyn*

gwy /gawwāy/ “internal” → *gw*

gzyrh /gazīrā/ “determination, decision” → *gzr*

gzr (v.) “cut off, conclude”

gzr /gāzer/ (/gazzār/?) “soothsayer” → *gzr*

glw /galū/ “exile” → *glī* II

glī I (v.) “uncover, reveal”

glī II (v.) “emigrate,” “deport” (*aph*)

gll (v.) “roll” → *gll*

gll /galāl/ a kind of stone

gmyr /gamīr/ “perfect, complete” → *šlm*

gnz /ganza/ “treasure”

gnzbr /ganzabār/ “treasurer” → *gnz*

gnyzh /ganīzā/ “storage, depot” → *gnz*

gp /gapp/ “wing”

gpn /gapn/ “grapevine” → *ḥmr*

grbh /garbǣ/ “north” → Numbers, 4

gšm /gešm/ “body”

dʾb /deʾb/ “wolf” → *db*

db /dobb/ “bear”

dbḥ (v.) “sacrifice”

dbḥ /debḥ/ “sacrifice” → *dbḥ*

dbḥ /dābōḥ/ “sacrificial priest” → *dbḥ*

dbq (v.) “cling, adhere, border on, arrive (rare)”

dbr (v.) “lead”

dbr /dabbār/ “driver” → *dbr*

ʿl dbr(*t*) /ʿal dabar(at)/ “because of, with regard to” → *dbr*, *mll*

dhb /dahab/ “gold”

dūṣ (v.) “rejoice” → *ql*

dūr (v.) “dwell”

dḥyl /daḥīl/ “frightful” → *dḥl*

dḥl (v.) “be afraid”

dḥlh /deḥlā/ “fear” → *dḥl*

dīn (v.) “judge”

dyn /dīn/ “court” → *dīn*

dyn /dayyān/ “judge” → *dīn*

dyr /dayr/ (> /dēr/) “pen, stall” → *dūr*

dkī (v.) “be clean, “cleanse” (*pa*) → *zkw*

dkr /dakar/ “male, ram”

dkr (v.) “remember”

dkrn /dokrān/ “memorandum, record” → *dkr*

dm /dam/ “blood”

dmw /damū/ “similarity” → *dmī*

dmī (v.) “be like, resemble”

dqn /daqan/ “beard” → *śʿr*

dqq (v.) “crush”

dr /dār/ “generation” → *dūr*

drg /darg/ “stairs” → *nḥt*

drh /dārā/ “court(yard)” → *dūr*

drʿ /derāʿ/ “arm”“ → *yd*

dš /dašš/ “wing of a door, door” → *trʿ*

dt /dāt/ “law, royal edict”

dtʾ /datæ/ “grass” → *ʿśb*

hdbr /hadabār/ a dignitary in the inner circle of civil service → Iranian Official Titles

hdr (v.) “ascribe majesty, praise” (*pa*) → *hdr*

hdr /hadar/ “majesty”

hwī (v.) “be”

hwn /hawn/ (> /hōn/) “mind, understanding, attention” → *śīm*

hykl /hēkal/ “palace, temple”

hymnw /haymānū/ (> /hēmānū/) “fidelity” → *ʾmn*

hūk (v.) “go”

hlk (v.) “walk”

hlk /helk/ “tax” → *hlk*

hmī (v.) “make noise” → *ql*

zbn (v.) “buy,” “sell” (*pa*)

zhyr /zahīr/ “respectful, deliberate” → *zhr*

zhr (v.) “pay attention” (*itp*)

zūn (v.) “feed” → *ʾkl*

zūʿ (v.) “tremble, be afraid” → *dḥl*

zīd (v.) “be arrogant”→ *ḥṭī*

zyw /zīw/ “splendor”

zkw /zakū/ “innocence”

zkī (v.) “be innocent” → *zkw*

zky /zakkāy/ “innocent” → *zkw*

zmn (v.) “make an appointment” (*itpa*) → *zmn*

zmn /zemān/ “time”

zmr /zamūr/ “blue” → *zmr*

zmr (v.) “make music, sing”

zmr /zamār/ “music” → *zmr*

zmr /zammār/ “musician” → *zmr*

zmr (v.) “prune” → *zmr*

zʿyr /zoʿayr/ (> /zoʿēr/) “small, few” → *śgī*

zʿq (v.) “call”

zʿqh /zaʿaqā/ “cry” → *zʿq*

zqp (v.) “pile” → śīm

zrʿ (v.) “sow”

zrʿ /zarʿ/ “seed, crop” → *zrʿ*

ḥbb (v.) “love” → *rḥm*

ḥbwlh /habūlā/ “crime” → *ḥbl*

ḥbyb /ḥabbīb/ “beloved” → *rḥm*

ḥbl (v.) “ruin, annihilate” (*pa*)

ḥbl /habāl/ “annihilation” → *ḥbl*

ḥbr (v.) “bind, consort with” (*itpa*)

ḥbr /ḥaber/ “comrade, other” → *ḥbr*

ḥbr /ḥabr/ “incantation” → *ḥbr*

ḥd /ḥad/ “one; time” → Numbers

ḥdwh /ḥedwā/ “joy”

ḥdī (v.) “rejoice” → *ḥdwh*

ḥūb (v.) “owe” → *ḥṭī*

ḥwb(*h*) /ḥōb(ā)/ “guilt” → *ḥṭī*

ḥwī (v.) “communicate, show” (*pa*, *aph*)

ḥwr (v.) “whiten, bleach, cleanse” (*pa*) → *ḥwr*

ḥwr /ḥewwār/ “(something) white”

ḥwry /ḥewwārāy/ “white” → *ḥwr*

ḥzh /ḥāzā̄e/ “seer” → *ḥzī*

ḥzh /ḥazā̄e/ “useful, necessary” → *ḥzī*

ḥzw /ḥazū/ “sight, visibility” → *ḥzī*

ḥzw /ḥezū/ “dream vision, vision” → *ḥzī*

ḥzwn /ḥezwān/ “phenomenon” → *ḥzī*

ḥzī (v.) “see,” “show” (rare) (*pa*)

ḥzy /ḥazī/ “sign, marking” → *ḥzī*

ḥzywn /ḥezyōn/ “dream vision, vision” → *ḥzī*

ḥṭʾ /ḥeṭē/ “sin” → *ḥṭī*

ḥṭī (v.) “sin”

ḥṭy /ḥaṭāy/ “sin” → *ḥṭī*

ḥṭr /ḥoṭr/ “rod, scepter” → *šbṭ*

ḥy /ḥayy/ “alive” → *ḥy*ī

ḥyb /ḥayyāb/ “guilty” → *ḥṭī*

ḥywh /ḥaywā/ (> /ḥēwā/) “animal, animals” → *ḥyī*

ḥyī (v.) “live”

ḥyyn /ḥayyīn/ “life” → *ḥyī*

ḥyl (v.) “strengthen” (*pa*) → *ḥyl*

ḥyl /ḥayl/ (> /ḥēl/) “power, host”

ḥk /ḥekk/ “palate” → *pm*

ḥkym /ḥakkīm/ “wise” → *ḥkm*

ḥkm (v.) “teach” (*pa*)

ḥkmh /ḥokmā/ “wisdom” → *ḥkm*

ḥlm (v.) “dream”

ḥlm /ḥelm/ “dream” → *ḥlm*

ḥlm II (v.) “become powerful” (*itp*), “heal” (*aph*) → *ḥlm*

ḥlp (v.) “follow, replace,” “interchange” (*aph*)

ḥlp /ḥalp/ “replacement” → *ḥlp*

ḥlph /ḥelpā/ “sprout” → *ḥlp*

ḥlq (v.) “allocate”

ḥlq /ḥelq/, /ḥolāq/ “portion” → *ḥlq*

ḥmh /ḥemā/ “wrath”

ḥmī (v.) “see” (W. Aramaic)

ḥmr /ḥamr/ “wine”

ḥmr /ḥemār/ “ass” → *ʿrd*

ḥmrh /ḥemārā/ “female ass” → *ʿrd*

ḥmš /ḥameš/ “five” → Numbers

ḥn /ḥenn/ “favor, esteem” → *ḥnn*

śnʾh /śenʾā/ “hatred” → *śnī*

śnī (v.) “hate”

śʿr /śaʿr/ “hair,” “barley”

śph /śapā/ “lip” → *pm*

šʾl (v.) “ask, request”

šʾlh /šaʾelā/ “question,” “demand” → *šʾl*

šʾr (v.) “remain”

šʾr /šoʾār/ “remnant” → *šʾr*

šʾry /šērī/ “remnant” → *šʾr*

šbh /šabbā/ “sabbath, week” → *ywm*; *šnh*

šbḥ (v.) “praise” (*pa*)

šbṭ /šabṭ/ “staff, tribe”

šbī (v.) “take away captive” → *glī* II

šby /šebī/ “captivity” → *glī* II

šbyb /šabīb/ “flame” → *ʾšʾ*

šbʿ /šabʿ/ “seven” → Numbers

šbq (v.) “leave, abandon, set free, forgive”

šbq /šibq/ “access balcony” → *šbq*

šbš (v.) “become confused” (*itpa*)

šgl /šēgal/ “king’s consort”

šdr (v.) “send” (*pa*) → *šlḥ*

šwh /šawā/ “suitable” → *šwī*

šwī (v.) “be like,” “agree” (*itp*), “close” (*pa*)

šwī II (v.) “place, determine” (*pa*) → *šwī*

šwq /šūq/ “major commercial road” → *mlk*

šwr /šūr/ “wall”

šḥyt /šaḥīt/ “ruined” → *bʾš*; *šḥt*

šḥt (v.) “be deformed,” “destroy” (*aph*)

šyzb (v.) “deliver”

šyṣyʾ (v.) “complete” → *kll*

škb (v.) “lie down, lie”

škḥ (v.) “be found” (*itp*), “find, be able” (*aph*)

škḥh /šakaḥā/ “discovery” → *škḥ*

škll (v.) “complete” → *kll*

škn (v.) “dwell,” “cause to dwell, settle” (*pa*)

škn /šekn/ “eyelid” → *ʿyn*

šlh /šalā/ “calm, carefree” → *šlī*

šlh /šillā/ “impertinence, blasphemy” → *šlī*

šlw /šalū/ “rest, leisure,” “negligence” → *šlī*

šlḥ (v.) “send” (also *pa*), in Imperial Aramaic of reports

šlṭ (v.) “have/exert power,” “empower” (*aph*)

šlṭn /šolṭān/ “dominion, ruler” → *šlṭ*

šlī (v.) “be calm”

šlyṭ /šallīṭ/ “powerful, empowered” → *šlṭ*

šlyn /šelyān/ “calm” → *šlī*

šlm (v.) “be complete,” “count, repay” (*pa*), “hand over” (*aph*)

šlm /šalem/ “complete, undamaged” → *šlm*

šlm /šalām/ “peace, well-being” → *šlm*

šm /šem/ “name”

šmd (v.) “destroy” (*pa*) → *ʾbd*

šmyn /šamayn/ (> /šamēn/) “heaven”

šmʿ (v.) “hear, obey”

šmš /šamš/ (< /śamš/) “sun”

šmš (v.) “serve, venerate” (*pa*)

šn /šenn/ “tooth” → *pm*

šnh /šanā/ “year”

šnī (v.) “be different,” “alter” (*pa* and *aph*)

šʿh /šāʿā/ “moment, hour”

špwlyn /šepōlīn/ “foot (of a mountain)” → *rgl*

špṭ (v.) “sue” → *dīn*

špyr /šappīr/ “beautiful” → *špr*

špl (v.) “humiliate” (*aph*)

špl /šapel/ “lowly” → *špl*

šplw /šapelū/ “humiliation” → *špl*

špr (v.) “be beautiful, please”

špr /šopr/ “beauty” → *špr*

šprpr /šaparpar/ “dawn” → *špr*

šq /šāq/ “leg” → *rgl*

šqī (v.) “give to drink, water” (*aph*) → *štī*

šql → *tql*

šrī (v.) “free, linger, settle down,” “begin” (*pa*)

šryr /šarīr/ “sound” → *šlm*

šrš /šorš/ (< /śorš/?) “root, descendant”

št /šett/ “six” → Numbers

štī (v.) “drink, celebrate”

tbr (v.) “shatter”

tdyr /tadīr/ “lasting” → *dūr*

thwm /tehōm/ “primordial deep” → *ym*

tūb (v.) “return, diverge,” “give back,” “answer” (*aph*)

twb(ʾ) /tūbā/ “again, further” → *tūb*

twh (v.) “terrify”

twr /tawr/ (> /tōr/) “steer, cattle”

twrh /tawrā/ (> /tōrā/) “cow” → *twr*

twtb /tawtab/ (> /tōtab/) “sojourner” → *ytb*

tḥnwnyn /taḥnūnīn/ “request,” “plead” → *ḥnn*

tḥty /taḥtāy/ “under,” “south” → *ʿly*

typt /tīpat/ “police commander” → Iranian Official Titles

tlg /talg/ “snow” → *ʿnn*

tlt /talāt/ “three” → Numbers

tmh (v.) “be astonished” (also *itp*)

tmh /temh/ “wonder” → *tmh*

tmnh /tamānǣ/ “eight” → Numbers

tṣlw /taṣlū/ “prayer” (Old Aramaic) → *ṣlī*

tqyp /taqqīp/ “strong” → *tqp*

tql (v.) “weigh, pay”

tql /teql/ “shekel” → *tql*

tqn (v.) “be firm,” “prepare” (*pa*), “install” (*aph*)

tqp (v.) “be strong, defeat,” “strengthen, put in force” (*pa*)

tqp /toqp/ “strength, power” → *tqp*

tryn /terayn/ (> /terēn/) “two” → Numbers

trʿ /tarʿ/ “gate,” “hatchway, opening” (rare)

trʿ /tarrāʿ/ “gatekeeper” → *trʿ*

tšbḥh /tašboḥā/ “praise” → *šbḥ*

tšˁ /tešˁ/ “nine” → Numbers

earth *ʾrʿ* /ʾarʿ/

east *mdnḥ* /madnaḥ/, *mwʿh* /mawʿæ/ (> /mōʿæ/; → Numbers, 4), *qdym* /qadīm/ (→ *qdm*)

eat (v.) *ʾkl*

edict *dt* /dāt/, *ṭʿm* /ṭaʿm/ (→ *ṭʿm*), *nštwn* /neštāwan/, *ptgm* /pategām/

eight *tmnh* /tamānæ/ (→ Numbers)

elder *śb* /śāb/

emigrate (v.) *glī* II

emperor *mlk mlkʾ* (→ *mlk*)

empower (v.) *ḥyl* (*pa*; → *ḥyl*), *šlṭ* (*aph*)

empowered *šlyṭ* /šallīṭ/ (→ *šlṭ*)

end (v.) *sūp* (*aph*)

end *swp* /sawp/ (> /sōp/; → *sūp*); spatially also *sypyn* /sayāpīn/ (→ *sūp*) or *qṣt* /qaṣōt/ (plural; → *qṣṣ*)

end of the world *qṣ* /qeṣṣ/ (→ *qṣṣ*)

enemy *ʿr* /ʿarr/ (→ ʿrr), *śnʾ* /śānē/ (→ *śnī*)

engrave (v.) *ršm*(?)

enter (v.) *ʿll*

enthrone (v.) *mlk* (*aph*; → *mlk*)

entourage → court lady → noble

entrance *mʿl* /maʿʿal/ (→ *ʿll*)

entry *ʿll* /ʿalāl/ (→ *ʿll*)

erect (v.) *qūm* (*aph*)

err (v.) *ṭʿī* (→ *ḥṭī*)

error *ṭʿw* /ṭaʿū/ (→ *ḥṭī*)

escape (v.) *plṭ* (→ *nṣl*)

esteemed *yqyr* /yaqqīr/ (→ *yqr*)

eternity *ʿlm* /ʿālam/

evening *rmš* /ramš/ (→ *ywm*)

evil *bʾyš* /baʾīš/ (→ *bʾš*)

evildoer *ršyʿ* /raššīʿ/ (→ *bʾš*)

exactly *ʾsprnh* /ʾosparnā/

examine (v.) *bqr* (*pa*)

execution *qṭl* /qaṭl/ (→ *qṭl*)

execution of office *mlkw* /malkū/ (→ *mlk*)

exile *glw* /galū/ (→ *glī* II)

exit (v.) *npq*

exit *mpq* /mappaq/ (→ *npq*)

explain (v.) *prš*

external *bry* /barrāy/ (→ *br* /barr/)

extremity *sypyn* /sayāpīn/ (→ *sūp*)

eye *ʿyn* /ʿayn/ (> /ʿēn/)

eyelid *škn* /šekn/ (→ *ʿyn*)

face *ʾnp* /ʾapp/ (dual), rarely *ṣlm* /ṣalm/

fall (v.) *npl*

fall *mplh* /mappalā/ (→ *npl*)

fall off (v.) *ntr*

fall to (v.) *npl*

fame *šm ṭb* (→ *šm*)

fate *ḥlq* /ḥelq/ (→ *ḥlq*)

father *ʾb* /ʾab/

favor (v.) *rḥm*

favor *ḥn* /ḥenn/ (→ *ḥnn*)

fear *dḥlh* /deḥlā/ (→ *dḥl*)

feast *mšth* /maštǣ/ (→ *štī*)

feed (v.) *zūn* (→ *ʾkl*)

fellow *ʿlym* /ʿolaym/

fetter *ʾswr* /ʾasūr/ (→ *ʾsr*)

fidelity *hymnw* /haymānū/ (> /hēmānū/; → *ʾmn*)

field (open) *br* /barr/

fight (v.) *ʿbd* qrb (→ *qrb*)

figure *ṣwrh* /ṣūrā/ (→ *ṣlm*)

fill (v.) *mlī* (also *aph*)

find (v.) *škḥ* (*aph*)

finger *ʾṣbʿ* /ʾeṣbaʿ/ (→ *yd*)

fire *ʾš* /ʾæššā/, *yqdh* /yaqedā/ (→ *ʾš*), *nwr* /nūr/

first *qdmy* /qadmāy/ (→ *qdm*)

flame *šbyb* /šabīb/ (→ *ʾš*)

flee (v.) *ndd*, *ʿrq* (→ *ndd*)

flesh *bśr* /baśar/

flood *thwm* /tehōm/ (→ *ym*)

flute *mšrwqy* /mašrōqī/ (→ *zmr*)

foliage *ʿpy* /ʿopī/ (→ *ʾyln*)

follow (v.) *ḥlp*

food *lḥm* /laḥm/, *mzwn* /mazōn/ (→ *ʾkl*); → barley → wheat → oil → wine

fool *skl* /sakal/ (→ *ḥkm*; *śkl*)

foot *rgl* /regl/ (of a mountain: *špwlyn* /šepōlīn/, → *rgl*)

force (v.) *ʾns*

ford *mʿbr* /maʿbar/ (→ *ʿbr*)

forgive (v.) *šbq*, *šrī*

former, formerly *qdmh* /qadmā/ (→ *qdm*)

fortification *byrh* /bīrā/

foundation *ʾšyn* /ʾoššīn/

four *ʾrbʿ* /ʾarbaʿ/ (→ Numbers)

free (v.) *šrī*

friend *rḥm* /rāḥem/ (→ *rḥm*)

frighten (v.) *bhl* (*pa*), *twh*

frightful *dḥyl* /daḥīl/ (→ *dḥl*)

fruits *ʾb* /ʾebb/ (→ *ʾyln*)

full *mlh* /malǣ/ (→ *mlī*)

gate *trʿ* /tarʿ/, *bb* /bāb/ (→ *trʿ*)

gatekeeper *trʿ* /tarrāʿ/ (→ *trʿ*)

gate area *ʾsp* /asopp/ (→ *trʿ*)

gather (v.) *knš*

generation *dr* /dār/ (→ *dūr*)

giant *gbr* /gabbār/ (→ *gbr*), (mythological) *npyl* /napīl/ (→ *npl*)

gift *mntn*(*h*) /mattan(ā)/, *nbzbh* /nabizbā/ (→ *ntn*)

gifted *ḥkym* /ḥakkīm/ (→ *ḥkm*)

give (v.) *yhb*, *ndb* (*itpa*), *ntn*

give a nickname (v.) *knī* (*pa*; → *šm*)

give back (v.) *tūb* (*aph*)

give to drink (v.) *šqī* (*aph*; → *štī*)

go (v) *ʾzl*/*hūk* (→ *hlk*)

go ahead (v.) *qdm* (*pa*)

go away (v.) *ʿdī*

go well (v.) *ṭʾb* (→ *ṭīb*/*yṭb*), *šlm* /šalām/ (as a predicate in a nominal clause; → *šlm*)

goat *ʿz* /ʿezz/; male *ṣpyr* /ṣapīr/ (→ *ʿz*)

god *ʾlh* /ʾelāh/, rarely *šmyʾ* (→ *šmyn*)

gold *dhb* /dahab/

good *ṭb* /ṭāb/ (→ *ṭīb*/*yṭb*)

good deed *ṭbw* /ṭābū/ (→ *ṭīb*/*yṭb*)

governor *pḥh* /pāḥā/, *šlṭn* /šolṭān/ (→ *šlṭ*)

grace → favor

grain *ʿbwr* /ʿabūr/ (→ *ʿbr*); → barley → wheat

grape *ʿnb* /ʿenab/ (→ *ḥmr*)

grapevine *gpn* /gapn/ (→ *ḥmr*)

grass *dtʾ* /datǣ/ (→ *ʿśb*)

grave marker *npš* /napš/ (→ *nšm*)

greatness *rbw* /rabū/ (→ *rb*)

greet (v.) *šʾl šlm* (→ *šʾl*)

greetings! *šlm* /šalām/ (→ *šlm*)

ground *ʾrʿ* /ʾarʿ/

grounds for an accusation *ʿlh* /ʿellā/

grow (v.) *rbī*

grow up (v.) *rb* /rabb/

guarantee (v.) *mḥī yd*

guard (v.) *ʿīr* (→ *ndd*, *ʿyr*)

guard *mnṭrh* /maṭṭarā/ (→ *nṭr*)

guardian (angel) *ʿyr* /ʿīr/

guilt *ḥwb*(*h*) /ḥōb(ā)/ (→ *ḥṭī*), *ḥyb* /ḥayyāb/ (→ *ḥṭī*)

hair *śʿr* /śaʿr/

half *plg* /palg/ (→ *plg*)

hand *yd* /yad/

hand (back of the) *ps* /pass/ (→ *yd*)

hand over (v.) *šlm* (*aph*)

harbor *mḥwz* /maḥōz/ (→ *ḥzī*)

harp *psntryn* /psantērīn/ (→ *zmr*)

haste *bhylw* /bahīlū/ (→ *bhl*)

hate (v.) *śnī*

hatred *śnʾh* /śenʾā/ (→ *śnī*)

have mercy (v) *ḥnn*, *rḥm* (*pa*)

have/exercise power (v.) *šlṭ*

head *rʾš* /rēš/

healthy *bšlm* (→ *šlm*)

hear (v.) rarely *ʿnī* I, *šmʿ*

heart *lbb* /lebab/, *lb* /lebb/

heaven *šmyn* /šamayn/ (> /šamēn/)

heavenly bodies *mʾny* šmyʾ (→ *mʾn*)

height *rmh* /rāmā/ (→ *rīm*), *rwm* /rūm/ (→ *rīm*)

help (v.) *sʿd* (also *pa*)

help *sʿd* /saʿd/ (→ *sʿd*), *ʿdr* /ʿedr/ (→ *sʿd*)

herald *krwz* /krōz/ (→ Iranian Official Titles)

herbage *ʿśb* /ʿeśb/

hero *gbr* /gabbār/ (→ *gbr*)

high *rm* /rām/ (→ *rīm*)

hip → joint

hit (v.) *mḥī*

hole *gb* /gobb/

holiday *ywm ṭb* /yawm ṭāb/ (→ *ywm*)

holiness *qdš* /qodš/ (→ *qdš*)

holy *qdy*š /qaddīš/ (→ *qdš*)

honor *yqr* /yaqār/

horn *qrn* /qarn/

horse *prš* /paraš/ (→ *prš*)

host *ḥyl* /ḥayl/

hour *šʿh* /šāʿā/

house *byt* /bayt/ (> /bēt/)

humiliate (v.) *špl* (*aph*; → *špl*)

humiliation *šplw* /šapelū/ (→ *špl*)

hundred *mʾh* /meʾā/ (→ Numbers)

hurry (v.) *bhl* (*itp*)

husband *bʿl* /baʿl/

immediately *bh šʿtʾ*; *br šʿt-* (→ *šʿh*)

immigrant *twtb* /tawtab/ (> /tōtab/; → *ytb*)

impertinence *šlh* /šillā/ (→ *šlī*)

in the control of *byd* (→ *yd*)

in the judgment of *bʿyny* (→ *ʿyn*)

in the name of *bšm* (→ *šm*)

incantation *ḥbr* /ḥabr/ (→ *ḥbr*)

incantation priest *ʾšp* /ʾāšep/

incense *lbwnh* /lebōnā/ (→ *mnḥh*)

inner *gw* /gaww/; *gwy* /gawwāy/ (→ *gw*)

innocence *zkw* /zakū/

innocent *zky* /zakkāy/ (→ *zkw*), rarely *nqh* /naqǣ/ (→ *nqh*)

insight *ʿrymw* /ʿarīmū/ (→ *ḥkm*), *śkltnw* /śokltānū/ (→ *śkl*)

install (v.) *bṭl* (*pa*; → *sūp*), *śīm*, *tqn* (*aph*)

interchange (v.) *ḥlp* (*aph*), *yhb*/*ntn b-*

interpret (v.) *prš*

interpretation *pšr* /pešr/ (→ *pšr*); less often *prš* /parāš/ (→ *prš*)

investigate (v.) *bqr* (*pa*)

invite (v.) *qrī*

iron *przl* /parzel/ (→ *dhb*)

joint (anatomically) *qṭr* /qeṭr/ (→ *qṭr*)

joy *ḥdwh* /ḥedwā/

Judea *yhwd* /yahūd/

Judean, Jew *yhwdy* /yahūdāy/ (→ *yhwd*)

remember (v.) *dkr*

remnant *šʾr* /šoʾār/ (→ *šʾr*); *šʾry* /šērī/ (→ *šʾr*)

remove (v.) *rḥq* (*pa*)

repay (v.) *šlm* (*pa*)

replace (v.) *ḥlp*

replacement *ḥlp* /ḥalp/ (→ *ḥlp*)

reputation *šm*

request (v.) *bʿī*, *šʾl*

request *bʿw* /baʿū/ (→ *bʿī*)

resemble (v.) *dmī*

residence *mwtb* /mawtab/ (> /mōtab/; → *ytb*)

rest *šlw* /šalū/ (→ *šlī*), *šlyn* /šelyān/ (→ *šlī*)

resting place *mdr* /madār/ (→ *dūr*)

return (v.) *tūb*

reveal (v.) *glī* I

rib *ʿlʿ* /ʿelaʿ/

righteous *ṣdyq* /ṣaddīq/ (→ *ṣdq*)

righteousness *ṣdqh* /ṣadaqā/ (→ *ṣdq*)

rip out (eradicate) (v.) *ʿqr*

rise (to speak) (v.) *ʿnī* I

river *nhr* /nahar/

robe → clothing

rock *kp* /kēp/ (→ *ṭwr*)

rod *ḥṭr* /ḥoṭr/ (→ *šbṭ*)

roll (v.) *gll*

roof (v.) *ṭll* (*pa*; → *ṭll*)

roof *ṭlwl* /ṭalūl/, *mṭll* /maṭlal/ (→ *ṭll*)

root *šrš* /šorš/ (< /śorš/?)

rootstock *ʿqr* /ʿeqqār/ (→ *ʿqr*)

ruined *šḥyt* /šaḥīt/ (→ *bʾš*; *šḥt*)

rule (v.) *mlk* (→ *mlk*)

sabbath *šbh* /šabbā/ (→ *ywm*; *šnh*)

sacrifice (v.) *dbḥ*

sacrifice *dbḥ* /debḥ/ (→ *dbḥ*), *mnḥh* /manaḥā/ (grain offering), *nḥwḥ* /nīḥōḥ/ (incense offering), *nsk* /nesk/ (libation), *ʿlh* /ʿalā/ (burnt offering, → *mnḥh*)

sacrificial priest *dbḥ* /dābōḥ/ (→ *dbḥ*)

saddened *ʿṣyb* /ʿaṣīb/ (→ *ʿṣb*)

salt (v.) *mlḥ* (→ *mlḥ*)

salt *mlḥ* /melḥ/

sambuke *śbk* /śabbok/ (→ *zmr*)

sanctify (v.) *qdš* (*pa*)

sanctuary *mqdš* /maqdaš/ (→ *qdš*)

say (v.) *ʾmr* (→ *mll*)

scale *mwzn* /mawzen/ (> /mōzen/; → *tql*)

scatter (v.) *bdr* (*pa*)

scepter *ḥṭr* /ḥoṭr/ (→ *šbṭ*)

scholar *spr* /sāper/ (→ *spr*)

scribe *ktwb* /kātōb/ (→ *ktb*), *spr* /sāper/ (→ *spr*)

scroll *mglh* /magallā/ (→ *gll*)

sea *ym* /yamm/

seal (v.) *ḥtm*

seal *ḥtm* /ḥātam/ (→ *ḥtm*)

secret *rz* /rāz/

secretary *spr* /sāper/ (→ *spr*)

see (v.) *ḥzī* (W. Aramaic *ḥmī*)

see again (v.) *ḥzī ʾnpy*

seed *zrʿ* /zarʿ/ (→ *zrʿ*)

seek (v.) *bʿī*

seer *ḥzh* /ḥāzǣ/ (→ *ḥzī*)

self *npš* /napš/ (→ *nšm*)

sell (v.) *zbn* (*pa*)

send (v.) *šdr* (*pa*; → *šlḥ*), *šlḥ* (also *pa*), Imperial Aramaic of reports and *yšr* (v.) of goods (*aph*; → *šlḥ*)

senior *qšyš* /qaššīš/ (→ *ʿtyq*)

servant *ʿbd* /ʿabd/ (→ *ʿbd*), *ʾmh* /ʾamā/ (→ *ʿbd*)

serve (v.) *plḥ*, *šmš* (*pa*)

service *ʿbydh* /ʿabīdā/ (→ *ʿbd*)

set out, move on (v.) *ngd*, *npq*

settle (v.) *škn* (*pa*)

settle down (v.) *šrī*

seven *šbʿ* /šabʿ/ (→ Numbers)

shade (v.) *ṭll* (*aph*; → *ṭll*)

shadow *ṭll* /ṭelāl/, *ṭl* /ṭell/ (E. Aramaic /ṭoll/)

shatter (v.) *tbr*

sheep *nqh* /neqǣ/

shekel *tql* /teql/ (→ *tql*)

shine (v.) *nhr* (*aph*), *nūr* (*aph*; → *nwr*)

shoot → sprout

show (v.) *ḥwī* (*pa*, *aph*), rarely *ḥzī* (*pa*), *ydʿ* (*aph*)

sight *ḥzw* /ḥazū/ (→ *ḥzī*)

sign (v.) *ktb*

sign (wonder) *ʾt* /ʾāt/

sign → marking

signet ring *ʿzqh* /ʿezqā/

silver *ksp* /kasp/ (→ *dhb*)

similarity *dmw* /damū/ (→ *dmī*)

sin (v.) *ḥṭī*

sin *ḥṭʾ* /ḥeṭē/, *ḥṭy* /ḥaṭāy/, *ʿwyh* /ʿawāyā/ (→ *ḥṭī*)

sing (v.) *zmr*

sister *ʾḥh* /ʾaḥā/ (→ *ʾḥ*)

sit, settle (v.) *ytb*

six *št* /šett/ (→ Numbers)

slave *ʿbd* /ʿabd/ (→ *ʿbd*)

sleep (v.) *škb*

small *zʿyr* /zoʿayr/ (> /zoʿēr/; → *śgī*)

smash (v.) *ḥšl*

smell (v.) *rīḥ* (→ *ryḥ*)

smite (v.) *mḥī*

snatch away (v.) *nṣl* (*aph*), *ntr* (*aph*)

snow *tlg* /talg/ (→ *ʿnn*)

sojourner *twtb* /tawtab/ (> /tōtab/; → *ytb*)

sole of the foot *kp* /kapp/ (→ *yd*)

son *br* /bar/

soothsayer *ḥrṭm* /ḥarṭom/ (→ *ʾšp*); *gzr* /gāzer/ (→ *gzr*)

soothsaying *nḥš* /naḥš/ (→ *šmyn*)

soul (life force) *npš* /napš/ (→ *nšm*)

sound *ql* /qāl/; *šryr* /šarīr/ (→ *šlm*)

south *tḥty* /taḥtāy/ (→ *ʿly*)

sow (v.) *zrʿ*

speak (v.) *mll*

speech *mlyn* (plural), *mmll* /mamlal/ (→ *mll*)

spending *npqh* /napaqā/ (→ *npq*)

spice, aromatic oil *mšḥ bśm* (→ *mšḥ*)

spirit *bl* /bāl/ (of humans), *rwḥ* /rūḥ/

spring *mʿyn* /maʿyān/, rarely *ʿyn* /ʿayn/ (> /ʿēn/; → *ʿyn*)

sprout (v.) *ṣmḥ* (→ *rb*)

sprout *ḥlph* /ḥelpā/ (→ *ḥlp*)

staff *šbṭ* /šabṭ/, in the Jewish realm also “tribe of Israel”

stair *drg* /darg/ (→ *nḥt*)

stall *dyr* /dayr/ (> /dēr/; → *dūr*)

stand up (v.) *qūm*

star *kwkab* /kawkab/ (> /kōkab/; → *šmyn*)

statue *ṣlm* /ṣalm/

stature, growth *qwmh* /qawmā/ (> /qōmā/; → *qūm*)

status, position *mqm* /maqām/ (→ *qūm*)

steer *twr* /tawr/ (> /tōr/)

stele *nṣb* /naṣīb/ (→ *ṣlm*)

stem → rootstock

stir up (v.) *gūḥ* (*aph*; → *šmyn*)

stone *ʾbn* /ʾabn/, rarely *gll* /galāl/ (→ *gll*)

stop (v.) *sūp*, *bṭl* (→ *sūp*)

store(house) *ʾwṣr* /ʾōṣar/ (→ *mlk*)

street *ʾrḥ* /ʾorḥ/

strength *gbwrh* /gabūrā/, *gbrw* /gabbārū/ (→ *gbr*), *ḥsn* /ḥosn/ (→ *ḥsn*), *tqp* /toqp/ (→ *tqp*); → power

strengthen (v.) *ḥyl* (*pa*; → *ḥyl*)

strong *ḥsyn* /ḥassīn/ (→ *ḥsn*), *tqyp* /taqqīp/ (→ *tqp*)

succeed (v.) *ṣlḥ* (*aph*)

suddenly *bh šʿtʾ*; *br šʿt-* (→ *šʿh*)

sue (v.) *špṭ* (→ *dīn*)

suffer damage (v.) *nzq*

suitable *šwh* /šawā̄/ (→ *šwī*)

sun *šmš* /šamš/ (< /śamš/)

support (v.) *sbl* (*pa*), *smk* (→ *sbl*)

support *sbwl* /sabūl/ (→ *sbl*)

surface *ʾnp* /ʾapp/

survey, scout (v.) *rgš* (*pa*)

survive (v.) *šʾr*

swear (v.) *ymī*

Syria *ʾrm* /ʾaram/ (→ *ʿm*)

Syria-Palestine *ʿbr nhrʾ* (→ *ʿbr*)

take (v.) *lqḥ*, *nśī* (Old and Imperial Aramaic), *nsb* (→ *nśī*, later)

take away (v.) *ʿdī* (*aph*)

take possession of (v.) *ḥsn* (*aph*)

take prisoner (v.) *ʾsr*

taste (v.) *ṭʿm*

tax *hlk* /helk/ (→ *hlk*)

teach (v.) *ʾlp* (*pa*), rarely *ḥkm* (*pa*)

tell a lie (v.) *kdb*

temple *hykl* /hēkal/, *byt* /bayt/ (> /bēt/)

temple employee *lḥn* /laḥen/

temple slave *ntyn* /natīn/ (→ *ntn*)

ten *ʿśr* /ʿaśr/ (→ Numbers)

ten thousand *rbw* /rebbō/ (→ *rb*)

tent *mškn* /maškan/ (→ *škn*)

term (as period of time) *ʿdn* /ʿeddān/, *zmn* /zemān/; (as designation) *šm* /šem/

terror *ʾymh* /ʾaymā/ (> /ʾēmā/)

testify about, attest (v.) *śhd* (*pa*)

testimony *śhdw* /śāhedū/ (→ *śhd*)

then *ʾḥr* /ʾaḥar/ (→ *ʾḥry*)

thigh *yrk* /yarek/ (→ *rgl*)

think (v.) *ḥšb*

thought *rʿyn* /reʿyān/ (→ *rʿī*)

thousand *ʾlp* /ʾalp/ (→ Numbers)

three *tlt* /talāt/ (→ Numbers)

threshing floor *ʾdr* /ʾedder/ (→ *ʿwr*)

threshold (ʾ)*skph* /(ʾa)skoppā/ (→ *trʿ*)

throne *krsʾ* /korseʾ/ (> /korsǣ/)

throw (v.) *rmī*

time *zmn* /zemān/; *ḥd* /ḥad/ (→ Numbers, 1), *rgl* /regl/

today *ywmʾ znh* (→ *ywm*)

toe *ʾṣbʿ* /ʾeṣbaʿ/ (→ *yd*)

tone *ql* /qāl/

tongue *lšn* /leššān/

tooth *šn* /šenn/ (→ *pm*)

top *rʾš* /rēš/

topple (v.) *mgr*

transgress (v.) *šnī* (*pa* and *aph*)

treasure *gnz* /ganza/, *śymh* /śīmā/ (→ *śīm*)

treasurer *gnzbr* /ganzabār/ (→ *gnz*); *srk* /sārak/

treasury *byt gnzyʾ* (→ *gnz*), *śymh* /śīmā/ (→ *śīm*)

tree *ʾyln* /ʾīlān/

tremble, be afraid (v.) *zūʿ* (→ *dḥl*)

tribute *blw* /belō/ (→ *hlk*), *mndh* /maddā/ (→ tax)

trust (v.) *ʾmn* (*aph*), *rḥṣ* (*itp*)

truth *qšṭ* /qošṭ/

two *tryn* /terayn/ (> /terēn/; → Numbers)

ugly *bʾyš* /baʾīš/ (→ *bʾš*)

uncover (v.) *glī* I, *ʿrr* (→ *ʿrr*)

undamaged *šlm* /šalem/ (→ *šlm*)

under *tḥty* /taḥtāy/ (→ *ʿly*)

upper chamber *ʿlyh* /ʿelliyā/ (→ *ʿly*)

uprightness *qšṭ* /qošṭ/

use (v.) *ḥšḥ*

usual *ḥzh* /ḥazæ/ (→ *ḥzī*)

venerate (v.) *plḥ*

veneration *sgdh* /segdā/ (→ *sgd*)

verbatim *mprš* (→ *prš*)

very *śgyʾ* /śaggī/ (→ *śgī*)

vessel *mʾn* /maʾān/

vineyard *krm* /karm/ (→ *ḥmr*)

vision *ḥzw* /ḥezū/, less often *ḥzywn* /ḥezyōn/ (→ *ḥzī*)

voice *ql* /qāl/

voluntarily *brḥmn* (→ *rḥm*)

vulture *nšr* /nešr/

walk (v.) *hlk* (*pa*)

wall *ktl* /kotl/, *ʾgr* /ʾeggār/ (→ *ktl*), *šwr* /šūr/ (city or external walls)

want (v.) *bʿī*, *ṣbī*; in legal diction also *rḥm*

war *qrb* /qarāb/ (→ *qrb*)

warn (v.) *zhr* (*aph*)

water *myn* /mayn/ (> /mēn/; → *štī*)

wealth *ʿtr* /ʿotr/ (→ *ʿnī* II)

week *šbh* /šabbā/ (→ *ywm*; *šnh*)

weigh (v.) *tql*

weight *mtql* /matqāl/ (→ *tql*)

well *bʾr* /beʾr/ (> /bēr/; → *štī*)

well-being *šlm* /šalām/ (→ *šlm*)

west *mʿrb* /maʿrab/ (→ Numbers, 4)

wheat *ḥnṭh* /ḥeṭṭā/

white *ḥwry* /ḥewwārāy/ (→ *ḥwr*)

white object *ḥwr* /ḥewwār/

whiten (v.) *ḥwr* (*pa*; → *ḥwr*)

wife *ʾnth* /ʾettā/

will *rʿw* /raʿū/ (→ *rʿī*)

win (v.) *nṣḥ*

wind *rwḥ* /rūḥ/

wine *ḥmr* /ḥamr/

wing *gp* /gapp/

wing (of a door) *dš* /dašš/ (→ *trʿ*)

wisdom *ḥkmh* /ḥokmā/ (→ *ḥkm*)

wise *ḥkym* /ḥakkīm/ (→ *ḥkm*)

wish (v.) → want

wish *rʿyn* /reʿyān/ (→ *rʿī*)

with one another *ḥd mn ḥd* /ḥad men ḥad/ (→ Numbers)

witness *śhd* /śāhed/ (→ *śhd*)

wolf *dʾb* /deʾb/ (→ *db*)

woman *ʾnth* /ʾettā/

womb *bṭn* /baṭn/ (→ *rḥm*), *rḥm* /raḥm/ (→ *rḥm*)

wonder *ʾt* /ʾāt/, *tmh* /temh/ (→ *tmh*)

wood *ʾʿ* /ʾaʿ/

woodwork *ʾšrn* /ʾāšarn/

word *mlh* /mellā/ (→ *mll*)

work (v.) *plḥ*

work *ʿbydh* /ʿabīdā/ (→ *ʿbd*)

world (cosmos) *šmyn wʾrʿ* (→ *šmyn*)

world (era) *ʿlm* /ʿālam/

worship *plḥn* /polḥān/ (→ *plḥ*)

write (v.) *ktb*, rarely *ršm*

writing, document *ktb* /ketāb/ (→ *ktb*)

wrong *ʿwl* /ʿōl/ (→ *ḥṭī*)

year *šnh* /šanā/, rarely *ʿdn* /ʿeddān/

yield *ʿllh* /ʿalalā/ (→ *ʿll*)

youth *ʿlym* /ʿolaym/

zither *qytrs* /qītāris/ (→ *zmr*)

zodiac sign *mzl* /mazzal/ (→ *šmyn*)

PUBLISHER'S NOTE

Preparing an index volume for a dictionary project such as this—almost four thousand pages in sixteen volumes that appeared over a forty-five-year span—is no small task. The *Theological Dictionary of the Old Testament* has entries on well over a thousand words, with references to many thousands of both Scriptural passages throughout the Old and New Testaments and extrabiblical sources ranging from Egyptian and Sumerian literature of the third millennium B.C.E. to Christian and Jewish writings of the early medieval period. Our purpose with this volume is to be as comprehensive as possible, indexing as much material as possible, from multiple angles.

How to Use the Index Volume

The Index Volume opens with an index of English words. In compiling this, we took the English words most associated with the Hebrew and Aramaic key word entries, as derived from *TDOT* itself. Next come the Hebrew and Aramaic word indexes. Here one can look up a Hebrew or Aramaic word and find every instance where it appears in the *Dictionary*. Underlined page ranges direct the reader to the primary entry for the word in question, but the other citations lead to passages where the word appears in the entries for other terms. The biblical indexes—Old Testament, Apocrypha, and New Testament—then enable the reader to look up any verse in Scripture and see where it is cited in the *Dictionary*. Between the English index, the Hebrew and Aramaic indexes, and the biblical indexes, the reader can use *TDOT* in several ways, beginning from a translated word, the original-language word, or a biblical verse, and find everything there is to find among the sixteen volumes.

After these indexes one will find a number of smaller indexes covering extrabiblical sources. These indexes include countless primary sources from

the world of the Bible. One can look up a line from the Gilgamesh Epic, or a Dead Sea Scroll, or a work of Josephus, or any number of other ancient works to see whether they are cited in the *Dictionary*. Beyond this, the index covers a host of reference material, including anthologies of ancient sources and dictionaries of cognate languages. Thus, for example, one can take a passage from *Ancient Near Eastern Texts Relating to the Old Testament* or an Akkadian word from the *Chicago Assyrian Dictionary* and look it up in *TDOT*. These are grouped primarily according to language and era (see the final paragraph of the Publisher's Note for more specifics) and they cover a vast amount of material.

Some Remarks on the Compilation of the Index Volume

The *Theological Dictionary of the Old Testament* maintains a common style throughout the sixteen volumes, but certain changes inevitably crept in as new conventions of style and formatting came to prevail in biblical studies. European-style commas separating section and line numbers mutate into periods that occasionally pop up as colons, Arabic numerals transmogrify into uppercase Roman numerals that eventually shrink into lowercase, and so forth. So, for example, a citation of the same passage of a scroll from Qumran with fragment, column, and line numbers might appear in early volumes as "IV, 3, 12-14," then later as "4 III:12-14," then still later as "4 iii 12-14." For the sake of the reader thumbing through this index for a particular passage, we have made all such citations consistent with recent *TDOT* style so long as it is clear that the passages are identical. In the Qumran section, for example, we tried to consistently represent fragments, columns, and lines with Arabic numerals, lowercase Roman numerals, and Arabic numerals, respectively (all separated by spaces). So "4 iii 12-14" in the index may show up at the location in the *Dictionary* as "IV, 3, 12-14." In situations where naming conventions have changed over the life of TDOT and the most recent conventions do not obviously cohere with the citation system in early volumes, we represented the original faithfully to ensure that the reader can find what they are looking

for when moving from the Index Volume to the main *Dictionary*.

Grouping the extrabiblical sources in the final section of this volume required several judgment calls as well. Because of the variety of sources indexed—anonymous primary sources, authored ancient works, dictionaries, anthologies, etc.—no single scheme can cover everything without some degree of redundancy and confusion. We elected to follow the scheme and order recommended by *The SBL Handbook of Style*, 2nd edition, §7.1.2.2, with slight modification. We follow the Old Testament indexes immediately with the Apocrypha and New Testament, then turn to extrabiblical sources. There are still places where perfect categorization is impossible, particularly where we index anthology sources that include texts from several categories. Thus we include a separate section for general ancient Near Eastern sources, such as Pritchard's *Ancient Near Eastern Texts Relating to the Old Testament* (*ANET*) and similar volumes, and we include a category of general West Semitic inscriptions that houses editions covering several languages, such as Donner's standard *Kanaanäische und aramäische Inschriften* (*KAI*). Text editions and other resources that include both Akkadian and Sumerian are indexed with the Akkadian.
